

Wizard 260

Chapter 260: Flower Knight, Legendary Levi! (5)

Since he has the powerful second-circle transcendent creature, the White Snake, a mixed-blood of the dragon race. He shall go all out and capture a second-circle Three-Headed Hell Lizard from hell. It's also a mixed-blood of the dragon race.

In the arms race, Demon Harland was no weaker than anyone else in his life!

It was even more impossible for him to lose to his arch-enemy, the Gray Tower.

The problem was that the wizard under him was disappointing.

An official wizard was killed by an apprentice wizard.

If word got out, it would be a joke.

If they went out to rob, they might end up losing everything.

The Demon was so angry.

However, he remembered that the apprentice wizard was a legendary knight.

Harland accepted his fate.

A hundred years ago, when he was still a First-Circle Wizard, he had fought with a legendary knight in the Star Tower. In the end, both sides were evenly matched.

That legendary knight was a woman.

She seemed to be very famous in the human world.

She was called Flower Knight Elena.

That damned woman had superb swordsmanship, and her powerful breathing technique made the confident Demon Harland suffer a lot.

After Demon Harland attained his second circle, he once wanted to take revenge on the Flower Knight.

It was a pity that he only found out when he went to the Star Tower that the Flower Knight had already advanced to a Third-Circle Wizard, and had advanced to the ranks of intermediate wizards. He could only return dejectedly.

Now, another legendary knight had appeared in this sea area.

This made Harland recall the past.

"Now is the time for me to use people. You have destroyed the official wizard that I have painstakingly nurtured. I will not punish you because it's meaningless. Within a year, no matter what method you use, you have to create another official wizard for me. Otherwise..."

The Demon was burning with anger as he sneered.

"Don't worry, Captain. I'll definitely do it," Green Ghost Carter said with a trembling voice.

He thought to himself, "Where am I going to find an official wizard? An official wizard is not that easy to find."

"Also, check the name of that legendary knight and his wizard talent. If he has a double affinity or is a Children of the Elements, we must kill him before he becomes an official wizard.

"If it's just a normal talent, it doesn't matter. Anyway, he'll become a

First-Circle Wizard at most. A legendary knight is the end of the knight's path. Therefore, his strength can't reach the second circle. It won't affect our future plans."

Harland remembered that Elena was a Child of the Elements.

Her cultivation speed was too terrifying.

It made Harland feel like he was trash.

So, such a tragedy could not happen again.

"Alright, Captain. I will often send people to patrol the route near the Gray Tower. Once we find that legendary knight, we will kill him on the spot. However, what if he continues to hide in the Gray Tower?" Green Ghost Carter suddenly thought about it and asked again.

"We can't start a wizard war with the Gray Tower for the time being. Recently, those damned law enforcers of the Star Tower have been looking for us all over the world. We can only make a move after I advance to the third circle. If he doesn't come out, you can wait slowly. No one can be patient and stay in a broken tower for so long."

Demon Harland looked at Green Ghost Carter with dissatisfaction.

Green Ghost Carter slowly retreated. Harland returned to his throne and continued meditating.

In a spell shop in White Sail Alley, Levi looked at the spellbooks in the display window.

These were all spell books for cantrip models.

A spell book for a first-ring spell would not be displayed in the display window.

Levi's idea was to choose a control or defense type spell from the Ocean School of Thought, and an attack type.

[Zero-Ring Cantrip: Water Arrow]

[Spell Constitution: 3 Constitution] [Spell Consumption: 3 Spell Power]

[Spell Price: 20 Points]

For offensive spells, Levi did not hesitate and chose a normal cantrip like Water Arrow. Although this cantrip was not very powerful, its structure was simple, and it consumed very little spell power. Levi was very experienced, and it would not take long for him to reach the limit.

Moreover, if he could cultivate the Water Arrow spell to its limit, its power would still be acceptable. At least, it would be enough for the apprentice wizard stage.

As such, Levi did not even bother to look at the other fancy attack spells.

In any case, the attack spells that he wanted to major in the future was from the School of Death.

As for the second spell, Levi chose a control-type spell.

His current level 10 Black Snake defense was already quite good. With the Frost Giant Armor, Levi could even withstand a casual attack from an official wizard.

Of course, Green Ghost Carter had used a cantrip to attack Levi at the end, so the power was average. If he had used a real first-ring spell, Levi might not have been able to withstand it. [Zero-Ring Cantrip: Tidal Grasp] [Spell Constitution: 5 Constitution] [Spell Consumption: 5 Spell Power]

[Spell Price: 40 Points]

This Tidal Grasp was much more difficult than Water Arrow.

There weren't many control-type spells, and Tidal Grip was considered a classic control-type spell at the apprentice level of the Ocean School of Thought.

Summon the power of water elements to form a tidal cage to restrict the enemy's movements.

However, this cantrip level of control could only imprison the enemy for a short period of time. For Levi, this was enough.

After buying the spells, Levi returned to the Gray Tower.

He happened to meet Senior Sister Winnie, who had finished a class.

"Junior Brother, didn't you go to class?" Winnie asked.

"No, Senior Sister, you just finished your class?" Levi greeted politely. He remembered what Ms. Marlene had said and took another look at Winnie..
