

Wizard 250

Chapter 250: Red Lotus Form and Nine Swords Form vs an Official Wizard! (2)

The kind Granny Marlene smiled until the wrinkles on her face were trembling. She stood up and said with a smile,

"Since you've already advanced to a high-level pharmacy apprentice, I'll give you some special training. After the training, I need you and three other high-level pharmacy apprentices to help me refine a second-circle potion, the

Eye Devil's Gaze."

"Yes, Teacher."

As far as Levi knew, Eye Devil's Gaze was an extremely precious potion that could simply increase the upper limit of a First-Circle wizard's spiritual force. Most importantly, it could also increase the probability of a First-Circle Wizard breaking through to the second-circle.

Levi guessed that this potion was meant for her own use.

He knew that Ms. Marlene has been a First-Circle Wizard for a hundred years. She should have been stuck at the threshold of breaking through to the second circle long ago, but because of her talent as a Children of Chaos, she has been unable to break through.

Now that Ms. Marlene was getting old, she could not wait any longer. This time, refining the second-circle potion was to certify as a Second-Circle Pharmacist. On the other hand, it was also to help her breakthrough to become a Second-Circle Wizard.

Next, Marlene gave Levi special training. This special training mainly focused on the refinement of the second circle potion, Eye Devil's Gaze, and also from the potion formula to the method of refining the potion, and the things to pay attention to.

Marlene repeatedly trained Levi.

Although Levi was only playing a supporting role in this round of refinement, he still had to be familiar with all aspects of this potion in order to provide better help to his teacher.

A month later, under Ms. Marlene's special training, Levi's level 5 Pharmacy proficiency had increased by quite a bit.

Levi felt that he might even become a First-Circle Pharmacist before he became an official wizard.

Apart from that, Levi had also obtained an extremely precious second -circle potion formula for free. This formula was not open for exchange in the Gray

Tower.

In the tower, only apprentice potion formulas can be exchanged.

In order to refine this potion, Marlene also invested a lot.

Moreover, she had already treated Levi as her personal disciple. If she could not break through to become a Second-Circle Wizard, her skills would not be lost before she died of old age.

Although wizards paid attention to the protection of intellectual property rights, for a witch like Marlene who had no descendants, she hoped that her legacy could continue, and the way of inheritance was naturally the master-disciple inheritance.

Levi was also sincerely grateful for Ms. Marlene's guidance.

He was very glad that the atmosphere of the entire Gray Tower was exactly like the wizard organization he had imagined.

Everyone was busy and did not disturb each other, but there was also some warmth.

This was the best.

On the vast island in the Endless Sea, the gray twin towers had become the harbor where Levi could cultivate in peace.

On a sunny afternoon, after the special training was over.

Ms. Marlene brought Levi and another high-level apprentice wizard of the Gray Tower to the coast.

They were waiting for the ferry.

The wizards called it the Azure Ship.

It was the ancient giant ship that Levi had taken when he came here. These giant ships were developed by the wizards of the Star Tower. They were fully automated, unmanned maritime transport.

Under the effect of the magic circle, they absorbed the power of water and fire elements of heaven and earth, turning them into the driving force for navigation. Then, they would endlessly sail on the safe sea route opened up by the wizard pioneers in the Realm of Azure Cloud.

These routes basically covered all the wizard organizations in the Endless Sea, big and small. Basically, there would be a ferry to the Gray Tower every other week.

Even though wizards had already developed a high-level portal spell, it was obvious that only high-level wizards could learn and master it.

First-Circle Wizards would usually learn a flying spell, but it was only for short distances. There was no way for them to fly long distances.

Therefore, traveling on the Azure Ship was still an important way for wizards in the Realm of Azure Cloud to communicate with each other.

This time, Witch Marlene was going to take Levi and the others to a relatively far place, which was Whale Song Island.

If one wanted to be a Second-Circle Pharmacist, one has to go through the Pharmacist Association.

The only Pharmacist Association branch in this area was on Whale Song Island.

The president was the Second -Circle Pharmacist from Whale Song Island. There were only five First-Circle Pharmacists in this association, but there were more than 50 official wizards from the 10 wizard organizations in this area.

From this, it could be seen that official pharmacists were rare.

Basically, there was only one official pharmacist among ten official wizards.

Therefore, potions above the first ring were exceptionally expensive. Levi's plan in the future was to become a First-Circle Pharmacist as soon as possible and then sell those first ring potions to make money.

Of course, an official pharmacist would probably need to have the Pharmacy skill at level 7, which was still far for Levi.

The Azure Ship arrived.

Witch Marlene took out her magic staff and began to chant an incantation. Then, Levi saw a pair of gorgeous wings of light suddenly spread out from her back. The golden wings of light were at least 20 feet wide.

"The two of you take White Tower No. 7 and hurry over. I'll go first."

After Marlene finished speaking, she flapped her wings of light and turned into an arc of light, flying forward quickly.

Levi was envious. He really wanted to become an official wizard and learn a flying spell..
