

Wizard 256

Chapter 256: Flower Knight, Legendary Levi! (1)

On the surface of the sea, Ms. Marlene's light wings glided, bringing Levi forward slowly.

This way, the consumption of spell power was relatively low, and she could fly slightly longer distances.

After advancing for about ten miles, she landed on an uninhabited island reef.

"Let's rest for a while," Ms. Marlene said.

"Thank you, Teacher. Are you alright?" Levi asked.

"Not too good. Although I've already built a second-ring spell model structure, I'm not strong enough to cast a second-ring spell. I can only cast it after my spiritual force reaches the peak of a First-Circle Wizard. But in that situation, if I didn't use a second-ring spell, Green Ghost Carter and another official wizard would have joined forces. We will have no hope of escaping," Ms. Marlene shook her head and replied.

"Poor Oliver. Although he's a little stupid and lazy, he's still a good person. I'll tell the Tower Master about this when I get back, and the Tower Master will give Oliver justice. All apprentice wizards of our Gray Tower are the children of the Tower Master. Even though he looks very busy and rarely cares about the apprentices, he's cold on the outside but warm on the inside. In fact, he loves his apprentices very much."

Marlene sighed.

Oliver's corpse and storage items were all collected by Ms. Marlene. Levi thought of Oliver's miserable appearance and could not help but sympathize.

As an apprentice wizard, Oliver's strength was naturally not bad. However, in this sea, in front of an official wizard, the life of an apprentice wizard was as fragile as a candle in a lamp. A small boat in the sea could be destroyed at any time, and the people on the boat could die.

"I know that your knight realm is very strong, but I didn't expect you to be able to kill a First-Circle Wizard. Although that person is obviously a rookie who has just stepped into the First-Circle Wizard realm, it is rare for a knight to kill a wizard in this wizard world. Usually, only legendary knights can do it," Ms. Marlene said.

"It's all because your second-ring spell attracted the wizard's attention. Otherwise, I wouldn't have been able to get close," Levi replied. He wasn't being humble. What he said was the truth.

It seemed that he had successfully killed an official wizard.

However, that was because on the battlefield, after casting a second-ring spell, Ms. Marlene was like a god that had descended from the heavens. She had attracted all the firepower of that wizard.

Thus, Levi was able to launch a sneak attack.

Otherwise, Levi felt that it would be very difficult for him to get close to an official wizard, even the weakest one.

He had mastered at least ten zero-circle cantrips and one first-ring spell. Judging from his performance, he had mastered at least two first-ring spells, and they were spells from different schools.

One of them was that terrifying green fireball, which was probably the School of Death's first-ring attack spell.

The other was his passive spell that could turn his body into a rock body. It was obvious that it was a first-ring physical strengthening spell, which should be a classic spell of the Earth School of Thought: Rock Body.

If it wasn't for the fact that Ms. Marlene was holding back the two official wizards, Levi would never have dared to try this.

"Little Levi, you're a good person in every way, but you're too humble. Overtly humble will become arrogance." Ms. Marlene said with a smile.

"Only a legendary knight can break through an official wizard's defensive barrier and shatter his physical strengthening spell.

"Tsk tsk, tell me, what's your legendary name in the human world? Let me see if I've heard of it.'

Levi smiled bitterly and waved his hand. "Teacher, don't make fun of me.

Legendary knights are just tiny specks of dust in this wizard world."

"Alright, alright. It's fine if you don't want to say it. Do you have a partner now?" Ordinary people couldn't understand Ms. Marlene's train of thought.

A second ago, they were still discussing the legendary knight, but the next moment, Levi was asked if he had a partner.

She was like the distant relatives he had in his previous life.

"No, I'm used to being alone," Levi answered.

"I see. It's a pity. With your future status and achievements, I think Winnie and you are quite compatible. However, since you like to be alone, I won't try to be the matchmaker.

"Indeed, many wizards, like me, would realize that falling in love is a very boring thing after we become addicted to our cultivation," Marlene said emotionally.

She had lived for 150 years, and she had only had feelings for someone before she became a wizard. After that, she had been cultivating alone until now.

Without any children or a partner, Ms. Marlene treated the Gray Tower as her home.

The reason why Levi wanted to be alone was because he felt that once he had a partner and children, he would have a weakness.

Moreover, he had the proficiency panel. Although he was a Child of Chaos, he would have a long way on the path of a wizard.

But what about his family?

For example, Winnie has a triple affinity.

She might not even be able to become an official wizard, let alone the future path.

Levi did not want to see his family die of old age in front of him.

In short, it was good to be alone without any worries.

Especially now that he didn't need to worry about the territory anymore.

With Andrew, the destined worker, overseeing the territory, Levi felt extremely comfortable.

He rested on the island reef with Ms. Marlene.

Marlene continued to fly with Levi. After waiting for three days on another route, they boarded the Azure Ship and returned to the Gray Tower..
