

Wizard 252

Chapter 252: Red Lotus Form and Nine Swords Form vs an Official Wizard! (4)

In the Realm of Azure Cloud, this organization is called the illegal wizard organization or dark wizard organization.

Decades ago, the owner of the Undead Ship had launched a wizard war against the Gray Tower.

In the end, they were repelled by the tower master, but the Undead Ship did not give up. After becoming a dark wizard organization, they were lawless. Like pirates, they hid from the law enforcement officers of the Wizard Tribunal and became pirates in this sea area.

Levi, who was well-versed in the art of hiding, was already familiar with the social relationships of the Gray Tower. This was to avoid unnecessary trouble when he went out in the future.

If not for Ms. Marlene, Levi might never have come to Whale Song Island in his entire life.

He remembered Angele, who had a double affinity, was an apprentice in this organization.

That kid had a Third-Circle Wizard as his teacher, so he would definitely improve very quickly.

Witch Marlene's arrival caused quite a commotion on Whale Song Island.

In the end, Levi finally met the legendary Second-Circle Pharmacist, the only Second-Circle Pharmacist in this sea area.

The pharmacist was a tall and thin wizard named Angus.

He had the strength of a Second -Circle Wizard and was the second-in-command on Whale Song Island.

Levi did not say a word and followed behind Ms. Marlene silently. Wherever the teacher went, he would follow.

Whale Song Island had a total of twelve First-Circle Wizards, two

Second-Circle Wizards, and one Third-Circle Intermediate Wizard.

They were one of the top forces in this sea area. If it wasn't for the act of the Pan-Plane Wizard Council that forbade internal wars between wizard organizations, perhaps Whale Song Island would have unified this sea area.

"Ms. Marlene, what kind of potion do you plan to use to get certified as a Second -Circle Pharmacist?" Angus asked expressionlessly.

"Sir Angus, I want to use Eye Devil's Gaze to verify my second circle," Marlene said with a smile.

"So it's Eye Devil's Gaze. This second circle potion isn't easy to refine." Angus was slightly surprised.

"I heard that you invited four high-level pharmacy apprentices to assist you," Angus asked again.

"Yes, but the main work is done by me. They are only doing some auxiliary work," Witch Marlene replied.

"It's fine. According to the Pharmacist Association's certification rules, you can have apprentices to do auxiliary work. You only need to complete the main work," Angus said.

After some necessary communication, Ms. Marlene was led by President Angus to a pharmacy lab.

The other two First-Circle Pharmacists from the association were also there.

To be certified as a Second -Circle Pharmacist, at least three pharmacists from the association, including the president, were required to be present.

Ms. Marlene started to get busy. Levi and the other four assistants also started to do their work according to what their teacher had taught them.

Levi carefully observed every step of his teacher's work. These were all rare experiences. With this experience, it would be very useful for Levi to be certified as a pharmacist in the future.

Just refining the second circle potion took half a day just to prepare. Levi and the others were busy and now was not the most critical moment.

"Little Levi, Oliver... Next, you four will start to refine the four supplementary potions. Just follow what I taught you. When I reach the last step, pour the potions into my crucible."

Witch Marlene had a serious expression. She had been preparing for a long time in order to refine the precious second circle potion. The consumption of the Aether Stone was not something that an ordinary First-Circle Wizard could afford.

Just the certification fee alone would cost a full 1,000 Aether Stones. Otherwise, why would the pharmacists in the association who were busy making money and researching potions waste their time to certify them?

Therefore, she could only succeed and not fail.

As the potion refinement began, Levi also started to get busy. He was in his own pharmacy lab, following his teacher's instructions and proceeding in an orderly manner. Levi was confident in himself.

On the other side, the other apprentices also started to get busy.

Time passed by.

Half an hour later, Ms. Marlene was at the second last step of the potion production. At this time, Levi had already finished refining the supplementary potion.

[Pharmacy Proficiency +30]

Levi grabbed the supplementary potion and left. He was the first to finish it, so he was the most efficient.

This made Angus and the others pay special attention to Levi.

After a while, another two high-level pharmacy apprentices also finished making the supplementary potions.

Ms. Marlene was about to reach the last crucial step.

Logically speaking, the four high-level pharmacy apprentices should have finished making all the supplementary potions by now.

However, Oliver hadn't come out yet!

Levi's expression changed slightly. Something seemed to have happened to Oliver.

"Are the supplementary potions ready? I still have ten minutes before I can carry out the final step of the potion assembly."

"Witch Marlene, Oliver is not ready yet."

A high-level pharmacy apprentice replied anxiously.

Witch Marlene's expression was a little ugly, but she calmed down and continued to refine her potion.

They couldn't mess up now. If they messed up, they would be completely finished.

The supplementary potion had a time limit and needed to be prepared on the spot. That was why Ms. Marlene needed the assistance of pharmacy apprentices.

Otherwise, she could have refined it herself and brought it over..
