

Wizard 2481

Chapter 2481: Titan's Blood!

From first-circle potion to seven-circle potion.

It took roughly eight hundred years.

Even for a primordial soul wizard, how many eight hundred years does one have in life?

Therefore, the emotions of Triss are difficult for ordinary people to understand.

Each new potion formula is a major breakthrough.

Especially the Nightmare Series, where prior research experience is very limited.

Research must start almost from scratch, making it extremely difficult.

Fortunately, half a lifetime of effort has borne fruit.

The hardest research was for the six-circle and seven-circle potions.

The most valuable are also these two types.

Elena asked, "What should we name this potion this time?"

Triss thought for a moment and said:

"The previous six-circle potion was called 'Dream Lady,' so this time, let's call the seven-circle potion 'Mr. Nightmare Realm,' aligning with the theme of nightmares."

The Mr. Nightmare Realm Potion is top-tier among the seven-circle breakthrough potions.

It requires various seven-circle Nightmare Creature materials and ingredient refinement.

Also uses some demon materials.

Its breakthrough success rate can increase by 12%.

For seven-circle breakthrough potions, this is already quite high.

Not much worse than the Demon Series.

Triss's eyes were filled with hope.

"When I developed the six-circle potion previously, I exchanged the reward of war merit for a Bright Moon Artifact. The seven-circle potion this time should be enough to exchange for a Sun Refining Artifact. Hopefully, something useful comes of it."

Elena laughed and said, "If the faction doesn't match, we exchange internally."

...

Ancient Dragon Continent.

Levi arranged the seedlings brought out from the ancient tower to the academy's admissions office.

Next, they will be allocated to cultivation organizations based on their wishes and personal circumstances.

They can choose from the Witch's Family, Starfire Wizard Academy, or Tower of Dawn.

This time, there was only one Child of the Element.

The remaining dozen are dual-elemental affinity and special talent individuals.

There were some seedlings Levi did not bring out.

After all, the human forces on the fifth and seventh floors also need development themselves.

Upon hearing that Triss developed the seven-circle breakthrough potion, Levi went to the Witch's Family.

"Hall Master, you're here!"

A gentle breeze formed around Levi, and Windwalker Lisa materialized.

She exuded the aura of a fifth-circle senior, becoming more mature, and her temperament increasingly like her teacher's.

Unconsciously, this top-level genius was already over two hundred years old.

"Where is your teacher?" Levi asked casually.

"Teacher is in seclusion." Lisa chatted with Levi as they walked.

"Keep it up, young girl, I'll reward you once you reach a primordial soul." Levi patted Lisa's shoulder and turned to leave.

Lisa stood there, her emotions stirred; the Hall Master's reward must be generous.

Levi gazed at the wizard tower of the Wind Witch.

With her talent, future advancement to Grand Wizard is not difficult.

Once he becomes a Grand Wizard himself, he can lend her a hand.

The organization is still lacking its high-end combat power.

The Wind Witch is the closest to achieving that.

Triss's laboratory.

Levi admired the dreamlike potion in front of him, praising:

"You two are amazing."

Elena replied modestly, "I'm just a little assistant; it's Triss who is amazing."

Triss smiled slightly and encouraged:

"You've also made noticeable progress recently; your talent is quite good, but you're lacking in-depth research. It's all just scratching the surface."

Levi said:

"Once the potion passes inspection and if there's extra stock, Madam can put it on the shelves at Gandaph Pharmacy. In just over a decade, there will be the Blood Battle Auction. We can just get some money."

Immediately afterward.

Gandaph Pharmacy began publicizing and creating momentum for the 'Nightmare Realm Potion.'

Even good wine fears a deep alley.

Fortunately, Gandaph's reputation is big enough.

Especially during the recent Gondor City defense battle, the three were widely publicized again.

Gradually, many six-circle wizards heard about the new variety of breakthrough potion coming to market.

They looked forward eagerly.

Previously, the pharmacy's 'Dream Lady' and 'Water of Erasure.'

Both passed the test of time as good potions.

Especially the latter's invention, listed by the Pharmacist Association in the 'Potion Chronicles.'

This is a potion to be remembered in history.

Just like the Klein Crystal Ball.

Even if new Water of Erasure emerges in the future,

everyone will first think of 'Triss' the person.

...

Ancient Banyan Fairyland.

Levi released the mantis from the Black Soul Demon Tower.

He healed its injuries mostly with Death Ember Dragon power.

The mantis looked wary and still wanted to attack Levi.

Levi took out the seven eggs and said:

"Don't make meaningless struggles; I won't harm you or your children."

The mantis quietly gathered the insect eggs, unsure of what to do.

After thinking for a moment, Levi decided not to use Extreme Darkness Enslavement.

He must learn to use other means to tame these creatures.

Not rely too heavily on this method.

Only chaotic slaughtering demons or cunning evil devils need such extreme measures.

He imposed some simple restriction brands on the mantis.

"From now on, you'll be called Golden Blade Guest. Consider this your home."

The mantis silently retreated, finding a dense area of metal elemental power and peacefully settled down.

Levi tasked Ronan to keep an eye on it.

He wanted to give Golden Blade Guest some opportunities.

If it doesn't behave wisely, then only Extreme Darkness Enslavement remains.

Only after complete taming would he dare to let it guard the Dusk Holy Temple.

He took out the gains from this period.

Regarding oddities.

'Bone of the Winter Emperor' and 'Golden God Armor,' let the Holy Infant and Lord Victor refine them.

Also, a Bright Moon Artifact from the Earth Faction, which Levi did not recognize.

Its shape resembled a green-haired insect, but the front half was... human.

It was a green, vaguely feminine-featured person. Follow current novels on [novel•fire.net](http://novel.fire.net)

With two antennae on the forehead and sharp teeth in its mouth.

It had three pairs of prominent chests, exuding a strong aura of primordial motherhood and reproduction. .

A slender waist connected to a rounded worm body.

It felt like the queen of nature's ants.

Based on Levi's experience with refining oddities.

Earth and Ocean, these two life-nurturing elements.

Coupled with these odd plant and animal forms.

Such oddities have a chance to give birth to useful auxiliary spiritual creatures.

Such as Long, ADie, and others.

So this thing, he wanted to keep for himself to refine.

The rest are just some rare plants, herbs, materials, no need to elaborate.

Finally, Levi took out a Red Flame Storage Ring, which itself was an eight-circle wizarding device.

Judging by the rust, it may have lain at the sea bottom for over ten thousand years.

Its original owner's mark and aura had completely dissipated.

After opening it, a strong scent of decay filled the air.

Inside the ring was a heap of sea beast bones, Aether Stone, minerals.

Mixed and varied materials, and a chain-shaped long whip wizard tool.

Its surface was covered in scars, even broken into two sections.

With burning aura and radiant Holy Light intertwined, displaying its extraordinary attributes.

This is a nine-circle witchcraft device.

Chapter 2482 Frost God - ! Sailing the Star Sea!

Nine-Ring Witchcraft.

Levi took it out, a wave of heat blew across his face.

Even after enduring the erosion of time, it still retained such spirituality, proving its extraordinary nature.

According to Levi's knowledge reserve in Artifact Refining.

The material used for the Wizard Tool is a rare elemental metal belonging to the dual factions of Burning and Light.

Its name is [Fierce Sun Gold], said to be produced from the interior of the Sun.

Of course, the so-called "Sun" in this universe is actually a certain burning plane.

Besides some Fire Elemental Spirits, there are no other living beings in such a plane.

Even the Burning School Wizards cannot reside there permanently.

Being able to control flames does not mean one can live there forever.

And the largest Sun in the entire Pan-Plane is the Red Plane, which nurtures the Fire Sovereign.

One can understand the Pan-Plane as a massive stellar system.

It is extraordinarily gigantic; in terms of area alone, it surpasses the current Nora.

However, no matter how large the Red Plane is, it is an incomplete world.

Aside from Fire Elemental Spirits, it cannot birth other civilizations.

On the handle position of the whip, there are mysterious characters.

The top has relatively ancient wizard common language.

[Bellman's Whip].

"Bellman? An ancient Grand Wizard of the Nine Cities Alliance."

Levi had some impression of this person.

Because he established Norn City, elevating it to the top ranks of organizations.

This person left behind great war merits during the early plane-opening wars of wizard civilization.

He also hunted many level 9 demons in previous Blood Battle eras.

It seems this whip is Bellman's legacy.

But due to some reasons, it was damaged and brought into the ancient tower by unworthy descendants.

Then it fell and was forever lost there.

The reason Levi is so knowledgeable about the history of Norn City.

Was the research done to counter the Fiery Flame Servant.

Even after seven hundred years of Blood Battle, Norn City still firmly holds its place among top organizations.

However, compared to its peak times, it is somewhat inferior.

Levi renamed Bellman's Whip to [Fiery Sun Whip].

This is a top-grade divine weapon against demons and other dark creatures.

Once at the ninth-circle, one strike can cause real damage, exploding the demon.

Other items in the ring are insignificant compared to this whip.

This journey to Hell did not yield a blind box purchase.

Thus, the anticipated box opening ritual is absent.

Six months later, Levi refined the oddity resembling an ant queen.

He opened the Klein Crystal Ball.

[Spiritual Force: 20500/25600]

...

First, the spiritual force increased by 160 points, fairly standard.

Only a 1500-point gap remains to reach Eight Ring Perfection.

Secondly, the earth element affinity talent has somewhat improved.

An affinity named [Earth Mother's Care] has been birthed.

No need to say much about other routine functions.

Levi's most important goal is to birth a companion spirit.

For this, before refining, he first performed the "Luck Changing Coin".

And activated [Absolute Luck].

Fortunately, he was successful.

Levi named the companion spirit [Green Queen].

It was somewhat shy upon arrival.

Levi soothed it with spiritual force and called it out.

A companion spirit resembling that oddity crawled out.

It was only the size of Levi's palm, head down, arms folded over chest.

Its chubby body swaying side to side.

Green Queen's upper body was humanoid, so Levi did not use names starting with "Long".

"Go ahead, this is your home."

Levi placed Green Queen on the ground.

After a moment of hesitation, it began to explore the surroundings.

As it wandered, earth elemental power started to gather in the world.

Green Queen's form began to expand.

By the time it reached under Mana, it had become a gigantic entity a thousand meters long.

Long poked its head from the soil, curiously observing the new colleague.

Green Queen seemed to find under the banyan tree safer.

It dug down along the tunnel Long had created.

"So itchy... Levi, what is this?! It's rubbing against my foot!"

Mana awoke from sleep, the tree roots rustling.

A strong presence was felt.

Green Queen shivered in fear.

Clunk.

A green egg dropped from its rear.

Upon encountering the soil, the egg quickly hatched into a green ant.

Oh no, to be precise, it was not an ant.

It was a bee, because it had a pair of small translucent wings.

Buzz buzz buzz!

The bee flew into the vast sky.

Within Levi's Perception, it went to Dreamy Cloud Swamp where the Saint Fruits were planted.

The flower sea was in bloom.

The Dragon Turtle leisurely slept among the flowers.

Diligent little fairies, or some insects, were fertilizing among the blossoms.

The bee went straight in to work.

Its efficiency startled the little fairies beside it.

In an instant, a small patch of Saint Fruits was fertilized.

The bee covered in pollen returned to Green Queen's nest.

Its form merged into Green Queen's body.

And then in Green Queen's translucent abdomen.

A trace of emerald honey began to take shape.

Emitting an intoxicating sweetness.

Upon seeing these, Mana knew what it was.

Another farming contraption created by Levi.

She sniffed slightly: "This honey smells delicious."

Levi laughed: "It should be as good as Immortal Flowing Liquid."

Not long after, that honey solidified into green gemstones the size of rice grains.

Green Queen expelled them, and Levi caught them.

These must be good things; as for their function, he needs to research.

In the following days.

Green Queen started laying more and more eggs.

Soon, the Ancient Banyan Fairyland was filled with millions of Little Bees.

Chapter 2483: Frost God - ! Sailing the Star Sea!

They are hardworking and capable, never complaining.

Shuttling back and forth between the medicinal fields and their nests, a straight line from point to point.

All just to make sweet honey.

This is the perfect companion spirit Levi desires.

Subsequently, the effects of the honey were also researched and understood.

This substance, once consumed, can enhance the physical qualities of life forms.

It's useful for transcendent creatures, the Dragon Clan, and even humans.

Even Levi in his realm finds some effect.

And it seems to have no medicinal resistance.

With long-term consumption, the effects become more apparent.

Of course, this enhancement cannot compare to the improvement brought by advancing breathing technique.

But as a daily beverage, it's quite good.

Without Heart-Cleansing Tea, Levi must find some substitute drink.

He named this thing "Immortal Grass Honey."

It reminded him of ADie's "Immortal Flowing Liquid."

Levi had a sudden idea.

Mixing these two special spiritual creatures with Spring of Immortality.

And paired with other rare materials.

Perhaps some good things could be concocted.

...

Time flies.

Three years later.

Nora Calendar year 921, Blood Battle year 710.

Gondor City.

Holy Infant refined "Winter Emperor's Blood" and "Bone of the Winter Emperor."

After nearly a millennium, the Winter Emperor Series finally reached Perfection.

His spiritual force limit and spiritual force both got an upgrade.

Getting closer and closer to the Seven Rings Limit.

The "Ice and Fire Divine Body" advanced further.

Companion spirit "Snow King" also experienced a world-changing transformation.

Its power grew stronger, far exceeding the King-level Series and even Emperor-level Series' spirit manifestations.

After all, it's a crystal born from the combination of the Sequence Artifacts of the Cold King and Winter Emperor.

It is a "mutating" variant of the companion spirit.

This phenomenon has only occurred on Holy Infant so far.

Now.

Holy Infant is only missing the three major sequences of "Red Dragon," "Frost God," and "Fire God" to achieve Perfection.

To forge the Supreme Complete Body of Ice and Fire Divine Body.

Regarding Witch Marks, Holy Infant has branded 22 Sixth Ring Witch Marks, 15 Seven-Circle Witch Marks.

The speed of cultivation compared to before is clearly much faster.

When he fully brands the Seven-Circle Witch Marks, it will be the day he ascends to eighth-circle.

Lord Victor has not refined the "Golden God Star" this Sun Refining Artifact.

But he refined the "Golden God Armor."

This Artifact increased spiritual force by 200 points.

Makes Lord Victor only 200 and some points away from the limit.

Additionally, he also birthed his own divine-level companion spirit.

A virtually shaped bronze longsword.

It is ancient in design, subtle yet grand, hinting at the majesty of a king.

To portray the distinct immortal style from this world for Lord Victor.

Levi named it "Xuanyuan Sword."

The companion spirit's function is simple.

Ultimate power of assault!

It can be used as a sword spirit, enhancing Lord Victor's secret techniques.

Lord Victor's sword control range, with himself as the center, radius of 10,000 miles.

Yes, it's truly astonishing.

Though he is only at the Seven Rings Perfect Realm, he reached the level of the erstwhile White Emperor's Son.

Seizing a head from 10,000 miles away!

This further elevated Lord Victor's combat power.

Heaven did not grant me Victor; the sword skill is as eternal as long night!

Pushing the path of sword cultivation to its limits.

In the Wizard World, cultivating Sword Immortal is Levi's last obstinance!

After all, the main body's style is hard to change.

Can only rely on Lord Victor to show apparent sanctity in front of people, to be handsome and impressive.

If one day, Lord Victor ascends to the legendary realm.

With legendary level secret sword magic.

Perhaps able to strike the entire Nora World.

Even, with one sword out, directly expedition to Multidimensional Plane might not be impossible.

Like Levi's "Thunder God," "Si Lei" combination.

"Golden God" and "Xuanyuan Sword" can also team up strongly.

Its direct combat power can already fiercely confront the eighth-circle ordinary wizard for a period.

Divine-level projection combined with companion spirit forms such a combo.

Before the ninth-circle, they are the trump cards for combat above their level.

Also, Lord Victor's "Golden God Body" becomes even stronger.

This makes Lord Victor's Witch Mark branded to 17 marks standard.

Only 5 marks short, can be perfected.

As for Gandaph, he is still refining "Titan's Heart."

Expected to need a few more years to exit seclusion.

After experiencing the last bloody battle.

Three Avatars' prestige in Gondor City is sky-high, second only to Gondor City Lord.

Deputy City Lord Renard closed a long seclusion to rebuild after possessing, resigned from the deputy city lord post.

So Lucian wants to invite Ace to become the deputy city lord.

However, Ace declined, and the other two also did the same.

They, like Levi, are not considered true politicians.

Just need to guard their own small territories.

Silently improving strength is the true path.

On this day.

People in Gondor City found.

Above Fire Dragon Sky Work, a Star Castle appeared.

This Star Castle is entirely reddish, painted with a stylish fire dragon pattern.

And four big words as a logo.

"Fire Dragon Sky Work."

Holy Infant stood in the wizard tower.

Star Castle opened, Fire Dragon Knight led the team to step out.

"This is the custom Star Castle purchased by Fire Dragon Sky Work, now delivered for use, please inspect."

Ace said with a smile:

"Thank you, Fire Dragon Knight, for personally escorting the Supernova, it's really a bit flattered."

Rumble! The Star Castle fell within the park area, an aura of oppression swept the entire city.

Gondor City's wizards were all alarmed by this.

"Is this giant the mechanical creation developed by Ancient Dragon Continent?"

"Isn't it? It's said to be called Star Castle, officially cooperating."

"This looks just like a real war machine."

"Rumor has it that this Star Castle can easily kill a sixth-ring wizard."

"Hiss, how terrifying, the times have changed indeed."

"Isn't it, mechanics changes life indeed."

Chapter 2484: Frost God - ! Sailing Far Into the Star Sea!

Ancient Dragon Technology, truly awe-inspiring!

From today onwards, Fire Dragon Sky Work will be entirely relocated within Star Castle.

If we encounter any dangerous situations in the future,

we can evacuate with the staff and engage in mobile combat, rather than defensively holding one city.

Of course, Gandalf Pharmaceutical and Daybreak Tower will also have them,

but they are still in the development process.

Lucian looked at this Star Castle, his expression moved.

"What a great thing."

He found Ace.

"I heard you have a good relationship with the Dusk Palace Master of the Ancient Dragon Continent."
Ace roughly knew his intention.

"City Lord, if you have something to say, feel free to ask."

Lucian smiled and said:

"Can this Star Castle be customized for a larger model?"

Ace: "That is naturally not a problem."

As the offspring of a legendary wizard and a talented individual in sect dual cultivation,

Lucian himself was not short of money.

He also had feelings for Gondor City, where he had lived for over a thousand years.

So he wanted to buy a Star Castle at his own expense to shelter the wizards in the city in the future.

This would also greatly enhance his personal prestige.

After all, after reaching the ninth circle, he would likely go into politics.

He also wanted to leave his father's shelter and build his own power.

Levi arranged for the Fire Dragon Knights to deliver the goods with such grandeur,

simply to gradually open up the sales channels for Star Castles.

This thing is expensive to produce.

Only high-level, top wizard organizations, or eighth-circle wizards have the financial capacity to buy it.

But once one is sold, business can be slow for three years.

Under the Holy Infant's matchmaking, Lucian personally went to the Ancient Dragon Continent.

He negotiated with the senior members of the Tower of Dawn.

Ultimately, he placed a 2 billion deposit to order a more advanced Star Castle.

For this, the Ancient Dragon Continent continuously increased the resources invested in the Mechanical School.

In times of war, developing heavy industry vigorously is the right approach.

Even if this development might be deformed and uncoordinated,

it is undoubtedly the most appropriate method for the current objective situation in the Wizard World.

To fight demons, rely on numbers and external objects.

Numbers by expanding alliances, external objects by developing machinery.

...

Witch's Family.

[Mr. Nightmare Realm] The potion successfully passed inspection.

Triss developed a new Seven-Circle Breakthrough Potion, which sparked heated discussions within the circle.

Many peers found it incredible.

Such a prolific pharmacist made them realize the gap between different people.

A supernova in the pharmacy academia, rising dramatically.

Triss also got a considerable amount of war merit rewards as she wished.

She went to the Blood Battle Temple to draw her oddity.

The final result left her somewhat regretful.

[Frost God Chapter].

This is a Sun Refining Artifact resembling a seal.

It belongs to the rare Frost God Series.

Generally, the rarity of special elements is higher than that of Earth, Fire, Wind, and Water.

Unfortunately, it doesn't suit her.

Fortunately, there's Levi; perhaps there might be a way.

...

Emperor's Palace.

Levi was instructing Elena on some combat techniques.

Helping her improve "Floral Secret Scripture," a combat technique she created.

Her path of knights is now at Level 6 Peak strength.

The bloodline crystals have gathered two types.

They are [Cherry Blossom Beast] and [Mortal Cranes].

The former is a giant beast that's tree-like but not a tree.

Its overall appearance resembles a plum deer.

It is covered with cherry blossom spots, while its pair of antlers is a branching cherry blossom tree.

The Cherry Blossom Beast has a gentle nature and enjoys mountain and water outings, and traveling across planes.

It contains a strong life force, leaving a path where flowers bloom instantly, and immortal energy drifts.

For many smaller civilizations, this is a miracle.

Thus, it's called the "Mountain God."

The Cherry Blossom Beast, similar to the Immortal Banyan Dragon, is a leader in longevity among their respective species.

Moreover, it also enjoys running to places where the World Tree exists.

The Hundred Flowers obtained this bloodline crystal from the bloodline descendants in Pandora World.

As for [Mortal Cranes],

it is an ancient bird species that existed in ancient times, most of which have gone extinct.

There is a bloodline descendant, [Ten-thousand-year-old Crane], raised within the secret realm of [Lilith's Cabin].

It passed away due to old age some years ago, and its bloodline crystal was auctioned, winning a high bid from the Hundred Flowers.

The crane's lifespan is extremely long and is a phenomenon among all transcendent bird species.

Additionally, this creature also aligns with the aesthetics of the Hundred Flowers.

She simply loves this kind of immortal aura.

Levi also found it quite suitable.

In Levi's past life, the crane was also a fascinating creature.

It was always linked with imagery like pine trees.

This and the Immortal Banyan Dragon, as well as the Cherry Blossom Beast, also share a similar resonance.

When combined, the three might even produce a wonderful reaction.

For the last bloodline crystal, Elena hasn't decided yet.

She still wants to choose the Ash Dragon, Undying Bird.

This might bestow her with the ability to reincarnate and be reborn.

Of course, if there are other suitable options, they could also be considered.

In any case, she's not in a rush.

The timing will be just right next.

"Levi, are you busy?"

Triss's voice came through.

Levi said, "No, is there something, madam?"

"Phew, that's great, it's break time." Elena happily went to welcome Triss.

Practicing sword with Levi was truly exhausting.

This guy was just like a robot.

Triss was wearing her pharmacist robe, looking quite casual.

As she approached her 2000th birthday, she appeared more dignified and elegant.

Perhaps it was due to her long-term research into potions.

She always exuded a faint scent of medicine.

The name Medicine Witch is well-deserved.

Levi keenly perceived that Triss's spiritual force seemed to have stagnated.

"Madam, have you reached the maximum spiritual force?"

Triss nodded.

"Yes, it's been that way for a while now."

Levi smiled faintly: "Then let me congratulate you in advance for your smooth advancement to the eighth circle."

Triss sighed slightly: "It's not that easy, I'm not like you."

Chapter 2485: Frost God - ! Sailing Far Into the Star Sea!

She is now at 22 six-ring Witch Mark Perfection, and still 3 away from the seven-circle Witch Mark.

Advancing to the eighth-circle within a century would be impressive; she has already been at the seventh-circle for over a thousand years.

Besides, she needs to prepare the medicine for advancing to the eighth-circle.

Thinking of this, Triss suddenly said:

"In the past, I refined potions for you, now it's your turn to act."

Levi smiled and said, "No problem."

"Then I'll prepare the materials and come to you. Today I mostly came to ask if there's a way to trade Sun Refining Artifact here." Triss sat down and said.

Levi asked, "I have an oddity from the Ocean Faction, but it's quite niche and I'm not sure of its function. What are you?"

Triss spread her palm, and a seal floated in the void.

It was square, exuding cold air.

"Frost God Chapter?"

Levi's heart skipped a beat.

Isn't this a coincidence?

Holy Infant is just short of this Ice and Fire Divine Body to be almost completed.

After that, only some Morning Star, Bright Moon Artifact will be left.

He took out a blue oddity in the shape of a ring.

It was like a blue wheel, endlessly spinning clockwise.

This kind of niche oddity does not have the stability of a Divine-level sequence.

It could be very strong, or relatively average.

So if one were to sell it, it certainly wouldn't be as valuable as the Frost God Chapter.

But Triss showed an expression of delight.

"What is this oddity called?"

"Sea Country Wheel? Why? Do you know this oddity?"

"Not really, it's just that this oddity seems to be unrelated to me."

Triss was not joking.

This was an inexplicable sense.

As if something inside her was mutually attracting with this oddity.

"Then should we trade?"

"Trade, thank you."

The two sides reached a deal, and Triss put away the oddities.

Levi reminded:

"Lady, refine after the eighth circle to avoid wasting the opportunity to enhance spiritual force."

"Yes, thanks for the reminder."

Triss was in a good mood.

She said, "I won't attend this year's auction. After returning, I'm going into seclusion to prepare for ascending to the eighth circle. If there are alchemy materials I need at the auction, Levi, you help me acquire them, and I'll pay you back when I return." RÂÑøBÈ S

Elena: "You're not going? It's a rare event every century, it'd be a pity not to join."

Levi assured:

"You can rest at ease in seclusion; anything you need, tell Elena."

Ascending to the eighth-circle is important.

Apart from him, the Witch's Family only has one eighth-circle wizard.

Even the declining Letney Family has four eighth-circle wizards.

He believes with Triss's thorough preparation and talent, the eighth-circle is no problem.

Afterward, Holy Infant obtained the [Frost God Chapter].

He also refrained from refining it, waiting until after the eighth circle.

...

Nora Calendar 926.

Blood Battle 715.

Ancient Banyan Fairyland.

Levi was 1350 years old.

The research on [Immortal Grass Honey] has been progressing smoothly over the years.

Levi successfully concocted a brand-new medicine.

It is golden throughout, dreamy and ethereal, with a lingering aura of immortality.

He named it [Emperor's Liquid].

Emperor's Liquid has three main effects.

Firstly, it improves physique, applicable to all stages of wizards so far.

Of course, the higher the realm, the weaker the effect relatively.

Although wizards don't mainly cultivate the physical body, improving physique is certainly all benefits and no harm.

Secondly, prolong life.

Previously, Immortal Flowing Liquid had the effect of prolonging life.

After Levi's experiments, taking it once can increase lifespan from ten years to a cycle of life, varying by individual's physique.

Of course, it is only effective for mortals and low-level wizards.

But the new Emperor's Liquid also works for middle-level wizards.

The maximum for prolonging life has reached a hundred years.

Indeed, a hundred years is not long for most wizards.

But for some wizards, it might be a life-saving straw.

Emperor's Liquid requires [Top-grade Immortal Dew] from ADie, and the yield is typical.

Currently, it isn't enough for Levi to supply his close associates.

So he hasn't made it public.

Just prioritizing supply to those around him.

Lastly, Emperor's Liquid has an even more notable effect on promoting transcendent creatures.

According to legends from Levi's past life, Emperor's Liquid can transform flora into monsters.

This one, however, promotes the development of monsters.

Therefore, calling it Emperor's Liquid isn't excessive.

Of course, Emperor's Liquid is too scarce, and giving it to transcendent creatures' drink must be diluted.

Thus, after the [Flying Immortal Platform Wine], [Five Immortal Liquid] emerged.

The future banquets in the Ancient Banyan Fairyland will feature these two drinks.

During this period, Levi also fully digested the gains brought out from the ancient tower.

Just last year, the Inferno Dragon Breathing Technique also successfully advanced to level 8 Mid Stage.

The abilities of the Undying Body and Undying Divine Domain have become more powerful.

The Nightmare Dragon Breathing Technique is also close to a breakthrough.

In terms of spells.

The 11 learned spells before are generally above nineteenth rank.

The next step is steadily cultivating to nineteenth rank maximum.

These years, Levi also learned 4 eight-circle magic spells.

[Gold Seeking Dog], [Withering Curse], [Shadow's Fury], [Thunder Ghost].

The first is a spell from Metal Faction.

After casting, a Golden Hound can be summoned.

The Hound is particularly sensitive to metallic ores.

After cultivating to maximum.

If there are ore veins or rare metals within thousands of miles.

The Hound will definitely not miss them.

Much more reliable than Jin's relying on luck.

This spell mainly facilitates Levi's exploration of the Multidimensional Plane or Dark Ancient Tower.

The second is from the Curse Faction.

This is the first curse spell Levi mastered.

It was obtained by a member of the Tower of Dawn during the exploration of a relic.

That lucky fellow thus received many rewards and soared.

Chapter 2486: Frost God - ! Sailing Far Into the Star Sea!

Initially, he wasn't very talented, yet he successfully advanced to the fifth-circle.

By taking a part of the enemy's body tissue or residual aura, he can cast spells.

Once cast, the light result is body damage and withering, the severe result is death and annihilation.

The specifics depend on the cultivation gap between the two parties and the caster's mastery of curses.

Levi studied this method to enrich his spell system.

He didn't truly wish to curse anyone...

The third spell was researched by Levi himself, taking quite some time.

The final result was very good and can be called an excellent grade spell.

By invoking the extreme rage power of shadow creatures, it stimulates the body's potential.

In a short time, it can boost the strength level by one-fifth.

It's quite good, considering it's a group spell. .

It pairs perfectly with "Shadow Wind" and "Leonardo's Sound Barrier".

The last spell was gathered by the organization members.

After casting, it can summon a terrifying Thunder Ghost descended from the Void.

The realm of the Thunder Ghost is equal to the realm of the caster.

With Levi's Thunder God Body, the summoned power is imaginable.

Moreover, with his talent, cultivating spells like this is quick.

It's considered a little bit of a shortcut.

Not long after, once he started learning these spells.

Levi initially mastered 15 Witch Marks.

The Ice Emperor's Throne is still not in hand.

He dares not slack.

After resting for a while, he embarked once more on the demon-hunting journey.

...

Time flies like a white horse galloping past.

Five years later.

Nora Calendar year 931, Blood Battle year 720.

The centennial auction opened once again.

Triss had already begun a retreat to sprint towards Witch Mark Perfection.

Before this, she handed over all the pharmacy materials she gathered to Levi.

Levi helped her refine the breakthrough potion.

A thousand years later, they finally swapped roles.

From now on, it will be Triss asking him for alchemy.

Perhaps this is the meaning of inheritance.

The premise is that the vision is accurate, investing not in an ingrate.

After years of demon-hunting, Levi's points reached 6.2 billion, and war merit also reached 2 billion.

After striving for a dozen years, he could exchange for the Sun Refining Artifact.

No one has exchanged for this artifact yet.

It seems it is meant only for him.

In the past years, demons did not dispatch level 9s to target him.

Maybe they discovered that level 9s were useless, so they gave up.

Of course, his Danger Perception hasn't weakened much.

Levi understood, his dazzling battle achievements had become a thorn in the eyes of demon high-ups.

Those guys must be plotting some bad ideas against him.

If it weren't for the legendary wizards holding the sky in the Wizard World.

Levi would have run away a long time ago.

Being watched by strong rulers day and night is indeed uncomfortable.

Because he had to attend the auction with Elena, he temporarily stopped demon-hunting.

Triss gave the list of materials she needed to Elena.

The two prepared and went to the Blood Battle Temple.

As for the Three Avatars, they continued developing in Gondor City.

Anyway, whatever they need, Levi knows clearly.

Whether participating or not, it doesn't matter.

Just send the money to him.

Levi brought another hefty sum just short of 20 billion.

He displayed sheer grandeur.

During his participation in the auction.

Over there in Gondor City, Gandaph finally finished refining Titan's Heart.

His energy and spirit completely renewed compared to before.

Breathing, it seemed like he could shake the earth and mountains.

As if he had become a Mountain Giant.

To be precise, a Mountain Titan!

God of Mountain Giants!

Gandaph, invigorated, casually punched in the Nightmare World a few times.

Whoosh! Thirty-three Dragon Elephants surged out!

"So strong, achieving thirty-three Dragon Elephants effortlessly."

And this wasn't even his maximum.

Titan's Heart effect is exceptionally strong.

Although it's not a Sequence Artifact, its effect is on par.

Firstly, Gandaph's spiritual force increased by a full 1000 points.

What concept is this, it's equivalent to the Flame Emperor's Sword refined by the main body.

This means it ranks among the best in Sun Refining Artifacts.

This improved Gandaph's spiritual force to 11,311 points.

Instantly breaking through the seven-circle Perfection realm, only nine hundred plus to the Maximum.

Secondly, Gandaph also gained the Glorious Sun-grade Earth Affinity Talent. Read complete version only at Nov3lFire.net

Titan's Heart!

This is a significant Special Talent.

It let Gandaph easily cultivate Earth Faction body tempering techniques.

Then, the most crucial Titan Rune.

This is where the artifact benefits body-refining wizards the most.

Titan Rune transformed Gandaph's current Dragon God Refining Body Rune.

Elevating all its attribute aspects to a higher level.

Its effect is akin to spell wizards improving their innate spells.

The most direct representation is the explosion of strength.

Before this, Gandaph's Dragon Elephant Fist was stuck at a bottleneck.

He could at most only manage thirty Dragon Elephants.

After refining, he easily broke through the bottleneck.

He estimates that his exploded power limit in one punch could nearly reach forty Dragon Elephants.

Once his body tempering technique realm advances, a hundred Dragon Elephants won't be a dream.

The only slight downside is that no special spiritual creature was born.

Also, because it is not a Body Refining Artifact.

Therefore, the enhancement on Dragon Elephant Holy Body kind of body-refining talent is also minimal.

Next, he needs to concentrate on researching the Purple Crystal Body Refining Technique.

Sooner retrieving the congress's Glorious Sun-grade Body Refining Artifact.

His strength will surely undergo metamorphosis.

Overall speaking, Titan's Blood is much stronger than he imagined.

Practicing the Thousand-Eyed Titan Body Tempering Technique next will definitely be smooth.

With such a boost in spiritual force, Gandaph dare not act recklessly.

Chapter 2487: Frost God - ! Sailing Far Into the Star Sea!

As he stabilizes his realm, he studies the medicine.

The "Nine-Headed Hell Snake Body Tempering Technique" has already been cultivated to the sixth environment realm by him.

The distance to full mastery is not far away.

He even started thinking ahead about what name to give to his future body tempering technique.

...

Tower of Dawn.

"Mother, I have achieved Fifth-Circle Perfection."

Heim arrived at Lillian's wizard tower.

Lillian looked at Heim, who was not yet two hundred years old.

Over the years, she has also noticed that Heim is different from his peers.

He is excessively mature, calm and deep.

She has also heard some rumors about legendary wizards reincarnating.

She has some guesses in her heart.

Putting away her complicated emotions, Lillian smiled and said:

"Keep up the good work, child, remember to be ready before you ascend to the primordial soul; you have plenty of time, there's no need to rush."

It's important to know that Heim, up to now, hasn't even refined a Truth Oddity.

He has relied solely on his powerful Three Initial Talents to reach this point.

Pique also said, "Keep working hard, your teacher is your role model."

Heim nodded deeply, beginning his closed retreat.

This retreat will last a long time.

But the next time he emerges, he will be a primordial soul wizard.

This might be the fastest advancement to primordial soul in the Nora Era.

...

Dream Academy.

Heart Moon Spirit Witch Natasha is making steady progress, also entering the senior realm of the sixth-circle.

In her exchanges with the Dreamland Steeple, she has gained immense benefits.

Her level of knowledge has rapidly improved.

The upper limit of her Nightmare Summoning Spells has been repeatedly broken.

This allows her to have a considerable force of Nightmare Creatures.

Her rank is steadily rising on the Level 7 leaderboard.

In recent years, the academy has also produced several potential seeds that might ascend to the primordial soul.

The development momentum of the School of Dreams is getting better and better.

...

Shadow Academy.

Aya has already branded 18 Sixth Ring Witch Marks.

She firmly ranks within the top five of the Demon Slaying List, with remarkable war merits.

Subsequently, she also refined several Shadow Artifacts brought out from the ancient tower by Levi.

Furthermore, with the consumption of Shadow Berry, her cultivation is twice as effective with half the effort.

It won't be long before she can perfectly ascend to the seventh circle.

Sorrett's disciple Sta, Sakura Witch, Calona, and other geniuses.

In recent years, they too have been steadily progressing, shining brightly in their respective schools.

Anya has even become Herman's right-hand man.

She is an elder-level figure in the Mechanical School.

Her own cultivation is not far from the seventh circle.

There are still 70 years left until the end of the first millennium of the Nora Era.

Everything is changing.

...

On this day.

Ancient Dragon Continent.

On the Star Castle Platform of the underground world.

The Ash Knight led the Apostle Group, fully dressed and ready to depart.

Surrounding them were wizards with expectant, excited, or nervous expressions.

Today is a special day. The source of this content is Novel[F]ire.net

After careful consideration, Ancient Dragon Continent decided to begin the first plane exploration.

The Star Castle Plan has been implemented for over two hundred years.

Now, eight star castles have been refined in the first stage.

The progress speed is far beyond what Levi and Herman initially envisioned.

All of this is thanks to the official support and the massive investment of funds and talent.

Therefore, this exploration is jointly facilitated by the military and Ancient Dragon Continent.

The military dispatched an elite wizard group.

Coincidentally, it was the Mountain Giant Wizard Group led by Laplace, who succeeded his cousin Soraya.

He's long wanted to explore the Multidimensional Plane, ushering in a new era.

Coincidentally, his father is also a significant figure in the military.

And Levi has a favorable impression of him.

So he was selected to participate in this action.

Laplace has achieved Seven Rings Perfection and is a top-level prodigy.

With him in charge, there's even more assurance.

On the Ancient Dragon Continent side, the Ash Knight was transferred from a branch.

He possesses a Mythical Breathing Skill, strong survival ability, and extensive healing methods.

So, although he's only at the early stage of level 7, he is the best choice for this journey.

Levi also wants to take this opportunity to temper the Eighteen Riders well.

During the blood battle, of course.

The danger level in the Wizard World isn't much better than in the Land of Darkness.

Or rather, even more dangerous.

The Ash Knight drew some elites from various Apostle Groups.

Including talents from the six dimensions, allowing for perfect cooperation.

His wife, the Snow Lotus Witch, will also be accompanying him.

Along with others selected from the Witch's Family, Tower of Dawn, and Starfire Academy.

Their cultivation is all middle-level and above.

The professions include:

The Three Arts of Wizardry, Supreme Divine Talisman, biologist, plane scholar, alien language scholar, etc.

Trying to ensure the lineup has no weaknesses, guaranteeing the smooth sailing of this journey.

Because it's the first time, to ensure everything goes smoothly.

The officials have arranged for a senior with rich experience in plane travel to preside over the operation.

This senior is Mr. Cloud Mist Dragon.

Indeed, a level 9 expert personally guarding.

This demonstrates the official attention.

Of course, Cloud Mist Dragon is only there to turn the tide.

It wouldn't be disturbed most of the time.

Aside from the high-level officials, even ordinary crew members are unaware of its presence.

The specific leadership tasks are entrusted to Laplace, the Ash Knight.

The Star Castle's voyage, the fortress master is crucial.

This position is held by the Ash Knight.

Because he can communicate with Levi anytime through the Twilight Round Table.

Levi himself often travels the Pan-Plane.

Also, the Spider King, the great manager of the Land of Darkness, has ample experience.

The Vice Fortress Master is Laplace.

This voyage is expected to last around three hundred years.

After three hundred years, whether or not they have completed the expected tasks, they must return as soon as possible.

To this end, the Star Castle is equipped with sufficient fuel and supply.

A Beast Garden has also been opened for the accompanying knights to accommodate their mounts and transcendent creatures.

Ensuring their cultivation is uninterrupted.

The same goes for wizards; they are well-equipped with various medicines.

Laplace brought a level 7 Space Treasure from the officials.

Used for accommodating transcendent creatures, alien races, etc.

The exploration gains must also be shared collectively.

The captain and high-ranking members will reward or punish based on the travel group's performance.

Similar to the policies of various organizations exploring Dark Ancient Tower.

In short, this is a meticulously prepared journey.

Levi, engaged in demon-hunting, personally came to the scene. .

The military also sent a Grand Wizard personally.

He is Iron Blood Walker Patricia, Laplace's father.

He ascended to Grand Wizard early and has unfathomable strength.

Cloud Mist Dragon transformed into an elegant white-robed gentleman, resting with eyes closed.

Levi gazed ahead.

"Tonight, you are setting sail. I hope the three hundred-year voyage can bring you growth and metamorphosis, and rescue more lives in the Pan-Plane. I wish you all a safe journey, as heroes of Nora you will return."

Iron Blood Walker briefly stated:

"Laplace, take good care of everyone."

After the farewell.

This star castle, representing the official start of the Pan-Plane Salvation Plan, roared into action.

Blue flames spewed, space trembled.

Mechanical creations shattered the void, sailing towards the starry ocean.

The Ash Knight and others glanced at the Ancient Dragon Continent below.

Excited, uneasy, nervous, unknown...

Various emotions intertwined, ultimately forming a single sentence:

"Nora, see you in three hundred years."

Chapter 2488: Radiant Sun Regained, Lion Emperor Solomon!

Ancient Dragon Continent.

The participants of the Star Fortress plan stared blankly at the starry sky.

Their faces were filled with a sense of accomplishment and anticipation.

This is just the beginning.

Soon, more Star Fortresses will emerge.

They will continuously escort the civilizations on the brink of destruction to Nora.

More resources will also be channeled here.

Thereby accelerating the process of plane convergence.

...

The Blood Battle Auction concluded successfully.

Most of the wizards who participated left satisfied.

The wealthy spent extravagantly at the auction.

Even those without money could haggle at the stalls.

Levi was among the former; he spent over 13 billion this time.

Among which 6 billion was for hoarding various rare materials.

For one, the wizard tower, and two, to refine the Eighteen Layers of Hell Array.

He also spent 800 million to purchase a Morning Star Artifact [Silver King Badge].

Lord Victor had previously refined the [Silver King Badge], which was also Morning Star-level.

With three more artifacts, the set can be completed.

After refining the Silver King Badge, Victor's spiritual force was increasingly near the Maximum.

No accompanying spiritual creatures were born this time.

With [Xuanyuan Sword] and [Golden Emperor] as his two main tools in hand.

Such King-level series are dispensable.

The other major expenditure for Levi came from a seventh-level rare treasure.

Named [Black Soil Pearl], worth 4 billion Aether Stones.

This is a Space Treasure, with an Inner Heaven and Earth inside.

Such treasures are rare and more is always better.

It's very useful for relocating organization bases and personnel.

Even if discarded later, Mana can refine its space, preventing waste.

The clan treasure [Wind Destruction Realm] Levi previously acquired.

Has now become the Tower of Dawn's treasure.

The last 2 billion, he still used to purchase a Dark Treasure Map.

He can explore it himself later or have the Spider King send a duplicate to do so.

Elena also spent a lot.

First, she bartered at a gathering for the [Water King's Ring], a Sky-level Artifact.

After refining, her spiritual force received a marginal improvement.

A new accompanying spiritual creature was born, named [Dark Giant Shark].

Exactly the type of spiritual creature Garcia previously used.

Its power is fair, stronger than the [Amber Dragon].

But far from matching the [Sky Water Stingray].

Elena's [Water God Body] also improved with the completion of the Water King Series.

The Water God Body has strong inclusivity.

It can fuse with any Acquired water-element special talent.

Levi's Thunder God Body and the Holy Infant's Ice and Fire Divine Body are both the same.

Through this, Elena unlocked the perfect achievement for the Water God Series Artifact.

In truth, there was another Morning Star-level Water God Series Artifact at the auction.

It was a small part Elena hadn't refined.

However, another eight-circle perfect wizard at the auction also desperately needed it.

This artifact's price was driven up to a terrifying more than 3 billion, far beyond its real value.

Levi, not short on money, could support Elena in bidding aggressively.

But Elena gave up. Read complete version only at [Novel\(F\)ire.net](http://Novel(F)ire.net)

She thought it was too expensive, not worth wasting so much money.

She could always wait patiently for another chance.

Those who have spent time with Levi develop the excellent virtue of thriftiness.

Levi felt relieved inside.

He too was reluctant to buy it.

Though he wasn't lacking money, it's better to spend it wisely.

Elena also purchased a seventh-level bloodline crystal, costing 2.8 billion.

From a seventh-level creature [Rebirth Gu Worm].

The Rebirth Gu Worm is a descendant of the Legendary Creature [Star Worm].

The [Star Worm] has a reincarnation ability akin to the Ash Dragon.

This creature's youngling takes twenty thousand years to cocoon.

And then it must endure twenty thousand years of not eating or drinking, unable to move during the cocooning period.

Thus, after forty thousand years, it will transform from a cocoon to a butterfly, reaching Complete Body.

At that time, it will no longer be called Star Worm.

But [Sang Butterfly].

Millennia later, it will be reborn randomly on a plane through reincarnation.

The youngling will host near the plane's will origin, devouring its strength for growth.

Thus, a fifty-thousand-year cycle occurs.

Interestingly, the Sang Butterfly also enjoys inhabiting beside various divine trees.

Such as [Divine Mulberry Wood].

It is said that in the Pan-Plane of ancient times, there was a Divine Mulberry World.

Established by a sky-reaching mulberry tree.

But it perished with the dissolution of the Frost Giant civilization.

Regardless, Hundred Flowers has solved the issue of her ascension materials.

Combining four bloodlines: Cherry Blossom Beast, Mortal Cranes, Star Worm, Immortal Banyan Dragon.

A blend of disparate biological types like insects, beasts, birds, and dragons.

Very likely to give rise to an aberrant being akin to the Ash Knight.

Finally, Hundred Flowers also bought some items for Triss.

Mainly potion formulas, materials, and such.

Additionally, Triss's Soul Artifact is now somewhat lagging behind her abilities.

Thus, she commissioned Elena to buy some materials, then asked Master Fire Dragon to refine a Wizard Tool.

Though she does not fight much as she is a technical talent, her equipment must also be improved.

Leaving Sorren Continent, Levi returned home to spend some time with Hundred Flowers.

Then tirelessly headed to the North Sea to continue working hard.

Elena, meanwhile, proceeded with her cultivation step by step.

The next few hundred years are destined to be her busiest times.

Wizards must advance to the eighth-circle, Energy Sect and knights to Level 7.

And follow Triss in potion research.

...

Time flies.

Five years later.

The Nora Calendar 936, Blood Battle 725 years.

On a certain island in the North Sea.

Blood-red waves surged, staining the originally white beach a dark red.

A sinister demonic aura lingered, with thousands of devil corpses floating on the surrounding sea surface.

Shadows diligently cleaned up the battlefield.

Chapter 2489: Gaining the Radiant Sun Once More, Lion Emperor Solomon!

Not long ago, a monster rose to level 8.

It was none other than the Swallowing Sea Great Venerable.

Its shadow initially had a realm of level 7 Late Stage.

Under Levi's intense demon-hunting, it quickly returned to the level 8 realm.

Someday, it could grow to level 8 Late Stage, becoming Levi's first monster.

On the beach, Levi basked in the sun, enjoying a rare peace.

His points have reached 7 billion, ranking seventh on the list, with 2.8 billion war merits.

The first rank, Thunder Fire Governor, has reached 18 billion.

The second rank, Duke Rumon, has 15 billion.

There's no denying, those on the Ninth-level Demon Slaying List are all extraordinary.

These individuals must have refined more than one Sun Refining Artifact.

Themselves being Legendary Reincarnations, likely with other powerful means.

And coupled with Eight Ring Perfection, up to Maximum cultivation.

Even though Levi has the Shadow Dragon Talent, he can't easily reverse things as before. .

[Levi, there are a few demon-hunting missions, interested? — Lucy]

Levi sat up quickly and stretched.

[Yes, thank you, lady — Levi]

Over the past years, his points have increased rapidly, thanks to the lady's guidance.

Situations similar to Starfire Wizard Academy have happened several times subsequently.

Levi rushed to the scene to rescue, earning the title of the "Rescue Immortal" in the Wizard World.

This has greatly elevated the reputation of the Dusk Palace Master.

If previously, respect was purely due to strength.

Today, more people respect him because he has saved many wizards.

Now, he is a highly mobile sword, able to quickly provide support.

Wherever there's a demon, he fights!

The North Sea Demons all retreat when they see him.

Before long.

Levi arrived at the first mission location.

The Schubert Family's residence.

Everywhere he looked, were the corpses of Schubert Family wizards.

An official wizard battle group was using a combat array to fight the Demon Army.

Levi sighed heavily.

The Schubert Family has perished...

Not long ago, a Level 8 Demon deceived everyone and launched a surprise attack here.

This organization, whose strongest member was only a Seven-Ring ordinary wizard, didn't withstand long.

They didn't receive support from their master, the Letney Family, either.

Back then, this family continually obstructed the rise of the Fire Dragon Shop.

Now you see, time proves everything. UPDATE FROM novelfire.net

Harming others eventually harms oneself.

With Levi joining the battle, the situation instantly reversed.

He casts a Fire Dragon Tribulation with both left and right hands.

Double Dragons fired, then exploded beside the demons!

A Level 8 Early Stage Demon was left with only a breath.

The Sword Qi fell and the Demon Soul completely perished.

Levi transformed into a Thunder Dragon, rampaging across the battlefield.

The Thunder King's Court annihilated everything.

Not long after, the battle ended.

"Thank you for your support, sir."

"You're welcome."

Levi exchanged simple courtesies and continued to his next target.

This wasn't Lucy's main task for him, just an appetizer.

According to the intelligence Lucy held.

In a month.

A demon will launch a surprise attack on the Seven Waters Steeple's shipyard located in the West Sea.

The congress has already laid a trap, with the Earth and Fire Wizard Group stationed nearby.

Led by the supernova, Duke Rumon, responsible for the siege.

But Lucy feels there might be variables, thus she wants Levi to make a visit.

If successful, the gained war merits could last Levi three years without action.

Because just the confirmed Level 8 Demon Commanders alone, there are ten.

More than half are Level 8 Middle Stage, Late Stage cultivation.

Their leader is Level 8 Peak, the Wind-drinking Venerable.

Its essence is the Wind Demon, the great commander of the North Sea Region's Demon Alliance Army.

Several eight-circle wizards have died under its hand.

This is undoubtedly the largest-scale battle in the North Sea Region in the past century.

Hence, Lucy pays special attention.

Levi felt a bit proud inside.

It seems his mature, steady, reliable, and powerful image has been firmly established in the lady's heart.

Winning a strong person's recognition is quite pleasing.

...

A month later.

Seven Waters Steeple.

A rough-looking middle-aged wizard smoked a cigar.

He was Duke Rumon, with Eight-Circle Perfect Cultivation, dual cultivation of Earth and Burning Sects.

Behind him, a phalanx of five hundred elite wizards from the Wizard Group.

Just the number of primordial soul wizards is eighteen, called the "Eighteen Earls."

Two vice commanders among them are also eighth-circle wizards.

Most other wizards are primarily fifth-circle.

The lineup is as luxurious as top wizard organizations.

The warband wizards formed an array like a Heavenly Net.

Encircled within is the Wind-drinking Venerable's Demon Army.

It appeared unflustered and chuckled, "Earth and Fire Wizard Group, known as the number one blood battle group, let's see if they live up to their reputation?"

Duke Rumon exhaled, his gaze serene and said, "You'll see."

The great battle erupted.

The duke's arms were surrounded by magma, forming giant hands resembling Qilin Arm.

With a single strike, he evaporated the seawater within a 500-mile radius.

Such might made the Wind-drinking Venerable's expression turn serious.

Boom! Its conjured Wind Demon Hand collided fiercely with the magma giant hand.

Arguably the strongest battle below level 9 unfolded between heaven and earth.

Ten thousand miles away, Levi concealed himself within the sea waves.

"As expected of the second rank, this kind of strength exceeds top talents by a long margin, not on the same level. Even I have to treat it seriously."

Duke Rumon's spiritual force is likely at its maximum.

He's been famous for a long time, and perhaps is not advancing now to brand more Witch Marks.

Danger Perception continuously sounded warnings.

Chapter 2490: Gaining the Radiant Sun Once More, Lion Emperor Solomon!

Levi knew there must be demons hiding nearby.

But he couldn't see any more detailed information.

Perhaps the strong ones from the demons' side used methods to obscure divination.

He had already set up the Death Ember Divine Palace in the distance, ready to retreat if needed.

The lady told him that preserving his life was the priority, everything else was secondary.

Along with the Seven Waters Steeple, there were also seven eighth-circle wizards present.

The high-level combat power was not far off from that of the demons, after all, wizards had arrays as their backing.

As time went by, Levi could see that the Wind-drinking Venerable was not a match for Duke Rumon.

Once it was defeated, the Demon Army would break without attack.

Duke Rumon's offensive grew fiercer.

A pair of lava fists transformed by spells, even more violent than body-refining wizards in combat.

Levi felt he must have some foundation in body refinement or combat techniques.

Seeing that it was about to lose, the Wind-drinking Venerable revealed its true demon form.

It transformed into a swirling black cloud of uncertain size, with a diameter of ten thousand meters.

This was the true body of the Wind Demon.

This seemed to be a signal, as the earth began to tremble again.

Four Demon Mountains descended from the sky, sealing off the battlefield from the periphery.

Four demons with Level 8 middle or late stage strength descended into the void.

Duke Rumon's eyes narrowed and his offensive became more ferocious.

Sure enough, the demons set a trap, enclosing themselves like dumplings.

"I wonder if the lady's backup has arrived."

The situation changed dramatically, and the Wizard Group's formation was forced to shrink inward.

Some people began to worry, their expressions turning grim.

Too many Level 8 demons.

The demonic aura on the battlefield became so thick it turned liquid-like, suffocating the wizards.

Their perception was greatly diminished, and their strength hard to exert.

"Fire God!"

Duke Rumon let out a long cry, and a ten-thousand-meter-tall projection of the Fire God descended.

He too had refined the complete body of the Fire God.

The fire spread outwards in an attempt to break through the blockade.

At the same time, Levi made his move.

He targeted a Level 8 mid-stage demon atop a Demon Mountain and launched a surprise attack.

In an instant, a flash of lightning cut through the Sky Dome.

Then, a menacing purple Thunder Dragon pierced through the demon's chest.

Levi closed in, summoning two Fire Dragon Tribulations with each hand, flanking the demon!

Boom, boom!

Flames swept through, and the Level 8 mid-stage demon was blown to pieces in an instant.

Levi reached out to grab the Demon Soul, Crimson Emperor Dragon Flames surged and burned it away.

Death Finger pointed out, the true soul began to dissolve.

Just like that, a Level 8 demon was killed instantly.

The Nine-colored Emperor drew the Emperor's Sword, delivering a powerful slash to the Demon Mountain.

Crack, the Demon Mountain split open.

The blockade broke accordingly.

Duke Rumon saw it was Levi, and his heart stirred.

"So he is the backup..."

He knew Levi was strong.

But just one person, is it really enough?

This battle was one of a scale rare in a century.

Wind-drinking Venerable saw Levi was the troublemaker again, and cursed inwardly.

"Wasn't the intelligence saying he was active in the North Sea? How did he end up in the West Sea?"

"Not sure, Lord, should we retreat?"

"Let's retreat, don't get entangled with the Dusk Hall Master, it's not worth it."

That fellow is only Level 8 mid-stage, but without Level 9 strength, it's impossible to kill him.

Seeing the Wind-drinking Venerable prepare to retreat, Duke Rumon was surprised.

Is Levi really that useful?

I rank second on the Demon Slaying List after all.

The demons don't fear me, but they fear Levi.

Suddenly feeling quite lacking in presence.

"Trying to run? Too late!"

Duke Rumon blew out a smoke ring.

He waved his hand, and an eight-layer small pagoda spun and flew out.

It grew larger in the wind, unleashing a powerful suction to hold the Wind-drinking Venerable in place.

As a supernova, he too had his wizard tower.

Its name was [Melt Mountain Tower].

The inner heaven and earth within it were a terrifying world of lava.

Many demons were sucked into it, disappearing instantly.

Levi snapped his fingers.

Spiritual Weapons, Maya, and monsters joined the battle.

He himself unleashed a Secret Word of Destruction, severely injuring another Level 8 demon.

The grand battle erupted, the sky turned dark, and the sun and moon lost their light.

Soon, half of the demons successfully retreated.

The remaining demons were completely killed by Levi and the Earth and Fire Wizard Group.

Just Levi alone killed four Level 8 demons.

Plus the other demons.

His war merit soared by 400 million in one go.

This efficiency was much faster than when he searched for demons in the North Sea.

Thanks to the lady for giving him this opportunity.

Meanwhile, the Wind-drinking Venerable was also killed by the team led by Duke Rumon.

Level 8 peak demon, he could earn quite a lot too.

This was a complete victory.

Because Levi's support was strong, the wizard's side suffered very small losses.

No eighth-circle wizards died, only a few sixth-circle and seventh-circle wizards fell.

The cause of death was the counterattack of Wind-drinking Venerable before dying.

Although the battle group was prepared, casualties were inevitable.

After the battle, Duke Rumon pulled out a cigar and handed it to Levi.

"Dusk Hall Master, reputation well-deserved."

"I don't smoke, thanks."

"This thing is good for meditation, a smoke before meditating makes you feel better than a living God."

"Better not."

"Alright."

Duke Rumon smiled as he put it away, half-jokingly asked:

"May I ask if the Ancient Dragon Continent recruits older knights?"

Levi: "You wish to cultivate as a knight?"

Duke Rumon replied: "Might want to try it someday, no time right now though."

Levi smiled: "We don't care about age or background, you're welcome anytime."

If he could bring Duke Rumon into the Dusk Holy Temple, that would be beneficial.

This person is likely a legendary reincarnation, with great potential.
