

Wizard 2561

Chapter 2561: Time Castle, Mythical [Torch Dragon]!

Either become the master of Nora, or turn into cosmic dust!

...

The years flew by, six years later.

Nora Calendar 1086, Blood Battle 874.

On the Demon Slaying List, Levi's points reached 16.6 billion.

That night six years ago, Edmund was suspected to have stepped in.

He wasn't a high-ranking figure, unaware of what exactly happened.

He just felt that after that day, the demon's offensives became even more intense.

At the same time, the great convergence of planes was also accelerating.

In less than a century, 534 New Worlds appeared.

Nearly twice the average speed of the past millennium.

Under the persuasion and force of the Wizard Council, an increasingly large alliance army of alien races had formed.

They were a force not to be ignored in the Blood Battle.

On this day, Levi, as usual, opened the Blood Battle Store.

There was nothing he needed among the Sun Refining Artifacts.

His gaze swept to other sections, and then his breathing became rapid.

[Mythical-level creature Star-Spinning Turtle Bloodline Crystal (Level 10): 20 billion war merit]

"A Mythical-level, and it's level 10... How could this be?"

Levi found it unbelievable.

Star-Spinning Turtle, he naturally knew.

This is a mythical creature known for its defensive abilities.

His Golden Brilliance Dragon Breath Technique wanted to evolve again.

Finding bloodline crystals purely of defensive Dragon Clan had become difficult.

He must start to focus on other creatures.

Although this might result in a Mythical creature that looks like a mishmash.

But it didn't matter anymore.

This Star-Spinning Turtle's bloodline was one of his targets.

But he just had people looking for some level 9 creatures that might contain its bloodline.

He never thought to get a level 10 bloodline crystal directly.

"Could this thing be something the congress specially arranged for me?"

Levi thought somewhat narcissistically.

Because this bloodline crystal appeared in the level 9 battle merit store.

This means, other Grand Wizards couldn't exchange for it.

Below the Grand Wizard, who else could have the conditions to exchange for it?

"Is it the Black Abyss Sovereign? Or the Frost Witch? Or maybe the Grand Council Chairman?"

Levi pondered.

"No more thinking, this Mythical Crystal, I must get it!"

He currently has 7.3 billion war merit, only 12.7 billion short...

With the Star-Spinning Turtle Crystal, he could evolve the Golden Brilliance Dragon Breath Technique to beyond Mythical level.

To be prudent, the Armored Dragon Bloodline Crystal can also be fused together.

"This is not urgent, just accumulating battle merit through normal cultivation and demon hunting will do, about a century should be enough."

His current Golden Brilliance Dragon Breath Technique hasn't reached its peak, rushing won't help.

Bringing along the Shadow Army with already seven King Kong, Levi set out once again.

Not long after, many people noticed the Mythical-level crystal in the Blood Battle Store.

The Blood Battle Channel was buzzing with discussions.

"Oh my God, 20 billion battle merit, that's ten times that of the Sun Refining Artifact... is this really for people to exchange? Even if I fought in the Blood Battle for ten thousand years, I wouldn't accumulate that much."

"You're thinking too much, this wasn't prepared for you, don't you understand?"

"Oh, I get it, maybe this is the treatment for a supernova."

"Yes, but it's understandable, after all, it's all fairly exchanged through war merit, the more work the more gain, the less work the less gain, 20 billion battle merit, if it was just hunting down level 8 demons, it would require killing hundreds... except for the Dusk Palace Master, who else on the current leaderboard could do it?"

...

Soon after.

The Heavenly King Dragon Breathing Skill advanced to level 8 late stage.

[Indomitable True Word] further enhanced.

Levi's endurance and stamina had reached an extremely exaggerated level.

He could continuously battle the Tyrant of Horror, giant dragon corpse demon, and even the Flame King Dragon.

Ultimately, he was defeated by the Flame King Dragon, because he didn't use the wizard tower or the giant dragon corpse demon.

Ogre admitted, during its previous battles with Levi, it went somewhat easy.

But with Levi's further enhanced strength, it now almost used its full power.

At the same time.

Levi's [Traveling the Void] speed reached 70 times the usual travel speed.

The many spell-like abilities of the Heavenly King Dragon also improved significantly.

[Wind Illusion Realm] and [Silver Mountain Skyfall] combined were enough to trap the Flame King Dragon for a moment.

But if the opponent wanted to leave, Levi couldn't stop them.

Catching a level 9 opponent forcibly was too difficult.

Between level 9 battles, it's also very hard to pin down the opponent, let alone Levi, who is only level 8.

With the bloodline essence of the level 9 Flame King Dragon.

Levi's Crimson Emperor Dragon and Death Ember Dragon Breathing Technique's cultivation speed also significantly improved.

Four years later, Nora Calendar 1090.

The Death Ember Dragon Breathing Technique advanced to level 8 late stage.

[Undying Body] and [Immortal Secret Word] both major abilities improved significantly.

The distance of the Death Ember Divine Palace even increased.

This meant Levi had a safer resurrection distance.

He wouldn't be immediately killed by some major figure right after resurrecting in the "spring."

Each time his strength increased, Levi would seek an opportunity to spar with the Flame King Dragon.

Possessing five major level 8 late-stage Breathing Techniques, he was brimming with confidence.

This time, the two fought for a whole day and night.

Levi still didn't use the wizard tower and corpse demon.

The final result was a draw, and the Flame King Dragon had used its normal power.

This meant, without external aid.

Levi's regular combat strength could already match that of a young giant dragon.

As for the Grand Wizard... that remains to be seen.

After reaching level 9, the combat methods of wizards and giant dragons differ too greatly.

The Flame King Dragon also didn't grasp abilities like the Elemental Holy Body.

Nor did it have wizard forms or Divine Soul Artifacts, etc...

Generally speaking, the average battle strength of a Grand Wizard is higher than that of a Legendary level Dragon Race.

After level 9, the advantage of giant dragons over their peers due to their bloodline is very small.

Chapter 2562: Time Castle, Mythical [Torch Dragon]!

Unlike the early stages, legendary creatures in the same realm are the combat power ceiling of that level.

Six years later, in the Nora Calendar year 1096.

Since receiving the bloodline essence of the Tyrant of Horror.

The cultivation speed of the Nightmare Traveler breathing technique has always been in the fast lane.

Finally, shortly after the Death Ember Dragon's breakthrough.

Levi's perception dimension also reached the level 8 late stage realm.

The strength of the Unhidden Secret can already affect the Flame King Dragon.

If a level 9 expert is distracted, Levi could pull their true form into the Nightmare World.

If the opponent does not have a means of return, it is akin to exile.

Of course, the success rate is not high.

The most important advancement is still the expansion of the perception range and refining of the precision, far surpassing the eighth-circle standard.

As usual, Levi once again fought a great battle with the Flame King Dragon.

It was a draw again, with a fifty-fifty chance of victory.

Of course, the victory here refers to the situation where both sides do not fight to the death.

Otherwise, relying on an undying body and super endurance, Levi could exhaust the Flame King Dragon to death.

The improvement in perception cannot bring a direct enhancement in combat power.

But the hexagonal dimension further improved Levi's combat error tolerance.

The grasp of combat opportunities was effortless, allowing for a less passive fight against level 9.

This year, Levi is 1,520 years old.

His points on the Demon Slaying List reached 18 billion, far ahead.

In ten years, he roamed the Land of the Four Seas hunting demons.

The Shadow Army already has the Eight Great Vajras.

Under the crazy demon-hunting, among the 20,000 shadows, the proportion of level 4 is getting smaller.

They either advance to level 5 or are eliminated.

Levi's dream is to cultivate a Shadow Army of all level 6 and above in the Blood Battle.

One day, he will lead the army with invincibility to charge into the Abyss!

On this day, during a break, Levi opened the newspaper.

[Blood Battle Daily: Congratulations to Lady Molly on advancing to Grand Wizard, titled "Golden Windwalker," joining the Blood Battle Command Center...]

"Another Grand Wizard, three ninth-circle have already emerged within a century, this speed is terrifying... Is this the power of the Golden Era?"

In less than a thousand years of blood battle, Levi roughly counted from the news.

The Wizard World has already produced more than 20 Grand Wizards!

This speed far exceeds any previous era.

The reason is simple.

First is that those legendary wizards of the past 300,000 years concentrated on reincarnating and re-cultivating.

They were well-prepared and not lacking resources, starting their layout before the great convergence of planes.

Now riding the favorable wind, they surged forward in one fell swoop.

Levi estimated that at least half of them are reincarnations of legendary wizards.

Second is the concentrated release of resources, leading some veteran eighth-circle perfect wizards to gain the opportunity for promotion, especially some top wizard organization leaders, like the Old Witch.

Of course, there are also various complex factors.

For example, the local improvement in element concentration of the Wizard World due to the planting of oasis creatures.

According to statistics from the Wizard Council. .

In this millennium, the average cultivation speed of wizards has increased by 5%.

Don't underestimate this rate.

Under the current base of the Wizard World, it's enough to give birth to many primordial souls, and even Grand Wizards.

Cultivation inherently comes from accumulation bit by bit.

This is an era of rapid advancement.

Levi is fortunate to witness and lead all of this.

Suddenly.

The image on the newspaper changed, and Edmund's figure appeared on the podium of the Tower of Heaven.

Levi's expression shifted.

"Is there another major event to announce?"

At this moment, everyone in the Wizard World concerned with the Blood Battle situation opened their newspapers.

"Letter to the Nora Clan".

[The Blood Battle is nearing the end of its millennia. Recently, with fellow legendary wizards, I slew a mythical demonic creature that plagued Nora in the Land of Darkness.

Earlier, the Abyss simultaneously launched an unprecedented super blood battle against the Sauron Plane, Hell, and even the Underworld.

Citizens of Nora, the era of total war has arrived. We will face a more complex Blood Battle situation and fiercer enemies.

Fortunately, this time we have reliable and strong allies, namely the ancient Underworld. The Kings of the Underworld have already led the Netherworld Soldiers on skeletal warhorses, rushing through the Mother River to the Blood Battle Battlefield of Multidimensional Planes. The emperors of the Underworld are closely monitoring the war situation.

Starting today, the Blood Battle Treasure Vault will further expand its scope and scale of access, offering more oddities, rare treasures, wizard tools, medicines, and all kinds of cultivation resources for every citizen of Nora to choose from, regardless of your race or profession!

The era we are experiencing will be a Chapter of Nora worthy of the history books, with legendary wizards, Grand Wizards, supernovas, the Nora Wan Clan, and billions of beings, together holding the pen!

Every demon you slay and every achievement you make will become a word, a sentence, a Chapter in the Age History Book!

Victory will surely belong to Nora! We will step by step ascend the supreme throne that belongs to Nora, trampling over the countless corpses of demons!]

...

Closing the newspaper, Levi murmured:

"No wonder my younger brother sent a message saying that a large number of Netherworld Soldiers have appeared in Hell, even masters like the Master of Demon Fox, the Sky Supporting Giant Elephant among the Seventy-Two Pillars, have been conscripted, the real storm is coming.

The confrontation between two super giants is now inevitable! Fortunately, the Underworld is on Nora's side, which was expected, most likely an arrangement when Sauron visited the Underworld, and the current objectives of the Underworld and Nora align."

The Abyss daring to launch a total war must have its confidence.

The astral world is besieged by insects, and the power of the four super worlds may already be unbalanced.

Chapter 2563: Time Castle, Mythical [Torch Dragon]!

Already, it's hard to say if there is one leading the pack.

Levi took a deep breath.

Next, staying in Nora might not be safe at all.

Even though the Dragon Flame God has the ability for full-map attacks.

However, Nora is continuously expanding.

And the Abyss will also increase its troop deployment.

If they arrange multiple Level 9 experts at once to target him.

Even a Legendary Wizard might have a headache.

Moreover, the Council of Ten Thousand Clans will certainly take the opportunity to add to the chaos.

The Flame King Dragon can steal the Holy Infant.

Which indicates that the Dragon Flame God can only monitor Level 9 demons currently.

As for other Level 9 experts, he might not be able to handle them either.

These are all potential dangers.

Fortunately, with years of secluded cultivation, he already has the confidence to face Level 9.

From now on, Levi will not retreat.

He will make these Level 9 demons into huge war merits for exchanging bloodline crystals!

"Levi, it seems Elena is about to break through, come in quickly!"

Mana's voice echoed in Levi's mind.

He quickly found a safe place and entered the Ancient Banyan Fairyland.

...

The outer sea region of the Ancient Banyan Fairyland.

It was quiet here, and sea beasts had already left with Ah Kun.

In the sky, terrifying tribulation clouds condensed.

Rich earth elemental power gathered.

Elena was already undergoing the tribulation.

The mirage of an Immortal Banyan Dragon emerged against the World Tree.

In the distance, Idrasala said: "This Immortal Banyan Dragon is a bit ugly, not as good-looking as me."

Mana laughed and said: "Right, you are the most beautiful."

The focus of the Dragon Clan is always so peculiar.

Levi's figure appeared, standing with arms crossed.

Mana asked: "Are you nervous?"

"Not nervous."

"Really? Then why is your heart beating so fast? You weren't like this during your own advancement."

"Alright, I'm nervous..."

After all, it's the promotion to the Mythical Tribulation, how could he not be nervous?

What if the success of those previous people used up all the fortune?

What if the Dark Tribulation acts unexpectedly, bringing a mirage?

Since beginning his cultivation, it's rare for Levi to feel this anxious.

Leon landed on Levi's shoulder, patting Levi's head with his small hand.

"Master, don't be nervous."

Levi pinched Leon's cheek, smiling and nodding.

After the ultimate sword light, the Hundred Flowers withered.

Elena stood with her sword, the mirage of the Immortal Banyan Dragon slowly dissipated.

Levi looked at her condition, and she seemed fine.

"It should be okay."

Subsequently, the virtual images of Legendary Creatures like Mortal Cranes, Cherry Blossom Beasts, and Star Worm descended one by one.

They displayed their powers, thrilling battles that shook the heavens and earth.

If not for the transformation of the Ancient Banyan Fairyland, it would have been affected long ago.

Levi's heart fluctuated with Elena's battle state.

Fortunately, her combat techniques were already perfected.

Coupled with a Seven Rings Perfection-level of spiritual force level.

Her comprehensive strength was considerably stronger than the Blood Knight during its tribulation.

Eventually, the Blood Tribulation was successfully overcome.

The Dark Tribulation loomed overhead.

It was an illusion shadow clone almost similar to Elena.

It emitted Level 7 Middle Stage strength... which was destroyed by Elena with a few moves of the Water God Projection.

This is the benefit of dual cultivation tribulation, only the Blood Tribulation Disaster poses a bit more challenge.

The Dark Tribulation was easily overcome, as long as it's not a mirage.

Elena sensed the changes after her ascension, and her severely injured body quickly healed.

She looked back, seeing the joyous expression on Levi's face.

"See my transformation!"

She said, then changed posture.

A giant beast emerged into the sky, resembling both a snake and a worm, covered in white feathers, with cherry blossom dragon horns on its head, its face resembling the Dragon Clan yet with a touch of feminine divine grace.

It coiled on the sea surface, around it, towering virtual images of divine trees: Divine Banyan, Divine Mulberry, Divine Pine, Divine Cherry Blossom!

A seasonal scene of spring, summer, autumn, and winter unfolded around the divine trees in a never-ending cycle.

The giant beast resembled the king of divine trees, like the master of the creation of the world.

Its elongated body moved through it.

In the void, flowers bloomed continuously, leaves sprouted.

With every breath it took, the seasons changed, harvests in autumn, hibernation in winter.

At this moment, Levi already decided the name for this breathing technique.

After everyone was awestruck.

Even the Flame King Dragon exclaimed in disbelief, and only then did Elena transform into a human form.

She threw herself into Levi's arms and laughed: "How is it? Beautiful, right? Were you worried I'd become a monster of mismatched parts?"

"Indeed beautiful, not something of the mortal world."

"Thought of a name yet?"

"Candle Dragon!"

"Candle Dragon? I think I've heard you mention it before, is it that Mountain God from your dream world of mountains and seas?"

"Yes."

"Candle Dragon Breathing Method, a pleasant name indeed."

Besides Levi, the 8th Mythical level breathing technique was born in the holy temple.

The "Candle Dragon Breathing Method", an extremely powerful physique type breathing technique.

Not at all inferior to the Ash Knight's "Star Butterfly Dragon Breathing Technique".

Its main capabilities are divided into three:

First, self-healing and healing.

This goes without saying, a standard feature for physique types.

The difference lies in whether the self-healing ability is stronger or the power to heal others is stronger.

Similar to Levi's, the Candle Dragon leans more towards self-healing.

Second, Feather Transformation.

Similar to the Ash Knight's.

The Candle Dragon possesses the ability for reincarnation, but only once.

Compared to Levi's Death Ember Dragon, it's not as impressive.

Third, life extension.

Hundred Flowers chose the legendary bloodline, known for the longest lifespan within the same realm.

This gives the Candle Dragon an extremely potent life-extending ability.

She is not a true Candle Dragon, just a knight containing its bloodline.

But at Level 7 stage, she already gains an approximate 30% lifespan increment.

With further realm advancements and increased bloodline concentration, this increment will continue to rise.

Chapter 2564: Time Castle, Mythical [Torch Dragon]!

Plus, with half of the Moon Rune's 70% amplification from Levi.

The total is 100% extra amplification.

Her lifespan as a wizard originally spans three thousand years.

Additionally, based on recent data testing on Ancient Dragon Continent.

Transcendents of both knight and wizard dual cultivation paths.

In the same realm of both systems.

Their lifespan is also about 20% higher than those on a single path.

That means, in the end, there's a 120% lifespan increase.

That's a 6600-year lifespan, already surpassing the average of a Grand Wizard.

The Energy Sect itself should also have some lifespan-augmenting capabilities.

But since there still aren't a large number of dual cultivation samples, it's difficult to calculate specific values.

Maybe add a few hundred years, wouldn't that round it to seven thousand years?

And Hundred Flowers is only seventeen hundred years old now.

For a short-lived species, fortune factors cannot be known.

Lifespan and talent are the greatest fixed capital!

With such conditions, Grand Wizard Elena undoubtedly has no problem.

A Legendary Wizard is also worth a try.

Of course, while the Torch Dragon Breathing Method is good for extending life.

Its direct combat power is slightly inferior compared to other Mythical Breathing Techniques.

Overall, there are gains and losses.

Back then, Hundred Flowers chose those longevity mythic bloodlines, already anticipating this point.

In any case, she is a triple cultivator, with wizard and Energy Sect enhancing combat power, she can't be weak.

Subtly, Levi found a new possible path.

That is to get more people to emulate Hundred Flowers, specializing in those longevity mythic and legendary breathing techniques.

Of course, this is actually very hard to replicate in bulk.

Not everyone has the good conditions like Hundred Flowers.

As the breathing technique ascended to level 7, Elena's Primordial Spirit and wizard form also further fused.

Finally giving birth to a technique named [World Dragon].

Similar to Levi's earlier [Nine-colored Emperor].

This further enhanced Elena's combat power.

After ascending, Levi sent Elena back to Ancient Dragon Continent.

Her mission was arduous and only partially complete.

She still needs to ascend to eighth-circle, level 7 in the Energy Sect, and create the [Hundred Flowers Martial Arts].

The result of triple cultivation is satisfying, but the process is indeed tiring.

This, Levi deeply understands.

If it was a peaceful era, with Elena's lifespan comparable to longevity species, relaxing a bit wouldn't matter.

Unfortunately, comprehensive war began, the future situation ever-changing.

Even Levi does not dare to sit back and relax.

...

Time flew by.

Nora Calendar year 1100.

Blood Battle year 888.

After comprehensive war started.

Occasionally, some patrolling Underworld legions fly over the sky of Nora.

They are led by the King of the Underworld, well-trained, astonishing the wizards.

The Underworld, worthy of being the oldest world, lives up to its reputation.

Unlike the chaotic Abyss, they are disciplined and orderly.

Their combat power is not just a notch higher than demons.

The only flaw is, currently, the troops of the Underworld seem fewer than those of the Abyss.

In terms of quality, the Abyss might be mediocre.

In terms of quantity, the Abyss is the absolute king!

A thousand years of Blood Battle, with so many demon lords fallen, without blinking an eye.

No matter what, the Underworld's dispatch of troops for support indeed had a strong deterrent effect.

Making some ill-intentioned beings secretly withdraw their gaze.

Nora's wizards and the All Clans' fighting spirit became more resolute.

Kidding, we joined forces with the Underworld.

Even in a comprehensive war, so what!

Levi could clearly feel, the good things in the Blood Battle Store suddenly increased.

The congress still had a lot of stock... maybe also due to Underworld support.

On this day, when Levi was browsing the store, he found a good thing.

[Ninth-level Burning Faction Sacred Medicine Fire Dawn Fruit, exchange War Merits: 2.7 billion.]

He didn't hesitate and immediately placed an order.

Just buy it, after all, he couldn't afford a Mythical Crystal for now.

If this thing is missed, it needs to wait for a while.

Plus the [Snake Tail Root], half of the four sacred medicines have already been collected.

As of now, Levi's total points are 18.5 billion.

And the total amount of War Merits he spent is up to 13 billion!

There are still 5 billion War Merits remaining.

"Continue on!"

Levi's day became more promising, rushing around for crystals all day.

Nora's supernovas and ordinary wizards.

Could only watch as the Dusk Palace Master's points balloon at an unimaginable speed.

He dominated the leaderboard, before he ascends to ninth-circle, no one is capable of shaking him.

The renowned critic and event judge, Dragonfly Wizard, commented in the Sorren Daily: "The Dusk Palace Master alone is worth ten standard wizard battle groups."

This is not flattery, this is true.

Because Levi's Shadow Army is growing stronger like a snowball.

...

One day.

In a place in the West Sea!

Buzz! Thunderlight ripped through the sky!

Levi descended like a heavenly deity, with eight Great Vajras pursuing shadows behind.

In front, four Level 8 Mid Stage Spirit Soldiers paved the way, accompanied by Level 8 Late Stage Maya Spirit.

Boom! A Level 8 Late Stage Thunder Giant Ghost cackled sinisterly as it descended from the sky, carrying Myriad Thunder!

Relying on the Thunder God Body's strength, Levi already cultivated the [Thunder Ghost] technique to the maximum.

The thunderclouds rolled, Si Lei descended thunder punishment in Thunder God's Form.

Fenks and a team of accompanying special spiritual creatures coordinated together.

Such a luxurious lineup made the Ninth Legion Demon Leader of the West Sea's face go pale.

"Enemy attack, it's the Dusk Palace Master!"

One after another, Level 8 demon figures soared into the sky.

Countless demon armies rose like locusts.

Levi shouted loudly, "Try to leave intact corpses."

Rumble!

Thunder, flames, raging winds, frost... Various techniques burst forth together.

The sky turned dark, the sun and moon lost their light, like an apocalypse descending.

The Golden Armor Youth's figure shuttled through the battlefield, weaving a giant web that covered the sky.

Countless demon souls were stuck on it, turning into its promotion supplies.

Halfway through the battle, a sudden warning of danger arrived.

On the Fool Rune, it showed a Level 9 Bottom-dwelling Fish Demon approaching.

"Continue!" Levi remained undisturbed and did not choose to flee.

A Level 9 demon, one is worth ten billion at the start.

If killed, it saves many years of demon-hunting time.

The Fish Demon's combat power is the bottom of the demons, perfect for practice.

Of course, that is if this Fish Demon hasn't been obliterated by the Dragon Flame God.

Meanwhile, on another battlefield in the Wizard World.

The Destruction Realm Thunder bathed in lightning, the Thunder God Projection swept across the world with senior eighth-ring cultivation.

As a Legendary Reincarnation, he had already entered seventh place on the Ninth-level Demon Slaying List.

Below ninth-circle, few are foes.

Suddenly, in his mind, a phantom purple Thunderbird flew out.

The Thunderbird chirped as if warning him.

This is his accompanying special spiritual creature, also having a strong Danger Perception ability.

"A Level 9 Demon?"

Almost simultaneously, streaks of terrifying aura swept across the darkness.

They descended like meteors, appearing all over Nora.

Some targeted mortal rookie congregations, some were wizard organizations.

And many were after the supernovas on the battlefield.

Land of Darkness.

The Wind Demon Lord stood atop the storm.

It watched the visibly swelling Nora and the sky full of demons.

"Do you see, Edmund? This is true war!"

Meanwhile, in another darkness.

A black-robed figure quietly descended, with a Black Sun outline appearing behind him.

Chapter 2565: Dragon Battles Across the Four Seas, Nora's Rise to Fame!

Sauron Continent.

Supreme Council.

At the round table, the high-level members of the Blood Battle Command Center are reporting the situation.

"The first wave of the demon offensive has arrived. The Dragon Flame God will appear and share the coordinates of the level 9 demon of Nora to all the walkers' communication devices, everyone prepare to intercept."

"For the supernovas who are being heavily targeted by the demons and may be retaliated by level 9 demons, we have arranged secret protection by walkers."

"Transcendent creatures and the Dark Mechanic Beast Army are also ready, they can support various battle zones at any time."

"The Magic Array Wizard Association's 16 sets of 'Thousand Star God Extinguishing Arrays' have been handed over to the commanders of the ace battle groups and are trained and ready to encircle level 9 demons at any time."

...

Edmund, after listening to the reports, said:

"Take action, please bother the legendary wizards to contain the level 10 demons, and let the walkers intercept the level 9 demons. In the Land of Fanorla, Nora's will must provide shelter. Whether it's seasoned walkers or newly promoted ones, go forth and slaughter boldly!"

The mobilization completed, figures flew out from the Sauron Continent, stepping into the teleportation array and leaving. .

They looked composed, nervous, or excited.

What they had to face was the ferocious and vicious level 9 demons.

Even though the demons would be suppressed in Nora, they are vast in numbers.

The peril of this battle is imaginable.

In the Tower of Heaven, Edmund stood with his hands behind his back.

The Red Flame Witch Robe flapped in the gale.

He overlooked Nora from the highest point, his sight covering everything.

War flames were everywhere, smoke rising, corpses piling like mountains.

Suddenly, his gaze turned to a certain place in the Land of Darkness.

In his pupils seemed to reflect a silhouette in a black robe.

The silhouette fell from the sky, disappearing without a trace.

...

Land of the West Sea.

The head of the demon commander of the Ninth Legion fell to the ground with a crunch.

Levi's combat boots stepped on its body, dissecting it on the spot.

A level 8 peak demon thus fell.

On the other side, the battle of the summoned creatures had ended.

A level 8 shadow dispersed into remnants.

"What a pity..." Levi sighed.

Because of the final counterattack of a level 8 late-stage demon, one of the Eight Great Vajras fell.

But it didn't affect much.

After this battle, a level 7 peak, and two level 7 late-stage shadows could be born again.

Soon, Levi could restore them to level 8 realm.

In war, the death and injury of summoned creatures are inevitable.

On the demon-slaying bracelet, Levi's 300 million war merit had been credited.

Total points were 18.8 billion, close to breaking the record of the former Thunder Fire Governor.

Leon was also full and finally not calling out for hunger.

It patted its belly, lying on Levi's shoulder to bask in the sun.

A kilometer-long serpent was sweeping the battlefield, devouring corpses.

It was the special spiritual creature, AShe.

"Master, I feel a danger approaching us."

Leon suddenly said.

It seems Leon also has a good perception ability.

Being the Nether Emperor, it surely has special means.

Levi pinched Leon's cheek and said:

"I know."

"Then why aren't you running?"

"There's no need to run."

"Can you defeat it?"

"Let's try."

"Do you need me to assist?"

"Can you protect yourself?"

"Rest assured, Master, a level 9 demon probably can't kill me."

"Alright."

Levi put away all the shadows.

The Shadow World and the Wizard Tower were already interconnected.

On the Sealing Stars, all Seven Great Vajras returned.

Afterward, shadows of level 7, level 6, and level 5 merged into it.

One, two... eight thousand stars shone brightly.

"Mary, hide yourself nearby."

"Okay, Master."

The giant dragon corpse demon had hidden well.

Levi adjusted his state, rapidly recovering his stamina.

He sat cross-legged atop the wave, Crimson Dragon Slash hovered in the void behind him.

He had already achieved the feat of challenging a level 9 giant dragon.

Next would be a level 9 demon.

Then demigods, wizards, alien races...

After cultivating for fifteen hundred years, it's time to fully test his strength.

Time passed minute by minute.

Thousands of miles away from Levi.

In the void, a figure surrounded by golden lightning descended, it was the Golden Walker.

He was ordered by the Supreme Council to protect a supernova in secret.

By sheer luck, the person he was supposed to protect... was his mother's Dusk Palace Master!

God have mercy, he was utterly resentful toward the Dusk Palace Master.

Damn it, making him protect the other, is practically heartless.

But he dared not defy the Supreme Council's orders.

He had to comply.

As for using this opportunity to make small maneuvers and eliminate the Dusk Palace Master.

He was no fool.

To deal with the Dusk Palace Master, it must be done outside Nora, quietly and unknowingly.

Here, who knows what method the legendary wizard uses to monitor everything.

Moreover, the Dusk Palace Master could escape multiple times from the clutches of level 9 demons.

Whether he could kill Levi was uncertain.

Now the Golden Walker was more conflicted.

If the Dusk Palace Master really encountered danger.

Should he make a move?

Should he pretend to be late, using the enemy's hand to eliminate her.

Or should he stand out and save this supernova sabotaging his efforts.

He didn't dare suggest to the Supreme Council to change the person for secret protection.

The legendary wizard might see his grievances against the Dusk Palace Master.

"Play it by ear."

His figure was hidden, sighed helplessly.

...

Boom!

Land of the Southern Sea.

A towering column of red flames fell from the sky.

A level 9 demon vanished within it.

Its true soul was extremely arrogant.

"I will return!"

Chapter 2566: Dragon Battles Across the Four Seas, Nora's Rise to Fame!

Buzz! A sudden change occurred.

A pitch-black river emerged from the void, hanging upside down from the sky.

A minotaur with a towering physique swung a sickle, reeling back the true soul.

"No! No! No!"

The true soul of the Level 9 Demon was cast into the river.

The minotaur was Mosi, who had once dealt with Levi as an Underworld merchant.

This time, with the alliance between the Underworld and the Wizard World, he was sent here for support.

"You really think you're a true immortal god? I've been working in the Underworld for ten thousand years, and I don't even dare to dream of immortality, yet you want to come back? Get lost!" the minotaur couldn't help but curse.

Taking away the true soul, he gazed into the distance.

"The Netherworld Ancestor said that the power of that King of the Underworld has awakened further. It's only been a thousand years, and he's already at level 8. Truly terrifying. These second-generation offspring of the Mother River are truly remarkable. When can I likewise achieve the status of an immortal in the Underworld?"

...

Dragon Flame City.

The Dragon Flame God sat in his estate.

Inside the crystal ball before him, scenes flashed continuously.

He looked toward the West Sea.

"Two Level 9 Demons risking their lives to deal with a supernova, the Abyss is truly willing to go all out. With the strength of the Dusk Palace Master, he should be able to contend with one... As for the other, I believe the Golden Walker will make the right choice. Ordinarily, there should be no problem, but why do I have a premonition that there are variables in this battle? What have I missed?"

He opened his mouth to spit.

A miniature Flame Divine Dragon drew complex and mysterious astrological symbols in the void.

The trajectories and nodes of billions of events whirled like program code.

At the same time.

In the Land of Darkness.

Adam felt the tremor of the Dark Sun Badge on his chest.

"Are you divining my fate again? But in terms of astrology, it seems the Dark Sun has the upper hand."

...

As the full-scale war began.

In the Land of Nora, the demonic attack came like a sudden storm.

Blood and fire spread with even greater ferocity.

Ordinary wizards and alien races engaged in a blood battle with the demons below.

High in the heavens.

The walkers, King of the Underworld, strong alien races, and Level 9 Demons unleashed the most intense collisions.

Columns of demonic aura rose across the Nora Four Seas and numerous continents.

Near the Continent Bridge and other key public facilities, the war was especially fierce.

In the Land of the North Sea.

The Thunder Light Wizard Group, led by the Annihilation Realm Thunder, was on full alert.

Above them descended a Flame Demon, two thousand meters high, with bull horns on its head.

It exuded a murderous aura, laughing eerily, with a huge axe in its hand pointing downward.

"Are you the Annihilation Realm ThunderHarvis?"

"I am."

"Die!"

The Flame Demon swung its axe, instantly vaporizing the sea surface within a thousand miles, causing magma from the earth core to flow.

At the same time, brilliant array lights shot into the sky.

A thousand Warband Wizards assembled like stars sprawling across the firmament.

Harvis stood atop the Thunder God Projection.

Accompanied by Thunder Roc and Human-faced Thunder Snake, two Glorious Sun-Grade spiritual creatures.

He was spirited, with an upturned smile:

"Thunder Light Wizard Group, assemble into the Thousand Star God Destruction Formation! Today, we shall slay the demons that defy God!"

Such battles unfolded simultaneously in multiple places.

This was the most intense wave of attacks since the demons had launched their blood battle.

They came at any cost, charging to their deaths.

If this wave of assaults could not be withstood, the future of Nora would be obvious.

...

The Black-bearded Demon King Zagusta looked at the young man on the sea below.

He sat upon the sea, drifting with the waves, sipping tea.

"Did you know I would come?"

"I did not."

"It seems you are confident enough to confront me."

"Yes, to correct, it's not confrontation... but extermination!"

"Arrogant!"

The Black-bearded Demon King's long beard transformed into countless sharp swords, shooting toward Levi.

Levi activated Roc and Snake Path, nimbly maneuvering between them.

The sea erupted with towering waves.

The Crimson Dragon Slashes flew out, and Levi gripped the greatsword, sweeping horizontally!

Torrential Sword Qi burst forth, colliding fiercely with the indestructible tendrils.

"Not bad... but not enough!"

Zagusta waved his hand, launching tens of thousands of tendrils once more.

They moved like the hands of an Ancient God falling from the sky, swaying peculiarly.

The poisonous water, corroding all things, fell like a torrential downpour, covering an area within a thousand miles.

Levi activated the Vajra Secret Word and numerous protective force fields.

The poisonous water dissolved layers of force fields as it fell, depleting them, while also being consumed.

The remaining poison was stopped by the golden barrier.

Zagusta's expression slightly changed.

"He can actually withstand my level 9 poison."

He discarded his underestimation, as even more vast demonic aura surged forth.

From afar, the world seemed to float a huge black sea urchin.

It launched hundreds of miles' long demonic aura tendrils continuously.

All tendrils danced wildly, chasing after the shadow of the black-armored swordsman.

In the breaking sound of the heavens and earth, it shattered like glass.

Seawater, clouds, the sky, demonic creatures... all who enter the battlefield meet certain death.

The Golden Walker, watching from a distance, was astonished.

"He... he truly dares to clash head-on with a level 9 demon?"

Even though this was only the early stage of level 9, and the weakest Fish Demon.

Yet, even for him, it required some courage to face it.

The higher the realm, the more cherished life becomes.

He felt some relief, thankful he did not make a move against Levi in Nora.

Otherwise, if Levi had escaped to report to the higher-ups, he would have been unable to continue in Nora.

"What is the congress thinking? With his strength, he doesn't need my protection. Could there be other unknown risks on this battlefield?"

Chapter 2567: Dragon Battles Across the Four Seas, Nora's Rise to Fame!

On the other side, on the battlefield.

Levi moved like a phantom, with each appearance pointing out a Fire Dragon Tribulation.

In an instant, more than a dozen Fire Dragon Tribulations appeared simultaneously.

They roared, intertwining as they blasted towards Zagusta.

The heatwave exploded, the demonic aura melted like snow, and several tentacles were severed.

Because of the Great Light King Body.

Levi's attacks, more or less, carried a Light attribute.

This was critical damage to demons. Coupled with his rapid casting of more than a dozen Fire Dragon Tribulations in a short time, forming a stacking effect similar to a Supreme Divine Talisman. Ultimately, an eighth-circle innate spell managed to injure a level 9 demon, and quite severely.

"Damn insect!"

Zagusta roared helplessly.

It dared not linger here for long.

Afraid that the Dragon Flame God would react and hit it with a map-wide attack.

These days are different because the Underworld intervenes, and the Mother River disrupts things.

Leading to some level 9 demons who consumed the Abyss Heart being unable to reincarnate.

Life is but one, and it didn't want to die.

Its form shattered the void, actually attempting to withdraw.

Roar! Accompanied by Mary's roar, the giant dragon corpse demon descended.

"Kekeke, let your dragon sister pamper you, little demon!"

Mary sounded more like a villain than a demon, in a lewd tone, not like she was acting.

"What?"

Zagusta couldn't dodge in time, pinned down by the giant dragon onto the sea surface.

Mary opened her mouth and bit fiercely onto its demon body.

It knew it had been ambushed.

This Dusk Palace Master actually had a quasi-ninth-level puppet trump card.

No wonder it was so confident.

"Black Water Demonic Realm! Open!"

With a single thought, Zagusta formed a Black Water Domain with a thousand-mile diameter in the void.

It rose into the air like a flying disk.

The immense force blasted Mary away, landing in the distance, with much of her scale armor corroded.

Boom! The Black Water Domain transformed into a sky-covering Demon Claw, slamming towards Levi.

Behind Levi, the Nine-colored Emperor's Dharma Idol emerged, and the Emperor's Sword cut skyward!

Sword Qi clashed with the Demon Claw.

A wizard tower flew out from Levi's mind.

It grew infinitely with the wind, seemingly about to pierce through Nora's crystal wall.

"Eternal Star AbyssEight Thousand Worlds!"

With a wave of Levi's hand, the wizard tower shattered the Demon Claw, heading straight for Zagusta's head!

"Suppress!"

Eight thousand strands of starlight descended, weaving into a giant net, trapping Zagusta.

"Kill!"

The Eternal Star Abyss began to spin like a millstone.

The wizard tower unleashed divine power, pressing the mountain-like demon body beneath the sea surface.

Around Zagusta, circle after circle of Black Water Domains appeared.

"Dual Black Water Domain!"

A level 9 demon naturally mastered the power of the Demonic Realm.

The so-called Demonic Realm is often related to the elemental power it represents.

This is a powerful domain, and the more layers one masters, the stronger the power.

An early stage demon at most has three layers.

By analogy, a mid-stage one has six layers, late-stage nine layers.

If it's a peak level 9 demon, it can master ten layers of demonic domain!

Zagusta managed only two layers, recently comprehended.

So this was its strongest strike.

Levi clearly felt a massive force surging like a tide, trying to knock the wizard tower away.

Inside the eight-thousand Sealing Stars, another batch of level 5 shadows died.

Even though Levi had already stacked various shadow magic states.

But a level 9 demon's full-force strike was still too fierce.

Luckily, shadows above level 6 were merely injured, remaining unharmed and able to recover.

As it stands, Zagusta's strength wasn't much stronger than a newly matured Flame King Dragon.

With the wizard tower suppressing, Levi was in an unbeatable position!

"Mary, hold the wizard tower down!"

"Got it."

The giant dragon corpse demon appeared atop the wizard tower, assisting in suppressing the demon.

Levi and the Nine-colored Emperor attacked the demon from both sides.

The Emperor slammed the void, Elemental Ruins!

Subsequently, Zagusta clearly felt the power of Dual Demonic Domain weakening significantly.

Demonic domains are fundamentally about utilizing elemental power and other energies.

Now, being nullified over a large area, its power naturally diminished.

Chaos Sun emerged, striking towards Zagusta's chest.

Zagusta roared, a thick demonic aura tentacle surged from its chest and went to entangle.

Levi activated Dragon Elephant Path, after stacking Mixed World One Hundred and Eight Swords, he sliced through!

Suddenly, his mind's Danger Perception frantically warned him of a new enemy's arrival.

Buzz! The space behind him unbeknownst to him had cracked open, revealing a level 9 Mud Swamp Demon.

It gathered a world-destroying black light on its body, aiming at Levi.

Clearly, this was a premeditated action by the demons.

One level 9 demon tied down Levi.

The other level 9 launched a sneak attack in his moment of combat climax, when he couldn't be distracted! .

Levi seemed to enter a state of no self.

He didn't dodge like he usually did; instead, he chose to continue attacking!

"Madman, you want mutual destruction, right? Then come on!" Zagusta shouted.

On the other side.

The Golden Walker's expression changed.

At first, he thought Levi could only save himself from a level 9 demon.

It turned out Levi seemingly could fight evenly with it.

With the appearance of the giant dragon corpse demon and wizard tower, Zagusta was completely passive.

He realized, wasn't this Dusk Palace Master going to defeat a level 9?

Such a terrifying record, even those reincarnated legendary sorcerers hadn't achieved.

How did he do it? Just who is he reincarnated from?

"Sigh, what bad luck, let's do it."

The Golden Walker cursed and vanished.

Chapter 2568: Dragon Battles Across the Four Seas, Nora's Rise to Fame!

...

The Chaos Sun and Levi's Sword Qi simultaneously struck Zagusta.

Boom! The scales on the surface of this Level 9 Demon began to crumble inch by inch.

At the same time, Levi was also hit by the light of the Level 9 Mud Swamp Demon, his form collapsing.

Billions of Thunder Element Particles surged into the sky, coalescing into a figure beneath the heavens.

He gasped for breath, looking at his lower body, half of which was corroded away.

"Even with elementalization, it's still unavoidable?"

Without hesitation, he exploded again.

Once, twice, three times...

In the dumbfounded gaze of Zagusta and the Mud Swamp Demon.

In an instant, the man self-detonated multiple times, reforming his body from the boundless blood fog each time.

Finally, Levi's figure emerged, looking unfazed.

The destructive black light, like maggots in the bone, finally dissipated.

Boom! Zagusta's head was severed by the Emperor, and the Demon Soul attempted to escape.

A Golden Armor Youth appeared, radiant like a Golden Sun.

A golden-edged net descended, trapping the Demon Soul.

Levi transformed into a Thunder Dragon, piercing through the Demon Soul's body.

After several such passes, under the assault of the Myriad Thunder, the Demon Soul became as thin as paper.

Zagusta's true soul emerged.

Before the Kings of the Underworld could arrive to claim its soul, Leon transformed into a golden light and shot through it.

Commencing a grand feast on the spot.

Another Mud Swamp Demon had already been intercepted by the Golden Walker.

Brilliant golden lightning filled the sky for thousands of miles.

Black gas and golden electric currents intertwined and collided, creating a scene of world annihilation!

Levi watched the rescuing Golden Walker but said nothing.

This battle, seemingly brief, had indeed been draining.

Those few instances of destruction and reformation consumed much of the Death Ember Dragon's power.

Staying here was unsafe; it was time to withdraw.

The Level 9 Demon earlier had contributed 12 points of War Merit to Levi!

Bringing his total points to 20 billion!

The goal of this battle had been achieved.

As he tore open the void, ready to leave, the sky darkened.

Suddenly, a powerful sense of danger erupted without warning!

Without hesitation, Levi activated the Invisible Secret Word, retreating tens of thousands of miles away.

At the original location.

An enormous black dragon, even more terrifying than Mary, emerged, exuding overwhelming murderous intent.

Yet another level 9 arrival! It seemed to be a puppet-like creature similar to the giant dragon corpse demon.

The giant dragon lunged in vain, then turned its gaze toward the Golden Walker, charging.

This made the Golden Walker curse aloud.

Dealing with one Level 9 Mud Swamp Demon was already taxing, and now there was a Level 9 Giant Dragon.

And the Levi he was protecting had fled without a trace.

"Outrageous!"

A golden ring with a diameter of ten thousand meters appeared behind him.

Countless golden lightning bolts circled around it, exuding destructive power!

Primordial Soul Witch ImageGolden Ring!

He, eyes aflame with anger, roared:

"Do you really think I'm made of clay? Let me show you what true golden lightning is!"

...

Tens of thousands of miles away.

The dawn broke, yet it wasn't any safer.

Levi's eyes narrowed.

A figure in a black robe emerged from the void's black hole in front of him.

"I didn't expect you to run so fast, but luckily I was prepared."

"Black Sun Adam?"

Levi's face turned grim.

He had never directly interacted with this person.

But his notoriety was known throughout the Wizard World!

"Indeed, Mr. Levi, this is our first meeting... and also the last."

Adam smiled, a black magic ball suddenly appearing in his palm.

The magic ball rapidly expanded to a massive size, engulfing the surrounding world in a tide of darkness.

Boom! Levi's form disintegrated once more, turning into countless Thunder Element Particles.

"Explode!"

The magic ball exploded completely, and for miles around, the black heavens descended.

In this realm of no light, Adam appeared as a king of the night.

His hollow black eyes, like those of a God, stared at the reemerging Levi.

"You can't escape."

He extended a finger, and a terrifying black light beam instantly pierced through Levi.

"You're strong; ordinary Ninth-Circle Wizards might not be able to take you down, but I'm no ordinary one."

Instantly, Levi's form began to disintegrate into countless elemental particles.

"It's over."

Black Sun muttered to himself, ready to leave.

The one struck by his light beam was undoubtedly doomed.

The next moment, he realized something was amiss and flickered away from the spot.

A hand emerged in the void, and a Chaos Sun rose!

Boom! White light banished the night, tearing apart the giant lightless barrier.

Sunlight shone on Levi's face, the Nine-colored Emperor standing behind him, cloak fluttering.

He calmly said, "You think you're special? To me, you're quite ordinary."

The Black Sun remained silent, his heart subtly changing.

His black light beam could dismantle enemies into elemental particles.

In theory, even an undying body or quasi-elemental holy body couldn't withstand it.

But he didn't know that Levi's [Immortal Secret Word] was far beyond ordinary undying bodies.

As long as his consciousness remained, as long as his life flame did not extinguish, he could resurrect instantly.

All he managed was to annihilate Levi's first level, celebrating prematurely.

"Could it be the Death Replacement Technique?"

Adam repeated his trick, conjuring another dark magic ball.

Buzz! The void trembled, and a massive golden shield descended with a roar, stretching across the seam and embedding in the crust!

The expanding magic ball made the giant shield tremble fiercely, threatening to hurl it away.

A burly figure clad in golden heavy armor descended.

His visage was majestic, carrying the demeanor of an Emperor, his eyes deep with wisdom.

In his hand, a giant hammer appeared, striking the giant shield!

Thud! The giant shield gained strength, pressing forward like a wall.

Chapter 2569: Dragon Battles Across the Four Seas, Nora's Rise to Fame!

The sea rolled back, and the sky shattered.

The shockwave of the black magic ball also rebounded.

The Black Sun retreated rapidly.

"Lion Emperor Solomon? How can you be in the Wizard World?"

He vaguely knew something about the man before him.

Because the Council of Ten Thousand Clans had once invited Solomon to join, only to be refused.

Not only that, this person also injured the emissary of the Council of Ten Thousand Clans.

Solomon shouldered the great hammer, exhaling a brilliant golden breath.

"None of your damn business!"

Adam sighed softly in his heart.

"It actually failed."

The strength of the Dusk Palace Master exceeded the expectations of both him and the Dark Sun Sovereign.

He had tried his best not to underestimate him, but still misjudged.

Plus Solomon's intervention, there was no chance of success anymore.

Wasting more time might only get himself involved.

He shattered the void with his body, disappearing without a trace.

The Lion Emperor did not stop him, nor could he.

Levi silently watched Adam disappear, feeling chilled inside.

"Looking forward to our next meeting, Adam."

He hated people who put on airs in front of him the most.

...

Land of Darkness.

Adam appeared, shaking his head, sighing alone.

Unless something unexpected happened, he wouldn't come to assassinate Levi again.

In this battle, he hadn't used his full power.

But he had a premonition, even if he did, he couldn't kill him.

The Dusk Palace Master was adept in the Path of the Witch Knight.

His methods were too numerous.

Turning around, Adam's expression froze.

A figure in a red robe was already standing behind him without his knowing.

...

North Sea Battlefield.

The body of the Level 9 Flame Demon collapsed, its breath dissipating.

Harvis sheathed the floating Thunder Giant Sword before him.

The greatsword was ancient and grand, not seeming to be of modern craftsmanship.

This was a very powerful rare treasure.

It was something left from his previous life, not to be used unless absolutely necessary.

"I thought using this treasure would expose my past life identity of Thunder of the Mortal World to my teammates, but now... no one recognizes my [Iso's Sword], I was being narcissistic." RÁNÖBĚŠ

He couldn't help but mock himself inwardly, then looked into the distance.

"I wonder how Levi is doing over there? In this era of total war, fighting alone is tough... No matter how many summoned creatures there are, they're not as good as a group of comrades."

...

West Sea Battlefield.

Watching the Mud Swamp Demon get killed by the Dragon Flames, the Golden Walker breathed a sigh of relief.

"To save him, I nearly got myself killed, damn, who do I go to for reason? With such strength, does he really need my protection? He should probably be protecting me!"

Today's battle made him realize how laughable it was to even think of getting rid of Levi.

Fortunately, he never acted, otherwise there would be no retreat.

"The times have changed."

The Golden Walker mused as he left the battlefield.

...

Levi looked at the robust blonde man who saved him.

"You must be Lion Emperor Solomon?"

Solomon nodded,

Levi gratefully said, "Thank you... but why did you help me?"

Solomon replied, "It's a long story."

He did not find the Solomon Empire's plane when he returned.

He guessed it might have been fused due to the great convergence of planes.

So he directly came to the Wizard World.

Indeed, that was the case.

The people of Solomon Empire had already integrated into Nora.

Having nowhere to go, he joined the Alien Affairs Administration.

And learned about the Star Fortress plan.

Knowing there were still Secret Mark Warriors wandering deep in space within the Star Fortress.

Estimated to return in more than a hundred years.

And Levi was the main person in charge of the Star Fortress plan.

So he wanted to visit the Ancient Dragon Continent.

Unexpectedly, he encountered Levi, who was being ambushed by the Black Sun, on his way.

So he saved him in passing.

He was shocked that Levi managed to survive before the Black Sun with an eighth level body.

During his wanderings in the Multidimensional Plane, he had heard some rumors about the Dusk Palace Master.

The external rumors were quite fantastic, even calling him the Twilight Demon.

Seeing him for real, he realized the Dusk Palace Master was even stronger than he imagined.

The external rumors were too conservative.

Levi said, "Rest assured, once the Star Fortress returns, I'll inform you first... Oh, right, Kane, whom you once taught, is also with me now."

He gave Solomon a detailed account of Kane's experiences.

Upon hearing, Solomon laughed, "Then we are fated, I especially like that child Kane, didn't expect he's already seventh level, I'll visit him when I have the time. I'll also be staying in Nora more often now, feel free to contact me anytime. With the current tense war situation, I won't disturb you further."

Saying goodbye to Solomon, Levi returned to the Ancient Dragon Continent.

He won't be leaving until this wave of massive war ends.

...

A month quickly passed by.

This time was the darkest and most grueling period in a thousand years for Nora.

Partings and separations were more frequent than ever before.

Every day, numerous primordial soul wizards perished.

Every day, new continents were being wiped off the map.

Even 3 Grand Wizards, 2 Kings of the Underworld, and 7 Supernovas fell.

Whole ace battle groups were annihilated, and wizard organizations collapsed.

The number of mortal rookie casualties was uncountable.

Nora truly turned into a ruthless meat grinder.

In response, the demon losses were even more terrifying in number.

There were more than 20 Level 9 Demons slaughtered by Dragon Flames alone!

Plus those killed by the King of the Underworld, battle groups, or other walkers.

Level 9 Demons lost totaled over 30.

In any civilization, this would be an extremely heavy blow.

For the Abyss, it was equally significant.

Chapter 2570: Dragon Battles Across the Four Seas, Fame Shakes Nora!

Since they have engaged in an all-out war, Nora is just one battlefield.

The deadliest part is due to the Underworld's involvement.

The 30 fallen Level 9 Demons truly perished.

Even owning an Abyss Heart proved futile.

Thus, the demons gradually began their retreat, pulling back to the Land of Darkness.

They continued to harass Nora using the original small-scale guerrilla tactics.

Even the Abyss, as strong as it is, finally felt the pressure.

This month's losses are no longer something they can ignore.

Nora temporarily returned to the state before the full-scale war.

The Abyss's voluntary retreat marked the victory in the First Nora Defense Battle!

Though a significant price was paid.

But at least for some time in the future, the Abyss won't be able to organize such large-scale battles again.

Nora welcomed a brief lull.

But it was only for a moment.

During the full-scale war, the Council of Ten Thousand Clans frequently dispatched powerful figures to harass.

Using the chaos the demons brought, they successfully carried out several assassinations. .

Of the 7 fallen supernovas, 3 died at the hands of the Council of Ten Thousand Clans.

The losses to the Wizard World were considerable.

The Tower of Heaven.

Edmund was giving a new speech.

He looked at the exhausted walkers and wizards, and then succinctly said:

"This time we were victorious, but the war is far from over..."

...

Ancient Dragon Continent.

Because it is close to the Sorren Continent.

In the past month, the degree of demonic calamity was not severe here.

The most dangerous attempt was when a Level 9 Demon tried to invade.

Before Levi could take action personally.

His good neighbor, Lady Rowling, settled the matter from a distance.

This filled Levi with gratitude.

He was not afraid of a Level 9 Demon.

But if a battle of destroying heaven and earth caliber occurred on the Ancient Dragon Continent.

It would inevitably cause some unnecessary losses.

At other times, the Ancient Dragon Continent successfully defended against the demon invasions.

The Gray-white Mechanic and Deep Space Wanderer brothers joined forces to completely upgrade the defense system of the Ancient Dragon Continent, so even if a Level 8 Demon appeared, it could be quickly eliminated.

Moreover, Levi was personally overseeing the place.

With the Shadow Army at his command, as long as it wasn't Level 9, any other demons would perish regardless of their numbers!

The demons aren't fools either.

They more often chose to attack areas with weaker defenses.

This could cause maximum damage to Nora in a short time.

The Ancient Dragon Continent, being a fortress as solid as a rock, was not their primary target.

Levi opened the Demon Slaying List.

His points had already reached a terrifying figure of 21 billion.

In the past month, he didn't need to actively seek out demons.

Simply by staying home and defending, he accumulated 1 billion points.

The bulk of which came from those powerful Level 8 Demons.

Not just him, but many other members of his organization also reaped substantial rewards.

Elena amassed 500 million war merits and could exchange them for a Sun Refining Artifact at any time.

The ranking of the Fire Dragon Knight and other 18 Twilight Cavalry continued to rise.

Soon after, Levi received the final casualty report.

In just one month, the Ancient Dragon Continent lost 7 Level 6 experts.

Including Lizardmen, witches, Holy Temple Knights, other alien race experts, etc...

The demons' attack was too fierce, and no matter how thorough, there'd always be some oversight, casualties were inevitable.

Comparatively, the Ancient Dragon Continent's casualties were already very low compared to other wizard organizations.

Once all the gains from this battle are digested.

It should be possible to make up for these losses in future years and even further advance.

Regardless, ensuring the safety and well-being of the injured and the families of the dead must be prioritized.

Additionally, owing to Levi's timely arrival.

He managed to place 5 Level 6 experts into the ancient banyan tree Mansion.

They became the first members of the Heroic Spirit Hall.

They will retain memories from their previous life and live out their second life in the form of the Undead.

Of course, the past month hasn't only brought bad news.

Recently, the Feather King of the Ancient Dragon Empire broke through to Level 7 in their twilight years.

This gave hope to other Level 6 Lizardmen.

Currently, it seems the overall talent of Lizardmen cannot match the human knights of the Holy Temple.

Yet, as time passes, with fate on their side, generation after generation and through life-and-death relay.

In the coming years, they are bound to achieve significant accomplishments.

At the Emperor's Palace, Elena's voice came through, a bit excited.

"Levi, look at the newspaper, you're on the front page!"

[Sorren Daily: During the full-scale war, the Dusk Hall Master, with an Level 8 body, defied odds to slay the Level 9 Demon Zagusta! The title of Supernova King is well-deserved!]

[Blood Battle Daily: To commend the outstanding achievement of the Dusk Hall Master slaying a Level 9 Demon, the Blood Battle Command Center, after unanimous research and approval by the Supreme

Council, decided to award an additional 2 billion war merits! Once again, a special reminder that fighting beyond realms of strength is a dangerous act and this is an exception, do not imitate!]

...

Article after article of the newspaper front page reported on Levi's kill of the Level 9 Demon.

At the same time, his bracelet beeped continuously with notifications of the 2 billion war merits credited.

"Is this for real? A free 2 billion?"

Levi was a bit surprised.

He hadn't actively announced that battle.

Unexpectedly, the Wizard Council publicized it on his behalf.

He didn't mind.

After realizing he can even escape in front of the Black Sun.

Levi knew, he had already crossed the Level 9 Chasm.

In the absence of a Level-10, he feared nothing anymore.

Next, it was about routinely improving his strength, then actively hunting Level 9 Demons!

From now on, he was qualified to join the upper echelons of the Wizard World's conflicts.

The only thing missing now was cultivation.

Elena hugged Levi, her eyes filled with laughter, she whispered: "You're incredible!"

The accomplishments of the man she held in her arms had seldom been achieved through history.

How could she not be proud?

Levi held Elena, watching the streams of messages from the communication device.

[Buddy, can you tell me which Legendary Wizard you've reincarnated from? Don't worry, my lips are sealed, I won't say a word! —Gatling]

[I admit, I really underestimated your strength before. As Sauron would say when praising others: Awesome!—Harvis]

[Impressive (thumbs up)!—Duke Rumon!]

[Congratulations, new achievement unlocked!—Lucy]

...

Levi smiled broadly.

Everyone loves fame and he's no different.

To be recognized and admired by others, he felt entirely pleased.

Before the Twilight Round Table, fellow knights executing post-battle duties extended their congratulations.

"Commander, you were damn awesome, weren't you?" Emperor Mu exclaimed.

"Yeah, you really made us brothers proud." Black Knight sighed.

An Level 8 body, slaying a Level 9.

Throughout history, how many have achieved this?

Lucky for them, the commander was one of those rare people.

The implications were self-evident.

Someday, the commander will be the most dazzling presence in the long river of time!

His achievements will surely not be limited to an ordinary Legendary Wizard.

There may even be a hope to stand shoulder to shoulder with Sauron, the ancestor of wizards.
