

Wizard 2471

Chapter 2471: Starlight Shines on Dawn, the Serpent Vulture Knight in This Life

Even an ordinary knight, when equipped with the Ten Generation Machine.

Can instantaneously become an unmatched presence within the same realm.

Of course, the cost of a high-configured Ten Generation Machine is extremely expensive.

Currently, it can only meet the needs of the Apostle Group.

Ordinary Holy Temple Knights cannot popularize it yet.

Fire Dragon Apostle Group, and Ashen Apostle Group.

One remains invincible in the Eastern Sea, while the other thrives on the Nora Continent.

These hundreds of people are carefully selected, the elite among elites.

The victories they've won are countless.

Their battle power cannot be measured by common sense.
Thus bringing immense shock to the teachers and students.

The Fire Dragon Knight wears a Dragon Head Helmet, clad in Level 7 [Chasing Sun Battle Armor].

Chasing Sun exudes a savage aura, like a demon god.

Its chest bears the emblem "Giant Chasing the Sun".

The Magic Power Axe behind can easily tear the defenses of Level 7 Demons.

This is a tailored special armor, costing over 1 billion Aether Stones.

Given the Fire Dragon Knight's cultivation nearing Level 7 Middle Stage.

Pairing with the Chasing Sun Battle Armor, hunting Level 7 Early Stage Demons is as easy as reaching into one's pocket.

He stood like a mountain, gazed downward, and softly said:

"Principal Garcia, are you all ready over there?"

Garcia replied, "We're ready."

The Fire Dragon Knight recited an incantation.

The Twilight Round Table's phantom descended.

Levi sat in a high-backed chair, and a blue greatsword phantom appeared behind him.

Each major organization has its own means of constraint.

But it surely pales in comparison to one's own Excalibur.

The necessary steps must not be omitted.

Indeed, during the process, there was a Fifth-Circle Wizard who was a Mind Flayer.

Eliminated by the Fire Dragon Knight with a flick.

These things truly seep into every corner.

Once ensuring no issues.

Star Castle emitted a glow, absorbing teachers and students into it.

Subsequently, Star Castle also went to the mortal gathering places under the academy's shelter.

Packed up those mortals as well, setting sail toward the Ancient Dragon Continent.

Star Castle's invisibility is superb, coated with advanced Nightmare Creature paint.

While sailing, it can create illusions that confuse perception, disguising within the heavens and earth.

Ordinary Level 7 Demons cannot detect it.

The journey was very smooth.

The teachers and students of Starfire Wizard Academy, arrived at the new worlds of the Eastern Sea.

Ancient Dragon Continent!

Nora's rising new star!

The academy was placed near the Tower of Dawn.

Convenient for connecting and communicating with wizards from the Ancient Dragon Continent.

Next, former organizational ideas need to be broken and fused.

Here, regardless of prior affiliations, everyone belongs to the Ancient Dragon Continent.

Here, you can pursue any transcendent paths you desire.

By undertaking various organizational tasks to earn Ancient Dragon Points.

Learn spells in a unified database, and exchange them in the treasury.

You can also minor in the Divine Talisman Path as your second career.

As a result, Ancient Dragon Continent added 5 Sixth-Circle Wizards and 1 Seventh-Circle Wizard.

Garcia gained new partners for mutual support.

He continued the legendary life of the Black Pearl Boy, carrying his old friend Jacob's legacy.

The faculty strength of Ancient Dragon Continent underwent metamorphosis.

The development of the Tower of Dawn entered a new stage once again.

Time passed.

As the news spread about Starfire Wizard Academy's integration into the Ancient Dragon Continent.

Wizard World began a small-scale debate again.

Some people used previous statements from the Golden Walker's interview as evidence.

They criticized that such rampant growth on the Ancient Dragon Continent would lead to large-scale monopolies.

Following that, the Golden Walker urgently issued a statement:

"My previous statements reflected an insufficient understanding of the current situation; now, it appears that the development of the Ancient Dragon Continent is beneficial to Wizard World in all aspects, so do not use my previous statements as evidence."

In the tide of the Blood Battle.

This matter quickly became submerged.

One certainty is.

The Witch's Family has been joining for hundreds of years, indeed, becoming more prosperous.

Looking at population ratio, the Ancient Dragon Continent has birthed the most supernovas and geniuses.

The mortal casualty rate on Ancient Dragon Continent is also the lowest.

...

Four years later.

Nora Calendar 916, Blood Battle 705.

In the North Sea, endless Sword Qi shredded the heart of a Level 8 Demon.

Levi tore its head off with his large hands, ending its life. .

"Leon is still sleeping."

Levi watched AShe busy alone on the battlefield, murmuring to himself.

His points have reached 5.7 billion, about to break into the top ten.

War Merit is 1.5 billion, only twenty billion more to exchange for [Ice Emperor's Throne].

This oddity is still available, not yet redeemed.

During his rest, Levi opened the Blood Battle Daily.

[Congratulations to Ice Sea Witch, Katarina, for advancing to Grand Wizard, titled "Ice Sea Walker". She will join the Blood Battle Command Center, becoming a pillar force to withstand demons!]

"Indeed, she previously advanced to Grand Wizard; now I'm stable."

During the Blood Battle, Levi saw many news about advancing to Grand Wizard.

There is envy, but more joy.

These demigod level forces are important pillars of civilization.

In this era, the speed at which wizard civilization births Grand Wizards far exceeds the last ten thousand years.

One reason is the surge in resources leading to an increase in the upper limit of Grand Wizard capacity.

Another is the concentrated reincarnation of legendary wizards.

Unknowingly, the Golden Era spoken by Lord Roger has already started.

Momentarily pausing his demon-hunting, Levi returned to the Ancient Dragon Continent.

Preparing for a descent into Hell.

This time marks a once-in-a-millennium grand Netherworld Market.

With expectations for life-extending items, he felt anticipation.

...

Just returning home, joyous news arrived.

Wendy gave birth to a daughter named Safa not long ago.

Chapter 2472: Starlight Shines on Dawn, Serpent Vulture Knight in This Life

This is a genius girl who inherited the excellent genes of her parents.

Possessing the Jade Qilin bloodline needs no further explanation.

She also has a talent for wind element affinity.

Levi was amazed, the Wind Witch is truly incredible.

She had two daughters, one a top water element genius, the other a Wind Element Child.

The man who married her must have been truly fortunate.

The Snow Lotus Witch, with a sister hundreds or a thousand years younger, was also very pleased.

The Blood Knight had a daughter in his old age, offering some solace amid his busy work.

When Levi came to visit their family,

this old man, who had accompanied him for over a thousand years, had slightly moist eyes.

It was the first time he had seen the Blood Knight so emotional.

"Congratulations, in the future spend more time at home with Wendy and your daughter."

Nowadays, the holy temple is full of talent, the Blood Knight can also semi-retire.

Levi wanted him to focus more on his own cultivation and family.

Other affairs can be handed over to successors.

The Blood Knight nodded, "I understand, commander."

Levi took out some medicine he personally refined with the Spring of Immortality.

"Give these to Wendy to replenish her health."

The Blood Knight thanked him profusely.

As he watched the commander's departing figure,

he found a new life goal.

To nurture Safa into a talented individual.

Preferably one who can shine brilliantly in both the path of the wizard and the knights.

The commander is Safa's role model.

Returning to the Emperor's Palace, Levi checked the birth data of the Ancient Dragon Continent.

After his visit, he was deep in thought.

Looking now, the union of high-realm knights and wizards,

seems to produce wizarding talent and even Children of the Elements at a higher success rate

than two primordial soul wizards.

However, the current sample data is small and should not be concluded rashly.

In any case, all the 18 Twilight Cavalry are gradually having their offspring.

Levi saw a bright future for the organization.

Furthermore, alien races like the Thunder Clan and Sea Clan are gradually integrating into the great family of Ancient Dragon.

The reproductive barrier between some of these alien races and humans isn't significant.

In the future, there might be a generation of hybrids born.

The talents of this new generation should not be lacking either.

The probability of producing wizard, body-refining wizard, and other professional talents is also higher.

Good things come in pairs.

Soon, at the Dawn Tower.

The child of the Golden Lion Knight, the Raid Wizard, broke through the six environments realm.

Unbeknownst to them, these youngsters are nearly five hundred years old.

Raid has a special talent from the Frost Blood Sect and double affinity, with considerable potential.

Before Raid, Emperor Mu's child, Eddy, also advanced to primordial soul level.

Eddy, as an Ice Element Son, cultivated very smoothly.

He also bears his mother's Aurora Bird bloodline, with talent surpassing his mother.

At a young age, he created the spear skill "Ice Soul Divine Spear," praised by Levi.

Truly, the student surpasses the master.

To fulfill his mother's regret,

he plans to complete the evolution of the Aurora Bird upon reaching level six.

Step into the Mythical level!

His knighthood level is currently at the middle stage of level 5, leaving plenty of time to prepare.

Regarding Eddy, Emperor Mu and his wife are not worried at all.

He is too sensible.

Levi sighed.

The descendants of the 18 Riders have already become the backbone of the Ancient Dragon Continent.

Time truly flies.

There have been so many changes within this century.

Some of the geniuses Levi once brought out of the ancient tower have also advanced to primordial soul.

Becoming key members of their respective sects.

After a thorough inventory, the Dawn Tower itself has produced seventeen primordial soul wizards.

More than the Witch's Family.

Including some foreign wizards who joined midway,

the total number of primordial souls has reached 32.

Adding together the three major systems of knights, Energy Sect, and wizards, along with organizations like the Dusk Holy Temple and the Ancient Dragon Empire, the number of level six experts has reached three figures.

This is quite a terrifying number.

Enough to put today's top wizard organizations to shame.

Relatively speaking, there is still a lack of level seven and level eight combat power.

Especially level eight; aside from Levi, they are all guardians he captured.

The Ancient Dragon Continent still needs to grow.

As the Star Castle project vigorously proceeds,

from now on, the focus of the Ancient Dragon Continent will no longer be limited to Nora alone.

A month later, Levi held a secret dialogue with military high officials.

With military support,

the new millennium's [Pan-Plane Salvation Plan] is about to commence.

At that time, the [Star Sea Battle Group] composed of both the official and the Ancient Dragon Continent,

will carry missions and tasks, sailing across Multidimensional Planes.

The resources gained will be split between the official and the Ancient Dragon Continent according to agreements.

Their shared goal, however, is to save those civilizations invaded by the Abyss.

Preserve the seeds and remaining forces of alien races, integrating them into the ever-expanding Great Nora.

The present is different from the past.

The power of a single race is not enough to combat the Abyss.

A real alliance line of all clans needs to be established.

...

Boom!

A colossal fist of stone slammed an eighth-level mid-stage demon away.

A trace of faint light appeared.

Zheng! A dagger sliced through the void.

The demon's body split apart, its aura extinguished.

"Damn, still haven't found out the whereabouts of my younger brother."

Magic Mountain's massive body landed on the sea, muttering.

Red Spirit Prison collected the demon's corpse.

She said helplessly, "Only rumors say that the younger brother went to Hell."

"Hell is too vast, going there would be like finding a needle in a haystack. Father didn't say specifically where our younger brother is; should we go back and ask Father again?" said Magic Mountain.

"It takes three hundred years to make a trip, and the hot potato will have cooled by then." Red Spirit Prison glared at him.

A hundred years ago, the offspring of the two formidable Purgatory Black King Dragons had arrived at Nora.

Chapter 2473: Starlight Shines on Dawn, Serpent Vulture Knight in This Life

Unexpectedly, the biggest difficulty they encountered was finding the younger brother.

"Why not find a legendary wizard to ask?"

"With our level of power, they won't care about us... Did you forget, to freely move within the Wizard World, that damned Golden Walker extorted a level 9 mineral from us, which Father wanted us to use for forging a rare treasure. Wizards are too greedy and deceitful."

"Or we could try to find the Lava Dragon; it might have a clue, after all, it is the leader of the dragon descendants."

"That's the only option."

...

Sleeping Dragon Domain.

Levi came to the Dragon Descendant Priory to discuss cooperation.

The Ancient Dragon Continent plans to advance further in dragon knowledge research with the Dragon Descendant wizards.

Here, he met the father of the Sky Dragon Wizard for the first time.

The Cloud Mist Dragon, Sir Lindt Hog.

Its body was covered with delicate and elegant scales, colored like the blue sky and white clouds.

Azure flame clouds surrounded it.

With every gesture, hurricanes formed and vanished.

Like the Wind Illusion Dragon, it was also a powerful Wind Element Dragon Race member.

The Sky Dragon Wizard was not only a top-level talent, but even surpassed that, likely due to the influence of their bloodline.

Therefore, Levi believed.

The descendants of the 18 Twilight Riders, as long as their initial talent is not too low.

Their future achievements would exceed those of regular wizards in the Wizard World.

"I heard the Sky Dragon Wizard talk about you; you're a very promising young man."

The Cloud Mist Dragon's voice was gentle, like a gentleman with a warm and jade-like demeanor.

This Pure Love Giant Dragon indeed had a very good temperament.

Levi smiled and said, "The Sky Dragon Wizard is really impressive too."

Back at the ancient tower, there was a time when the Sky Dragon Wizard and he were competitors.

Once, he was almost killed by him.

Ever since then, when the Sky Dragon Wizard saw him, he would avoid him.

Time passed, and this child smoothly became a Seven-Circle Senior Wizard.

Their relationship was still decent.

While Levi and the Cloud Mist Dragon exchanged flattering remarks, noises started outside.

"We want to see Mr. Magma Dragon." The voice from Magic Mountain sounded like thunder.

"Who are you? We don't know you." Sir Golden Dragon's expression was one of resignation.

He understood that this was a Dragon Descendant Giant, even a Mythical level Black King Dragon.

Thus, he maintained a good attitude; if it were any other alien race, they would have been driven away long ago.

Lava Dragon said, "Let them in."

Levi observed these two alien races, both emanating powerful Dragon's Might.

He had seen Dragon Descendant Giants and Dragon Descendant Elves before.

But ones with such formidable strength, it was his first time.

Especially that giant; it was already at level 8 peak.

Its power was comparable to the leaders of some top-level wizard organizations.

Most importantly, Levi felt somewhat familiar with the bloodlines of these two individuals.

"Purgatory Black King Dragon... What connection do they have with my second brother?"

Magic Mountain spoke bluntly.

"Mr. Magma Dragon, we come from the Black King Palace."

The Lava Dragon seemed to have guessed something.

"Are you looking for Soderos?"

Red Spirit Prison nodded.

The Lava Dragon said, "Sorry, I don't know either. He's been missing for a long time."

Red Spirit Prison responded, "I see. I trust you, sir."

The two left somewhat dejectedly.

...

"What do we do now?" Magic Mountain was at a loss.

"Not sure, could the younger brother be dead?" Red Spirit Prison lay on the sea surface.

As the two discussed, a voice suddenly emerged.

"Why are you looking for Soderos?"

Magic Mountain's expression slightly changed; it looked toward the void, ready to punch anytime.

Levi emerged from within the ripples, standing with arms crossed.

"You were the person from before; do you know Soderos?" Magic Mountain asked gravely.

This black-armored swordsman could silently hide around them.

Such abilities were somewhat terrifying.

No wonder in the Wizard World; there are hidden dragons and crouching tigers.

No wonder Father repeatedly emphasized not causing trouble here.

Even a dragon must be coiled.

The meticulous Red Spirit Prison recognized Levi and got up, smiling slightly.

"Greetings, Hall Master of Dusk."

This person was one of the most talked-about figures in the Wizard World in recent years.

His connections were extensive; he might actually know the whereabouts of the younger brother.

Levi asked, "I know him, but I need to know what you want to do."

He roughly guessed their identities; they should be the older brother and sister of his second brother.

However, he wasn't sure about their stance towards the second brother.

Dragons are often indifferent to emotions, and if they wanted to frame his second brother and engage in some drama of nine dragons vying for the throne, he would eliminate the two right here.

Red Spirit Prison grabbed the arm of Magic Mountain, who was prepared to act, and pulled it back.

"Can we trust you, sir?"

Levi said, "It's up to you."

...

After listening to their explanations, Levi gazed at Magic Mountain in contemplation:

"So, you want to secretly protect Soderos?"

These two dragon descendants traveled for three hundred years and stayed in Nora for a hundred years.

All to serve as hidden bodyguards for his second brother.

What kind of Dragon's Might plot is this?

The dragon descendants he's encountered are truly interesting.

Other fathers don't care about their offspring at all.

Yet the Lava Dragon, Cloud Mist Dragon, and Purgatory Black King Dragon are so attentive.

"Taking you to him is not a problem, but you need to swear an oath under my sword that what you say is true and you won't harm Soderos, or I won't trust you."

"Why would we harm our younger brother! You really are troublesome!"

Red Spirit Prison slammed Magic Mountain with a palm and said:

"Sir, please don't take it seriously; we will swear."

After making the pledge.

Levi took the two to the eighth level of Hell.

...

Black King City.

The influence of the Demon Fox Tribe on the eighth level.

"Soderos lives in this city; do you want to see him?"

Chapter 2474: Starlight Shines on Dawn, Serpent Vulture Knight in This Life

Levi looked at the siblings and asked.

The Red Spirit Prison said with a smile, "No need, we have already confirmed through the Bloodline Sensing Secret Method that our second brother is here. We have a mission, so we can't meet him right now. We also ask you to keep this confidential. Thank you, Your Excellency. You are a kind wizard, oh, and also an honorable knight."

The Magic Mountain smiled sheepishly, "If we had known our second brother had an older brother like you taking care of him, we wouldn't have needed to come at all. If you need any help in the future, just let me know. I won't refuse within my capability."

Levi waved his hand.

"No need to be polite, I'll count on you for my second brother's safety in the future."

No matter what, having two such formidable bodyguards in the shadows is reassuring.

As long as the second brother doesn't provoke those level 9 entities in Hell, he can walk unhindered.

...

In the city.

"Big brother, you're stronger again."

The Purgatory Demon Sword embraced Levi, feeling excited.

The three sisters, Demon Fox Main Mother, Ghost Elephant Master—all gathered as a small Hell squad.

A century has passed, so there's no need to elaborate about the second brother.

He advanced to the Seven Rings Senior Realm some time ago.

Moreover, he has comprehensively developed both in spell and body refinement.

The three sisters' cultivation lingered around the Early Stage to Mid Stage of Level 7.

Only the eldest sister recently stepped into the Late Stage of Level 7.

After all, providing nourishment to the second brother makes it difficult for them to grow rapidly.

The Demon Fox Main Mother has actually advanced to the Level 8 Middle Stage.

The leaders of the major tribes in the Eighth Level are generally at Level 8 Late Stage or Peak Cultivation.

The Mistress and Ghost Elephant Master still need to improve.

The second brother said with some difficulty.

"Big brother, we've tried everything over the years to raise 8 billion joss paper for you. We can't acquire more since we still have to supply the Seventy-Two Pillars... If it doesn't work, the two of us will go back to our old trade and rob those rich devils on the eighth level." s

Levi said, "It's sufficient; the organization also needs funds to operate."

Anyway, it's just this amount of money.

If we can buy it, great; if not, it's no big deal.

As for robbery, he's retired from that line of work.

The second brother said, "Thank you for understanding, big brother."

Levi said, "I have some oddities and rare treasures here; take them to develop yourself and your forces. Also, these few bottles of Immortal Platform Wine are good brews—share them among yourselves."

Levi and his second brother have always exchanged resources, not just one-sided demands.

Gandaph obtained the "Nine-Headed Hell Snake Body Tempering Technique" under a confidentiality agreement.

Otherwise, he would also give a copy to the second brother for reference.

...

The Nether River flowed magnificently.

The millennial grand market had arrived.

Unlike ordinary Netherworld Markets, the types of goods in the grand market were not many.

But they were all high-level items, and the method of purchase was through auction.

Levi arrived at the agreed location.

When he boarded the ship, he found that besides Di Gao, there was also a Minotaur.

Oh, all familiar faces.

Most striking was a figure clad in pitch-black armor, sitting with eyes closed in rest.

Beside him, a skeletal warhorse stood silently, lowering its head to gnaw on something,

"The King of the Underworld has arrived."

Levi's heart stirred, feeling slightly nervous.

Presumably because the leader was present, Di Gao didn't dare to acknowledge Levi.

The King of the Underworld wore a helmet, obscuring his appearance.

Levi could feel its gaze sweeping over him.

"Hmm."

The King of the Underworld uttered an imperceptible sound of surprise.

Through secret techniques, it couldn't see Levi's lifespan.

Interesting, yet another junior with the protection of a great figure.

But having seen much, it wasn't overly concerned.

The auction quickly commenced.

Silhouettes exuding the aura of Level 7 and Level 8 devils arrived one after another.

Levi roughly perceived that there were five Level 8 individuals alone.

Among them was a Level 8 Late Stage devil.

Everyone concealed their faces, clearly not wanting to be recognized.

It's possible there were also wizards or alien races hidden among them.

The items began to be put up for bidding.

Among them were materials that could be useful to Levi.

But he held back for the life extension items.

Other devils, lacking Levi's insider information, bid passionately.

"Rest Soil, 2 jin, starting bid 1.5 billion!"

Levi sighed; all the good items were together again.

He didn't make a move.

Ultimately, those 2 jin of Rest Soil were taken by a Level 8 devil for 3.5 billion.

Becoming the most expensive auction item so far at this event.

The devil hurriedly left, afraid of being targeted.

Treasures attract covetous eyes, and devils even more so.

Afterward, a ninth-level material was also auctioned.

Named "Nether River Molybdenum Iron," it was an excellent material for forging ninth-level Ghost Tools.

Levi's eyes flickered; this negative energy material had a rare trait known as "Life Shortening."

What is Life Shortening? It's essentially lifespan reduction.

After being attacked by this thing, one's lifespan is diminished.

The extent of reduction relates to the power of the user and the one being attacked.

This stuff is rare in the Wizard World.

Lifespan is the most precious thing, and lifespan reduction can be considered the most malicious curse.

"Interesting."

Levi still did not bid.

Ultimately, the Nether River Molybdenum Iron was auctioned for a staggering 5.6 billion.

It was taken by that Level 8 Late Stage devil.

After much anticipation, the final item made its appearance.

"Life Extension Treasure, Shell Mother Fruit, directly extends life by a thousand years. If refined into medicine by an expert, one thousand five hundred years is no problem."

Within the tray lay a fruit like a shell.

It seemed alive, continuously squirming.

A fresh fragrance permeated, as if one whiff would prolong life and health.

These ninth-level Heavenly Materials and Earthly Treasures look truly extraordinary.

"Starting bid, 2 billion Aether Stone."

No sooner did the words fall.

Fierce competition began.

Even immortal species devils were extremely fond of this item.

Chapter 2475: Starlight Shines on Dawn, Serpent Vulture Knight in This Life

No one would mind having a long life.

Perhaps living an extra thousand years could lead to reaching level nine.

Then challenge the Seventy-Two Pillars and replace them!

Even devils should have dreams!

Thus, the competition's intensity far exceeds earlier levels.

"7.2 billion!"

Levi concluded decisively.

His competition was a devil at Level 8 Late Stage.

The opponent was also wealthy, possibly a Clan Leader of a large tribe.

The devil had previously spent a fortune acquiring the Nether River Molybdenum Iron and was now financially tight.

He silently gave Levi a glance and hurriedly left.

Levi's wish was fulfilled.

With 800 million Joss Paper remaining, he continued to wait for the next auction.

Up next were some minor items.

The first item attracted Levi's attention.

[Rebirth Stone, special item, can view the deceased's future life, one time per stone, three stones total, starting bid 600 million.]

"View future life? Isn't that the Underworld's authority? They can sell it for money too?"

Levi felt slightly speechless.

There wasn't much competition for this item.

He secured it smoothly for 700 million Joss Paper.

He spent the remaining 100 million casually on some materials.

The auction ended.

The King of the Underworld left with Di Gao and the Minotaur.

He took out a small portion of the huge amount of Joss Paper obtained from the auction.

"You've been with me for some time, take these."

Di Gao and the Minotaur quickly thanked him and carefully stored them away.

The King of the Underworld waved his hand, causing billions of Joss Paper to drift like snowflakes in the wind.

The bills fell into the Nether River and disappeared.

...

In the wilderness.

Levi withdrew his Perception and halted his movement.

"It's a pity, the Nether River Molybdenum Iron."

After circling around, he did not see the figure of that Level 8 Late Stage devil.

He thought the devil might ambush him nearby to intercept and kill him.

Thus, he could take the opportunity to counterattack and seize a level nine material for free.

Obviously, he was overthinking.

The devils at the eighth level have profound thoughts, not easily engaging one another.

Otherwise, it might escalate to large-scale wars among the Seventy-Two Pillars.

...

On Ancient Dragon Continent.

Inside Emperor's Palace.

Levi took out the Shell Mother Fruit.

"A good item, swapping it for a Glorious Sun-Grade Oddity is not a problem."

He didn't intend to consume it.

He had many years of lifespan, and eating it would be wasteful.

It's better to exchange it for other resources or keep it as a backup.

If a close relative needs it, he can offer help at a crucial moment.

He took out [Rebirth Stone].

"Able to view the present life, interesting."

Of course, limited to some unimportant characters.

If the person being viewed is a strong figure, this item cannot display their present life.

This item wasn't expensive, and it was the first time Levi encountered it in the Netherworld Market.

Next time, ask Di Gao if he can find more.

He wanted to use them to check some people's present lives.

Like... a certain knight.

Naturally, it would be Old Fred, who was most important during his mortal period.

Serpent Vulture Knight.

He didn't intend to disturb others' present lives.

He was just curious.

Using this item is simple; imprint the true name on the Rebirth Stone.

And add all relevant "keywords" about this person.

In this way, Levi could accurately find Fred.

The images flashed like a slideshow.

Blackwater Domain, dilapidated castle... past memories surged.

Levi seemed to quickly view Fred's entire life.

Finally, the perspective shifted:

Sauron Plane, Nar World...

Master of Dawn, Dawn Sect, Holy Sect Army, Unbeliever Brotherhood.

Vice President Kane, Level 7 Demon Swordsmen...

At this moment, Levi felt like a God.

Soon he understood the present life of the old butler.

The Rebirth Stone lost its mysterious power and turned to ashes.

Levi let out a breath of relief.

It seemed Fred's present life was going well.

He was no longer a mortal but had become a leader of an underground transcendent organization.

Ruler of Nar World, also a church force.

As for the so-called "Master of Dawn."

Through Lucy's tea party.

Levi knew it was just another name for "Heavenly Father."

This figure likely held God's Authority related to Light.

Had spiritual temples in many worlds throughout the Multidimensional Plane.

In some ways, the old butler was rather unlucky.

Treated as someone repressed by Heavenly Father in both lives.

Coincidentally, Nar World was in the Flora Realm where the Spider King resided.

It was a medium civilization, with top power probably at level eight.

Specifically, the Pope Saint of the Dawn Sect.

Levi had the Spider King send a duplication to gather intelligence there.

Past life and present life have no relationship.

However, Levi hoped that Kane in this life would fare better.

If Kane encountered difficulties, he could offer aid.

Next, Levi imprinted the true name of the Wild Boar Knight onto the Rebirth Stone.

After a while, he opened his eyes with a strange expression.

"Unexpectedly, Wild Boar Duke? Tusks Prince's child."

The Wild Boar Duke's end was being killed by Levi, even his true soul was devoured by Leon.

This meant he had no future life.

So, indeed, the Wild Boar Knight was truly dead!

Levi had no regrets along this path!

This segment of grudges ended, making him feel much more relieved.

Finally, Levi imprinted Marlene's true name onto the Rebirth Stone.

After viewing it, he showed a complex expression.

Marlene had reincarnated several times, always living as an Ordinary person.

In her present life, she was in a small world during the Doomsday Era.

Her position there was as a professor of Mysticism at a university.

"That's fine, Marlene can still pursue what she wishes to do."

Levi sighed.

After learning about the present lives of these important people,

He seemed to have let go of his feelings about Life and Death.

If there were more Rebirth Stones,

He still wanted to check the present lives of those legendary knights from the Doomsday Era.

Perhaps it would yield some potential individuals to gather.

Lionheart Knight, Golden Warhammer Knight, Snowflake Knight...

...

Ninth Layer of Hell.

In the sky, millions of chains hung down, boundless.

On the ground, Blade Mountain, Sea of Fire, boiling oil, and icy torture grounds were scattered.

In the wilderness, pillar after pillar spanned the heavens and earth.

Each pillar, a world in itself.

Only the seventy-two strongest in Hell had the right to dwell in the Seventy-Two Pillars World.

Once becoming a Pillar, they must face challenges from the Wild Nine-level.

If they fail to defend, the price is losing their life.

The Wild Nine-level would strip their Authority and gain Pillar qualification.

Similarly, if the Wild Nine-level fails in a challenge, they would perish.

Only with countless sacrifices can victory be achieved.

Countless devils and Undead from antiquity became yellow soil before the Seventy-Two Pillars.

This place is Hell, endlessly cruel.

But once becoming a Pillar, the benefits are endless.

The most important is gaining lifespans several times longer than their own.

It's said that those at the forefront, the Pillars, are terrifying beings from antiquity.

Realm of Slaughter, seat of the Emperor of Torture.

"Master, the Nether River Molybdenum Iron is secured."

Chapter 2476: Titan's Blood!

"Where is the Shell Mother Fruit?"

On the throne, the Emperor of Torture opened his eyes.

Its appearance was similar to an alien, extremely ugly.

Bone spears formed a ferocious blood-red crown on its head.

Its leathery wings folded behind it, resembling a blood-red cloak.

Sharp claws emitted a cold glow, capable of tearing the world apart.

"Failed to obtain the Shell Mother Fruit; over the years, the military expenditure to amass troops was excessive, and coincidentally, there's an eight-level middle-stage devil competing with me. It's my inability," the devil explained.

The Emperor of Torture asked, "Can the identity of that devil be found?"

The devil replied, "Can't be traced, I'm worried about unexpected troubles and didn't dare to probe."

The Emperor of Torture closed his eyes and said indifferently:

"You did right, step down and continue amassing troops."

To him, the Shell Mother Fruit wasn't indispensable.

As long as he got the Nether River Molybdenum Iron.

He intended to forge it into his Ghost Tool.

This was an essential object to deal with those powerful short-lived species.

...

Dark Ancient Tower.

Seventh floor.

Saint Roland Continent, Rune Land.

Saint Council.

Levi listened to the reports from the saints.

From the fifth level, he moved the wizard seedlings and directly came here.

This batch didn't include Children of the Elements, only several Special Talents.

This marks the four hundred years of Humans' Tianqi.

The Saint Council reached a member count of 25.

The "Six God Invisible Skill" and "Six Intentions Divine Power Fist" also spread.

The overall strength of mortals went to another level.

Those mortals who became strong because of this became Quasi-Knight Rangers, traveling the world to slay demons and eliminate devils.

Time passed with changes.

The once-threatening Giant Beast Restricted Area has now become a protected area.

To prevent excessive hunting from causing an imbalance in biological resource regeneration.

The Saint Council set a forbidden hunting period in the Giant Beast Restricted Area.

Giving the black beasts time to breed to avoid extinction.

The authorities encouraged wizards to hunt black beasts in more remote underground worlds.

They also dispatched special battle groups to find new intersection points.

Through this method, constantly expanding the resource channels of Rune Land.

The Sea Beast Park acquired 3 sub-dragons and 13 mixed-blood dragon clans, 34 rare creatures.

Levi selected a portion to enter the Dragon Palace to expand the species scale.

The rest were left to the School of Spiritualism for self-breeding and growth.

Diplomacy-wise, the Three Realms and Four Lands remain stable.

Levi equally honored the agreements.

Not excessively interfering with the development of these alien races.

With his current strength, extinguishing the Three Realms and Four Lands would be just a thought.

Flame Wolf Saint advanced to level eight for a hundred years, steadily strengthening.

He was a Child of the Fire Element and had the Flame Clan Royal Family bloodline.

The first native of Rune Land who could achieve this might himself carry a fortune.

His potential likely hasn't been fully exploited.

When the new level eight Saint is born. .

Levi will take Flame Wolf Saint out, letting him join the Tower of Dawn.

Letting him further his advance by riding the wave of the Blood Battle.

Kidman, who was brought from the fifth level before, is now preparing to advance to level seven.

If successful, he will be the first level seven Mage King in history.

Additionally, Water Dragon Saint advanced to level seven late stage.

The current total of level seven saints in the council reached 6.

Without the pressure from the Three Realms and Four Lands, combined with ample resource supply.

The potential of the saints is fully unleashed.

In a high-pressure environment, all can become saints.

This alone proves their talent is not questionable.

What's missing is just the opportune moment and advantageous location.

When leaving Rune Land.

Flame Wolf Saint handed part of the resources collected over these hundred years to Levi.

One Bright Moon, one Morning Star, nine Great Earth and Sky.

Notably, the Bright Moon Artifact is a crystalline transparent ice spine.

Named "Bone of the Winter Emperor," originating from the Ice Realm.

Thus, the Holy Infant has now collected the Five Great Winter Emperor Relics.

The other four are Winter Emperor's Breath, Winter Emperor's Hand, Winter Emperor's Beard, Winter Emperor's Blood.

Looking at the Illustrated Guide of Strange Items, Winter Emperor Series, it has achieved perfection.

Before heading to the eighth level, Levi made a detour to the Giant Beast Restricted Area.

At the Gegewu Ruins, he saw Little Black Cat.

It was still alive, and seeing Levi, it ran over without fear and rubbed against his leg.

Clearly, it still remembered Levi.

This black cat seemed more rounded than before.

Unclear what it has been eating over the long years.

Spent a whole day playing with the cat before he arrived at the eighth level.

With prior experience, this exploration was much smoother.

He didn't waste time at the Five Great Sky Pools.

Despite being able to have the Shadow Army explore gradually.

Doing so cautiously seems unpleasant.

Better to wander around the eighth level with Jin.

After all, aside from Sky Pools, other places hardly pose any danger to him.

Once he advances to level nine, or truly gains a power to fight against level nine.

He can directly flatten the Five Great Sky Pools in one go, wouldn't that be splendid?

Shortly after arriving at the eighth level.

Under Master A Jin's guidance, Levi flew toward a primeval forest.

A few days later, he stopped in front of a cave.

Whoosh! Whoosh!

Invisible Dense Qi condensed from metal element shot out from the cave.

Collided with Levi, shattering abruptly.

Levi set up the Death Ember Divine Palace, diving relentlessly through the entrance.

In the pitch-dark underground caverns, some weak transcendent creatures hid.

For example, a bird species covered with golden feathers, roughly the size of a kite.

This is the "Sword Feathered Owl," a level one transcendent creature.

They can shoot sharp blades made of metal element sword feathers, very formidable.

Levi captured some to breed.

Chapter 2477: Titan's Blood!

Generally speaking, Sword Feathered Owls like to gather in places rich in metal elements.

This suggests there might be a Golden Element Blessed Land below, possibly birthing an oddity.

After half a day, Levi felt like he was reaching the Earth's core.

The air became increasingly scorching, and faint sounds of magma flowing could be heard.

Buzz! A golden blade light slashed through the void, heading straight for Levi's face.

He stood unwavering, surrounded by a golden aura that formed an invincible barrier.

It was the Vajra Secret Word.

Crackle.

In an instant, hundreds of piercing blade lights exploded around the barrier.

After advancing to Level 8 Middle Stage, the defense of the Brilliant Golden Dragon Armor improved further.

The barrier shook but ultimately didn't break.

Seizing the opportunity, Levi drew the greatsword and slashed at the enemy.

Boom! The Sword Qi smashed something hard onto the rock wall.

The ground quaked, as if the underground world was about to collapse.

Hiss! An insect with a height of about three meters, with golden wings and a mantis head, landed on the ground.

"Such speed, such strong attacks, and remarkable defense. Such strength, and it's only at the Level 8 Middle Stage."

Levi clicked his tongue in admiration.

He thought the enemy would be at Level 8 Late Stage.

This kind of Zerg was yet another transcendent creature beyond his knowledge.

This mantis could wield metal elemental power.

Its physical strength was formidable, and it was also skilled in combat techniques.

If it were an ordinary eighth-circle wizard, they would have been injured already.

As the overlord of this underground world,

it kept giving warnings upon seeing the invading Levi.

Levi ignored them and flickered forward to engage.

Golden blade light came forth.

Boom! He swatted it away with his sword.

Crack! The golden scythe-like arms of the mantis clashed with a sound of metal striking metal.

"It can actually withstand the Crimson Dragon Slash."

Levi decisively put away his shark-tooth-shaped sword and activated the Limitless Path and Sky Dragon Path.

He fought the mantis bare-handed.

One used a mantis fist, the other a dragon fist.

One used its body as a weapon, as did the other.

Levi naturally didn't go all out, just wanted to take this chance to assess the mantis's skills.

The mantis had strong bursts but poor endurance.

After only a few thousand rounds, it couldn't hold on anymore.

The metallic shell was full of dented fist marks.

It spread its wings, trying to slice through the void to escape.

Levi lightly clenched his right hand, forming the Air Castle, sealing the mantis within.

Then he leaped onto the mantis's back with a downward cannon punch.

Boom! The mantis fell with a crash.

The shockwave rippled back, the strata exploded into irregular mass, spreading in all directions.

There was a strong tremor within a thousand miles radius.

Levi's Serious Punch left the mantis with no strength to fight.

After all, it was just a Level 8 Middle Stage insect adversary.

Levi had even killed Level 8 Late Stage demons, let alone this.

The Black Soul Demon Tower radiated light, sucking in the mantis.

The Undead Sealing Array within the tower activated.

Red King and Lopez, the two Ape Generals, flew over as guardians.

This mantis Levi wanted to tame, then take it to the Dusk Holy Temple as a Guardian.

Aside from guarding the gate, it could also spar with the knights.

Its every move in natural battle was the perfect Level 8 Sword Technique.

If the knights could grasp even a little, they would greatly benefit.

After dealing with the mantis, Levi looked around.

The dense power of the metal element formed countless natural and swift Sword Qi in the cave.

A Sixth-Circle Wizard's protective force field could only last a moment.

Luckily, Levi's body was tough and totally ignored it.

At the center of the cave, there was a giant pillar reaching toward the sky and earth.

It emitted a dark golden sheen, covered with sword-shaped patterns.

"This is... Flash Gold Wood!"

No wonder the place was so rich in the power of the metal element.

Turns out there was such Strange Wood here.

Judging by its size and age, it seems to be over a hundred thousand years old.

Not inferior to the Thunder Pattern Wood he got earlier.

A bit lacking compared to the Ocean Stabilizing Pillar.

Levi inspected inside and out.

"No inscription from Sauron, it seems it's not an Easter egg or anything."

Levi muttered.

The Strange Wood collection plan advanced further.

With Ice, Thunder Pattern, and Flash Gold, the three major elemental magic woods were gathered.

For Earth, Fire, Wind, and Water, only wind and fire remain.

This Strange Wood, in the external world, is valued at tens of billions to hundreds of billions.

Here, all he needs is to follow Jin to collect.

Rumble! Levi uprooted the Strange Wood, and the entire underground world began to collapse.

He tossed the Strange Wood into the Black Soul Demon Tower, then turned and left.

"Huh, what's that?" .

Levi glanced around, spotting a rock cave exposed by the collapse.

Inside, there seemed to be a golden light flickering.

A suspected nest-like place.

Upon entering, he saw seven oval insect eggs the size of golden ostrich eggs.

The aura on them was similar to the golden mantis.

"Turns out it was a female mantis..."

Levi collected the seven insect eggs.

No wonder it had such hostility towards him.

It was for protecting the nest.

After collecting the eggs, Levi discovered the nest also seemed piled with various rare materials and minerals.

He collected them all.

"Jin, well done."

Levi patted the mouse's head, surging towards the exit.

Without this pillar, the area began a large-scale collapse.

Many transcendent creatures were startled, fleeing in all directions.

Levi took the opportunity to start capturing pets.

Shadows flew out one by one.

After the destruction, Levi flew high into the sky.

Below was a sinkhole, spanning a thousand miles.

"Such a sin..."

Levi mourned for a second.

The shadows threw all the newly captured transcendent creatures into the Black Soul Demon Tower.

Levi checked to ensure everything was fine before settling them in the Ancient Banyan Fairyland.

The tentacles of the Level 8 Fish Demon Shadow coiled around a struggling golden armor shadow and flew over.

Chapter 2478: Titan's Blood!

Levi's eyes sharpened.

"There's more treasure?"

This armor is entirely covered with metal Truth Runes.

From its design, it is the Golden God Armor.

Precisely the Bright Moon Artifact in the Golden God Series that Lord Victor needs.

Over long ages.

Formed through coincidence in this Golden Element Blessed Land and various oddities like Strange Wood.

"The eighth level is indeed a paradise on earth."

Previously wandering a volcano, I found pure-blooded Dragon Clan and Sun Refining Artifacts.

This time descending into a cave, a Level 8 mid-stage alien insect, and a nest of small bugs.

Another Bright Moon Artifact, a piece of Strange Wood.

"Wonderful."

Levi enjoyed the feeling of solo exploration and treasure hunting.

"What a good omen, let's continue."

He summoned ABiao, patting the White Tiger's rear.

"Roar!"

The swordsmen rode the White Tiger, transforming into a whirlwind, exploring unknown lands.

...

Nora Calendar 918.

Blood Battle year 707.

Nora Continent.

Land Domain.

Demons have launched their 24th attack on Gondor City.

On average, one attack happens every few decades.

Previously, 23 assaults ended in failure.

The most serious one already breached the inner city of Gondor.

Causing significant casualties.

Gondor City Lord sat centrally in the city, overseeing the super magic array.

The defense army and battle groups from various city organizations roamed in all directions.

Overwhelming spells and demon-like abilities clashed between heaven and earth.

The most dazzling, undoubtedly, was the Fire Dragon Sky Work's Heavenly Craft Battle Group.

This group consists of Black-armored Warriors and mechanical creatures.

They fear nothing, feeling no pain.

Like a sharp knife, piercing the demon encirclement in the barracks.

Many demons fell.

Meanwhile, another is the Dawn Sword battle group from the Dawn Tower.

Comprising 7 sixth-circle wizards and 28 fifth-circle Secret Sword Flow Wizards forming the Beidou Seven Stars Formation.

This formation was self-created by Lord Victor.

beams of sword light whizzed out from the city.

Sometimes assembling, to violently strike sixth-level demons.

Other times splitting apart, piercing through and slaughtering cannon fodder.

Lastly, the White Robe Wizard Group.

Is a group of Independent Body Refining Wizards from far and wide.

They are Gandaph's followers and also students of the Body Refining Academy.

In response to Gandaph's call, they came to protect the city against the demon's mass invasion of Gondor City.

They all cultivated Gandaph group's researched Purple Crystal Body Refining Technique.

Emitting amethyst light, like purple stone men.

Once a demon gets close to the barrier, they would be knocked flying with a single punch.

Three distinctly styled battle groups become the beautiful line of defense in the battle to protect Gondor City.

The demon forces are naturally not easily dealt with.

This attack, mobilized four Level 8 Commanders.

The strongest one is a Flame Demon with Level 8 Late Stage cultivation.

With hands thrust into the earth, chanting ancient spells.

"In the name of Fire Demon, awaken!"

Rumble! The earth begins to crack.

Fiery cracks spread towards Gondor City.

Soon, torrents of magma flow from beneath the ground.

Volcanoes suddenly appeared around the city, erupting violently.

The apocalyptic scene makes the wizards within the city tense, fearing the city might be breached.

Gondor City Lord's expression is grim.

The enemy is very strong.

Even with his Senior Eighth Ring Cultivation and as a dual-faction practitioner, he feels immense pressure.

Master Fire Dragon appears and asks:

"City Lord, are there any guarantees for this battle?"

Lucian replies: "If we can eliminate that Flame Demon Commander, we can hold."

Ace says: "I, Victor, and Gandaph can restrain Level 8 Early Stage demons, three together can battle Level 8 Mid-stage, against Level 8 Late Stage demons, we would be powerless."

Lucian says: "The three of you just need to create some opportunities for me. I have a powerful primordial soul spell and a rare treasure that should heavily injure or even annihilate that Flame Demon."

Ace says: "Let's try."

If they could assist in killing a Level 8 Late Stage demon.

Three individuals' war merits would soar past 500 million.

Inside the city are two eighth-circle wizards.

One is Lucian, the other is the Deputy City Lord Renard.

The current situation indicates that a standoff is not a solution.

The Flame Demon keeps deploying magma magic, depleting the barrier energy.

So everyone agrees to strike proactively.

Eight figures flew out of the barrier.

Both city lords, Gondor Three Heroes.

Plus three other wizards above Senior Seventh Circle Cultivation within the city.

Boom! Countless evil magic enveloped them.

The Holy Infant raised a hand, a purple wizard tower emerges from his mind, growing in the wind.

Soon becoming a towering castle 8000 meters high.

"Ice Castle!"

Frost aura spreads, forming an ice castle.

After centuries of refining, the Holy Infant's wizard tower is nearly complete.

After modifications, the crimson wizard tower becomes purple.

Both externally and internally, it is completely different from before.

Its power, also much stronger than before.

The wizard tower has two forms.

Ice form, mainly for defense and control.

Burning form, focuses on attack!

Using the tower to block countless attacks.

The Holy Infant has already arrived in front of a Level 8 Early Stage Gargoyle.

Sharp ghost claws swung at him.

The Holy Infant slaps the wizard tower.

The tower flies out, like a spear shooting forward.

"Fire Dragon Breath!"

Boom! A thick flame beam shot out from the tower's tip!

The searing torrent blasts the Gargoyle, leaving it scorched black, surrounding the low-level demons perish en masse.

If it weren't for its major realm dominance and high magic resistance.

This strike would leave it half-dead.

"I will crush you!"

Chapter 2479: Titan's Blood!

It flapped its wings, and earth walls encircled the Holy Infant, crushing in.

"King's Dragon Elephant Fist!"

Ang! The sound of dragon elephants reverberated endlessly!

Under the Sky Dome, thirty dragon phantoms circled.

On the Earth, thirty giant elephant phantoms galloped.

Unknowingly, Gandaph had already developed this martial arts to the level of thirty dragon elephants!

The power of this punch was astounding, shaking the heavens and moving ghosts and gods. .

Those earth walls instantly crumbled, the fist wind blasted the Gargoyle away.

Its charred shell surprisingly showed cracks.

Yet Gandaph's cultivation was not even at Seven Rings Perfection.

"Divine Fallen StarThree Thousand World Calamity!"

In the sky, a platinum star hung high.

A handsome black-haired figure emerged from within.

Lord Victor formed a sword seal with both hands, then pointed forward.

Thirteen secret swords cut through in random trajectories indescribably.

Marks of swords appeared in the void.

Subsequently, these marks wove into a giant net obscuring the sky and sun.

Three thousand stars spanned its surface, casting an illusion of three thousand worlds vanishing beneath the sword.

Having studied the Secret Sword Formation for hundreds of years, Lord Victor gained richly.

This was not a part of the original "Divine Falling Star Formation"; it was his own creation.

The power was immense, it had become his strongest attack.

Boom! Being flanked by the wizard tower and Gandaph, the Gargoyle was unavoidable.

Three thousand sword marks descended, slicing space and shredding him into fragments.

The Demon Soul had just appeared but was absorbed into the wizard tower, refined and obliterated.

Another perfectly executed teamwork.

The Holy Infant's wizard tower collected the devil corpse.

The Gargoyle's shell was an excellent material for refining wizard tools.

On the other side.

A phantom of a giant lava figure appeared behind Lucian, soaring over ten thousand meters.

It was his Wizard MinisterEarth Core Destroyer.

Among the top 200 powerful wizard forms.

He battled fiercely with the Flame Demon Commander.

The Deputy City Lord and the other three were similarly matched.

The Gondor Three Heroes quickly resolved the battle on this side, opening a breakthrough.

They hurried to support other battlefields.

Soon, another level 8 early stage demon was also slain by the collective efforts.

With victory in sight, a sudden change occurred.

The Deputy City Lord was heavily injured by a level 8 mid-stage demon.

Unexpectedly, a level 8 mid-stage Mind Flayer lurked within this demon.

Seizing the opportunity during the Deputy City Lord's intense battle, it invaded.

With its powerful soul-stealing ability, the Deputy City Lord's primordial soul was damaged.

He cried out in agony.

Lucian's expression changed, wanting to rush over to assist, but he was entangled by the Flame Demon Commander.

"Jie jie jie, die."

Surrounded by two level 8 mid-stage demons, the Deputy City Lord quickly fell.

The Mind Flayer had even gnawed a part of his brain, cruelly.

The Gondor Three Heroes saw and quickly rushed to support.

They distracted one of the demons, the Holy Infant summoned the Fire God projection and Zhu Rong Mountain.

"Go help the Deputy City Lord!"

Boom! The Fire God stepped forth, its giant hands grabbing the Mind Flayer's tentacles.

But it was too late, the latter already invaded the Deputy City Lord's body.

The Deputy City Lord exhausted his methods, unable to drive it out.

Watching as he was about to be possessed, leaving only a shell.

His figure dashed towards the Flame Demon Commander.

Lucian sighed, knowing what the Deputy City Lord intended, he quickly retreated.

Boom! The Deputy City Lord's body exploded.

The shockwave swept through, heavily injuring the Flame Demon, the Mind Flayer was also tormented.

Seizing the chance, a somewhat fragmented phantom primordial soul flew out.

It was the Deputy City Lord.

He escaped into the void, then returned to the city.

Ace and others breathed a sigh of relief.

Fortunately, the primordial soul was preserved, life was safe.

An experienced eighth-circle wizard like the Deputy City Lord likely had prepared another body.

Later, he could possess and restore cultivation, better than dying.

All present erupted with power, using all means.

Seeing the situation turning dire, the level 8 mid-stage demon quickly retreated.

If it hadn't fled quickly, it would have been eliminated by Victor's sword array.

Though exhausted, the three still hurried to assist Lucian's side.

Their strength compared to the Flame Demon was starkly inferior.

Thus, the tactic was for the Holy Infant to defend with the wizard tower, Victor to harass from afar with the sword array.

Gandaph raided the formation.

Other wizards also arrived to support.

The Flame Demon Commander saw the tide turning, trying to escape into the magma.

But was forced out by Lucian.

He looked fierce, determined that the Flame Demon Commander must die!

Relying on others to collectively restrain the Flame Demon.

He chanted incantations.

"Eight-Circle Magic Molten Lava Starburst!"

This was a dual-faction magic of earth and fire.

Its power ranked among the top in Wizard World's eight-circle magic.

Like the explosion of the Sun, the Flame Demon's body continuously evaporated in the spell.

In Lucian's palm, a dirt-yellow mountain peak emerged.

Nine-level Treasure Nine Mountains Linked Town.

Nine successive giant mountain phantoms descended from the sky, flattening the Flame Demon's form into a patty.

Even the Demon Soul was completely annihilated.

The Holy Infant was slightly shocked.

This was almost the strongest level below nine, quite comparable to the [Chaos Sun].

Nine-level Treasure, terrifying indeed!

Lucian looked pale.

Obviously, using this rare treasure consumed substantial strength.

That's why he chose to wield it now.

He had to guarantee a kill on this formidable Flame Demon.

In the end, aside from one that fled, all three level 8 demons were wiped out.

The Holy Infant gazed upon the demons scattered across the battlefield starting to cleanse the ground with Fire Dragon Tribulation.

After the battle.

The Holy Infant and others returned to Gondor City.

During their struggle against the level 8 demons.

Gondor City's barrier had been breached, the demons charged into the city once more.

Chapter 2480: Titan's Blood!

Fortunately, most demons were annihilated before breaking through the wizard battle group's defenses.

Yet, it still caused considerable damage.

Lucian's face was somber.

The greatest loss in this battle was the Deputy City Lord losing his eight-ring senior body.

Even if he undergoes possession and cultivation again, he might not return to the peak realm.

After all, it seems his primordial soul origin is also damaged.

There are also limits on his lifespan.

War is so cruel.

The Holy Infant looked at the credited over 100 million points and couldn't feel happiness.

Overall, the demons suffered greater losses.

But the issue is that the Abyss can afford it, while wizards cannot.

The disparity in foundation between the two sides is too large.

Regardless, the 24th Gondor City Defense Battle was a tragic victory.

Everyone is already prepared mentally for the next wave.

Lucian said, "Thanks to everyone, we've defended Gondor City again."

Gandaph smiled, "Gondor City is our home, naturally we must protect it."

With their businesses here, they certainly cannot flee.

Lord Victor looked at the battlefield shrouded in smoke.

Facing the increasingly severe blood battle situation ahead,

The Star Castle plan needs to be accelerated.

Like today's situation.

If there were a Star Castle, there would be no need for a direct confrontation with the demons.

Just temporarily avoiding the sharp edge, and then engaging in guerrilla warfare.

Not just the Ancient Dragon Continent.

Every organization and city in the Wizard World must have its own Star Castle.

Advance to attack, retreat to defend.

After handling the post-war matters,

The Three Heroes went to the Blood Battle Temple to start exchanging their random Sun Refining Artifact.

After this battle, their points surpassed Elena, the tenth gatekeeper.

The Holy Infant had 700 million, and Lord Victor and Gandaph had similar amounts, ranked adjacent.

Once the exchange of artifacts was completed, they could enjoy a period of rest.

Next, focus on breaking through to the eight environments realm.

Demon-hunting is extremely exhausting both physically and mentally.

Soon, the results of the three's random drawings were announced.

The Holy Infant obtained the [Titan's Blood].

This is a Sun Refining Artifact from the Earth Faction, a non-sequence artifact.

Gandaph drew the [Golden God Star].

Undoubtedly, this is a Sun Refining Artifact from the Golden God Series.

Lastly, Lord Victor drew the [Sea Country Wheel].

This artifact is from the Ocean Faction and is non-sequence.

Their luck this time seemed quite average.

The most useful artifact is the [Golden God Star] needed by Lord Victor.

Including the newly discovered [Golden God Armor].

He has already gathered five kinds of Golden God Series artifacts.

Just two more to achieve Perfection.

The [Titan's Heart] artifact is also quite good.

It's not purely a body-refining artifact, unable to birth body-refining talent.

But it's likely the most suitable spell artifact for body-refining wizards currently.

After refining this artifact, one can comprehend the [Titan Rune].

This rune can be added to spell models to enhance the spell's power.

Simultaneously, it can also be incorporated into body tempering techniques.

Enhancing the power of body-refining runes and comprehensively boosting Gandaph's attributes.

It can also greatly improve earth element talent.

Providing a foundation for Gandaph's most difficult cultivation ahead in the "Thousand-Eyed Titan Body Tempering Technique".

Additionally, it has many other ingenious uses.

It could also supplement Gandaph's body refining methods.

As a body-refining wizard, his attack methods are definitely not as diverse as those of the Holy Infant and Lord Victor.

The final artifact, [Sea Country Wheel], left the three somewhat puzzled.

This oddity is not listed in the Illustrated Guide of Strange Items from the original source.

The official description is very brief.

The only useful information.

Is that when this artifact is refined, one can grasp some authority similar to the deities of the sea.

The rest are normal artifact functions.

The final decision was to give it to the original source to handle.

The Holy Infant is currently focused on the Path of Ice and Fire.

Gandaph doesn't particularly need it.

There's no need to mention Lord Victor, who is dedicated to sword cultivation in the Metal Faction.

Gandaph with [Titan's Blood] immediately began preparations for refining it.

While Lord Victor temporarily postponed refining the Sun Refining Artifact.

His current spiritual force is only a few hundred points from Maximum.

If it increases his spiritual force, that would be a great loss.

So refining after advancing to the eighth-circle is not too late.

...

Dark Ancient Tower, eighth level.

The abyssal depths.

Levi picked up a somewhat rusty Red Flame Ring.

Anything fallen on the eighth level should be a relic of an eighth-circle wizard.

Upon inspection, it indeed held many good items.

He temporarily put it away and continued exploring.

Not much time remains until the ancient tower closes.

Levi calculated that he collected 23 earth and sky-level artifacts.

Along with 7 Morning Stars and 3 Bright Moons.

The only regret was not encountering a Sun Refining Artifact this time.

It seems last time encountering Ronan was indeed an extraordinary performance.

Of course, besides artifacts, there are other gains to be sorted out after returning.

Additionally, Levi suspects the golden mantis might be a kind of Legendary-level Zerg.

At least, it's likely a descendant of a Legendary Creature's variant.

Its combat power surpasses that of sub-dragons of the same realm.

Returning to nurture it, foster its growth.

The School of Insects on the Ancient Dragon Continent can prosper.

Eventually, as the ancient tower closed, Levi did not encounter a Sun Refining Artifact.

Such level of treasure is still too rare.

But the journey was still abundantly rewarding.

People must learn to be content.

...

Ancient Dragon Continent.

Witch's Family.

In the laboratory, Triss was visibly excited.

She was staring at a dreamy blue potion in front of her.

The assistant Elena felt the same way.

"You've succeeded, the Nightmare Series' Seven-Circle Breakthrough Potion! You've done it, Triss!"
