

Wizard 2591

Chapter 2591: Sword Slays Demigod, Sauron Easter Egg!

Herman came upon hearing the news, saying goodbye to old friends.

"I think it must have gone to find Teacher Salman."

"I think so too."

"Levi... I suddenly realize that the Gray Tower only has the two of us left. Marlene, Winnie, Marko... and now even Jorman has gone."

"Death is not the end, forgetting is. In the corners of history, there will always be someone who remembers them."

...

Dark Ancient Tower.

Levi went to the fifth level.

Perhaps last time too much luck was used up.

This time there were no outstanding candidates.

However, a Supreme Archmage had advanced to Level 6 Late Stage, and Levi took them away as promised.

After that, he directly jumped to the seventh floor.

The Saint Council added 2 Level 6 Saints, bringing the total to 30 Level 6 individuals.

Meanwhile, a Level 7 Saint died naturally of old age.

The Water Dragon Saint failed to advance to Level 8, feeling somewhat dejected.

He managed to keep his life, but Level 8 seemed almost out of reach.

After seeking his opinion, Levi took him away.

He simply decided to venture into the outside world.

Previously, Heim's father's second primordial soul was successful.

This Water Dragon Saint cannot be said to have no chance at all.

The Flame Wolf Saint's strength, on the other hand, was steadily increasing.

He could already match strength with some veteran strong individuals from the Three Realms and Four Lands.

The Sea Beast Park sent another batch of rare and exotic beasts, including 3 sub-dragon breeds.

Among them, one was particularly rare, a [Halo Dragon] with Level 7 Middle Stage strength.

It is a rare dragon breed of light energy.

Moreover, its bloodline was evidently that of the Mythical Creature [Ancient Holy Light Dragon].

Thus, like the Black Lotus Beast, it could be regarded as the strongest light element sub-dragon breed.

It was said that this Halo Dragon was discovered recently at a new intersection point.

At that time, the sky was filled with rosy clouds, anomalies appeared, as if it was a divine descent.

Typically, this Halo Dragon advancing to Level 8 Peak Realm would not face much difficulty.

Levi named it "Elden" and placed it in the Ancient Banyan Fairyland for proper care.

Next, pulling Duke Rumon into the Dusk Holy Temple seems even more promising.

Before leaving, the Flame Wolf Saint gave Levi the materials stored in a ring.

Levi picked out several potentially useful Truth Oddities and said, "At my current realm, these things aren't very useful to me. Let's use them as rewards for the school's teachers and students."

"Well, the Flame Wolf will certainly do so!"

"Good luck, and when the Rune Land births a new Level 8 Saint, or when you advance to Level 8 Late Stage Realm, I'll take you from here."

"Thank you, Heavenly Venerate."

Afterward, Levi gathered old friends from Three Realms and Four Lands for a reunion.

After the meeting, the Merfolk King found Levi.

"Ultimate Saint... You, sir, see if you can take me out."

"Why? You want to leave here? I must tell you, the outside world is now fraught with war, demons are everywhere, you must be certain."

"Oh? Then I'll reconsider, I won't disturb you."

...

Upon reaching the eighth level.

Levi did not rush to the Five Great Sky Pools.

His Crimson Emperor Dragon Breathing Technique is already close to Level 8 Peak.

During this time, he casually wandered other places.

Wait for the Crimson Emperor Dragon to progress further and directly tackle those final dungeons.

Clear the eighth level in one go, and then wait for the ninth level.

...

Six months later.

Nora, Eastern Sea.

A white mountain range quietly emerged.

The White Dragon Mountain Master stood with his hands behind his back, accompanied by his daughter and a group of White Scale Clan strong individuals.

Soon after, the Old Witch and Wanderer of the Vast Sea, two Grand Wizards, arrived with smiles.

"Welcome White Dragon Mountain Master to Nora, once here, you are family."

"Excuse me to you both, I hear the Nora Council is being prepared, so I'm here to offer my help."

"We are aware, Mountain Master please follow us."

"One more thing, my daughter adores the heroic deeds of the Dusk Palace Master, could she join the Ancient Dragon Continent?" at this point, the White Dragon Mountain Master looked at the blushing Nanette.

"I see... this needs to be discussed with the Dusk Palace Master, but we have good relations, I can go for you," the Old Witch smiled.

With the Dusk Palace Master's fame spreading far and wide, many seek to join.

Situations like the White Dragon Mountain Master's are not uncommon.

It's why the Wizard Council wants to heavily advertise the Dusk Palace Master defeating the Level 9 Demon.

Such impact on the Multidimensional Plane's various races is much better than other mere pretenses.

"Thank you both."

White Dragon Mountain Master's heart rejoiced.

It seems promising now.

He transmitted to Nanette: "Child, perform well at the Ancient Dragon Continent, our White Scale Clan's hope rests on you."

"Oh dad, they haven't agreed yet... I might not even get in."

...

Soon after.

The Old Witch brought Nanette to the Ancient Dragon Continent.

However, Levi had gone on a journey, and Elena was in seclusion.

The other Eighteen Riders were mostly out demon-hunting and in seclusion.

Guarding the Dusk Holy Temple was none other than Green Bird Knight Eddie.

Looking at the talented young knight before her.

Nanette blushed, remembering her father's words, feeling a bit nervous.

Clearly, she was five thousand years old, while Eddie was only seven hundred.

Although Eddie's cultivation was only Level 6, he had witnessed the great events on the Ancient Dragon Continent.

Facing Level 8 Peak experts, he was neither humble nor arrogant.

Upon hearing the Old Witch's intentions, he smiled warmly:

"I'll have to ask the commander about this matter, he needs to make the decision."

"Alright, thank you, sir!" Nanette expressed her gratitude.

Chapter 2592: Sword Slays Demigod, Sauron Easter Egg!

The old witch saw that the matter was likely settled, and couldn't stop smiling.

In her heart, she envisioned Levi reaching level 9 and counter-slashing a level 10 demon.

Surely, at his call, countless strong ones would be rallied.

...

On the eighth level of the ancient tower.

Levi opened the proficiency panel.

The Crimson Emperor Dragon Breathing Technique had already reached its peak.

He felt the strength advancing further.

And the Red Emperor Domain with a diameter reaching 250 kilometers.

"The time has come."

Levi exhaled a searing breath through his nose and mouth, like a real giant dragon.

He picked up the Crimson Dragon Slash beside him, gazing at the Shadow Abyss thousands of miles ahead.

Suddenly, he opened the Twilight Round Table.

Eddy inserted some news about the White Dragon Mountain Master.

"The White Dragon Mountain Master's daughter?"

"Yes, she's reached the Level 8 Peak and is likely to reach level 9."

"Approve it, let her serve as a guardian at the Dusk Hall Master."

In recent years, many alien races have come to pledge allegiance.

But she's the first with level 8 power.

He looked at Nanette's profile, indeed it was quite good.

Although he had once caused a small disturbance at White Dragon Mountain.

But the White Dragon Mountain Master didn't know.

So there's no animosity between the sides.

"Alright, then White Dragon Mountain also settles in the Outer Sea of Ancient Dragon Continent."

"Okay."

While speaking.

Levi arrived at the entrance of the Shadow Abyss.

He had already set up the Death Ember Divine Palace.

This time, he wanted to test how truly strong the legendary demigod was.

Before Levi could step in, a figure already appeared.

It had gray wings sprouting from its back, and its grand twelve wings spread, exposing its withered body.

"You should be Sauron's successor, right?"

"I don't know."

"Then I'll assume you are... Are you confident to face me this time?"

"Yes, I came to kill you. Before that, tell me which Main God you serve?"

"Ho ho ho, kill me? Interesting, another ignorant mortal wanting to slay Gods! I am Uma, the angel of the Shadow Castle! The God I serve is the Shadow Lord! Thirty..." It hadn't finished its line before being interrupted by a stroke of Sword Qi.

"Alright, no need for further introduction. I just want to know who owns this dead dog, so when its master comes knocking, I'll be prepared!"

Bang! The shadow angel was struck as if by thunder and was flung a thousand miles afar.

Uma wasn't angry; it showed a cruel smile.

"Yes, just this feeling, the long-lost sensation of death."

It opened its hands, looking devout.

"Divine Arts: Ten Directions Heavenly Shadow Kill!"

Swoosh! Swoosh! Swoosh!

Shadow-formed daggers appeared around Levi from all directions without warning.

Crackling, the Vajra Secret Word shook incessantly, cracks being patched.

"Light!"

The Light Goddess appeared, Guang's Whip was swung out.

Shadow daggers touched it and melted, disappearing without a trace.

Levi blinked using the Invisible Secret Word and appeared in front of Uma.

Then delivered a plain and simple sword strike.

The Sword Qi tore Uma apart.

"I'm here... your speed is a bit slow, Sauron's successor."

As the words fell, Levi's gaze slightly constricted.

A pitch-black divine dagger had already stabbed into his chest.

Rip! Uma lifted upward, Levi's head splitting apart.

"People only yearn for Light, but always ignore Shadow... You're too weak, you don't understand the enormity of divine strength, even if you have some brute force, you can't kill me. As Sauron's successor, I'm very disappointed."

Uma gazed at the flying blood and flesh before him.

Suddenly, it felt a warmth in its chest.

A Chaos Sun magic ball appeared behind it.

Uma's divine shield quickly dissolved before the sun.

It tried to dodge away but found a wizard tower piercing through the clouds.

Eight thousand sealing stars shone brightly, netting it with a starlight giant web.

Snap! The long whip tempered by holy light wrapped around it.

The Light Goddess, with her round long white legs elegantly crossed, sat atop the wizard tower.

She forcefully bound the other end of the long whip to the tower's pinnacle.

Meanwhile, the Thunder God descended, beating the Thunder War Drum!

Boom! Thunder and Holy Light intertwined, spreading along the long whip to Uma's body.

It howled in pain, its divine power melted like snow.

"True immortal god?"

Uma looked around, tense-faced, as new divine arts began brewing.

Shadow power within the Sky Pool turned into rivers, flowing towards it.

"Divine Arts: Six Heavenly Shadows Realm Illusion!"

Magic balls formed by shadow divine power orbited around Uma, aiming to devour everything.

Even the wizard tower was dragged, teetering.

Guang's Whip was taut, seemingly about to snap at any moment.

The Light Goddess trembled, bit her silver teeth lightly, struggling with force.

Boom! Boom!...

Magic balls exploded, shockwaves engulfed thousands of miles, the Sky Pool shook roaringly.

Uma felt the ever-depleting divine power, its expression somewhat anxious.

"Is it dead?" It spread its divine perception, mumbling to itself.

"Turns out, even Gods experience fear?"

Bang!

Ripples spread through the void!

The Red Emperor Domain surged out, enveloping a radius of five hundred miles.

Flames gathered into a towering crimson-scaled figure.

He had two horns on his head, black armor fell off, revealing his sturdy body. .

Holy Image roared, the bull bellowed... Secret Word of Destruction!

Numerous powers infused into his whole body!

Boom! Beneath the Crimson Dragon Slash, dazzling Sword Qi engulfed Uma's divine body.

Its divine shield buzzed and trembled, then began to disintegrate.

"Ahhhhh!"

Uma shrieked, Uma feared.

Two sharp dragon claws covered in fine dragon scales appeared in the void, tightly locking its demigod body.

Chapter 2593: Sword Slays Demigod, Sauron Easter Egg!

One pierced through the left shoulder, one pierced through the right shoulder.

Accompanied by the high-pitched roar of a dragon.

Rip! Uma's Divine Bone, Divine Tendon, Divine Organ... all began to shatter.

She was forcibly torn in half, black divine blood spilled across the sky.

Levi panted heavily, holding Uma's head, which had split in two.

Uma laughed madly, "Hahaha, I'm liberated. I will return to the Divine Realm and tell my master everything about my plight. One day, the angels will make Sauron regret it."

Her true soul shot out, crashing into the golden net.

"Damn it? What is this? It smells like the Underworld!"

Uma was utterly panicked.

The Golden Armor Youth landed in front of it, starting to enjoy a feast on the spot.

It hadn't eaten for a day and was almost starving.

Levi put away the wizard tower as the danger perception gradually receded.

This Sky Pool was now safe.

"So this is a demigod, huh? They seem less impressive than a Level 9 demon, but these demigods have been trapped by Sauron for countless years, and their divine power has long since been exhausted."

In fact, under normal circumstances, demigods can't stay in the astral world for so long.

Levi suspected that Sauron used special methods to make these demigods serve as NPCs here.

Unable to live, unable to die.

That's why Uma was so eager for liberation.

The true souls of saints and angels would enter the Star Realm Divine Country.

The Main God they serve could choose to expend valuable divine power to resurrect them or abandon them.

The angel remains in Levi's hand gradually turned into shadow divine power and dissipated.

Eventually, only two things remained in Levi's palm.

The first was a gray crystal.

It emitted a strong divine power aura, being a Divine Crystal.

Its intensity was even greater than the one obtained in the Monarch's Treasure.

As far as Levi knew, the power of an angel depended on the strength of the God they worshipped.

At the same Level 9, an angel of an Intermediate God could easily overpower one of a Weak God.

Clearly, the [Shadow Lord] was stronger than the God in the Monarch's Treasure who had spied on him.

He put it away for now, it might come in handy later.

The second thing was a dagger resembling a gray feather.

Although the material was gray, it emitted a faint purple glow.

On it was an information panel formed by hieroglyphs from the depths of Levi's memory.

[Name: Shadow Blade (Purple Epic)]

[Level: Nine]

[Special Effect: Shadow Arrow (Each time it hits a target, there is a 10% chance to shoot a ninth-circle level shadow magic "Shadow Godslayer Arrow," with a cooldown of one day)]

...

"Sure enough, there are more than one Easter egg left by Sauron," Levi murmured to himself.

[Shadow Blade] was a Level 9 rare treasure, it seemed like something casually made by Sauron.

This was an excellent assassination divine weapon, it could cut through anything and kill invisibly.

Besides, it had a very strong additional function.

Normal attacks had a one in ten chance to release a ninth-circle spell.

Unlike Nine-Ring Witchcraft.

As a rare treasure, even an eighth-circle wizard could wield it.

In other words, with this rare treasure.

Levi had a ninth-circle spell as a trump card every day.

With his luck, triggering it shouldn't be difficult.

Levi casually swung it.

The Shadow Blade easily tore a massive gap in the void a hundred miles ahead.

He then slashed his own arm.

With a bit of force, the dragon scales broke layer by layer, and blood flowed profusely.

"Not bad, breaking the defense of a Level 9 expert shouldn't be an issue."

With this divine weapon, Levi was in a great mood.

He also looked forward to the upcoming journey in the Sky Pool.

Five Great Sky Pools, wouldn't that mean at least five Level 9 rare treasures?

That would be incredibly exciting, wouldn't it?

After a short rest.

Levi, along with his mighty shadow army, charged into the Sky Pool.

The long-lost feeling of slaying monsters and acquiring equipment had returned!

He was going to cultivate day and night!

With the shadow of the angel Uma joining in.

Around Levi, there were now ten King Kong surrounding him.

Inside the Sky Pool, there were also many shadow creatures and black beasts hiding.

Levi's path was paved with conquest, becoming the resource for the shadow army's ascension.

The previously discovered rare plant [Shadow Berry] was still widely distributed deep inside.

Levi transplanted them all to promote the development of the Shadow Academy.

Additionally, the extremely rare shadow energy ore, also plentiful, wasn't scarce.

The shadows transformed into golden miners, their busy figures spread throughout the valley.

Levi, about to strip the Sky Pool to its bones, arrived at the deepest part.

There, darkness reigned supreme, with no light.

Even Spiritual Perception was influenced by shadows.

Fortunately, Levi had the [Shadow Body], which exempted him from these side effects.

If it were wizards from other sects, they would be like blind men here.

A month later.

A figure returned to the surface, it was Levi.

In his hand were four semi-transparent vessels, each sealing a rare treasure.

Two Morning Stars, one Bright Moon, one Radiant Sun.

No need to elaborate on the Morning Star, the Bright Moon Artifact was the [Shadow Dragon's Heart].

This was an important component of the Shadow Faction's Emperor-level Series Artifact.

Its appearance resembled a beating dragon's heart.

The Sun Refining Artifact was [Shadow Fog].

Inside the jar, there was a mist-like shadow substance drifting and changing.

Levi spent considerable effort to capture this oddity.

It had extremely strong stealth and escape abilities.

Presumably, refining it would enhance those aspects.

As for the [Shadow Dragon's Heart], Levi planned to place it in the organization's treasury.

With this harvest considered, he would refine two Glorious Sun-Grade Shadow Artifacts.

Bright Moon Artifacts, not very useful.

...

Death Abyss.

Thick Death Energy rolled, forming a skull with a diameter of ten thousand meters.

It rotated like a star, the White Bone Star Ring harbored countless wraiths.

Chapter 2594: Sword Slays Demigod, Sauron Easter Egg!

"You have finally arrived," the White Bone spoke.

"Yes."

"This is our fourth meeting."

"I passed by here before, didn't have time to greet you, may I ask who you are, sir?"

"I am the Angel of Death, Danit, under the God of Death."

"Um, can Mr. Danit be more specific? There are so many gods who claim to be the God of Death, nowadays, even a nobody dares to claim godhood?"

"Silence! My master is the Master of Bones and Graves, the great God of Death, Azit, residing in the Star Wilderness!"

"The Master of Bones and Graves? Never heard of him, but residing in the Star Wilderness, doesn't sound like a genuine God of Death... Take my sword!"

A stream of Sword Qi interfused the Death Sky, splitting it down the middle.

A gigantic skull opened its abyssal mouth.

Boom! The power of death transformed into an energy cannon that fired out with force!

A great battle erupted in an instant, shaking the heavens and the earth!

"Divine ArtBurial of Nine Realms!"

Nine gigantic cemeteries, each spanning a hundred miles, appeared out of thin air.

Out of each, a massive, cadaverous, red-furred hand emerged thousands of meters long.

Levi, like a Heavenly Peng, swept through them and then activated the Red Emperor Domain!

Under the scorching heat, those giant hands retracted one after another.

Levi's immense strength erupted, one sword, then another...

The gigantic hands exploded one by one, and the cemeteries burst apart.

"Is this all a demigod can do?"

Levi blinked to the top of the skull.

Behind him, the projections of the Thunder God and the Light God stood tall like gatekeepers.

Boom! Boom!

Lightning and Holy Light intertwined, crashing into its skull.

The Divine Power Barrier glowed brilliantly, resisting the terrifying offensive.

Levi released over ten Fire Dragon Tribulations in a row, bursting them open.

Then, with all his strength, he thrust his longsword downward!

"Yayayaya, if not for being imprisoned for 300,000 years, how could I be humiliated by you?"

The gigantic skull exploded, transforming into billions of small skulls.

They laughed eerily, swarming around Levi like a hive of bees.

Gnawing at Levi's defensive field, barrier, and even flesh, they enveloped him instantly.

"Divine ArtBurial Sky Star!"

The little skulls finally reformed into a gigantic skull that let out a satisfied belch.

"Still too green to fight me..."

Just as it finished speaking, firelight ignited in its hollow eye sockets.

Roar! Millions of tons of magma, like bloody tears, flowed from within its eye sockets.

It opened its giant mouth, spewing limitless heat.

Crack, crack!

A pair of gigantic Crimson Flame Dragon claws tore open the eye sockets of the skull, revealing a dominating head.

It was ten thousand meters long, similar in size to the skull.

The raging flames of the Crimson Emperor Dragon formed columns, reaching the sky.

The cloudscape and sky dome for thousands of miles around were dyed into a sea of red fire.

"Such a weak angel..."

The Crimson Emperor Dragon Wings thrummed, and it fought fiercely with the skull.

In its right claw, it held a dagger, swinging continuously.

The Shadow Blade pierced into the skull cap, and the dragon exerted immense force, tearing it in half.

The Angel of Death was split apart again.

It used its old trick, transforming into countless small skulls, using a method akin to elementalization to evade damage.

"Dragon Flames!" The Crimson Emperor Dragon turned into a flamethrower, a swirling sea of fire consuming all.

In the end, only one small skull fled towards the depths of the sky pool.

The Crimson Emperor Dragon swung its dagger once more.

A ghostly light emerged, the dense shadow energy contained in the dagger transformed into an arrow.

Nine-Ring MagicShadow Godslaying Arrow!

Poof! The seemingly modest strike penetrated the skull directly.

It exploded, and the true soul fled.

"Kekeke, you've been tricked, human. Gods are immortal. This angel is about to return to the God of Death's side. Prepare for divine punishment..."

Before it could finish speaking, it was covered by a web.

The Golden Armor Youth wrapped it up well and slung it over his shoulder.

The snacks from a while ago hadn't fully digested yet, so this time it's making a canned meal.

"Netherworld Envoy? Are you trying to start a war between the Underworld and the astral world?"

Danit's true soul threatened.

"Huh? What war? I'm just snacking?"

After injecting venom, Leon soothed Danit to sleep.

The world fell silent.

"Master, what did it mean just now?" Leon asked.

"Nothing, ignore it."

Levi picked Leon up.

His gaze shifted, picking up a small piece of crystal and a golden hand in front of him.

The former needed no explanation, it was a Divine Crystal.

"This golden hand shines with golden light, could it be Golden Legend equipment?"

Levi was excited, examining it carefully.

The golden hand seemed like an emoji.

Just that "like" thumbs-up.

[Name: Golden Finger (Golden Legend)]

[Level: None]

[Special Effect: Stone to Gold (can produce 1 million gold coins from stone each day through alchemy, if the Golden Finger is damaged, the gold coins will revert back to stone.)]

...

"What's the use of this thing?"

Levi was puzzled, even though it displayed as [Golden Legend].

But this thing, honestly, was of no use at all, not some rare treasure... purely Sauron's prank.

"Can't really say it's useless, it can still be used to pay wages to Dragon Palace members..."

Levi put it away, feeling both amused and exasperated.

Seems like the bosses of the Five Great Sky Pools do not necessarily drop Nine-level Treasures.

Levi was indeed overthinking.

With the locust-like Shadow Army, he began sweeping the Death Sky.

Later, Danit joined, increasing the Level 8 Shadow count by one.

The Death Sky was full of undead and undead creatures.

Levi took out the Black Soul Demon Tower, collecting ghosts as he went.

Now that he had the Eternal Star Abyss, the tower had little use.

Once out, he would give it to Gandaph to use.

He had already refined the pound of Rest Soil won at the Netherworld Market auction into the tower's inner heaven and earth.

The Black Soul Demon Tower could now hold a small Undead Cemetery.

Though insignificant, it sufficed for placing undead, and transforming Death Energy was not a problem.

To spare Gandaph from running to Hell every few days.

Two months later.

Levi contentedly emerged with 1 Radiant Sun and 7 Morning Star Artifacts.

After having consecutively slain two demigods, Levi was full of confidence.

No matter how powerful these angels once were,

after countless years imprisoned in this ancient tower, they're but shadows of their former selves.

If compared to demons,

The Angel of Death held the equivalent of a First Layer Demon Realm power.

The Shadow Angel, roughly the power of the Second Realm.

...

Seven days passed in a flash.

The scenery changed before him, the sky dome ahead turned a deep blood-red.

Boundless stench seeped forth overhead.

A majestic twelve-winged blood-red figure stood obverse the firmament.

Faceless, with twelve cavities like a piece of mahjong.

Sensing Levi's approach,

It turned, with a chilling voice.

"I am..."

Boom! A Fire Dragon Tribulation interrupted the angel's line.

Levi drew forth the Crimson Dragon Slash, the phantoms of thunder and light gods revealed behind him; Maya, the Thunder Ghost, and the Spiritual Weapons with him. His longsword pointed forward, sternly declaring:

"I'm in a hurry, so no need for introductions, I know you, you are the Blood Angel under the Blood Fire Dominator, prepare to meet your end."

Chapter 2595: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

The Blood Angel's cavity was filled with blood light, exuding a dangerous aura.

Its strength, stronger than Uma's, was close to the Triple Demon Realm.

Suddenly, it withdrew the blood light and said in a peaceful tone:

"Human... How about we make a deal?"

"What deal?"

"I am Yoger Sad, once the Angel Leader guarding the Deep Red Gate. Release me and sincerely worship my master, the Blood Fire Dominator, and I can take you to ascend to the astral world, becoming a Great Angel under the Blood Fire Dominator, and handing you the position of Angel Leader, granting eternal life and immortality."

An Angel Leader typically commands many saints and is an existence of a Great Angel.

They are generally at Level 9 Late Stage or even Peak Power.

The truly powerful Angel Leaders have strength not inferior to a Weak God.

As an Angel Leader, Yoger was once very powerful!

But after hundreds of thousands of years, he has already fallen to Level 9 Early Stage.

This place is the Dark Ancient Tower, isolated from the world, unable to replenish divine power.

"May I ask impolitely, how many Subordinate Gods are around the Blood Fire Dominator? If I let you go, can Blood Fire Dominator grant me a deity position? Just being the Angel Leader is not enough to persuade me," Levi said with a smile.

He also wanted to gather some intelligence on this powerful God.

Due to the Council of Ten Thousand Clans, he would inevitably deal with the Blood Fire Dominator in the future.

Levi's arrogant words made the Blood Angel a bit displeased.

However, it might have believed Levi genuinely intended divine enthronement, so it didn't explode in anger.

In the Multidimensional Plane, very few can resist the temptation of divine enthronement.

It said, "My master resides deep within the astral world in the realm of the Thousand Hills Countries, behind the Deep Red Gate. The gods of the astral world dread him as if he were a tiger, for he is accompanied by the invincible Blood Fire Twelve Flags. Each flag represents the power of a True God. To become a True God, one must obtain God's Authority, which is a rare opportunity. Your request is somewhat high."

"I see," Levi nodded.

He smiled, saying, "In that case, this deal is off, then."

Buzz! His figure flickered, dragging the sword up, and slashed down fiercely!

The Blood Angel said coldly, "Overestimating oneself!"

Divine Skill Blood Cross!

Suddenly, two intersecting crosses, each about a hundred miles long, blasted towards him!

Levi disintegrated with a bang, transforming into thunder element particles, free between heaven and earth.

The Blood Angel's head suddenly rotated three hundred and sixty degrees.

The void behind tore open, revealing the Nine-colored Emperor holding a dagger, slashing forward.

A flash of ghostly light. .

Shadow energy coalesced into shadow arrows.

Nine-Ring MagicShadow Godslaying Arrow!

The arrows penetrated the Blood Angel's body, piercing through its chest.

Thick blood flowed, divine power already beginning to dissipate.

"Damn it, ambushed me!"

Boom! A bolt of lightning struck the Blood Angel, converging to form Levi's figure.

He seized the chance, slashing his longsword down!

Sword Qi swept through, striking against the Blood Angel's Divine Armor, buzzing and trembling.

"So strong..." Levi's face tensed.

It seemed his conventional means were unlikely to harm the Blood Angel.

Fortunately, he obtained the Shadow Blade, which was the biggest breakthrough in this battle.

Lightning, Holy Light, fire, and various magic abilities intermingled beautifully.

Levi's sword Qi traversed the air, engaging the Blood Angel head-on.

The Nine-colored Emperor's dagger was unpredictable, undefendable.

The Blood Angel's anger boiled, and then all twelve cavities on its face shot out a blood light.

Twelve strands of blood light combined to form a crimson rainbow piercing through the heavens!

Boom! The Nine-colored Emperor was shattered, blasted thousands of miles away.

The blood light came before Levi, tearing apart the Golden Light Barrier.

Then layers of defensive field crumbled, unstoppable.

Seeing this, Levi unhesitatingly self-destructed and left.

Twenty thousand miles away.

Within the Death Ember Divine Palace, Levi's figure reappeared.

"This Blood Angel is too powerful."

Especially those twelve targeting blood lights, which Levi can't withstand at this stage.

For safety, he temporarily returned to the city.

"However, my Shadow Godslayer Arrow also wounded it. It will surely need to consume scarce divine power to heal... I'll try again once the Shadow Blade's cooldown is over."

Levi was in good spirits.

After all, this Blood Angel couldn't escape from the Dark Ancient Tower.

If he couldn't win this time, he'd just return a hundred years later.

He had already obtained two Sun Refining Artifacts, which was quite a harvest.

During his rest, he took out a semi-transparent jar.

Inside, a string of black canine teeth was sealed, radiating overwhelming Death Energy, constantly clashing against the jar, making it buzz and tremble.

Fortunately, Levi's containers for sealing Sun Refining Artifacts were specially made, costly, and very sturdy.

This oddity wasn't recorded in the "Illustrated Guide of Strange Items."

Levi temporarily named it Death's Tooth.

"Returning to Nora this time, relying on Sun Refining Artifacts alone should be enough to push spiritual force to the Eight Ring Limit. Next, I'll perfect the Witch Mark, prepare two sacred medicines and the Star Spirit's Heart and then advance to the ninth-circle."

The gains from the Death Sky weren't just oddities.

There was also a Nether Spirit Fruit Tree, a Level 7 Heavenly Material.

It can bear a batch of Level 7 Medicinal Herbs, the Nether Spirit Fruit, once every hundred years.

This is somewhat useful for meditation of the School of Death wizards and can also be used for alchemy.

However, its greatest use is in promoting the cultivation of undead creatures.

It can magnify the Soul Fire within them, enhancing cultivation.

Levi transplanted it to the ancient banyan tree Mansion to reward the elite of the Undead Army.

The Undead Three Swordsmen, the Vengeful Spirit Girl, and the likes are among the ones with significant potential in the undead creatures.

If well-cultivated, they all have the potential to become great in the future.

Chapter 2596: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

...

The next day.

The light of Daybreak.

The Shadow Blade regained its luster.

Levi set up the divine palace and soared towards the Sky Pool.

This time, the Blood Angel was not at the entrance.

Levi's eyes flickered, hesitated for a moment, and then went deeper.

Soon, the void rippled, and a blood-red giant claw extended from behind Levi.

Bang! Levi, whose figure flickered, was grazed slightly, and the entire person was sent flying.

He activated the Red Emperor Domain, illuminating this Crimson abyss.

"You dare to come again?" the Blood Angel's cold voice echoed.

On its chest, the wound left by yesterday's Shadow Arrow had already healed.

It seemed fine on the surface.

However, this worsened its already meager divine power reserves.

Without a word, Levi activated the Vajra Secret Word and tangled with the Blood Angel.

Thunder God, Light God, and numerous summoned creatures joined the battle, trying to restrain the Blood Angel as much as possible.

Having been ambushed by the Nine-colored Emperor last time, the Blood Angel learned its lesson.

A circle of blood light, covering a thousand miles, surrounded it.

Anything entering its domain would be instantly perceived and reacted to.

The Nine-colored Emperor had just appeared and was dragged into the Blood Sea by thousands of blood hands, barely managing to escape.

Suddenly, a wizard tower descended from the sky.

Eight thousand stars gleamed, and as the wizard tower spun, the Blood Sea was torn apart.

The giant dragon corpse demon roared and appeared, and Mary eagerly went to "pamper" this demigod.

"Looks like a celibate type... I like it."

With the wizard tower and corpse demon restraining, Levi used the Invisible Secret Word to blink to the Blood Angel's side.

The dagger struck, sparking against the Divine Armor.

Levi's hand turned into a phantom, slicing out ten strikes in an instant.

On the seventh strike, the special effect was triggered.

The Shadow Godslayer Arrow pierced through the Blood Angel's body once again without suspense.

The Blood Angel, in a hysterical move, unleashed its trump card of twelve blood lights.

Although powerful, this technique consumed a tremendous amount of divine power, and it rarely used it.

"Farewell." Before the blood light could fall on him, Levi self-destructed and returned to the city.

"I will return!" he shouted like a villain.

...

Inside the deep valley, the lone Blood Angel panted heavily, its body trembling.

It, an angel leader, when had it ever suffered this kind of humiliation?

To be mocked by a junior not even at level 9, this was outrageous!

The sun rose and set, another day passed.

The Blood Angel looked ahead as that figure smiled and descended.

"As you can see, I'm back again!"

Another fierce battle ensued.

Both sides exhibited their abilities in a chaotic display.

Levi seized the opportunity and struck the Blood Angel's back again.

The third Shadow Godslayer Arrow hit its target.

The Blood Angel used blood light despairingly, blasting Levi to pieces.

"Did it die?"

It doubted its sanity.

On the fourth day.

"I'm back again."

Seeing Levi return, the Blood Angel unleashed a powerful move in frustration.

"I still will..."

Before Levi finished his line, he was sent back home by the Blood Angel.

And so, the tedious and monotonous battle carried on for a month.

The Blood Angel was on the verge of collapse.

What was this strange thing?

When Sauron captured it, it was quick and efficient too.

Not this torturous!

Another month later.

Levi was still lively, while the Blood Angel resembled an elder near the end of life.

Its divine power was nearly exhausted, only enough for one last use of blood light.

"Just kill me, make it quick!" the Blood Angel said.

"Alright, I'll grant your wish."

This time, the Blood Angel didn't resist.

The Chaos Sun blasted upon it, disintegrating its body into fragmented elements.

The blood color that dyed the sky began to fade away.

The Sky Pool returned to normal.

This Blood Angel, with its own power, changed the surrounding sky and earth, its strength was formidable.

Fortunately, its divine power ran dry, and it was confined here unable to leave.

Otherwise, Levi reckoned he would need all his Six-dimensional Breathing Techniques at their peak to take it down.

Of course, the Shadow Blade, this level 9 Treasure, was equally indispensable.

All along, what Sauron left for Levi were Civilization Treasures, which didn't greatly enhance combat power.

This Shadow Blade compensated for that shortcoming.

Two more spoils of war floated midair.

One was a Divine Crystal, semi-transparent and crimson red.

Its volume was larger than the previous three combined.

The Blood Angel was once the Angel Leader of the mighty Divine entity, the Blood Fire Dominator.

The divine power it contained was extraordinary.

Unfortunately, Levi didn't know how to use it at the moment.

Perhaps he could ask Ms. Lucy, the Black Abyss Sovereign.

The second was a dark red armor.

Its surface was rusty, exuding an ancient, weighty aura.

The helmet's sharp edges, the dragon-scale-like plates, the blade-like vambrace...

Its design was sinister, fierce, full of killing intent and murderous aura!

Levi gently stroked it, and scenes of mountains of corpses and seas of blood, Golden Spear Iron Horse flashed in his mind.

A golden glow surrounded the surface, and Chinese characters began to appear.

[Name: Blood Battle Armor (Golden Legend)]

[Level: 0/10 (Sealed)]

[Special Effect: Blood Battle]

[Remark: Bind by a drop of blood.]

...

[Blood Battle: This is a sealed warrior's armor, only a true hero can endure its mighty power. You can enhance its level by personally slaying demons. Upon reaching level 9, you can initially unlock some abilities of the Blood Battle Armor. Upon reaching level 10, you can unseal all abilities of the Blood Battle Armor.]

[To reach level 1 requires: independently slaying 10 Level 1 Demons or 1 Level 2 Demon, and feeding this armor with Demon Blood, Demon Core, and Demon Soul!]

Chapter 2597: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

...

Levi's breathing was heavy, his hands trembling.

"Is this... a Level 10 Treasure?"

Treasure is divided into five levels: six, seven, eight, nine, ten.

A Level 10 Treasure is the most powerful treasure in the Multidimensional Plane.

It's also known as a Supreme Treasure.

Of course, above the Supreme Treasure, there should still be corresponding tiers.

However, due to their extreme rarity, they are not included in the conventional ranking system.

Levi hypothesized that the Supreme Council's [Round Table] and [Dark Ancient Tower] were treasures above Level 10.

He never expected that Sauron would leave behind a Supreme Treasure as inheritance on the eighth level.

Although it was unsealed.

But with his strength, unsealing it to level 9, activating some functions is not a problem.

According to its incremental patterns.

Level 9 requires the slaying of a Level 10 Demon, or ten Level 9 Demons.

Sub-levels have no requirements, presumably, a Level 9 Early Stage Demon would suffice.

This was not a difficult task for the current Levi.

He caressed the armor, hesitated for a moment, then dripped blood on it.

The armor then turned into a ray of blood light and entered Levi's body.

Gushing blood flowed from his body surface, fully covering the Indestructible Armor and the Nightmare Helmet...

Before long, Levi's appearance had greatly changed.

The Frenzy Blood Armor seemed to have somewhat fused with the Divine Armor he was wearing.

The previously black-armored swordsman had turned into a Blood Armor Knight.

At a thought, Levi returned to his classic "skin" appearance.

The Blood Armor was too demonic; he still preferred the low-key black armor.

Upon returning to Nora, he would unleash a massacre to quickly raise it to level 9.

After resting, Levi and the Shadow Army conducted a sweep inside the Sky Pool.

Days later, he shook his head and left.

This place, unlike the previous two Sky Pools, did not have a Sun Refining Artifact.

It either took on form and fled, or perhaps it was never nurtured.

He only found six Morning Stars and one Water Element Bright Moon Artifact.

The Bright Moon Artifact appeared like a pool of blood, writhing, exuding an ominous aura.

Levi named it [Red Tide Blood].

The rest were just some herbs and minerals, relatively conventional.

...

Abyss of Ten Thousand Poisons.

The guardian angel here was a gigantic centipede with twelve wings on its back, spanning several kilometers long.

It had a human face full of divine aura, showing neither joy nor sorrow.

Its body emitted poison gas, causing an endless black fog to linger for miles around.

Levi tested it with a sixth-level Shadow, and before long, the defensive field could no longer hold.

This angel's strength should be close to a Double Demon Domain Level 9 Demon.

Comparable to the Shadow Angel, weaker than the Blood Angel.

Golden light surrounded Levi's body as Sword Qi cleared the mist, revealing the centipede's human face.

It said indifferently, "Did you kill those few angels?"

"Yes, what kind of angel are you? What is your true name? I do not kill nameless beings."

"Hohoho, I am the God of Poison, the Angel Leader under the throne of the Serpent and Insect Lord, the Poison Centipede AngelAnmonte."

"Where do you live? Star Wilderness, Forest of Myriad Phenomena, or Thousand Hills Countries?"

"Why are you asking that?"

"Never mind if you won't say."

Levi, agile as ever, charged into the poisonous fog with an invincible stance.

The Red Emperor Domain activated, and the Light God Projection appeared.

Holy Light illuminated, and the poison fog began to dissolve with Levi at the center.

With previous experience of killing demigods, Levi was already familiar with the process.

With the help of the dagger that could be considered a divine weapon, the Poison Centipede Angel did not last three days.

Under Levi's torment, it perished.

Leon packed the true soul, waiting to go home for a feast.

After depleting the Shadow Angel's true soul recently, its strength increased significantly again.

Dealing with these Level 9 True Spirits was not a concern.

Once it digests all these true spirits, it might be able to advance to Level 8 Middle Stage.

After the Poison Centipede Angel died, two items were dropped.

The first was a Divine Crystal, which needed no further words.

The second item was a miniature model resembling a city.

Its surface was shrouded in amethyst light, indicating its extraordinary quality.

"It seems to be a Purple Epic Quality Nine-level Treasure."

Levi blew off the dust, and inscriptions began to appear.

[Name: Wind and Rain Unmoving, Secure as a Mountain (Purple Epic)]

[Level: Nine]

[Special Effect: Vast Building]

...

[Vast Building: A place to shield from wind and rain. Can gather elemental force, can withstand any attack below Level 10, can promote the growth of transcendent creatures, and is beneficial to physical and mental health. Residing within accelerates the recovery of physical strength, injuries, and spiritual force.]

"Another Civilization Treasure, like a Bug House or similar."

Levi refined it and his consciousness entered the treasure.

As expected, there was a fixed space of tens of miles in diameter.

Mountains and rivers, everything one might expect.

Moreover, the concentration of elemental force inside was stronger than in the Ancient Banyan Fairyland.

"It could serve as a base for the Dragon Palace."

In recent years, the number of the Dragon Clan had surged.

The original Sky Fire Fortress had long been insufficient.

Levi used that Level 7 Treasure as the base for the [Flame Clan].

Now with this [Wind and Rain Unmoving, Secure as a Mountain], it solved this need.

Aside from housing transcendent creatures.

This treasure's other function is to resist powerful enemies.

If he encounters an unbeatable foe, Levi just needs to slip inside.

This treasure can withstand any attack below Level 10 for some time.

Levi can then maneuver within the space to escape.

In this way, he was truly safe from any threat below Level 10.

As the Poison Centipede Angel fell, the miasma and poisonous fog lingering in the Sky Pool gradually dissipated.

A few days later, Levi left the place.

Chapter 2598: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

There was also no poisonous faction artifact like he imagined.

Only a Bright Moon-level water-element artifact.

Combining it with the Illustrated Guide of Strange Items.

It seems that the Poison and Blood factions don't really have such artifacts.

Or perhaps these artifacts have been classified under general factions.

The Red Tide Blood he obtained earlier was just like that.

Also, there was the Black Queen Snake and Red Moon Golden Toad that Triss refined.

These are all Ocean Faction artifacts.

But they can give birth to Exotic Species Water containing highly toxic corrosive power.

Levi looked at the vessel sealing the artifact.

A miniature centipede was struggling inside.

Its body flowed with black and gold streams, covered with Truth Runes.

Levi had a gut feeling that this artifact would be useful for Triss.

"Let's call you Mystic Water Golden Centipede."

Aside from this artifact, there was another significant find in the Sky Pool.

Levi took out a specially crafted box.

Upon opening it, a stench filled the air.

A root that looked like a cross between a snake and a dragon was squirming inside.

Its surface was covered in fine scales, flexing open and closed.

This is a sacred medicine of the water-element, known as Dragon Scent Herb.

It's known for its strong dragon scent.

It contains a level 9 poison.

If ingested without special processing,

Even a Grand Wizard could hardly withstand it.

However, with Levi's physique, it shouldn't be lethal.

But to be safe, he should consult Triss or Lucy.

The rest were some common high-level medicinal herbs and ores.

"2 Sun Refining Artifacts, 2 Nine-level Treasures, 1 supreme treasure, and a Golden Finger for fun... Sauron truly left behind a lot of good things."

With a few months left until the ancient tower closes.

There was only one last Dark Sky Pool left.

Levi hurried off, not daring to delay.

...

Two months later.

Dark Sky Pool.

"Damn human, the great Dark Goddess Gulana won't spare you!"

Amidst violent explosions, the Dark Angel guarding this place fell.

"Big can, hehe." Leon skillfully packed up its true soul.

Levi gathered the fallen relics and sighed with relief.

"Five Great Sky Pools, completed in a year!"

As for the Dark Goddess, Levi didn't care one bit.

Living in the Star Wilderness, a Weak God was nothing worth mentioning.

Once he becomes legendary, he could easily overpower it.

The astral world's Gods, their titles all sounded impressive.

But according to a paper by an astral theology scholar.

Truly powerful Gods.

Typically don't use common titles like "God of xxx".

For example, the seven orthodox gods' titles sound quite grounded.

Heavenly Father, Holy Mother, Legendary Emperor...

The Dark Faction Gods do have some strong ones.

Among them is Lady of Night, Neknas, residing in the Thousand Hills Countries.

This one is not well-known in Nora.

But in other worlds, she's the famous Night Goddess, comparable to Heavenly Father.

Of course, in the Doomsday Era, she has her churches and believers in Nora as well.

Just that they developed later, not as prominent as the Seven Orthodox Churches.

So they became an underground evil cult, completely out of mainstream.

This church is exactly the Silent Monastery.

Lady Silence is an alias of Lady of Night.

"Even though Sauron is strong, he didn't overly provoke those powerful gods, since deeper in the Thousand Hills Countries, there are suspected level 11 beings, and many strong gods have connections with them."

In the Five Great Sky Pools, the only powerful god involved is Blood Fire Dominator.

The Shadow Lord is Intermediate Divine Power, and the other three are Weak Divine Power.

Putting all that aside, Levi looked at the spoils.

The Divine Crystal spoke for itself.

The second was a luxurious black low-cut corset gown, emitting purple light.

The dress seemed woven from the night sky, embellished with Deep Blue Sage star points on the black gauze.

Elegant, profound, vast, romantic...

This is also a Nine-level Treasure.

Name: Dark Night Dance (Purple Epic)

Level: Nine

Special Effect 1: Star Night

Special Effect 2: Dancing Together

...

Star Night: Wearing this equipment grants a temporary 5% boost to spiritual force and other basic six dimensions; the boost doubles to 10% at night; capable of blocking most perceptions below level 10; can resist most level 9 spell attacks in a short time and also slightly weaken physical attacks.

Dancing Together: When fighting alongside a loved one, the Star Night effect doubles.

Levi was somewhat stunned by the item description.

"Such powerful effects, spiritual force, and basic six dimensions all-round boost, maxing at 20%, it's too incredible, but unfortunately, it's women's clothing... Did Sauron make a mistake?"

Then, Levi saw the notes inside the dress lining.

1. No gender usage restriction. 2. Appearance cannot be changed.

"..."

Levi looked around, seeing no one was around.

He tried it on...

"Damn, it really can't change appearance."

He quickly took it off and stored it away.

"This must be Sauron's twisted sense of humor!"

It appears that this black dress is indeed a female-exclusive treasure.

Unless Levi can bear the eyes of the world and wear a low-cut corset dress to fight.

As a straight manly man, this would be more painful than death.

"Forget it, I'll let Elena wear it, it can be her congratulatory gift for advancing to the eighth-circle and her 1800th birthday gift, killing two birds with one stone."

With this Nine-level Treasure for protection, combined with the Quasi-elemental Holy Body.

Chapter 2599: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

After Elena's eighth-circle, she can come and go freely with Nora, without worrying about her safety.

In the face of level nine, she can also calmly preserve her life.

Moreover, she happens to have a level 8 Exotic Treasure, [Night Cloak].

It perfectly matches the style of this black dress.

Elena will absolutely look stunning in it.

As the wife of the Dusk Palace Master, it is a necessity.

...

One month later.

On the eve of the ancient tower's closure.

A streak of black light shot out from the Sky Pool.

Following it, a Holy Light Whip broke through the air, wrapping around it.

"Got you."

Levi sat on the fragrant shoulder of the Light Goddess, with an expression of excitement.

The whip rolled up an object resembling a crown woven of black feathers, which fell into Levi's palm.

He opened a container and sealed it.

"Another Sun Refining Artifact."

Because it's not recorded in the Illustrated Guide of Strange Items.

Levi named it [Crown of Darkness].

Its specific function will only be known after refinement.

Light and Darkness are opposites unified.

Since Levi has refined the [Light Whip].

Refining a Dark Artifact poses no significant problem.

Previously, he also refined a Morning Star-Level Dark Artifact without any side effects.

Besides that, Levi captured 3 Morning Star Artifacts.

The other gains are not worth mentioning.

...

Ancient Dragon Continent.

Levi returned full of harvest.

He placed the wizard seedlings into various major organizations.

He also supplemented the organization's treasury with a batch of oddities and cultivation resources.

Upon hearing the Dusk Palace Master has returned, Nanette dressed grandly and came to visit.

"Greetings Master."

"Hmm, how's life here?"

"Pretty good."

"Just treat this place as your home, your father is also welcomed for a visit."

"Thank you, Master."

Looking at the departing Nanette, Levi's expression was contemplative.

With his intuition, he naturally saw that this father-daughter pair must have a quest.

According to the Green Bird Knight's report, Nanette was very enthusiastic and often privately guided his combat technique cultivation.

For this, Emperor Mu and Elsa the old couple are very pleased.

"Probably has eyes on young Mu's son..."

He went to the Tower of Summer Flowers, Elena was still in seclusion.

Passing by the Tower of Dawn.

The Shadow Power surged between heaven and earth, another person advanced to the seventh-circle.

Shadow Queen Aya broke out of seclusion.

"Not bad, advancing to the seventh-circle at thirteen hundred years old, the future is promising." Levi said with a smile.

Aya advanced by acquiring 22 Witch Marks.

She is the first among the talents cultivated by the organization to achieve such an accomplishment.

If this momentum can be maintained.

Grand Wizard is assured, legendary achievements can also be aimed for.

"Thanks to Master and the organization's nurturing."

Her smooth seventh-circle advancement also benefited from the Shadow Berry.

"According to organizational policy, those who advance with 22 Witch Marks can be awarded a Bright Moon Artifact, use this [Shadow Dragon's Heart] for cultivation."

"Thank you, Master."

Aya had long been collecting oddities from this sequence.

Shadow Dragon's Heart, is undoubtedly a great help.

Levi visited the Witch's Family, and consulted Triss on how to handle the [Dragon Scent Herb].

Holding the Nine-star Medal, Triss can access the Pharmacist Association's knowledge base.

Soon, she found the relevant knowledge and helped Levi handle it.

Levi conveniently gave her the [Mystic Water Golden Centipede].

Triss hesitated, not accepting it.

"You... did that on purpose."

"It's the reward for helping me handle the Dragon Scent Herb."

"It's not worth a Bright Moon Artifact, and this Nine-star Medal already took advantage of you, how about deducting from my profit share at Gandalf Potion Store."

"...That works."

Only then did Triss accept, showing a smile.

"Thank you."

"You're welcome, good day, madam."

Levi left, keeping his contributions and name under wraps.

...

Time flies.

Five years later, Levi refined [Crown of Darkness].

His spiritual force increased by 900 points, reaching 25,600 points.

The previously obtained [Great Black Celestial Body] also got strengthened.

He gained a Special Talent named [Dark Body].

He also created a power projection named [Black God].

And a divine perception technique called [Dark Vision].

Thus it seems, [Crown of Darkness] is also a type of Dark Series Artifact.

Fittingly corresponding to the Light Series.

The projection of [Black God] is also female.

It wears a crown of night feathers, covered in black crow feathers, with a graceful figure. .

Like a maiden of the night, with a mysterious and eerie aura.

Strikingly contrasting with the Light Goddess.

Unfortunately, this refinement did not birth any special spiritual creature.

Now, Levi possesses: Light God Body, Dark Body, Thunder God Body, Shadow Body, Emperor of Flames, Ice Emperor, Blue Emperor, seven Glorious Sun-Grade Talents.

With the surge in spiritual force, Levi did not rush to refine new oddities.

But instead practiced spells to stabilize his mental state.

During this time, he learned four new spells, which are:

"Storm Giant Spirit", "Valkyrie's Spear", "Mountain Melting Armor", "Night King Chapter".

Storm Giant Spirit is similar to Thunder Ghost spells.

Valkyrie's Spear is a Light School spell.

Historically, someone once used this spell, with an eight-circle body, to seriously wound a level 9 demon.

Levi believes, with his [Light God Body], the power will only be stronger.

Mountain Melting Armor is a dual-faction of Earth and Fire, similar to Sea God Armor.

But the latter can only be used in water areas, the former is on the earth.

Night King Chapter belongs to the Dark Faction.

Can condense [Night King] composed of dark energy to attack enemies.

Generally speaking, summoning spells are divided into two types.

One is to form contracts, summoning spells of living entities.

Death, Shadow Faction mainstream summoning technique are of this type.

Chapter 2600: Speedrunning the Eight Layers! Level-10 Supreme Treasure: Blood Battle Armor!

The advantage is the large number, which can form an army, with summoned creatures being more intelligent.

The disadvantage is only one: they will die.

Another type is formed by conjuring certain energy entities through spells.

Or communicating with mysterious beings from other dimensions to bring down their power projection.

"Thunder Ghost", "Storm Giant Spirit", "Night King Chapter" are such examples.

This type of summoned creature is powerful and originally has no life, thus immortal.

During cross-level battles, they can serve as cannon fodder.

However, they have a time limit on their existence and consume a large amount of spell power.

Therefore, Levi's army of summoned creatures is a combination of both types.

Next, he needs to upgrade the [Blood Battle Armor] and exchange for a Mythical Bloodline Crystal.

The more summoned creatures there are, the higher the efficiency of demon hunting.

As of now, Levi has already achieved 23 eight-circle Witch Marks.

He opened the communication device.

Triss sent a message saying she had refined the [Mystic Water Golden Centipede].

As expected, she obtained a toxic power projection in the form of a centipede.

"The Five Poison Series might really exist."

...

Five years later.

The soaring spiritual force has stabilized enough, and Levi, seizing the opportunity, refined the [Death's Tooth].

His spiritual force increased by 900 points, reaching 26,500 points.

He is just 300 points short of the upper limit.

In ten years, his spiritual force has risen by 1,800 points.

He temporarily ended his seclusion, waiting to refine [Shadow Fog] after upgrading.

Death's Tooth birthed the talent [Netherworld King Body].

Aside from increasing his affinity with death energy, it has one straightforward and brutal effect.

He can communicate with the Underworld through his consciousness and summon the King of the Underworld to descend. .

"Given the current relationship between the Wizard World and the Underworld, summoning the King of the Underworld for a chat shouldn't be a problem..." he muttered, closing his eyes and entering the Underworld with his consciousness.

...

Underworld.

Above the Sky Dome.

The Nether River rumbles with a sound like thunder.

One by one, masted ships hang upside down above the Nether River.

They will travel through the extensive tributaries to different places in the Multidimensional Plane.

Fighting against the Abyss that invades the Multidimensional Plane.

Ancient cities tower magnificently over the black wildlands.

Outside one such city, a minotaur with a level 9 aura is training soldiers on the wildlands.

In sight, there are elite soldiers clad in armor.

Level six experts abound.

Suddenly, Mosi looked toward a side in the void.

"Who's there?"

"It's me." Ripples spread, and the black-armored swordsman descends.

"Oh, Sir Levi?"

The minotaur was somewhat surprised.

They had invited Levi to visit the Underworld multiple times before.

He had always declined.

Today, he came uninvited.

Moreover, it seems he didn't come bodily.

It's just his consciousness arrived in some special way.

Still as cautious as ever.

The Netherworld soldiers looked at the black-armored swordsman, curious or shocked.

"What? This is Dusk Hall Master Levi?"

"Who is he?"

"Haven't you heard... He's a wizard from Nora, who recently killed a level 9 demon with a level 8 body, making waves. Didn't expect he'd personally descend to the Underworld."

"Wow, impressive."

"Indeed, in the realm of the Underworld, he's one of the exceptional top talents."

Mosi instructed, "Stop chatting, continue your training. I'll talk with the esteemed guest."

He led Levi into the city.

"What brings your lordship to the Underworld?"

Levi straightforwardly stated his purpose.

Upon hearing, Mosi's expression was enlightened.

"So that's how it is. If your lordship doesn't mind, I could... Of course, if you want me to introduce a stronger King of the Underworld, that wouldn't be a problem. I just advanced and might not be as capable as you."

"Hahaha, the King of the Underworld is being modest. I'll rely on you in the future."

Levi's consciousness couldn't stay long.

After deciding the choice of King of the Underworld, he returned to the Ancient Dragon Continent.

He and Mosi have a good relationship; the man is trustworthy, no need to seek another King of the Underworld.

"Great, another level 9 enforcer plus one."

Flame King Dragon, Tyrant of Horror, plus Mosi, King of the Underworld.

Levi now commands three level 9 thugs.

It is the year 915 of Blood Battle, with 5 years until the auction.

Outer Sea of the Ancient Dragon Continent.

A white mountain ridge encircles.

Mages and alien races come and go on it, bustling.

The prosperity is astonishing, hardly believable amidst the Blood Battle period.

Ten years ago, approved by Levi.

Nanette founded the first Pan-Plane, Pan-Race commercial organization of the Wizard World on White Dragon Mountain:

White Dragon Commerce.

The president is Levi, vice president is Nanette, honorary president is the White Dragon Mountain Master.

Its purpose is to integrate various mages and alien species markets from Nora to the Multidimensional Plane.

Forming an extremely large-scale commercial platform cluster.

Buying, auctioning, and other commercial activities can all be conducted here.

The commerce only charges operational fees.

Relying on the White Dragon Mountain Master's fame and the Ancient Dragon Continent's powerful security abilities.

In ten years, White Dragon Commerce has become the most prosperous place in the Eastern Sea.

Today happens to be the day of the first White Dragon Auction.

Levi attended as president to deliver a speech.

To show support.

Duke Rumon, Lady Molly, Ice Sea Witch, and other Grand Wizards also came.

Solomon even brought a supreme treasure, intending to entrust it to White Dragon Commerce for auction.

Upon seeing this treasure, Levi quickly called Solomon to the backstage.

After some communication, exchanged the [Shell Mother Fruit] from the Netherworld Market for the [Star Spirit's Heart].

Both were very pleased.

Solomon possesses great talent.

But still, there's not enough time for him to advance to level 10.

He travels to collect treasures for longevity.

Thus, Levi needs only one more wind-element sacred medicine to promote to ninth-circle.

He watches the Blood Battle Store and also entrusted Nanette with handling the matter.

His key reason for supporting White Dragon Commerce is to help himself gather intelligence and resources.

...

Nora Calendar 1132.

Blood Battle 920 years.

At the Blood Battle Command Center, Levi, Duke Rumon, and others formed a stable four-person squad.

Code name: [Dusk].

Over the past few years, the Dusk Squad was dispatched to the Land of Darkness to execute six level 9 tasks.

His formidable strength earned the complete recognition of the Grand Wizards at the Blood Battle Command Center.

They regard him as a peer.

His war merit finally accumulated to 200 billion.

On this day, Levi arrived at the Blood Battle Temple.

Rock King smiled and said, "Been waiting for a long time."

He understood well, this was prepared by the congress for the Dusk Palace Master.

But truly accumulating 200 billion war merit is indeed one's skill.

The congress never denied others the chance to exchange.

Thus, apart from a few voices, most are completely convinced.

Sanctuary backstage.

Rock King took out a special crystal box.

A deep blue bloodline crystal lay silently inside.

Star-Spinning Turtle!

Born with the ability to command the most extreme special magnetic force, also known as the [Power of the Whirling Star].

Capable of moving the world, attracting stars, a Mythical Creature!
