

Wizard 251

Chapter 251: Red Lotus Form and Nine Swords Form vs an Official Wizard! (3)

Flying has always been Levi's dream.

"Speaking of which, my Blood Beast Breathing Technique can also give birth to Blood Wings. It's just that they're too short and can't fly. If the special effect is upgraded in the future, I wonder if it can fly." Levi thought of his own breathing technique.

Perhaps one day, he would not need any spell at all. He could spread his Blood Wings and fly high into the sky!

After he finished fantasizing, Levi and the high-level apprentice wizard boarded White Tower No. 7.

The name of this high-level apprentice wizard was Oliver.

He looked like he was almost sixty years old.

To be honest, if he hadn't broken through to an official wizard at this age, it would be very difficult for him to become an official wizard. He would probably be removed from the Gray Tower very soon.

Therefore, Oliver put his mind on upgrading his Pharmacy skill and eventually became a high-level apprentice wizard. Many of the potions in White Sail Alley were refined by Oliver.

"Junior Brother Levi, I didn't expect you to be a high-level pharmacy apprentice in just half a year." Oliver's expression was full of envy. He had been immersed in the path of pharmacy for decades and barely became a high-level pharmacy apprentice.

This junior looked to be less than 40 years old. He had only entered the tower for half a year, but he was already a high-level pharmacy apprentice and had received the attention of Ms. Marlene.

This made him very envious.

"You flatter me. It's just that when I was in the human world, I had already begun to learn pharmaceuticals. I have a foundation in making medicine," Levi replied.

"Junior Brother you're really humble. I live on the 26th floor. If there's a chance, you can come to my place and exchange our pharmaceutical experiences," Oliver said.

Levi naturally agreed politely.

Soon, the two of them also boarded the Azure Ship.

The giant ship braved the wind and waves. Ms. Marlene was meditating alone, so Levi and Oliver did not disturb her. They each found a cabin to rest.

Most wizards were boring. They spent long periods of time doing research and resting, so they didn't like to talk. They preferred solitude.

This voyage would take three days and Levi naturally cannot waste any time.

Levi planned to start refining potions to earn points after he returned from his trip. Then, he would buy two spell models. Only then would he officially become a mid-level apprentice wizard.

The current him only had the spiritual force of a wizard, but he did not have the corresponding actual combat spell.

His strength was that of a knight.

He could only be considered a half-baked wizard.

Moreover, after the Deep Sea Meditation Art reached level 2, it required a total of 5,000 proficiency points to reach level 3.

After level 2, Levi could gain 2 proficiency points through meditation every day.

According to the current progress of 2 proficiency points per day, Levi needed seven years to become a high-level apprentice wizard.

At that time, Levi would be thirty-five years old.

Although this speed was actually much faster than the other Children of Chaos, Levi was definitely not satisfied with the current situation.

He also had to prepare the potion to aid his spiritual force cultivation.

Three days of cultivation on the ship passed quickly.

As the Azure Ship slowly arrived at the harbor, Levi finally saw the lone island standing on the sea.

This island was called Whale Song Island, and it was several times larger than the island where the Gray Tower was located.

In the Endless Sea, the more powerful the organization, the larger the island they occupied. The larger the island, the more cultivation resources there were.

Of course, for the wizards of the Endless Sea, because most of them cultivated Meditation Art and spells of the Ocean School of Thought, their cultivation resources basically came from the vast sea, and only a small part came from the islands.

Levi and Oliver followed behind Marlene. At the harbor of Whale Song Island, there were already people waiting for them.

After all, Marlene was a First-Circle Pharmacist. Her status and reputation in this sea area were pretty well-known.

"Lady Marlene, I've been waiting for you." An official wizard in a blue robe smiled.

Because the wizards of the Gray Tower were relatively friendly, the Gray Tower had a good relationship with most of the forces in this sea area.

Of course, there were also some who did not have a good relationship with each other. For example, the Undead Ship was a wizard organization from the

School of Death. Tower Master Herman had once killed the vice-captain of the Undead Ship, so the relationship between the two sides was irreconcilable.

The vice-captain was doing some illegal activities on the sea.

He caused the death of the beloved partner of Tower Master Herman, and naturally, the Tower Master couldn't tolerate it. He found an opportunity to kill the vice-captain, causing the death of one of the two Second -Circle Wizards on the ship.

Herman lost his right hand during that battle. For this reason, he began to specialize in alchemy and installed an alchemical prosthetic body for himself.

The death of a Second-Circle Wizard from the Undead Ship was something that no organization could afford.

In the end, the ruling of the Wizard Tribunal under the Pan-Plane Wizard Council was:

The vice-captain had to bear most of the responsibility for the death. It was understandable for Herman to avenge his wife, but it was inappropriate to kill a precious Second -Circle Wizard. Herman compensated the Undead Ship 8000 Aether Stones, and this matter was considered settled.

Herman later paid the compensation according to the judge's ruling, but the Undead Ship did not let it go. It directly left the Pan-Plane Wizard Council. This way, it would not be bound by the rules of the Pan-Plane Wizard Council. Of course, it would not be protected by the Pan-Plane Wizard Council in the

Future..
