

Wizard 257

Chapter 257: Flower Knight, Legendary Levi! (2)

After saying goodbye to Levi, Ms. Marlene hurried back to the third floor of the White Tower. She needed to recuperate for a period of time and recover from the damage to her spiritual force caused by forcefully using a second-ring spell. Then, she would try to break through to a Second-Circle Wizard.

After returning to the Gray Tower's ninth floor, Levi did not check his gains immediately.

"If the Second-Circle Pharmacist Angus from Whale Song Island leaked our

Whereabouts, we might be in big trouble. Whale Song Island might look peaceful, but it might actually be colluding with the Undead Ship."

This was not impossible. It seemed that the relationship between Whale Song Island and the Gray Tower was not bad, but no one knew what the overlord wizard organization of this sea area was thinking.

After all, Whale Song Island had the only Third -Circle Wizard in the sea area. If it were not for the rules of the Pan-Plane Wizard Council, Whale Song Island might have unified this sea area.

However, Levi did not have any evidence, so it was purely his own guess.

It was also possible that it was the other two high-level pharmacy apprentices who leaked the information.

Although the two apprentices were Witch Marlene's friends, they might have some bad intentions.

There was still competition between different wizard forces. There were only so many resources in this sea, and it was inevitable that there would be conflicts.

"I don't care. In the Gray Tower, even if the sky falls, the Tower Master will be able to take care of it. What's there to worry about? The Tower Master was able to kill a Second-Circle Wizard a long time ago. His strength might be close to that of a Third-Circle Wizard now, and he seems unfathomable."

Levi thought.

After all, the Gray Tower was also an organization that had given birth to a Third-Circle Wizard. Their legacy was not ordinary.

Moreover, the founder of the Gray Tower held a post in the Star Tower, his position was not ordinary. He was also an Intermediate Wizard. If they were really in trouble, they could even call their ancestor over.

There was no need to worry unnecessarily.

Levi looked at the bags on the ground. There were three in total.

One of them belonged to an official wizard, while the other two belonged to apprentice wizards.

The bag of an official wizard looked particularly delicate, with complicated spell runes on it.

Levi estimated that just this storage pouch alone could be sold for quite a bit of money.

He was fully armed and activated the Bright Silver Protection. Liquid black scales covered his entire body in case there were any traps on it.

The bag was tightly closed. Levi tried to open it physically, but after a long time, he could not open it at all.

Spell runes flickered as a surge of power protected the storage bag.

"Damn it, I think I need a spell to open it. This bag is quite advanced."

Levi cursed.

Using brute force to tear it open was a way, but he was afraid of damaging the items inside.

This was the asset of an official wizard, and Levi would be heartbroken to see it destroyed.

In the wizard world, there were all sorts of storage items. He had never seen such a bag before, so he did not know how to open it.

He asked Tuten, but that old guy didn't know either.

"I'll try again after I study this bag properly. If it really doesn't work, I'll go find

Ms. Marlene. She should have a way to open it."

Since he could not open the storage pouch of an official wizard, Levi could only settle for the next best thing.

The storage items of the two apprentice wizards looked similar to the Bag of Gluttony.

Levi easily opened it.

A large pile of miscellaneous items was scattered on the floor.

Apart from some of the wizard's daily necessities and clothes, there were not many valuable items.

Levi did a summary:

66 Aether Stones.

A wand.

It was a sheepskin notebook. Levi looked at it and saw that it was a First-Ring Spell, Undead Summoning.

There was also a spell book from the School of Death that recorded the spell models of three zero-ring cantrips: Withering Ray, Soul Fire, and Corpse Burst.

Finally, there was a Meditation Art called Night Crow Meditation Art.

Apart from that, there were also some casting materials and ordinary gold.

To Levi, the amount of gold was better than nothing.

Of course, these storage pouches were also considered a harvest.

Levi unceremoniously put away the Aether Stones.

Up until now, he had been in the wizard world for half a year, and he still did not have a single piece of Aether Stone.

He did not expect that the people from the Undead Ship would actually send him an Aether Stone from afar. This was 66 points.

As for the wand, it was a pitch-black tree branch with a fork at the end, like the forked tongue of a poisonous snake. It had a very strange shape, and the style was dark.

"Viper Wand, a middle-grade wand. There are two zero-ring cantrips, Soul Fire and Undead Bone Armor."

"Soul Fire is an offensive cantrip. It will produce a ball of ordinary green hellfire to attack the enemy. The Soul Fire can burn the body and soul, so this cantrip is a classic spell of the School of Death. Many official wizards also use it. The Soul Fire solidified in this wand has the power of a high-level apprentice wizard. It's pretty good."

"The Undead Bone Armor is a classic defensive cantrip of the School of Death. It can be condensed into a set of bone armor to protect oneself. It is enough to withstand a full-force attack from a high-level apprentice wizard."

"This wand is considered a small masterpiece among the middle-grade ones. Other than the two solidification spell, it can also increase the casting speed of the apprentice wizard stage by 10%, and

increase the power of the magic spells by 10%. In White Sail Alley, a wand of similar quality costs 50 points.”

Satisfied, Levi put away the Viper Wand.

Very good, he could save a lot of points again.

Whether it was in the mortal world or in the wizard world..
