

Wizard 248

Chapter 248: Blood Beast Limit Breaker, Deep Sea Level 2!(6)

In general, this mission was not difficult. The reason why many high-level apprentice wizards did not choose this mission was that this mission required them to learn a cantrip and occupy a spell slot.

This cantrip was called Flower Fairy's Dew, and it was a Zero-Ring Cantrip belonging to the Ocean School of Thought.

Levi came to the small garden. He came to the first plot of land in the herb planting area and chanted a spell. As he chanted, mist surged from the herbs in this small plot of land and gathered here.

When the mist dispersed, the petals, leaves, and roots of these medicinal plants were covered in dew, like pearls embedded in the medicinal plants.

These dewdrops were imitating the dew of the Flower Fairy.

Flower fairies were a very magical and rare type of spirit.

It was said that some wizards had raised flower fairies in their gardens.

The flower fairies could take care of the herb garden for the wizard. Wherever they were, they would produce some rain. This rain was the favorite thing of plants. It contained rich elemental power and nutrients.

However, due to the large number of flower fairies captured by wizards, their numbers were extremely low. Most wizards or pharmacists did not have such things.

Later on, some wizards imitated the flower fairy's ability and developed this zero-ring cantrip.

Of course, the effect of this cantrip was definitely not as good as the Flower Fairy's, but it was still much better than the ordinary rain in nature.

Other than watering the flowers and applying fertilizer, the zero-ring cantrip, Flower Fairy's Dew, had no combat power.

Generally speaking, only a pharmacy apprentice would learn this kind of trick. Many wizards would not waste their precious spell slots to learn this.

Levi was different. He was considering the path of a part-time pharmacist. Therefore, after accepting this mission, Levi looked for Witch Marlene and got the spell model of this cantrip from her for free, saving him another 2 points.

After that, he spent half a month learning the basics of this cantrip, and now, Levi had reached the third level.

Levi—

Flower Fairy's Dew: Level 3 (5789/10000)

With the level 3 Flower Fairy's Dew, Levi's casting area was much larger than before.

In the small garden, a small plot of land was five square meters, and there were hundreds of such plots in the entire small garden.

The level 3 Flower Fairy's Dew was just enough to cover an entire plot of land. Levi's current maximum spell power had reached 36 points after consuming the potion.

It was almost comparable to his current 1+ points of spiritual force.

The Flower Fairy's Dew required 2 points of spell power to cast, and Levi could cast it 18 times a day. He only needed to water once, and he could ignore it for a week.

Therefore, Levi could basically water all the herbs in the small garden once a

Week.

To be honest, this kind of work was very tedious and tiring.

However, Levi was enjoying himself.

He had already been in the Gray Tower for half a year.

As a low-level apprentice wizard, he only had two cantrips, which were the Insect Controlling Technique and the Flower Fairy's Dew. In the eyes of other apprentice wizards, these cantrips were not serious spells.

However, Levi did not mind. To be honest, with his current strength that was comparable to a legendary knight, he really did not care about the power of apprentice spells sold by the Gray Tower. They were not as powerful as his fists and seals.

On the other hand, Levi liked this kind of auxiliary cantrip.

Because all of Levi's hard work in the past six months had been seen by Witch Marlene.

Therefore, Levi could feel that this official wizard's attitude towards him was getting better and better.

She really saw Levi as her successor.

Levi knew very well how precious the legacy of an official pharmacist was. Therefore, everything he did now was worth it.

Moreover, his progress in the field of wizardry in the past six months was not without progress.

The current Deep Sea Meditation Art was about to break through to level 2.

After completing the watering task for the day, Levi sat in the small wooden house in the small garden to rest.

While meditating, he took out the Klein Crystal.

"Spiritual Force: 4"

"Spell Power: 36"

Levi looked at his bracelet.

Currently, he only had 8 points on his bracelet.

In the past half year, he had earned 25 points as a pharmacy apprentice. He had also earned some points by doing some other scattered missions.

Unfortunately, before these points could be accumulated, Levi bought the Green Elf's Tears.

"When my spell power reaches 40 points, I will be able to upgrade the Deep Sea Breathing Technique to level 2. The entry-level standard for middle-grade apprentice wizard is 5 spiritual power points, and the upper limit of spell power is 50 points."

After Levi finished his work in the small garden, he returned to the Gray Tower.

He happened to see Senior Sister Winnie, whom he had not seen for a long time, walking with a high-level apprentice wizard senior brother. It seemed that they were going out to sea.

"Junior Brother Levi, we're going to Whale Song Island as guests. Do you want to come with us?"

Because everyone was very busy, Levi was even more busy with the pharmacy and watering flowers, so she rarely met Levi.

"I'm sorry, Senior Sister. This year's assessment will be held in a few days. I won't be going. There are still many courses that I haven't completed."

Levi looked at the eyes of the senior brother beside Senior Sister Winnie. It was obvious that he did not want Levi to come along, but because of Winnie, he was too embarrassed to say it.

Senior Sister Winnie was an extroverted person. She was beautiful and had a good temperament. She had many followers around her, many of whom were high-level apprentice wizards who lived on the 20th floor and above.

It was not that Levi was afraid of these apprentice wizards. To be honest, even if he did not use the magic seal and his quasi-wizard tools, he could easily defeat most of the high-level apprentice wizards of the Gray Tower just by relying on his knight's ability.

However, Levi did not like to cause trouble.

"Alright, then we're leaving." Winnie and the senior brother left excitedly.

Levi returned to the ninth floor alone and went to his pharmacy lab.

After half a year of practice, his Pharmacy skills had just broken through to level 5 a few days ago, and reached the level of a high-level pharmacy apprentice.

As a high-level pharmacy apprentice, he could start to refine Green Elf's Tears. He had already bought the materials in White Tower Town. The materials for the Green Elf's Tears were relatively expensive, costing 100 gold coins per portion. However, it was still much better than spending 2 points to buy it.

For the next few days, Levi spent all his time in the pharmacy lab refining medicine. He also took part in the assessment. The final result was "Excellent" in the basic theory course, and "Fail" in the actual combat course...

As a knight's abilities were not allowed to use in actual combat, Levi did not want to use his seals either. He did not have any combat-type spell, so Levi always took the initiative to admit defeat as soon as he got on stage, leaving both the opponent and the examiner speechless.

Fortunately, the consequences of failing once were not that serious. It was just that he would not be rewarded with any points. Levi did not care. As long as he did not fail more than three times, he would not be expelled.

He just quietly trained his pharmacy skills and followed the established goal step by step.

Seven days later, he was already proficient in making Green Elf's Tears, and his success rate had reached half.

A month later, Levi's spell power reached 40 points.

His spiritual force and spell power had both reached the limit of a low-level apprentice wizard.

In the end, on a quiet afternoon, Levi's Meditation Art also broke through to level 2.

Levi's spiritual force had reached the level of a mid-level apprentice wizard.

At this moment, he felt that his perception was stronger than before.

He used the Klein Crystal to check.

"Spiritual Force: 5"

"Spell Power: 43"

The moment his spiritual force reached the level of a mid-level apprentice wizard, the Black Devil Blade, which had been at its limit for a long time, had also broken through to level 3.

As Levi thought about it, a black gas appeared behind him.

The black gas rose and went to Levi's back.

It condensed into a terrifying evil spirit with three heads and six arms, wielding nine swords!
