

Wizard 247

Chapter 247: Blood Beast Limit Breaker, Deep Sea Level 2!

(5)

Then, his spell power reached 17 points.

Low-grade Green Elf's Tears were only suitable for apprentice wizards. At the middle-grade apprentice wizard level, they would need the advanced version of the potion [Green Fairy Pearl], which was expensive, costing 5 points per bottle.

Therefore, Levi had to increase the upper limit of his spell power before his spiritual force advanced to the middle-grade apprentice level.

Year 1017 of the Holy Brilliance Calendar, the Month of Flowers.

On the sea, the vigorous search for the treasure of Golden Knight Gregor had ended.

When someone finally found the island where Golden Knight Gregor had buried his treasure, they realized that the island had already been occupied by someone else. The treasure of Golden Knight Gregor was already gone...

Everyone was guessing who had obtained the treasure.

Many people felt that the Fist of the Empire had succeeded.

After all, the Fist of the Empire was the most powerful, so it was most likely to obtain the treasure.

However, the Fist of the Empire had disappeared again. No matter how hard the people of the Church of Storms searched, they could not find it.

Therefore, this matter was left unsettled.

Meanwhile, in Flower City of the Emerald Kingdom.

Inside Black Snake Castle, Andrew, who looked like Levi, was playing chess with Anderson.

"Speaking of which, your master has been in the wizard world for half a year. I wonder how he is doing there? Has he become a legendary knight? I have high hopes for this kid." Anderson smiled bitterly.

"Elder, there's no need to worry. With my master's standards, he will definitely be able to survive in the wizard world. My master is not an ordinary person. I

Can feel a terrifying aura from him," Andrew said.

During this period of time, with Andrew in charge, Levi's territory was very peaceful and nothing happened.

The Emerald Kingdom had just ended the war and had begun to recuperate.

With the efforts of the Church and the various worlds, the Snow Demon calamity in the north had barely stopped the momentum of the south. For a long time, the South should be able to sit back and relax.

Andrew had also collected some ambergris and breathing techniques for Levi. He was waiting for Levi to come home when he had time.

In the Realm of Azure Cloud, Levi also spent half a year in the Gray Tower.

In this half a year, Levi had trained the Blood Beast Breathing Technique to the limit of the ninth level.

Levi—

Blood Beast Breathing Technique: Level 9 (Maximum, breakthrough available, current progress 0/7).
Special Effect: Blood Wings (Gas), Blood Contract.

After reaching the limit of the ninth level of the Blood Beast Breathing Technique, the Transcendent Speed special effect from before had been upgraded to a new effect: Blood Wings.

"Blood Wings: Black gas gathers on your back and transforms into gaseous blood wings. Through the high -speed oscillation of the blood wings, your explosive speed, jumping ability, reaction speed, and so on will be greatly increased..."

The special effect of the Blood Wings was like an upgrade to Transcendent Speed.

"The Blood Beast Breathing Technique has reached the limit of the ninth level. Next, I can break through the limit. My current extreme speed-type breathing techniques include the Siren Breathing Technique, the Thunder Wolf Breathing Technique, the Thunder Bird Breathing Technique, and the Swift Dog

Breathing Technique."

"The Thunder Wolf Breathing Technique at the limit of the seventh level provides 4 points to break through the limit, the Lightning Bird at the limit of the fifth level provides 2 points to break through the limit, and the Swift Dog at the fourth level provides 1 point. As for the Siren Breathing Technique, I'll just keep it for now."

The Siren Breathing Technique had been with Levi for so long that it could be considered a veteran breathing technique. Furthermore, the Siren Breathing Technique was a rare initial breathing technique with two special effects. Levi felt that there was no need to fuse with the Siren for the time being. Soon, the Blood Beast Breathing Technique had broken through its limit.

After resting for a while, Levi opened his proficiency panel.

Levi—

Blood Beast Breathing Technique: Level 9 (1/150000). Special Effect: Blood

Wings (Gas), Blood Contract

"Now, let's test the effect of the Blood Wings."

Levi went down to the ninth floor of the Gray Tower and left his residence. He came to a dense forest. Seeing that there was no one around, he ran in the direction of the small garden on the island.

The Blood Beast Seed in his body began to erupt, and a blood-red aura circulated through Levi's limbs and bones, causing his speed to increase by a level. In addition, the excess blood aura also vaguely transformed into illusory bat wings on Levi's back.

These bat wings looked very small and thin. If one did not look carefully, one would not be able to see them clearly. They were very illusory. However, as the bat's wings flapped rapidly, it suddenly accelerated.

With a bang, Levi was like a loaded bullet.

He shot out, and the fallen leaves in front of him were sent flying.

Smoke and dust filled the path.

In less than ten breaths, Levi had already run two miles away.

"In other words, my current explosive running speed has completely stabilized at 100 meters per second. If I explode my seed, I might be able to go a little faster."

Not long after, Levi arrived at the small garden in the depths of the island.

The reason why he came here was to complete the mission.

In the past six months, he had also accepted another mission from Ms. Marlene.

That was the task of looking after the small garden.

The small garden was located in the depths of the island. The elemental power was the densest there, and it was suitable for the growth of herbs.

This was the exclusive herb garden of the Gray Tower, and the director was Witch Marlene. Because she was the only one who knew the most about herbs, considering that herbs and medicine were complementary, Levi accepted this mission.

This mission could also earn 30 points a year. Although it was not as good as going to the Blacksail Market to enforce the law, it was safer.

Levi cultivated every day, and apart from practicing pharmacy, he only needed to set aside some time in the morning and evening to go to the small garden to look at the herbs planted. Watering the herbs would be enough..
