

Wizard 263

Chapter 263: Extreme Ostrich Mountain, Maximum Limit Dragon's Might, and Dragon Affinity! (2)

Levi looked at himself in the mirror strangely.

He also summoned his Black Scale and Blood Wings.

"Black Scale, small black feet, bat wings, what kind of monster is this?" Levi was speechless.

He kicked, and the air exploded.

If this strong kick landed on a grand knight's body, the grand knight would probably be smashed into pieces.

The special effect of the Ostrich Feet was an upgrade from the transcendent power of the Ostrich Mountain Breathing Technique.

"The Giant Breathing Technique is used to strengthen the arms, while the Ostrich Mountain Breathing Technique is used to strengthen the legs. Even though they are both strength-type breathing techniques, the area of strengthening is different. I wonder what the Red Lotus Breathing Technique strengthens?" Levi was looking forward to it.

The Red Lotus Breathing Technique was a perfect breathing technique, and its cultivation speed was the slowest among all breathing techniques. Fortunately, Levi had prepared many secret medicines before

entering the world of wizards, so he did not have to worry about the problem of secret medicines for the time being.

Now that the Red Lotus Breathing Technique was about to reach level 9, Levi estimated that it would only take a few months.

At that time, he would see what kind of surprise the Red Lotus Breathing Technique would bring him.

Up until now, the only breathing techniques that Levi cultivated that were not at their maximum limit were the Red Lotus Breathing Technique and the Blood Beast Breathing Technique which had just broken through.

"The Black Snake Breathing Technique's breakthrough is on the agenda. I have to think of a way to get some defensive breathing techniques in the next few days. The world of wizards has existed for so long, and there will definitely be some knights who bring their breathing techniques in. I wonder if the Blacksail Wizard Market sells them."

Levi thought to himself.

After experiencing the last unexpected disaster, and before Levi became an official wizard, he did not really want to leave the Gray Tower.

The outside world was too dangerous. It was better to stay in the tower.

With Levi's current strength and status, he felt that he could hand this job over to someone else in the tower. As long as it could be done with money, there was no need for him to take the risk himself.

As for why he wanted to collect so many breathing techniques, it would be easy to explain if he said that he was a breathing technique collector.

Apart from the cultivation of breathing techniques, Levi has also been studying the Golden Cross Slash. He felt that he seemed to have some understanding of the Golden Revolving Divine Palm, but he was still a distance away from truly comprehending it.

After collecting more information, Levi was now basically certain that the Golden Cross Slash was the ultimate technique of Golden Knight Gregor.

He could not help but admire this legendary knight.

Every legendary knight had their own strengths.

Blood Knight Brad's strong willpower and righteous principles.

Golden Knight Gregor's sword talent and Golden Blood.

Lionheart Knight Rhine, Flower Knight Elena, Black Knight Blake, the Nameless Knight, and Snow Knight Flair. Although Levi had never seen these people before, they were all worthy of respect as they were mortals who created legends.

If there was a chance, Levi wanted to track down the traces of these legendary knights.

If possible, he could learn their powerful breathing technique and their combat techniques.

Perhaps it would be helpful for Levi to break through to the legendary realm and open up the path of a knight.

One could walk further on any path only by standing on the shoulders of the predecessors.

The greatest wisdom of humans was collective wisdom. That was why the wizards established the Pan-Plane Wizard Council, which ended the chaotic state of the early wizards. From then on, the development of wizard theory knowledge began to accelerate.

After half a year of cultivation.

Levi's Black Devil Blade's proficiency had also increased by quite a bit.

However, he was still far from breaking through to level 4.

After level 3, the cultivation speed of the Black Devil Blade had clearly slowed down.

Levi guessed that in order to reach level 4, one would need the spiritual force of a high-level apprentice wizard.

This black gas technique was a technique that combined one's physical body and spiritual force.

What was important was balance. Levi was already at the peak of the knight realm, and he was only missing the legendary realm. In terms of physical cultivation, he could already be called a true grandmaster.

However, in terms of spiritual cultivation, he was still a mid-level apprentice wizard, a rookie.

Therefore, he could only take it step by step.

The last part of the training related to wizards was what Levi had spent the most time on in the past six months.

The Deep Sea Meditation Art was still at level 2, but its proficiency had increased a little. Without supplementary potions, Levi estimated that it would take another four to five years for it to reach level 3.

Apart from the Deep Sea Meditation Art, Levi had also mastered the second wizard Meditation Art.

Levi—

Night Crow Meditation Art: Level 1 (420/1000)

Perhaps it was because Levi had already learned the Deep Sea Meditation Art.

It was also possible that the Night Crow Meditation Art was new.

Thus, Levi had spent half a year increasing Night Crow Meditation Art's proficiency by a large margin.

This speed was nearly three times faster than the Deep Sea Meditation Art.

Levi felt that perhaps the Meditation Art was similar to the breathing technique. The more Meditation Arts he learned, the higher his experience and realm, and the faster he could learn new Meditation Arts. Now, Levi's spiritual force had already increased to 6 points.

His spell power has 60 points.

Now that Levi had a lot of points, he was able to max out all the potions that could increase the upper limit of his spell power.

The range of spiritual force for a mid-level apprentice wizard was 5 to 10 points.

Above 10 points would be a high-level apprentice wizard.

The range of spiritual power for a high-level apprentice wizard was from 11 to 20 points..
