

Wizard 266

Chapter 266: Extreme Ostrich Mountain, Maximum Dragon Might, and Dragon Affinity! (5)

"Although I'm a Children of Chaos, I have a special effect like earth affinity.

Even without the proficiency panel, my cultivation speed for the skills from the

Earth School of Thought will definitely be much faster than the Children of Chaos. Coupled with my proficiency panel, my actual talent might not be inferior to a double affinity's. I have to learn it in the future. I can't waste this affinity talent. "

With a thought, a faint golden light enveloped his body, protecting Levi like a golden bell.

After Levi's test, he found that the defensive power of this barrier was stronger than the cantrip of a high -level apprentice, but he did not know how it would compare to the original First-Ring Spell, Shield Effect.

Shield Effect was the most classic defensive spell of the Earth School of Thought. It could form a protective force field condensed from earth elements to protect the caster.

Many of the later defensive spells from other schools shadowed Shield Effect.

"A level 3 Seal of Protection, a level 10 Black Snake's liquid Black Scale, and a Frost Giant Armor. My defense is even more abnormal. I feel that unless it's an official wizard, a high-level apprentice wizard would not be able to break my defense." Levi analyzed.

"Now I'm only left with flame flow. Once I reach Seal of Flame's maximum level, my overall strength should not be inferior to that of an official wizard."

Even a First-Circle Wizard who mastered four First-Ring Spells at the same time would be considered a veteran wizard.

Even so, Levi did not plan to leave the island.

He really liked these days when he could cultivate peacefully.

He did not yearn for the outside world at all.

Green Ghost Carter, who was lying in an ambush in the nearby sea area, became very anxious because Levi wasn't going to leave the island.

On the ship, Green Ghost Carter's face was gloomy.

He had been waiting for more than half a year.

God knew how he had endured it.

"This damned little brat, isn't he going out?"

"Damn it, you darned little brat. If it really doesn't work, I can only use my final trump card. "

Green Ghost Carter returned to the cabin.

The Undead Ship had planted a spy in the Gray Tower, and he planned to let this spy lure Levi out and kill him.

On this day, Levi was practicing Water Arrow in the forest.

Water Arrow seemed ordinary, but it has many advantages, such as fast casting speed, low consumption of magic power, and no need for casting materials.

[Water Arrow Proficiency +2]

Levi held the Viper Wand in his hand and completed another round of casting.

There was a huge rock that he used to practice Water Arrow every day, and it had long been pierced through. Now, it was in the shape of honeycomb briquettes.

After practicing Water Arrow, Levi went to the small garden to water the plants.

He returned to the Gray Tower's ninth floor.

At the door, an apprentice wizard stood there with a hesitant expression. When he saw Levi, he smiled and said softly, "Junior Brother Levi, you're back." "Senior Brother Noz, what's the matter?"

Levi recognized this senior. He lived on the twentieth floor and above.

He was also the senior brother who went to Whale Song Island with Winnie as a guest.

He seemed to be close to Winnie.

It looked like he was pursuing Winnie, but she didn't accept. She only agreed to be friends.

Then he continued to get along with Winnie as a friend.

He could be considered a bootlicker.

In any case, if it were Levi, he probably wouldn't contact Winnie.

"Junior Brother Levi. I have something that I need your help with. After it's done, you'll receive benefits too."

Noz said with a serious tone.

Levi's expression did not change. He asked calmly, "What is it? If it's within my ability, I can help you. We're all seniors and juniors, so this is what I should do. "

"Junior Brother, I encountered a storm some time ago and was stranded on an uninhabited island. I found the remains of an official wizard on the island. I suspected that the island was an ancient wizard organization. Unfortunately, there was a spell barrier at the entrance of the ruins. I was too weak to break it. I have to be at least a First-Circle Wizard to break the seal. I remembered that you are a legendary knight. Your attack is not inferior to a First-Circle Wizard, so I wanted to invite you to explore the wizard's ruins with me. When the time comes, we'll split the things inside equally," Noz said softly.

"Where is that place? Is it in a safe sea area?" Levi asked.

"Although it's not in a safe sea area, there are no dangerous sea beasts in that location, so there's no danger. With my level as a high-level apprentice wizard and your strength as a legendary knight, there's definitely no problem," Noz replied.

Levi nodded and said decisively, "Senior Brother, I won't be going. I've been busy practicing my spell and preparing for the upcoming year-end assessment."

"What about after the year-end examination?"

"My schedule is also full."

"Junior Brother, you have to think carefully. These wizard ruins are definitely real. There must be a lot of good things inside. Aether Stones, spell books, wizard tools... These are all good stuff." "Forget it, Senior Brother."

"Alright, what about next year?"

"No, I'm not interested in the wizard ruins. I'm just a Children of Chaos. The spells of the schools are enough for me to cultivate for a lifetime. Senior Brother, you should find someone else."

In the end, Noz left helplessly.

He returned to his residence.

"This damned Levi, he's so stubborn. How could he not be tempted by this?"

Noz was speechless. The wizard ruins he mentioned were real and he did not lie to Levi..
