

Wizard 2581

Chapter 2581: Treasured Heavenly King's Exquisite Pagoda, a Sky-Cleaving Strike Miles Above the Ground!

Sword Qi echoes, Ice and Fire resonate!

Boom! A splendid saturation attack engulfed Baoshan.

"Holy Spirit Skill: Ancient Crocodile Flipping Sky!"

Roar! Terrifying purple light surged forth, dispelling numerous spells.

A purple giant crocodile, thousands of meters long, emerged into the sky.

It was covered in wounds, its scales shattered, and its bloody maw aimed to bite Ace.

"No wonder it's so troublesome; turns out it's a genius of the Amethyst Race mastering the Holy Spirit Skill."

Lord Victor remained calm, lightly tapping his fingers.

"Divine Falling Star Three Thousand Worlds Destruction!"

This is the strongest sword move he's created, based on the Three Thousand World Tribulation.

The strongest strike!

One by one, sword Qi stars take shape.

They blink in the path of the giant crocodile, then explode with a roar.

Baoshan went berserk, breaking through two thousand nine hundred ninety-nine worlds.

Finally, its movement ceased, eyes gazing at the unreachable Holy Infant.

A difference of one star, like a sky chasm.

Muscle giant Snow King punched, shattering its already worn-out body.

The giant crocodile faded, purple light like snow, condensing into a purple crystal with a diameter of about five meters, shining brightly.

Baoshan perished!

The Holy Infant put away the purple crystal, smilingly murmured:

"Just after breaking through the eighth-circle, how generous of the Amethyst Race to offer weapon refinement materials; how could they know I have a batch of seven-ring top-grade magical artifacts needing advancement?" $\mathbb{R}\mathbb{A}\mathbb{N}\mathbb{D}\mathbb{E}\mathbb{S}$

Lord Victor retracted his secret sword.

"Let's eliminate those demons first."

The duo stepped into the void, disappearing without a trace.

Inside Gondor City.

Soraya gazed at the disappearing purple light in the sky.

"An Amethyst Race of level 8 middle stage was killed just like that..."

Judging by the Amethyst Race's sneaky attack on herself.

Its true power nearly approached an eight-circle perfection wizard.

Lord Victor and Ace, these two supernovas, upon advancing, could jointly kill their foe.

Their strength is truly unimaginable...

Since the blood battle began.

The world's assessment of prodigious wizards mainly consists of genius, top genius, and supernova these three tiers.

Yet little does anyone know that there is also an evaluation system for supernovas within the congress officially.

The third tier is the pinnacle of top geniuses, like the Gondor Three Heroes during the seven-circle period.

The second tier is legendary wizard reincarnation.

Finally, there's the unique tier to candidate: Dusk Palace Master.

His situation is special, already beyond the Three Realms, not within the Five Elements, generally incomparable to others.

Turns out, Ace and Lord Victor already show momentum nearing the second tier.

Thinking of this, Soraya recalled Gandaph.

He is also one of the Three Heroes, always neck and neck with the other two.

If he advances to eight-circle, does he also have such potential?

Boom! On the plains, the Ice and Fire Tower crashed into the demon military formation, the shockwave crushing a large group of demons.

In the Holy Infant's hands, Fire Dragon Tribulation transformed into a regal Fire God roving the skies!

Terrifyingly large-scale explosive output, demons died in heaps.

"Arrogant!" A number of level 8 demons attacked, surrounding the Holy Infant.

Lord Victor seated high in the sky, pointed distantly, aiding the Holy Infant's breakout.

Soraya shouted, "Charge out!"

More wizards joined the battlefield. .

Soon after, the official wizard battle group arrived.

The demon alliance swiftly crumbled, either perishing or fleeing.

The crisis at Gondor City finally dissolved.

After sending the official wizard group away, Soraya approached Ace.

"Thank you both."

"It's nothing, even without us, Gondor City could stand firm."

This time the official wizard group arrived very timely.

This is the significance of the Continent Bridge plan.

The wizards in the city, their eyes either envious, respectful, or grateful.

Voices of thanks rose one after another.

The Holy Infant and Lord Victor smiled as they left the crowd, returning to their respective homes.

They have already broken through for a while now.

Merely consolidating their realm, not revealing to the outside world.

The time just after advancement is the busiest.

Refining previously acquired oddities, reforging Wizard Tools, arrays, secret swords, etc.

Once these are digested, their strength can go even further.

Meanwhile, at Gandalf Potion Store.

Gandaph, shirtless with a muscular upper body, meditated with closed eyes.

Mysterious Dragon and Snake runes flowed over his whole body.

New runes sprouted, expanded.

Like multiplying cells, merging into every corner of his body.

Although Witch Marks were unnecessary.

Gandaph's cultivation was even harder compared to Victor and the Holy Infant.

Otherwise, body refinement wouldn't have been eliminated so quickly.

Advancing to eight-circle requires condensing 100 million Dragon and Snake runes.

He now has only a million left to complete.

The newly acquired "Thousand-Eyed Titan Body Tempering Technique" has yet to begin cultivation.

After advancing to the eighth circle, refining all Sun Refining Body Artifacts.

Then cultivate with the even more advanced Dragon Elephant Holy Body, achieving twice the results with half the effort.

...

When the battle to defend Gondor City concluded.

In the distant Cold Mountain World.

An even grander battle was unfolding simultaneously.

Within the storm array capable of world destruction.

A black demon dragon, whose wings seemed like clouds drooping from the heavens, roared.

"You dare ambush me?"

In three directions around the dragon, three figures appeared.

Duke Rumon, Lady Molly, Ice Sea Witch.

"Cut the nonsense, face your death." Duke Rumon puffed his cigar, snapped his fingers.

Colossal Fire God and Earth God projections emerged from both sides.

Behind them, a planetary phantom with a hundred-li diameter appeared majestically.

32nd on the Wizards Ranking: Star Furnace!

Ranking so highly after the Golden Era began.

The power of this wizard form can be imagined.

Lady Molly's back bore a sparkling star-like golden storm, constantly shifting.

56th on the Wizards Ranking: Star Nebula Storm.

Chapter 2582: Linglong Pagoda of the Heavenly King of Many Treasures, Absolute Sky Cut from Ten Thousand Miles Aloft!

More spirit creatures, like Feathered Serpents hundreds of miles long, surrounded the Wind God Projection, hidden within the storm.

The number of other accompanying spirit creatures was astonishing.

The witch form of the Ice Sea Witch was even more magnificent.

In the starry sky, there appeared a shifting world phantasm, constantly changing between ice and ocean states.

In it, giants galloped, sea beasts roamed, birds soared to the sky, all creatures competing freely under the frosty sky.

Ranked 36 on the Wizards Ranking: Frost Sky Floating World!

Beside her, various powerful oddities were projected, with spirit creatures circling around.

"The Ice Sea Witch must also be a Legendary Wizard reincarnated... Such oddities are well-prepared," Levi exclaimed in wonderment from his hidden position.

"Lady Molly seems comparatively weaker; perhaps she's not a Legendary Reincarnation, just the favored by fortune of this era, or maybe her previous life was not sufficiently prepared... After all, some Legendary Wizards fell unexpectedly, not from natural causes, leaving insufficient preparation time."

A battle of earth-shaking proportions unfolded in the starry sky.

Vast and unmatched power erupted.

It was Levi's first time witnessing such a large number of ninth-circle battles.

Duke Rumon was the most ferocious.

Behind him, the Molten Furnace Stars continuously spewed hot magma.

The Fire God and Earth God Projections coordinated, one attacking, the other defending, forming a perfect array.

With each move, innate spells of Destroying Heaven and Earth burst forth.

[Frost Sky Floating World] blocked the North.

[Star Nebula Storm] arrayed in the South.

There was also a pillar of red flames and a blue castle sitting in the East and West.

They were the [Molten Core Pillar] and the [Ice Sea Realm], the wizard towers of the duke and Lady Molly.

The design of wizard towers need not adhere to the traditional spire shape.

Some wizards innovate, transforming them into styles they prefer.

Two wizard forms, two wizard towers, along with Lady Molly's crafted nine-ring [Thousand Wind Locking Array].

This made it so that Phineas, even at the level 9 middle stage, couldn't escape its trap.

Not long after the battle began, it fell into a disadvantage.

It wasn't because it was weak.

In fact, according to what Levi knew.

If one were to track the lineage of the Dark Dragon, .

its ancestor was the [Blood Dark Dragon King] of the Ancient Twin Dragons era.

"Indeed, one mustn't be prideful; the level 9 demon I defeated can't possibly compare... This is the might of a Legendary Reincarnation!"

Levi murmured to himself.

Speaking of which, it seemed like this battle had little to do with him.

These three joining hands could easily kill Phineas.

Lucy said that the war merit rewards for this battle based on performance ranged from 1 billion to 1.5 billion.

Meaning, even if he only acted as a lookout, he could earn a steady 1 billion.

Wasn't that like earning by lying down?

The congress treated him so well that Levi was somewhat unaccustomed.

Relying on the [Unhidden Secret] for an extremely large range of perception.

Levi kept a vigilant watch in all directions...

As time passed,

Suddenly, his expression changed slightly.

Within the Fool Rune, a scene emerged.

It was a giant of ten thousand feet stepping through the starry sky, coming forward.

It was clad in bronze armor, with muscles knotted, and a chest towering like a mountain.

"The lord of the 69th layer of the Abyss, Mother of Copper Giants, Motanas, why is it here too?"

This intelligence had no mention of its presence.

This Copper Giant should have the strength of a Level 9 Early Stage.

But its power far exceeded the Level 9 Fish Demon suppressed by Nora.

It was Phineas's madam, likely coming to save him.

"Can't let this giant disrupt the proceedings, else this effort might be in vain."

Ninth-circle battles could let the enemy escape with slight variables.

Levi telepathically communicated to the three Legendary Wizards, "I sense the Mother of Copper Giants has arrived; I'll intercept it. You seniors focus on killing Phineas and then assist me."

Against such a formidable foe, he didn't wish to act bravely.

Thus, his tactic was to delay as much as possible, with safety as the priority.

"What?" Duke Rumon was slightly surprised.

Clearly, the giant's appearance had taken them by surprise as well.

He was even more amazed at Levi's terrifying perception ability.

Because none of the three Grand Wizards had detected the approaching enemy.

"Be careful; we will solve this battle swiftly to aid you... If necessary, lure the giant here; though handling two simultaneously is challenging, we can ensure your safety," the Ice Sea Witch advised.

Before arriving, the Supreme Council had instructed the three to safeguard Levi's well-being.

Lady Molly said, "I have a spare eight-ring array here, named [Despair Wind Valley], which I used before I ascended as a Grand Wizard; it can also trouble a level 9. Take it with you. I recall you are also an array wizard?"

With a gesture, a stream of light flew to Levi's palm.

Levi said, "Thank you, madam."

After Victor and Holy Infant reached the Eight Layers, his Eighteen Layers of Hell Array began to be refined as well.

With the foundation Levi left, it wouldn't take long to form.

Given his array knowledge, after just a glance, he knew roughly how to use this array.

Yet comprehending it thoroughly would require long-term study.

As he was about to move, another stream of light flew over; it was armor burning with blue flames.

The high, bulging chestplate indicated it was suited for females.

Duke Rumon's voice came through, "This is a Nine-level Treasure, Star Smoke Armor, which I used in a previous life... You don't mind cross-dressing, do you? Hahaha, just joking; it can freely change its appearance."

"Thank you, senior, I'll return it after use."

Levi wasted no time, receiving it promptly.

Whoosh! Another stream of light came.

Levi opened his palm, revealing a deep blue scroll.

On it were ultimate complex spell runes.

Finally, it depicted a Giant Whale leaping across the ocean.

This scroll had such powerful aura that Levi's cultivation and spiritual force found it hard to gaze directly.

"This is the Legendary Magic Scroll 'Sky Whale Sea Splitting,' given to me by a senior for protection... Use it if you face insurmountable danger. However, I reckon, given your strength, it won't come to that. If unused, just return it to me."

The Ice Sea Witch's voice came through.

Levi's hand tremored slightly as he held the scroll.

"Senior... This is truly not right."

He dared accept a Nine-level Treasure.

But this Legendary Magic Scroll truly shocked him.

Using this could kill a God!

The pricelessness of this was imaginable.

From what he knew, while numerous Legendary Wizards emerged in the Wizard World,

Legendary Magic Scrolls circulated were extremely rare.

Most likely, they were the congress's ultimate trump cards.

As crafting one required enormous materials and cultivation costs.

Even a Legendary Reincarnation might only reserve one or two before their end.

"It's just in case, you're unlikely to use it, go on quickly."

Hearing the Ice Sea Witch's words, Levi put away the scroll and set off promptly.

With so many trump cards in hand, even if Gods came, he'd still put up a fight!

Chapter 2583: Battle Beneath the Stars, Dragons Overrun the Sea!

Land of Darkness.

On the road, Levi was recalling the words of the Ice Sea Witch.

"Sky Whale Sea Splitting... I remember there was a legendary witch in the history of the congress called the [Master of Whale Ruins], could she be the reincarnation of the Ice Sea Witch?"

The predecessor mentioned by the Ice Sea Witch is definitely her own past life.

When she handed this Shifting Scroll to Levi, she was already prepared to reveal her past identity.

These seniors trust me so much.

This made even his cold and dormant heart start to stir.

All of this should be inseparable from the battle prowess he displayed.

Ever since he reversed the battle against a Level 9 Demon with his Level 8 body.

His life seemed to have unlocked a new cheat.

The attitude of those big figures towards him also became better.

Even the hostility of the Golden Walker seemed somewhat vague.

This feeling is just too exhilarating.

On the other side.

The expression of the Mother of Copper Giant was slightly anxious.

Like the legendary Kua Fu chasing the sun, it sped through deep space.

After Phineas left home, it felt restless.

Always thinking that this journey might not be smooth.

So, it tracked all the way here.

In the distance, it vaguely sensed terrifying battle fluctuations coming.

It knew that Phineas had probably fallen into the wizard's trap.

It only wanted to rush quickly and save this arrogant pure-blooded dragon.

Today is different from the past; the Underworld is gradually reclaiming the authority that the Abyss had taken.

Even if Phineas consumed the Abyss Heart, once he falls, it would still lead to death and dissolution.

Thinking of this, it sped up its pace.

Suddenly, the void ahead rippled, and a figure descended from the sky.

Levi drew out the Crimson Dragon Slash, and the Nine-colored Emperor rose behind him.

Standing firm and unyielding, this is nothing short of it.

"Lady Motanas, this path is blocked."

Motanas frowned slightly, as it looked at the tiny figure in front of it.

"Dusk Palace Master... Are you going to stop me? Phineas indeed fell into your trap!"

Levi said, "Face me in battle."

Motanas sneered, "Do you really think that killing Zagusta allows you to compete with a level-9? Get out of the way, I don't want to deal with you today."

What greeted it was a Sword Qi as dazzling as the Milky Way.

Boom! Motanas casually swatted, shattering the Sword Qi.

It stomped the ground fiercely, its fury soaring to the heavens.

Armor pieces resembling ancient general's armor appeared floating on its body.

This was the powerful physical defense ability inherent to the Copper Giant.

Vast power of the metal element gathered, forming a spear in its grasp.

"Since you insist on seeking death, I won't refuse your head as a trophy."

The bounty on Levi from the demons had long since risen.

The basic reward had been upgraded from a level-9 Abyss Heart to a level-10 core of the Abyss.

Additional rewards even included a lord position after the 300th layer of the Abyss.

Before the 666th layer of the Abyss, many layers were currently without masters.

Either those lords had fallen or had not grown up yet.

The spear, with a casual sweep, tore a void rift stretching a thousand miles towards Levi.

Facing such an enemy, Levi went all out from the start.

Eternal Star Abyss flew out, standing tall among the stars.

The giant dragon corpse demon circled behind Motanas.

"Such a great chest, such a fine rear, it'd be such a waste not to use it as a breeding body... Master, this female giant's beautiful body is mine! The heroine of my new book is a female giant, perfect for inspiration."

Mary maneuvered the corpse demon to sneak attack.

Motanas turned around and punched, colliding with the dragon claw of the corpse demon.

Its form slightly recoiled, but the corpse demon was sent flying far away.

The gap in strength between them was still significant.

Motanas was an old-fashioned level-9.

Levi estimated its strength to be roughly akin to a demon lord who commands a three-layer Demon Domain. .

Mary's half-baked giant dragon corpse demon was only effective for harassment.

But it was enough; the real damage had to be dealt by him!

"Eternal Star Abyss Eight Thousand Worlds!"

In the dark void, eight thousand sealing stars lit up.

The starry sky was adorned, and the starry light descended.

Intricate and covering the sky, the starlight giant net pressed down.

Motanas ignored it, stepping straight to Levi.

The spear swept, and Levi barely dodged.

The terrifying shockwave directly shattered a massive meteorite of several hundred miles in diameter, dissipating into nothing.

The starlight giant net enveloped Motanas, temporarily restricting its actions for a moment.

Levi seized this opportunity to unleash the [Secret Word of Destruction]!

At the same time, the Nine-colored Emperor descended, holding a Chaos Sun!

Levi's two strongest killing moves appeared simultaneously!

Boom! Boom!

The Secret Word of Destruction, usually unstoppable, at this moment only caused cracks to appear on Motanas' armor.

The true flesh and blood body remained unharmed.

Its defense was insanely strong, no less formidable than the Armored Dragon.

Crossing such a major realm made breaking defenses difficult.

Other eight-circle perfect wizards would fare even worse.

It was the Chaos Sun that managed to shatter its outer shell and cause a large portion of its flesh to disintegrate.

Writhing in pain, Motanas tore apart the starlight giant net, thrusting its spear at Levi.

"Bronze Prison!"

To lock down Levi's movement, it used its giant's spell-like ability.

In the void, metallic walls appeared, enclosing Levi.

Under immense pressure, even the quasi-elemental holy body struggled to be employed.

Levi had no choice but to take this strike head-on.

[Mountains and seas may shift, but my body remains unmoved!]

Brilliant golden light descended, encircling Levi, eternal and unyielding.

Yet under the unstoppable spear strike, the [Vajra Secret Word] held briefly before shattering.

Golden Dragon Frenzy, Heaven Burning Crimson Emperor... Earth Dragon Barrier.

Chapter 2584: Battle Beneath the Stars, Dragons Overrun the Sea!

Layer upon layer of Bloodline Dharma Idol, protective force field appeared and shattered swiftly.

The momentum of the spear weakened step by step.

Bang! All defenses were shattered completely.

"Bring it on!"

Levi took a deep breath, smashing his fist covered in Golden Scales against it!

Subsequently, both the spear and Levi exploded into pieces, disappearing without a trace.

Motanas looked grave.

"Are you dead?"

The next moment, its expression changed, and it swung a punch to its side.

The figure of the Nine-colored Emperor emerged, blocking with a giant shield, which was knocked far away by the mountain-sized fist.

"Roar! Little woman, you're mine!"

Giant dragon corpse demon lunged from the other side, tackling Motanas to the ground.

Blue flames appeared out of nowhere, forming a pillar of light that reached the sky!

Levi, clad in the Star Smoke Armor, descended as a heavenly deity.

He looked like an Evil Spirit Knight from hell, with blue fire soaring skyward, incredibly dashing.

Chains engulfed in blue flames extended from the back of his armor, disappearing into the void.

Unceasing power surged into Levi's body, intoxicating him.

"I feel invincible..."

Utilizing the corpse demon and emperor to create opportunities.

He unleashed the most formidable Sword Qi, having completed the stack of One Hundred and Eight Swords.

Boom! The Sword Qi furrowed a noticeable gash on the 30,000-meter giant's true form.

Flesh flew, revealing bones.

Motanas howled in agony, swinging its massive hand at Levi.

Levi, using the Thunder Element Formless, evaded the strike, circling to the back of the giant and slashing another sword!

Accompanied by the clash of gold and iron, the Sword Qi collided with the layers of manifested and shattered back armor, sparks flying.

The recent strike made Motanas wary, specifically strengthening back defenses.

Inwardly, Levi marveled, "The Star Smoke Armor is too powerful."

After failing to confront Motanas with his strength, he resorted to this rare treasure.

He had previously feared the battle might damage this Nine-level Treasure.

Now, it seemed he worried too much.

The pure combat-type treasure left by the Legendary Wizard for his future incarnation, how could it be ordinary?

This rare treasure, even among the ninth level, is undoubtedly top-quality, even top-grade.

Just from Levi's preliminary understanding, it holds three mighty functions.

First, the ever-burning unique flames, named Star Blue Fire. This flame is even stronger than the Dark Death Flame he obtained early on, capable of incinerating stars.

Second, the strength enhancement, with those chains piercing the void, infusing the owner's body with the extraordinary power of stars for a temporary boost.

Third, the formidable defense, needless to say.

With this treasure aiding, he was full of confidence.

Motanas swung a punch, and Levi also punched back.

Bam! The Star Blue Fire spread to the giant's fist, beginning to burn.

The giant's hard armor showed signs of melting.

"Boasting of rare treasure's benefits! Die!"

Motanas swept away the flame.

It had lost its rationality, the furious power of the golden element transforming into swords, spears, and halberds, bursting forth.

Levi dodged while attacking.

Occasionally, attacks landed on him, blocked by the layers of defense and the Star Smoke Armor.

They posed no deadly threat to Levi.

Giant dragon corpse demon, Nine-colored Emperor, and the wizard tower formed a siege around Motanas.

Occasionally, summoned creatures like Spiritual Weapon, Maya, and Thunder Ghost would disturb, only to be slapped away by the giant.

Levi maneuvered around the giant, muttering incantations.

Array items flew out one by one, transforming into light as they pierced the void.

Motanas pursued Levi as if swatting a fly.

Unknowingly, it was already surrounded by the Despair Wind Valley array.

Whoosh! Whoosh! Two towering wind walls emerged, forming a valley trap.

The powerful wind pressure made Motanas unstable, with Wind Blades slicing its hard skin, sparking.

As Mother of Copper Giant, it never expected.

That one day, it would be teased to such by a yet-to-be ninth-level junior.

With the array activating under layer upon layer of suppression, Motanas couldn't fully exert its strength.

Conversely, Levi, aided by the Star Smoke Armor, became fiercer.

Sword Qi endlessly, flame dragons sweeping, lightning pillars descending from the sky...

Various attacks continued incessantly, dazzling the eyes.

Especially with Levi's attacks, due to the Great Light King Body, they all contained some Light Energy.

This dealt critical damage to the giant turned demonic creature.

For many transcendent creatures, being demonized supposed to be a little stronger.

Equivalent to enhancing the original means with demonic aura.

Yet, at this moment, under Levi's Light Energy, it weakened instead, completely suppressing its attributes.

Motanas roared, swinging fists and long legs, repeatedly blasting the corpse demon and wizard tower away. .

The corpse demon was already significantly damaged.

Thankfully, the wizard tower, with its arrays, could dissipate the power and still hold up.

The cost was a considerable number of Level 5 Shadows within the Sealing Stars being shaken to death.

Even some Level 6 Shadows also suffered severe damage or death, though their numbers were few.

Of course, the main bearers of damage were the Level 7, 8 Shadows.

After slaying Zagusta, Levi newly acquired a Level 8 Shadow.

The Eight Great Vajras, once again completed.

Time ticked by.

Levi roved around the battlefield's edge.

He restrained the giant using various means, focusing on long-range attacks to wear down the opponent, waiting for reinforcements to arrive.

Behind him.

The alluring yet sacred silhouette of the Light Goddess emerged.

In her slender jade hand, holding the apparition of a whip composed of Light Worms.

Whap, whap, whap!

The bright whip whipped the giant's body through the air.

Like hot oil dripping into water, it splashed numerous sparks, leaving streaks of blood marks.

Not only that, Si Lei and Thunder God captured opportunities, divine lightning bursts, annihilating all.

Chapter 2585: Battle Beneath the Stars, Dragons Overrun the Sea!

"Ahhhh!"

Motanas roared in agony, its appearance ferocious, with light and electric snakes intertwining on its Demon Body, lingering for a long time.

Suddenly, it gazed into the distance.

Its mind filled with sorrow, as if sensing the painful screams of Phineas.

Regaining its sanity, it burned the Giant's Blood, unleashing a terrifying metallic storm.

Boom! The wizard tower, corpse demons, and others were swept away, toppling over.

It ignored Levi, running towards that battlefield.

Levi used the Invisible Secret Word to catch up with it, then punched its back.

Motanas fell forward.

With savage eyes, it glanced at Levi, stood up, and continued running forward.

"Stay here!"

Levi activated the Red Emperor Domain, initiating multiple layers of power enhancement!

His figure swelled, transforming into a mini-giant to grab Motanas' leg.

Boom! Levi wrestled with the giant, not yielding an inch.

Motanas staggered and collapsed once again.

Its fist slammed into Levi, but Levi held onto it without dodging or evading.

The two tangled in the starry sky, engaging in hand-to-hand combat.

Blue fire and metal fused, with molten iron flowing.

The female giant was scarred and battered, and Levi wasn't feeling great either.

Fortunately, the Star Smoke Armor and the wizard tower absorbed most of the attacks for Levi.

Otherwise, even with the Undying Body, it would have been difficult to hold off the opponent under constant bombardment.

Subtly, it seemed as if a mournful dragon's wailing echoed in his mind.

Levi knew Phineas was dead.

The female giant looked into the distance, her eyes trembling.

"Phineas is dead... Ahhh, all of you should die!"

Her towering rage erupted, venting towards Levi in front of her.

The Giant's Blood within her burned fiercely.

The already massive giant's body swelled once more.

Thirty thousand meters, forty thousand meters, fifty thousand meters!

Imagine a titan towering amidst the starry sky, how astonishing that would be!

Levi's eyes narrowed slightly, taking a deep breath.

Forcing the Mother of Copper Giant to such a state, he had every reason to be proud.

At this moment, the female giant's power was comparable to a demon lord wielding the Four-layered Demon Realm.

The Nine-colored Emperor stood firm, and Levi's aura was overwhelming, his gaze resolute.

"Going all out? Burning your life force for ultimate Ascension... then forgive me for not accompanying you."

The Invisible Secret Word was activated, and Levi streaked towards Duke Rumon's side.

Having fought and shown off, it was time to slip away.

He was just working for the congress; there's no need to risk his life. .

Motanas was initially stunned, then flew into a rage, madly chasing after him.

Seeing Levi's stance, it thought the opponent was also going for ultimate Ascension to fight it desperately.

Who would have imagined he would be teased!

In the Cold Mountain World.

Duke Rumon and the others had just finished tidying up the aftermath when they saw two figures, one large and one small, rushing from the horizon.

"Seniors, I leave the next part to you."

Levi's figure flashed, arriving directly behind Duke Rumon and the others, protecting them ahead!

At this moment, Motanas had already lost its sanity, launching a frenzied attack.

"Everyone, hold on a bit longer; slaying two Abyss Lords today is quite a feat!"

Three Grand Wizards advanced to engage, surrounding the female giant.

Levi also dove in, diligently assisting!

After all, these were crucial to earning evaluation points.

With the combined efforts of four, Motanas also met its end.

Its five-thousand-meter Demon Body collapsed with a thunderous crash, shrinking like a deflated balloon.

From an incomprehensible void dimension, a winding, flowing black river suddenly emerged.

A King of the Underworld riding a skeletal warhorse stepped forth, taking away Motanas' true soul.

Among the many wizards present, Levi didn't reveal Leon.

"Thanks everyone for your help, it was a pleasure working together," the King of the Underworld cordially greeted them.

"Pleasure working together."

Today, two level 9 demon lords were slain, including one at the level 9 Middle Stage.

As the tension eased, everyone present showed signs of exhaustion.

"Let's head back home."

Duke Rumon exhaled a smoke ring, leading everyone back to the Cold Mountain World.

The Bitter Cold Sage's side was also full of demon corpses.

"The problem is solved; let's build the Star Gate soon, or traveling wastes too much time."

"Thank you all; when the Nora Council is established, I will certainly pay my respects."

The Cold Mountain World gradually faded into the distance.

Some walked side by side.

"Lady Molly, here is your array, uh... a few spots are damaged, sorry about that."

"No worries, you can have it."

"I can't accept this."

This set, capable of momentarily trapping a level 9, was of immense value.

No less valuable than the Sun Refining Artifact or sacred medicines.

"No problem, take it; it's no longer useful to me," Lady Molly smiled.

Unable to refuse, Levi accepted the Absolute Wind Valley array.

"Thank you, my lady; if there's anything I can help with in the future, just let me know."

"Haha, no need for formalities; rank up to the ninth-circle first."

Levi quietly returned the Star Smoke Armor to Duke Rumon.

Honestly, he really liked this armor, even though it was designed for women...

"How was it? Useful?" Duke Rumon smiled.

"Very useful; without this armor, I wouldn't have lasted so long."

"Hahaha, forging this armor took a lot of effort from me as well."

Speaking of which, Duke Rumon was quite proud.

According to him, he was a renowned Exotic Treasure Forger in a past life.

He even participated in forging a level-10 supreme treasure.

"Speaking of which, I once had a disciple with a good talent for forging oddities, but he unfortunately died young, fading into history."

"May I ask, senior, what was the name of this disciple?"

Chapter 2586: Battle Among the Stars, Dragons Overwhelm the Seas!

"Doster Keren."

"So it's him."

"You've heard of him?"

"Yes, I once obtained some rare treasures forged by this master, which helped me get through the early difficult times. I was deeply impressed by him, and I also know that he left a branch of his family on the Yellow Earth Continent, but they too vanished in the dark wizard war."

"Alas, time flies, life is fleeting... Speaking of which, rare treasure forging is a thing of the past, and times are progressing. Except for certain specific scenarios, wizard tools are more in line with the development trend."

"Indeed, but rare treasures are still useful. What you have learned will surely shine brightly."

After exchanging pleasantries with Duke Rumon, Levi found the Ice Sea Witch.

"Sky Whale Sea Splitting, Ruins Fish Sky Opening... Are you the Master of Whale Ruins?"

"Yes, this legendary scroll, you indeed don't need it."

"To use such a precious item on merely a level 9 demon would be an insult to the Supernova name."

"Ha ha ha, you're finally not being modest. It seems you've studied ancient history quite a lot, recognizing this old one's title."

"You created the Long Whale Series spell, a stunning talent, long famous through the ages."

"Past glories are nothing worth mentioning."

"In any case, thank you for trusting me, gifting me the legendary scroll for protection!"

"There are others who trust you even more... work hard and don't let them down."

"I understand."

...

Nora Calendar 1108.

Blood Battle Year 896.

Blood Battle Command Center.

"Congratulations, Levi, on perfectly completing your first level 9 mission."

Ms. Lucy stood at the door to welcome back the group of four.

Duke Rumon laughed and said, "Thanks to the lady's intelligence."

Molly said, "More than that, Levi has overachieved."

Upon completion of the mission, Levi looked at the 2 billion war merits credited to his account.

Under normal circumstances, Levi would have earned about 1 billion war merits for this battle.

However, due to the variable of the Mother of Copper Giant, Levi's obstruction was credited.

And since he contributed significantly in this battle, he ultimately reaped 2 billion.

Following the Grand Wizard to earn war merits is far faster than hunting demons on his own.

His total war merit reached 12 billion.

Ms. Lucy said the Supreme Council is very satisfied with this mission.

The demons lost two generals again, a considerable loss.

Of course, since it was a group task and Levi earned war merits,

the spoils were also handed over to the congress for official processing.

Levi understood this.

He already had 2 billion war merits, so what more could he ask for?

The other three Grand Wizards also received their respective rewards.

For these pillars of the Wizard World, the congress naturally would not be stingy.

...

Land of Darkness.

"What? Phineas and Motanas have fallen?"

"Yes, Lord Pazuzu."

"How did they die?"

"Ambushed by wizards while on a mission!"

With the Underworld entering the fray, the balance of the war seemed to be shifting.

Once confident, Pazuzu was now somewhat unsettled.

Adding to this, the rise of the Dusk Palace Master was adding fuel to the fire.

It knew that regardless, the Abyss must compress the front lines.

Engaging in full-scale war, the forces would be too scattered, reducing the Abyss's chances of victory.

To tackle the tough bone that is Nora, only then can the grand plan continue.

Recruiting Surgard to join the Nora Battlefield is imperative.

...

Two years later.

Levi continued to roam the Land of the Four Seas hunting demons.

Meanwhile, awaiting new mission assignments from the Blood Battle Command Center.

Before advancing to the ninth circle, he needed to accumulate as many war merits and resources as possible.

On the Ancient Dragon Continent, Elena began her seclusion.

Her Witch Mark was also nearing perfection, not long before she could break through to the eighth circle.

Triss immersed herself entirely in the Thousand-Year Potion project research.

Enthralled by the ocean of pharmacy knowledge, unable to extricate herself.

Working alongside a group of ninth-circle and even legendary alchemists was the dream of countless pharmacists.

...

Gondor City.

After the Holy Infant and Lord Victor stabilized their realms,

they also began refining the Truth Oddity they had previously accumulated.

Of course, before this,

The Holy Infant and Lord Victor went to the Blood Battle Temple to exchange the rewards for taking down Baoshan.

Thanks to the replenishment of the Council Treasury, there was no shortage of good items this time.

Baoshan's heinous crimes and formidable strength prompted a substantial bounty reward.

There were shares for 2 Bright Moon Level Artifacts, just enough for each of them.

Considering the Supernova status of the Gondor Three Heroes and their repeated meritorious defense of Gondor City,

the responsible party made every effort to accommodate, allowing the two to personally choose their artifacts.

The Holy Infant obtained a Bright Moon Level Artifact "Red Dragon's Head."

Previously, he had obtained three Red Dragon Artifacts, completing four-fifths of the series.

Victor acquired the "Golden God's Chain," reaching seven-sixths of the series progress.

Gandaph made a final push, the Eight Ring Body Refining was imminent.

The Three Avatars have been waiting for this moment, the path to the Eight Environments was clear.

On this day, Levi, as usual, opened the Blood Battle Store, then his eyes sharpened.

"Level 9 Dark Dragon Demonized Bloodline Crystal, war merit required for exchange: 2.5 billion."

"This..."

He had initially intended to ask the congress if the Dark Dragon Crystal could be sold externally.

The Dark Dragon was known for its speed, and its bloodline crystal could be used as a material to evolve into an "Extreme Darkness Dragon."

However, Ms. Lucy said there was another use for the Dark Dragon Crystal.

Levi didn't pay much attention to it then.

Unexpectedly, the bloodline crystal was eventually put up for sale in the Blood Battle Store.

"Is the lady helping me save money? By letting me exchange with war merits?"

Chapter 2587: Battle Among the Stars, Dragons Overwhelm the Seas!

Levi pondered deeply in his heart.

The market price of the Legendary bloodline crystal is worth tens of billions of Aether Stones.

He could afford it, but he indeed hesitated to spend so much.

A few days later.

Levi placed the exchanged [Dark Dragon] bloodline crystal into the Purification Pond.

"Only 9.5 billion war merits left..."

Now, Levi's only focus was on hunting demons.

He tirelessly ventured into battlefields, searching for demons causing havoc in Nora.

Wherever Dragon King Li appeared, demons had to flee.

...

Time flew by, another two years passed.

In the year 1112 of the Nora Calendar, the Blood Battle had lasted for 900 years.

Nightmare World.

The members of the Dragon Palace People and Dreamland Steeple looked in awe at the red and black sky.

Waves of energy storms swept out in all directions.

At the center of the storm was a massive black dragon with a wingspan of tens of thousands of meters.

"On this day, I have finally returned to the realm of the Nightmare Overlord!"

The Tyrant of Horror roared with abandon, venting the frustrations of recent years.

It had already once passed through the tribulation to level 9, so this time it was second nature.

"Congratulations to the Great Commander of the Dark Department!"

"Congratulations, Overlord!"

"Hahaha, our Dark Department is soaring!" Golden Spear, Faceless Infant Dragon, and other nightmare dragon clan members were filled with pride. After the Flame Department, the Dark Department now had the second level 9 giant dragon, an impressive achievement!

At the end of the year's performance assessment, the Dark Department excelled further.

Whether it was Dragon Scale Fruit or Five Immortal Liquid, they could all be distributed a bit more now.

Upon hearing the good news, Levi came immediately.

"Congratulations!"

The Tyrant of Horror lowered its head upon seeing Levi and said:

"My achievements today could not have happened without my master's nurturing."

Indeed, Levi had invested considerable resources to ensure its promotion, so these words weren't baseless.

He nodded slightly, it seemed the Extreme Darkness Enslavement effect was still in place.

The Tyrant of Horror was not like the Flame King Dragon, without this enslavement, it would very likely turn against him.

To remove the enslavement, it would take reaching level 9 to be prudent.

Besides, Levi currently did not lack enslavement slots, so they'd deal with it when necessary.

Now, among the Eight Dragon Guards, two had level 9 giant dragons.

The strength of the Dragon Palace was now a significant force in the Wizard World.

Whenever outsiders spoke of how impressive the Ancient Dragon Continent was.

The members of Dreamland Steeple felt immensely proud inside.

The world was unaware that the most powerful organization under the Dusk Palace Master was actually in the Nightmare World.

Unfortunately, they couldn't speak of it due to confidentiality agreements, which left them feeling quite repressed,

...

Land of Darkness.

On a meteorite, a figure in a black robe awoke slowly.

He rubbed his forehead, appearing somewhat confused.

Then he returned to normal, activating a projection, revealing the Dark Sun Sovereign.

"Were you captured by Edmund?"

"I believe so."

"How could you be so careless!"

"Could it be that he grew stronger? Don't forget, I'm just a ninth-circle duplication..."

"Why did he let you go? Have you already been controlled by him?"

"In fact, I'm not controlled... He asked me to tell you that he wants to make a bet with you."

"What's the bet?"

"The bet is whether he will advance first or you will become the Sovereign of Nora."

"Hmph, arrogant, throughout the ages, there have been countless level tens in the Multidimensional Plane, but those that step into level eleven are very few. Does he really think he has Sauron's capabilities?"

The Dark Sun Sovereign's eyes were gloomy.

He initially thought Edmund would seize this opportunity to deal with Black Sun.

Unexpectedly, he let him go instead.

This was Edmund's strategic play.

Fortunately, when the Black Sun incident occurred, he severed all ties with him.

Otherwise, Edmund might have tracked him down through his connection with Black Sun.

Since becoming the Plane Sovereign, his strength wasn't quite at his former peak.

He only relied on his long lifespan to acquire some unusual methods.

In direct combat, he couldn't match the peak Edmund.

In fact, among the ancients today, those who can compete with Edmund face to face,

are only the likes of that old codger, the Amethyst Saint.

So he couldn't leave the Council of Ten Thousand Clans.

"What should I do now?" Adam's tone carried a hint of bewilderment.

The Dark Sun Sovereign said, "It's up to you, you are no longer related to me, you can now run to the Wizard World and engage in bloodshed, or find a place for a secure life, studying spells. In any case, Adam, you are free... You can live for yourself, do whatever you want."

Then, he turned off the projection.

Adam sat alone in a daze on the meteorite.

Just moments ago, his authority in the Dark Temple was revoked.

He also lost his Hidden One seat in the Council of Ten Thousand Clans.

He found himself all alone.

"Freedom... to follow one's heart?"

All along.

He believed he was the unique Black Sun.

He was different from ordinary wizards.

But this recent action shattered his confidence and moral foundation by an eighth-circle wizard.

Adam sat desolate in deep space, watching the sun rise and set, stars shift.

A month later.

With a wave of his wizard robe, his figure disappeared into the darkness.

...

Five years later.

Year 1117 in the Nora Calendar.

Blood Battle's 905th year.

Gondor City.

Fire Dragon Sky Work.

[Spiritual Force: 14,900/24,300]

...

"The Ice and Fire Divine Body is finally taking shape."

The Holy Infant felt the surging spiritual force and exhaled deeply.

Recently, he refined the [Frost God Chapter], this Sun Refining Artifact.

His spiritual force leapt by 900 points.

The birthed Glorious Sun-Grade frost talent, [Frost God Body], was also absorbed by the [Ice and Fire Divine Body].

Now, his Dual Affinity Talent, even just pulling one out casually,

was at a top-tier genius level.

In addition, the [Ice Dragon Prison] talent also underwent metamorphosis.

Arriving in the Nightmare World, the Holy Infant pointed with a finger.

Chapter 2588: Battle Among the Stars, Dragons Overwhelm the Seas!

Eight Ice Dragons with claws and teeth bared spiraled out, spreading in all directions.

Then, centered around him.

An ice domain in the shape of an eight-petaled snowflake was formed, radiating over a thousand miles.

Vaguely, it hinted at the mysterious and complex beauty of octagrams, resembling an array.

The world turned into ice and snow, cold and freezing.

Any Nightmare Creature that stepped into it would quickly turn into an ice sculpture.

"The Ice Dragon Prison now has a super-large attack range."

The original ability to control still existed.

Following this, the Holy Infant's thoughts moved, and he pointed again.

This time, the Fire Dragon Tribulation roared out.

In the next moment, high temperatures and ice reacted like a chain reaction, erupting violently.

The super storm of Ice and Fire Double Heaven formed, with the momentum to sweep around over a thousand miles.

"So strong, it already has half the power of the Victor Sword Formation."

Ice Dragon Prison + Fire Dragon Tribulation.

The power of this combination is definitely not a simple 1+1.

The mysterious snowflake pattern formed by Ice Dragon Prison is a natural array.

With Fire Dragon Tribulation as the catalyst, it detonates it.

It's equivalent to creating an eighth-ring attack array out of thin air!

"This move can be called the Ice and Fire Dragon Formation."

Additionally.

In a thought, the Holy Infant summoned a vision of a cold woman dressed in frost-blue robes behind him.

This is the Frost God projection, and like Levi's Light God, it's manifested in female form.

At the same time, a rough and bold Fire God projection emerged, echoing with the Frost God.

"Can these two divine projections be fused?"

The Holy Infant murmured, attempting to merge them.

Successfully, without any hindrance.

A purple god projection emerged, seeming both male and female.

It donned purple robes, with ice and fire flowing harmoniously around it.

"I was originally an Ice and Fire Divine Body, so merging divine projections is not difficult."

Bang! The god projection threw a punch, and purple flames woven with ice and fire hung down the sky dome like a waterfall.

Interweaving hot and cold, an indescribable sense of contradictory destruction filled the air.

The Holy Infant felt that the power of this new projection was comparable to an eighth-ring senior wizard.

"Let's call this divine projection the Purple God."

Additionally, the Holy Infant acquired an ability named Frost of All Things.

It's also a signature wide-range perception ability of a divine-level sequence artifact.

It can complement the Fire Heart Eye.

The Frost God's Chapter was the first Frost God series artifact refined by the Holy Infant, not yet producing a companion spiritual creature.

He still had a second artifact in the same series, Frost God's Book, which was not yet refined.

Having accumulated too many artifacts in the past, he could only take his time.

...

Six months later.

Gandalf Pharmacy.

A high-pitched dragon roar echoed across the seas.

Subsequently, elemental power subtly formed dragons and snakes around Gondor City.

"Who is breaking through? Such a large anomaly? Are they about to advance to ninth circle?"

"Judging by the location, it should be Gandalf breaking through."

"Is the first eighth-circle body-refining wizard in today's Wizard World about to be born?"

"It must be, the title of King of Body Refining is not just for show."

Rumble! The Sky-reaching Dragon Snake visions all surged into Gandalf Pharmacy.

Then an overwhelming eighth-ring aura swept out.

"Hahaha!"

Gandalf's hearty laughter echoed in the sky.

He was bare-chested, his form like a dragon coiled and tiger crouched.

A billion body-refining runes filled his flesh and blood, bursting with endless power.

"It seems the first eighth-ring body refining wizard of this era is born."

Lucian treaded the void, emanating the aura of Eight Ring Perfection.

"City Lord, long time no see."

Gandalf put on his clothes.

"Ah, my Gondor City already has five eighth-ring wizards. From now on, Gondor City will be the most impregnable place in the Central Earth Domain." Lucian was genuinely pleased. ʘAN ŌbĒS

See this luxurious lineup.

Himself, the Gondor Three Heroes, and the similarly well-prepared Lady Soraya.

Even if a Level 9 Demon arrives, perhaps there's a chance to fight.

After all, previously, Victor and the Holy Infant teamed up and easily killed the Level 8 Middle Stage genius of the Amethyst Race.

While he himself belongs to the dual sect of Eight-Ring Perfection, possessing a Nine-level Treasure.

The five joining forces have the power to overturn the heavens and earth!

"Tonight I'll host a banquet at The Lord's Manor to thank everyone for their years of dedication."

"Great, I will surely visit."

After the chat, Gandalf impatiently entered the Nightmare World.

"Lopez, Red King, come, come, let's have a battle of thirty thousand rounds."

Lopez said: "Congratulations on reaching eighth ring."

It knew in its heart.

It was no longer a match for Gandalf.

But with the Red King teaming up, two Level 8 Early Stage Legendary Creatures might stand a chance.

Two giant apes walked upon the void, water and fire intertwining; surprisingly a joint attack technique.

"Good, you come prepared."

Gandalf's bones crackled, his robe swelling with Qi.

Radiant King Martial Arts Dragon and Snake Covering Sea Fist!

He made a bow with his body like a shooting moon, simultaneously throwing out a punch.

Over a hundred invincible dragon and elephant shadows galloped across the sky and earth, unstoppable.

Boom! Boom!

In the initial encounter, Lopez and the Red King were fiercely blasted away.

"Very well, you start with the real deal, don't you?"

Lopez swept a long staff across the sky, its momentum astonishing.

In a fierce battle, Gandalf fought one against two, completely unfazed.

After battling over thirty thousand rounds, he clasped his palms together.

A vision of an ancient god stood upon dragon snake, overlooking the ocean behind him.

Radiant King Martial Arts Dragon and Snake Covering Sea Fist!

Rumble!

The sky cracked, the earth collapsed, the sea overturned.

Two gigantic dragons and snakes, extending thousands of meters, emerged from within.

They were like beasts of the apocalypse, stirring heaven and earth into chaos.

Space twisted, even time showed signs of disturbance.

Gandalf rode the serpent and dragon, traversing the world, where the first wind reached, all things annihilated.

This was the ultimate profound meaning of the Radiant King Martial Arts he comprehended after advancing to the eighth ring!

Integrating previous abilities like Dragon God Domain, Dragon God Protection, all into one.

Combining control, attack, and defense into a single entity.

It was the epitome of his body tempering technique and combat skill.

With the power to move stars and shift constellations, overturn heaven and earth!

With firepower fully unleashed, Lopez and Red King quickly fell behind, finally sent away by two punches from Gandalf.

"Refreshing! Pity that Baoshan was killed by Victor and the others, otherwise I'd have to test my fists on it."

Gandalf returned to Gondor City.

Lady Soraya, dressed elegantly, stood at the entrance.

"Congratulations on reaching eighth ring... the City Lord sent me to invite you to the evening banquet."

...

Hell.

Somewhere on the eighth level.

Upon Levi's arrival, his eyes narrowed slightly.

The devil city before him was already a ruin.

Countless demons crowded within, demonic aura darkening the skies.

An Abyss Well hung in the sky dome, exuding a dangerous aura.

"The Blood Battle between the Abyss and Hell has also begun..."

Chapter 2589: Sword Slays the Demigod, Sauron Easter Egg!

A moment later.

Levi quietly left the Abyss Well.

The situation in Hell is unclear; he dared not act recklessly. .

Moreover, hunting demons here yields no war merit.

Currently, the Abyss is at war across all fronts, and Hell is in chaos.

The war storm sweeping across the Multidimensional Plane is still brewing and intensifying.

...

Black King City.

A tense atmosphere lingered in the city.

Troops from the Demon Fox Clan patrolled outside.

Levi quietly arrived within the city.

Council Chamber.

The Demon Fox Mistress, the three sisters, the Ghost Elephant Master, and the second brother were all present.

They wore solemn expressions, clearly discussing important matters.

Seeing Levi arrive, everyone looked relieved.

"Big brother, you're here; I've already heard about your deeds in the Wizard World."

The Purgatory Demon Sword seemed more excited than Levi.

"Our leader, with his level 8 prowess, has slain a level 9 demon; it's already become a legend." The Demon Fox Mistress smiled.

The Ghost Elephant Master nodded: "Recently, when attending a meeting on the Ninth Layer, the Hell high-ups were also talking about it."

Levi hadn't expected that slaying a level 9 could cause such a significant ripple effect.

If in the future he were to slay a level 10, wouldn't the entire Pan-Plane come to know?

He somewhat understood why heroic epics can endure for ages and continue to be passed down.

People always spread the word.

The Purgatory Demon Sword was genuinely delighted.

Who would've thought?

The elder brother he met by chance in Hell back then.

Would turn out to be such a legendary figure that shines through the ages.

He suspected he'd used up a lifetime's worth of luck just meeting this brother.

Levi sat at the round table and asked:

"How is the battle on the eighth level? When I just arrived, I saw an Abyss Well."

"Not too well. Since the full-scale war began, demons have launched over a dozen invasions into Hell. The devils on the first six layers have suffered heavy casualties. Currently, Hell intends to retract its lines and focus on protecting the seventh, eighth, and ninth layers. With a large number of undead as cannon fodder, the Abyss can't take Hell in a short time," the Purgatory Demon Sword sighed.

"Not long ago, the Bright Prison Dragon King Bah of the second pillar, while dispatching demons on an expedition from the Underworld, led the Emperor of Torture and other confidants to renounce their pillar status and abandon Hell, fleeing beyond the Pan-Plane, whereabouts unknown," the Demon Fox Mistress said.

Levi pondered: "To abandon Hell is tantamount to betraying the Underworld. What is the Bright Prison Dragon King up to?"

The Purgatory Demon Sword said: "I don't know... I just fear that after I ascend to the ninth circle, I still won't be able to find the Emperor of Torture, making it impossible to personally avenge my mother."

This reminded Levi of the Wild Boar Knight.

He consoled: "They will surely return, unless they've joined the astral world, Abyss, or Nightmare—those top-level worlds. Otherwise, they'll be accounted for by the Underworld sooner or later."

Levi estimated that these folks might be opportunists.

They probably believed that under the Abyss's assault, Hell wouldn't last long.

Or perhaps they didn't want to be cannon fodder for the Underworld, so they chose to escape the war.

As the epoch of full-scale warfare begins, more and more monsters and devils emerge.

Even a behemoth world like the Underworld, which has existed since ancient times, is experiencing turmoil.

This millennium is bound to be an era of great reshuffling.

"Second brother, are those body tempering techniques useful to you?" Levi asked.

The Purgatory Demon Sword responded: "Very useful. I didn't expect the Body Refining Academy in the Wizard World to have developed to such an extent; Gandaph is truly a model for us body-refining wizards!"

He himself practiced the "Ten-Winged Heavenly Dragon Body Tempering Technique."

But the other three major body tempering techniques can also serve as references.

Moreover, his fire element affinity talent is quite good.

So the "Nine-Headed Hell Snake Body Tempering Technique" can also be practiced.

Levi said: "There's one more thing. I've arranged a Demon Slaying Bracelet for you and have registered it with the official congress. If you have time, there's no need to stay in Hell all the time. You can return to the Wizard World to hunt demons and earn war merit. The Mistress and the others are sufficient for Hell."

Now that the council treasury has so many good things, second brother must also get involved and accelerate his cultivation.

"Thank you, big brother. I've been away from the Wizard World for too long. I indeed want to take this opportunity to go back and take a look. Not being able to personally participate in such an exciting war will be something to regret later," the Purgatory Demon Sword said.

His path also primarily involves slaughter and combat.

Staying within the city walls daily accompanied only by women has almost left his limbs degenerating.

In fact, he came to Hell initially to avoid past enemies.

As time went on, those enemies have long turned to historical dust in the blood battle.

There are no longer any concerns about returning to the Wizard World now.

His cultivation is already at Seven Rings Perfection.

Being a mythical dragon descendant, he still has ample lifespan left.

And to date, he has only sporadically refined some low-level oddities provided by Levi.

He's only refined two Bright Moon Artifacts and none of the Sun Refining Artifacts.

He has much more potential to tap into.

That's why Levi wants him to hunt demons—to exchange for more oddities.

With second brother's talent, he's bound to shine brightly in Nora like a supernova.

Finally, carrying 2 billion Joss Paper and some materials, Levi left.

In times of war, the military expenses of the two major tribes are considerable.

In the short term, they need to tighten their belts to get by.

Of course, war also means opportunity.

The coming times are bound to see old forces being eliminated and divided.

If Black King City seizes the opportunity, there's hope for it to become a top tribe in Hell.

...

A month later.

Seeing the Nether River and the mast-sail ship arrive as scheduled, Levi breathed a sigh of relief.

He had worried that due to the war, the Netherworld Market might not be held.

This would have caused him to lose a stable source of Rest Soil.

Chapter 2590: Sword Slays the Demigod, Sauron Easter Egg!

At the stall, Di Gao sat there, seemingly injured.

This time, there wasn't anything particularly good on the stall.

Levi bought a pound of Rest Soil, four Rebirth Stones, and 100,000 blind boxes.

"We're actually at the same realm now..." Di Gao remarked.

Levi looked at its wound tainted by demonic aura and said, "Do you want me to help heal you?"

Di Gao shook its head: "It's useless. This was left by a Level 9 Plague Demon. I've already seen a doctor in the Underworld. I managed to survive, but it's hard to heal quickly."

Levi asked, "Let me try."

"Thank you."

With a thought, a graceful and divine projection of the Light Goddess holding a whip appeared.

The Holy Light Domain unfolded, illuminating Di Gao's wound.

Moreover, the power of the Death Ember Dragon also transformed into a warm current that flowed into it.

In terms of healing others, he's not as professional as the Ash Knight.

But he should have no problem saving Di Gao.

After some effort, Di Gao's injury improved quite a bit.

"Thank you, I feel much better."

"You're welcome."

"I heard about your deeds, slaying a Level 9 Demon, truly impressive."

"Just luck."

"Luck is also a part of strength."

"Will the Netherworld Market continue as usual?"

"Yes, unless something goes wrong with the Mother River, the Netherworld Market won't stop."

"Alright, thank you for telling me."

"Sir Levi, I wish you an early ascent to the ninth circle."

"You too, I wish you an early promotion to King of the Underworld... By the way, how's Hao Shan doing lately?"

"Hao Shan passed away before ascending to King of the Underworld... Alas, with its position and lifetime savings, it could have actually bought a Reincarnation Stone in the Underworld, but it already lived a long life, so it eventually gave up."

After some silence.

Levi bid farewell to Di Gao and left Hell.

Partings due to life and death are only natural.

But from the information from Di Gao.

It seems that some high-ranking civil servants in the Underworld.

Can all live another life by the Reincarnation Stone.

That's quite interesting.

...

Ancient Banyan Fairyland. .

The land of the Ghost Mansion stretches for a thousand miles.

Under the dense death energy, spectres are born here every day.

The early spectres, some were even exceptional enough to rival Intermediate Wizards.

In the center of this place, there is a Heroic Spirit Temple built from Dragon Bone.

A ghostly incarnation in a Leopard Patterned Witch Robe descends faintly.

"Hall Master, any orders?"

"Nothing, how do you feel here?"

"Pretty good."

"That's fine."

The figure before him was the ghost transformed from the Leopard Witch.

Having recently reincarnated, her power is still quite weak.

But clearly, the transformation into a Heroic Spirit was successful.

She completely retained the memories of her past life.

In this life, with a spectre's body, she might even advance to level 6!

Returning to the Small Stone Pond, Levi examined the four Rebirth Stones one by one.

First was still his father, Baron Black Snake.

The last time he checked, it happened to be during the interval of reincarnation.

It was enough to show that every future life of his father was as an ordinary person.

If he had become a level six expert, the minimum lifespan would start at two thousand years.

There simply wouldn't be such a thing as an interval period.

This time, the scene of reincarnation before Levi made him freeze:

The valley plains, adorned in silver, the frozen riverbank caves, the collapsed castle, the abandoned bear pen, the black-spotted snake hibernating between rock layers...

"This is... Black Water Valley."

Though the sea and fields have changed, Levi could still recognize the outline and some features of Black Water Valley.

Especially the relic of his family's castle, which he would never forget.

"Baron Black Snake really turned into a snake... Well, I hope in the next life he can at least become a person." Levi smiled and scattered the stone powder in his hand.

The black-spotted snake is just an ordinary mortal snake, with a lifespan of just thirty years.

It's enough to see that his father successfully reincarnated.

Starting as a Black Snake, ending as a Black Snake.

In the future, he won't peep into his future lives anymore.

Then, Levi examined the future life of the Golden Knight.

This one is now a formidable general in a mortal empire in a small world.

He has his own brilliant life, and Levi has no intention to disturb it.

Next was the Lionheart Knight.

The Rebirth Stone's scene appeared, and seeing the figure within, Levi showed a look of surprise.

"It's actually him?"

Seeing a golden-haired man in golden armor invincible on the battlefield.

Beside him, the disciple Kane attended closely, the sword slaying hordes of demons.

Lion Emperor Solomon!

Among the Glittering Legends, it turns out this ancient one fared the best... Interesting.

Solomon was extremely talented, truly favored by fortune, creating his own transcendent path.

His achievements weren't even limited to level 9.

If the Golden Lion Knight knew his ancestor was so amazing, he'd probably be ecstatic.

But Levi didn't intend to tell him.

The Lionheart Knight is already a thing of the past, now there's only Solomon in the world!

The last one, Levi checked Wizard Newt.

In the scene.

In a poetic landscape on a plane, a Wind Thunder Giant Eagle soared freely across the sky.

Levi was left speechless but smiled.

"Alright, as a magical creatures enthusiast, he lived the life he wanted."

And there was a pure white giant eagle circling alongside, echoing each other.

"Everyone is living well... At least away from war."

As the last Rebirth Stone turned to flying ash.

The many people and events Levi encountered along his journey became passing clouds one by one.

Walk forward, don't look back.

...

Months later.

On the eve of entering the ancient tower.

White Snake Jorman also met the end of its snake life.

Its hundred-meter-long snake body had already stiffened.
