

Wizard 262

Chapter 262: Extreme Ostrich Mountain, Maximum Limit Dragon's Might, and Dragon Affinity! (1)

Waves were rolling in the blue sea.

A wooden boat was slowly moving along the sea lane around the Gray Tower.

On the wooden boat, Green Ghost Carter brought a few apprentice wizards.

"Keep an eye on him. It's been three months. I don't believe that kid won't leave the tower."

Green Ghost Carter followed Captain Demon Harland's orders to wait for that d*mn legendary knight on the sea lane near the Gray Tower.

It had been three months.

He had been waiting for a long time on the possible sea lanes of the Gray Tower.

There was no sign of the legendary knight.

He did see the other apprentices of the Gray Tower going out a few times. If it was any other time, according to Green Ghost Carter's habits, he would have attacked them.

However, in order not to alert the enemy, he held back.

"D*mn you little brat, I don't believe that you can stay indoors for a year. If you stay indoors for a year, then I'll wait for two years. If you stay indoors for two years, then I'll wait for three years."

The people on the Undead Ship were used to cultivating on the ship.

Therefore, Green Ghost Carter wasn't worried about delaying his cultivation because of this. After all, it was usually these apprentices who kept an eye on him.

Just like that, on the sea lane near the Gray Tower, Green Ghost Carter waited for another three months.

He still hadn't found the person he was looking for.

An apprentice asked cautiously.

"Why not? I'm not happy if I don't kill that little bastard. It's all his fault that I was punished by the captain."

Days passed.

The Month of Beginning, Year 1018 of the Holy Brilliance Calendar.

The human world welcomed the new year again.

In the past year, the blue frost calamity would occasionally erupt in small areas within the Northern Territory. Compared to when it first appeared, the calamity seemed to be much weaker.

This put the Emerald Kingdom at ease. If the outbreak only occurred in the Northern Territory, then the royal family and other great nobles in the South did not have to worry.

Meanwhile, in the neighboring Evernight Kingdom, there was also a piece of major news.

That was the Snow Queen, a female grand knight who had broken through to the legendary level.

This surprised many people. Although the Snow Queen was also a top-tier grand knight, she was still far from becoming a legendary knight.

Even the White Horse Knight couldn't break through to the legendary level.

It was unbelievable that Queen Evernight had made a breakthrough.

In Flower City, where it was like spring all year round.

Anderson came to play chess with Andrew again.

The old man had settled down in Flower City. In his long life, besides continuing to study the way of knights, one of his few hobbies was playing chess.

"The Snow Queen has broken through to the legendary level. I didn't expect that. It seems that the Church of Snow intends to support the Snow Queen. Otherwise, she wouldn't have attained the legendary level," Anderson said.

"Everyone says that the Snow Queen is the daughter of God, so it's normal for her to become a legendary knight," Andrew said while playing chess.

"Speaking of which, it's been a year, and there's still no news from Levi. Has he broken through to the legendary level?" Anderson mumbled.

"It shouldn't be that easy to break through to the legendary level. Even my master needs some time. Elder, do you have any way to contact my master? I have something to give him," Andrew said.

In the past year, he had collected a few breathing technique inheritance diagrams for Levi.

There was even a perfect quality physique breathing technique.

It was called the Undying Bird Breathing Technique.

It was said that after mastering it, one's physique would be as strong as the legendary Undying Bird. One would be immune to all poisons, water, and fire. One could even... rise from the ashes.

Of course, these were all exaggerations, but it was true that this breathing technique could provide a very strong self-healing ability.

Andrew had spent a lot of effort to obtain this breathing technique.

"I can't contact him either. I don't even know which organization he went to. Wait for him to contact us. I hope that kid doesn't die in there. Although there is order in the wizard world, it is also very dangerous," Anderson said.

In the Endless Sea.

Inside the Gray Tower.

Levi had been in the Gray Tower for a year.

Some time ago, Ms. Marlene had already recovered from her injuries. It was said that she was about to attempt to break through to a Second-Circle Wizard.

If she could succeed, the Gray Tower would have two Second-Circle Wizards, which was undoubtedly a good thing for Levi.

Starting from the preparation work, it would take some time to break through, and very few people knew about this.

It was to prevent the people from the Undead Ship from arranging spies in the Gray Tower and causing trouble at the critical moment of the breakthrough.

The reason why Levi knew about it was because of Ms. Marlene. It was obvious that she trusted him.

On the ninth floor of the Gray Tower.

Levi woke up from his meditative state. His current state was much better than half a year ago.

The period of weakness from the Burning Red Lotus Blood had long passed.

In the past half a year, whether it was training as a knight or a wizard, Levi had gained a lot.

As for the path of a knight, Levi had successfully cultivated another breathing technique to its maximum limit.

Levi—

Ostrich Mountain Breathing Technique: Level 9 (Maximum, breakthrough available). Special Effect: Ostrich Feet (Gas)

"Ostrich Feet: Black gas gathers in the legs, forming gaseous ostrich feet. It will strengthen the power of the legs. A kick can cause an earthquake."

The ostrich raised its head and puffed out its chest. Its long legs were strong and powerful. Black gas surged out from the heart area and surged into Levi's legs.

Like the fine scales on chicken feet, Levi's legs seemed to have become even more slender and powerful. The black gas on his feet spread and condensed, transforming into a pair of two-toed bird claws that looked like an ostrich's..
