

Wizard 2681

Chapter 2681: God Above Gods! The Secret of the Astral World!

After repeatedly confirming there were no other surprises or clues in the temple.

Levi then left.

The first dungeon was a big explosion.

Making him quite look forward to the journey ahead.

In the following half year.

He wandered east and west, trying to trigger new dungeons.

However, before the ancient tower closed, he was not successful.

Along the way, though, he found a lot of rare items.

Levi collected them all and went back to take stock.

...

Nora Calendar 1318.

Blood Battle 1106.

Ancient Dragon Continent.

Levi returned with a full load.

He came to the Sky Dome above the Emperor's Palace.

Gazing around.

"This place isn't bad, let's hang the Bright Sun here."

Sensing Levi's return, Elena's figure appeared.

Then she saw Levi holding a white crystal ball, muttering incantations.

The crystal ball grew in the wind and rose steadily.

Finally, it hung high in the sky like a little sun.

The amazing thing is.

The dimension it resides in seems not to be in our conventional world dimension.

Without the Ninth Level Realm, it's hard to reach.

Visible but untouchable.

"What is this, my dear?"

"A Ninth-Level Treasure I picked up, installed on Ancient Dragon Continent, can form a Holy Light Domain with a diameter of thousands of miles, where dark creatures are forbidden and cannot hide."
RÁNỒBỀs

"That powerful?"

"Indeed."

"Why does the crystal ball also have strange characters on it? They look similar to those on my dress, what does it mean?"

"[May the Holy Light protect you]."

"Oh, I understand."

Before long, this "light bulb" lit up.

Warm light poured out, instantly illuminating a vast expanse of mountains and rivers.

Psst!

An invisible demon's scream came from the void.

Levi's lips curled into a smile.

Even Void Land would be affected by the Holy Light.

Now, Ancient Dragon Continent truly is as solid as a rock.

Whether spies or scouts.

Unless they were a Level 9 Demon, they simply couldn't penetrate deep.

Levi called in the leaders of various organizations.

After some discussion, they moved the logistics and business organizations into the Holy Light Domain.

Those remaining outside were all combat divisions.

Of course, there were some negative energy factions.

For convenience in cultivation, they resided in the fringe Star Castle.

This Bright Sun was extremely striking and very high-profile.

If it were in the past, Levi wouldn't have dared to install it.

Now, his strength was evident.

He believed that apart from enemies, no one would dare try to steal his treasures.

Soon, this spread throughout Nora.

Other organizations were all greatly envious of it.

A Ninth-Level Treasure, and such a practical Civilization Treasure.

It was simply a divine weapon in Blood Battle.

No one knew how Dusk Palace Master got it.

The number of people wanting to take refuge on Ancient Dragon Continent subtly increased.

...

Ancient Banyan Fairyland.

Levi finished taking stock of the gains from this ancient tower expedition.

First is the Legendary Artifact, no need for more words.

The rest of the artifacts totaled 236.

Of course, most were Earth and Sky-level.

There were only 36 Morning Stars and Bright Moons.

As for the Radiant Sun, none were acquired this time.

Perhaps due to the Legendary Artifact draining Levi's luck considerably.

It's worth mentioning.

First is the Morning Star Artifact [Fire God's Claw].

This was the last oddity of the Holy Infant Fire God Series.

It was elusive.

Levi originally intended to use the [Heavenly Seizing Technique] to see if it could be refined.

Now being able to get it for free is certainly better.

After all, refining still requires a cost.

Thus, the full collection achievement for the Fire God Series was smoothly completed.

As for the Frost God Series.

In the past few years, through auctions and various market trades, the Holy Infant acquired three, namely [Frost God's Sound], [Frost God's Prayer], and [Frost God's Joy].

Two Bright Moons and one Morning Star have been successfully refined.

So currently, it's a six-missing-one status.

Nowadays, Ancient Dragon Continent is filled with talents.

Level 6 and Level 7 experts are abundant.

Many people have the qualification for random exchange for Morning, Bright Moon artifacts.

To facilitate mutual exchange.

White Dragon Mountain specially established a corresponding artifact exchange platform.

If they didn't get what they needed.

They could well go to White Dragon Mountain to sell or trade it.

With Ancient Dragon Continent as a safe guarantee, no one dared to make trouble.

The Holy Infant's artifacts were obtained this way.

Among this gain, there was also a Bright Moon-level Body Refining Artifact.

Since it looked like an ant, Levi named it [Armored Sky Ant]. .

Handed it over to Gandaph for refining.

Levi himself took a few Sequence Artifacts from the Light and Dark Factions.

To supplement the Light God Body and Dark Body.

The rest, he dumped into the organization's treasury.

Anyone in need could exchange them.

He didn't leave any for Elena or Triss.

After all, the two could exchange them as they needed.

With the Dark Ancient Tower as a base, the number of artifacts in Ancient Dragon Continent's treasury should only be second to the Council Treasury. Other top wizard organizations simply didn't have so many spare artifacts for members to exchange, which is another major advantage of Ancient Dragon Continent.

Many people were also curious about where these artifacts came from.

Just no one dared to ask.

Nor had they heard anywhere being robbed.

It could only be attributed to Levi, the Supernova King's unrivalled fortune.

Other magical plants, rare medicinal herbs and so forth, counted by the hundreds.

Levi transplanted them into Ancient Banyan Fairyland.

From now on.

The resource of rare creatures in the fairyland.

Should surpass Lady Aurora's Demiplane.

The Ninth Layer had more good stuff than could be counted.

...

Four years later.

Nora Calendar 1322.

Ancient Banyan Fairyland.

Levi spread his palm, muttering incantations.

A wave of invisible Elemental Magnetic Force swept through.

Wherever it passed, everything was drawn in.

Chapter 2682: God Above Gods! The Secret of the Astral World!

"Seven Rings MagicElemental Magnetic Wind."

Levi recorded it.

And then placed it in the organization's knowledge base.

His Primordial Magnetic Series magic had already begun to be studied by newcomers.

Elemental Magnetism is important and powerful.

However, the wizard civilization has developed until now.

The development and utilization of elemental magnetism are still too minor.

In this aspect, the Mechanical School has the most authority to speak.

The refinement of many mechanical creations is inseparable from the power of elemental magnetism.

Levi planned to start from the Ancient Dragon Continent to strengthen the Primordial Magnetic School.

The Primordial Magnetic Series he created.

Is sure to inspire many others.

For the upcoming Eight-Circle Magic, he also had ideas.

But it still required time for verification.

He opened the proficiency panel.

Levi —————

Justice Rune: Level 7 (1/10000). Special Effect: Power of the Hound Constellation.

...

[Power of the Hound Constellation: The Rune Language communicates with the Hound Constellation, amplifying your damage bonus against dark creatures, with a current increase of 60%.]

"In the future, tackling demons will be much easier."

Levi murmured.

The [Justice Rune] was a new Rune Language he learned after the nine rings.

Now it had been cultivated to level 7.

Its effects could be considered a blood battle weapon.

Levi already possessed the [Great Light King Body].

Plus the effect of this rune.

Demons below level 9 late stage.

Could almost be killed with a full-force strike.

With higher levels.

Fighting beyond his level against a level 10 demon would also prove endlessly useful.

Levi planned to find a Level 10 Fish Demon to test it out.

Striving to keep his record of defeating enemies beyond his level. .

One month later.

As the [Magic Rune] reached level 11.

A new astral soul phenomenon was born.

Levi summoned it.

"Squeak, squeak, squeak."

A giant rat descended with a roar.

Its gaze was cunning, nose sniffing back and forth.

Levi examined its information.

Unveiling a satisfied smile, he couldn't help but nod.

[Astral Soul: Spirit Rat]

[Star Name: Tom Jerry]

[Star Justice: Clever and Skillful]

[Star Language: Spells]

[Level: 9]

[Ability: Skillful Hand]

[Skillful Hand: After summoning the astral soul, it will steal the energy of any spellcaster profession and slow their casting speed. The slowdown standard equals the amplification standard of your current realm's casting speed.] RÂNÒbÈŞ

"Interesting, so my casting speed increases by 100%, the enemy's casting speed decreases by 100%, and it works on any spellcaster profession, even against means similar to innate spells, making it very difficult for them to cast instantly. Besides, it continuously steals spellcaster energy."

Here, the "energy" is called differently in different systems.

But in essence, there isn't much difference.

Spell power, wizard power, magic power, psionic power.

It could even be called... Chuck.

Levi once visited a multidimensional plane.

The spellcasters there called it that.

Before casting a spell, they had to shout it out loud to build momentum.

In the Nightmare World, he tested the Dark Monkey Star Soul's effects with Elena.

It wasn't false advertising.

Elena's casting noticeably slowed.

If it were a ninth-level spellcaster, the effect might not be as apparent.

But ninth-level battles are immensely dangerous.

A slight impact can reverse the tide of battle.

Temporarily ending his retreat, Levi went to Black Abyss City.

"Senior, I have a question to ask, when advancing to legendary at Nine Rings Perfection, can two legendary artifacts be refined at the same time?"

The Black Abyss Sovereign pondered for a moment.

"Yes, someone has done it before and succeeded."

"Which senior was it?"

"Roger."

Levi thought it was Sauron.

Didn't expect it to be Roger.

The Black Abyss Sovereign continued:

"Roger is called the [Platinum Wind] because his legendary artifacts were both of the Metal Faction and the Storm Faction. Choosing multiple legendary artifacts for advancement is possible, but this increases the difficulty of advancement and lowers the success rate... Therefore, throughout history, only those with great confidence or adventurers dare to do so."

"I see."

"Choosing two legendary artifacts means two legendary professions. You must choose one as the primary profession and the other as the secondary. Similarly, some Gods mastered different divine authorities, but one is always their primary strength, and the others are merely secondary."

"Of course, if successful, possessing multiple legendary professions would make one's strength far superior to ordinary legends, like Roger in the ancient era. Our wizard civilization has undergone many reforms and metamorphoses, but his strength was undeniably strong, recognized even by today's legendary wizards."

Hearing the Black Abyss Sovereign's explanation, Levi realized the truth.

No wonder Roger was so confident.

He was indeed very powerful.

Unfortunately, he already underwent a second refinement.

No opportunity for reincarnation.

Otherwise, in this era, he would undoubtedly be an earth-shattering presence.

Reaching level 11 might also be possible.

"Senior, can one refine another legendary artifact after advancing to legendary?"

"Naturally, yes, but a legendary secondary profession can't be born."

"I understand. Thank you, senior, for clarifying things."

Returning home, Levi reflected.

I still need to converse more with legendary wizards.

Many things I can't figure out become clear with just one question.

Regarding whether to choose a legendary secondary profession.

Chapter 2683: God Above Gods! Secrets of the Astral World!

Levi is not certain at the moment.

He will wait until reaching Nine Rings Perfect.

Then assess his chances of successfully advancing to legendary.

Decide according to circumstances.

He simply does not want to waste a ready-made legendary artifact.

Judging by the background information Sauron left behind.

Combined with the hexagrams refining array above.

Levi speculates.

The [Light Candle] was refined by the six subordinate gods of the Heavenly Father.

Among these six gods, there are both weak and intermediate divine power users.

In any case, being refined by six true gods.

This oddity's potential won't be low.

As his legendary secondary profession, it's more than sufficient.

If it were another legendary wizard of the Light School.

They wouldn't hesitate to refine it.

One should know, [Mr. Silver, Fermont] of the Lightning School of Thought.

Advanced using an oddity refined from the remains of an intermediate god.

The power of six gods surely far exceeds the power of one god.

Additionally, having more secondary professions has an intangible benefit.

When introducing himself to others, he can show off.

Reciting a long string of legendary title prefixes.

Others will know this person is extraordinary.

In books, these are protagonist-level characters!

...

Astral World.

Arrogant Sun Plateau.

After traversing the Nine Luminaries Road and arriving at the Gate of Radiance.

Ramon looked at yet another extinguished demigod flame.

Silent and wordless.

This demigod was once the Great Angel Commander by his side.

Punishment AngelRajil.

At his peak, his power wasn't much weaker than a weak god.

Three hundred thousand years ago, Sauron, seeking revenge against him.

Ventured alone into the Arrogant Sun Plateau, slaying six gods.

And took Rajil away, leaving triumphantly.

He did not stop him.

Because he realized.

He suddenly was no longer a match for Sauron.

As a powerful god.

Aside from a scarce few Supreme Existence beings.

He was the absolute peak on the Multidimensional Plane.

Yet he was frightened by Sauron.

He knew Sauron might already rival the Ancestor of Frost Giants.

However, unlike the Ancestor of Frost Giants who defied the heavens and fought the gods.

He chose to show his prowess, signed agreements with the gods, and then withdrew.

In the astral world, there is also Level 11.

Residing deep within the Thousand Hills Countries.

He is the King of the Gods, the Father of All Gods, the Mother of All Gods, the God above Gods.

The first will of the astral world at its birth.

Also the faith of all gods in the astral world.

The first [Great Divine Power User] of the astral world.

This is another level above [Powerful Divine Power].

Even gods have faith.

Mortals might not imagine it.

But it is true.

He has neither a true name nor a divine name.

He is the destination and endpoint of all gods.

The embodiment of faith, and the astral world itself.

The gods call him the "Star Ancestor."

The Star Ancestor slumbers deep within the astral world, usually leaving two [Great Divine Power] standings weaker than him to guard it.

The attendants are incarnations of the Star Ancestor, a trinity.

One is named [Father of All Gods].

The other is named [Mother of All Gods].

Throughout the years, whenever the astral world met significant crises.

He would awaken at the call of the gods.

Many have tried to defy the authority of the gods in history.

But no one has ever overturned the astral world.

Due to the presence of the Star Ancestor.

It is a Supreme Existence enough to rival [Abyss Will], [Underworld Source River].

Throughout the ages, these Supreme Existences' powers have not remained stagnant.

They continuously grow stronger.

So even if an Level 11 being like the Ancestor of Frost Giants emerges.

Powerful gods like the Heavenly Father have never panicked.

Because he knows.

No matter the fortuitous rise to Level 11, they are no match for the Star Ancestor.

These new "Supremes" can never become true "Supremes."

They will be crushed by reality when they glimpse hope.

These are the survival rules of the Four Great Giants.

They stand at the pinnacle of the four cosmic poles.

Any challenger meets no good end.

From ancient times to now, the Origin Divine Tree, Star Dragon King, and Blood Dark Dragon King, Ancestor of Frost Giants, Ultimate Creation, Sauron... all have set foot on Level 11. S

But in the end, nothing changed.

Any of the Four Great Giants taking action.

Can render a lifetime of effort futile for them.

How could the Heavenly Father not know?

Sauron surely has a contingency on the Multidimensional Plane.

The Dark Ancient Tower is one of them.

And possibly the Dusk Palace Master.

But history has told him.

Even if another Sauron-like figure appears.

They cannot escape the cycles of history.

Of course, if it can be nipped in the bud.

That's naturally best.

Otherwise, it would trouble the attendants and the Star Ancestor to intervene.

He recites the name of Artu.

The young Dusk Sun God appears before him.

"Surgard has appeared again within the God Race territory. This time, make sure to kill him... Moreover, [God of Prophecy] informed me, you have the opportunity to kill the Dusk Palace Master as well. Do it together, for there can only be one Dusk in this world."

"Understood, I will descend with Divine Power Incarnation immediately!"

...

Eight years later.

Nora Calendar 1330.

Blood Battle Year 1118.

Nightmare World.

On the Chaotic Wilderness, the Primordial Magnetic Storm spanning a hundred miles rages.

Levi quietly observes, taking notes.

"Eight-Circle Magic Elemental Magnetic Storm is complete. Its power is top-grade among eighth-circle, combining control, life-saving, and attack in one."

He recorded it into his self-compiled "Book of Ten Thousand Techniques".

This book will document all magic sequences created by Levi.

To be passed down as a family treasure of the Ancient Dragon Continent.

Chapter 2684: God Above Gods! Secrets of the Astral World!

After decades, he successfully completed the first eight-circle magic of the Primordial Magnetic Series.

Levi's confidence soared.

In this light, creating a ninth-circle spell within a century is not a big issue.

Inside the spire within the Black Dragon Territory.

Triss raised her eyes and saw Levi finishing his research.

"Levi, check the repayment bill, it's just 20 billion away from being settled."

Levi laughed heartily.

"Alright, no need to worry too much, ma'am."

"You've never owed any money, you don't understand."

"Alright then."

On the open plain.

Gandaph and the Red King, Lopez, are in an intense battle.

After his advancement to the Eight-Ring Senior, it's even easier to target two immature Legendary Creatures.

Even if the two brothers are now in the Level 8 Middle Stage, it's the same.

This made the two little monkeys somewhat depressed.

"I won't fight anymore, I won't fight anymore. Next time, find Hardros to spar. From now on, I'll only accept challenges from Emperor Mu, there's no benefit in sparring with me, hmph!"

Lopez refused to continue.

Went offline straight to fairyland to sleep deeply.

Gandaph chuckled, "Hardros is busy being a congressman, discussing who knows what all day."

Though the Storm Star Ape is a monkey, he's very fond of official positions.

Any affair of the congress, he insists on participating as long as he's allowed.

He has the air of a new official with ambitions.

Levi consulted the Nightmare Overlord about the situation in the Nightmare World.

Then he revealed a pleased expression.

The advantages brought by a millennia-long locust plague were already benefiting the land.

Around the Black Dragon Territory, lush Blood Flesh Forests began to sprout and grow.

The territories of the Tyrant Realm and Blood Rain Realm are about to join into one vast expanse.

Such vast lands.

Enough to support more Nightmare Overlords.

If he could control more realms, Levi might become a monarch himself.

Of course, now is not the time.

His current territory actually belongs to the Pale Monarch.

It's the one who once killed the Ash Dragon with a White Bone Giant Hand.

This level-10 entity's whereabouts remain unknown.

The Blood Rain Overlord is also missing.

Though the Nightmare World doesn't engage in constant blood battles.

It's still unrestful.

Invasions of other worlds are common occurrences.

Levi has resided in the Black Dragon Territory for over a thousand years.

Never having seen the Pale Monarch once.

Whether he's dead from battles outside or just taking a nap is unknown.

For such long-lived longevity species.

Millennium is just a nap for them.

He never expected.

In such a short time.

Suddenly a rocket-like rising Black Dragon Lord emerged in the territory.

Levi is quite satisfied with the status quo.

He doesn't expand externally recklessly, just maintains the Black Dragon Territory well.

When he is strong enough to confront level-10.

The Pale Monarch might flee hastily at night.

...

Two years later.

Blood Battle 1120 years.

Another Blood Battle Auction is held.

Levi didn't personally attend.

Apart from the Dark Treasure Map.

There are almost no items at the auction useful to him.

Therefore Ninth-Circle Wizards rarely participate.

Instead, White Dragon Mountain increasingly became the default trading site for level 9 experts.

These years, just from collecting transaction fees.

Levi has earned considerably.

Of course, the Gondor Three Heroes, Elena, Triss, and others still went.

Eighth-circle wizards can still obtain quite a few valuable things.

As expected.

Holy Infant Flower traded 1.8 billion Aether Stones for the last Frost God Series oddity.

[Frost God's Dance].

Since then, the Frost and Burning Series have all reached perfection!

Lord Victor bought some materials for refining a wizard tower.

Gandaph also found an ancient body tempering technique.

Named "Rhino Emperor True Body."

Although it's not among the four major levels.

It can be cultivated to the primordial soul realm.

It's of significant reference to him.

Elena and Triss mostly purchased potion-related knowledge and materials.

Upon advancing to eighth-circle, Elena's pharmacist skills have indeed improved significantly.

She's not only refining daily meditation supplementary potion.

But is starting to transform into an original research-type talent.

Triss bought only modestly.

Firstly, there are not many things she really needed. .

Secondly, she currently owes too much external debt and doesn't want to overspend.

As for Levi, he had the Three Avatars buy all the Dark Treasure Maps for him.

A total of 16 maps, planned to open them during a journey.

...

Half a year later.

Nearly 600 years of cultivation.

The Sky King Dragon and Extreme Darkness Dragon Breathing Skill both reached their maximum limits.

The Evolution Potion for the Sky King Dragon is not yet ready.

So it's temporarily set aside.

He arrived at the Outer Sea of the Ancient Dragon Continent.

Found a place to seclude himself.

First evolved the Extreme Darkness Dragon.

This evolution used the bloodline crystals of [Rainbow Dragon] and [Dark Dragon].

One Mythical, one Legendary.

This combination is destined to be Super Mythical.

...

Five years later.

Nora Calendar 1337 years.

Blood Battle 1125 years.

The seasoned Levi successfully ascended the Invisible Heaven.

This is a world emanating a dazzling multicolored glow amidst the darkness.

Like a low-lying aurora night sky.

Levi sat on that light-surrounded black throne.

Experiencing another metamorphosis in life.

He reached out his hand, surrounded by Invisible Sanctuary.

Tiny wisps of rainbow light spread.

He had a feeling that with just a thought.

He could disappear from a level 9 expert's sight.

This is absolute speed.

Rainbow Dragon contains [Rainbow Power].

Is a speedster amongst the level-10.

If not for the Frost Witch risking her life to shelter it forcibly with the Demiplane during a chaotic battle.

No one could hold on to it.

Even if stronger, it's hard to achieve.

Every trade has its specialty; it excels in speed to the utmost.

The rules of this world and the previous world are entirely different.

In the prior world, the Rainbow Dragon is akin to a life form that has surpassed the speed of light.

Chapter 2685: God Above Gods! Secrets of the Astral World!

In his previous life, Levi watched some anime or movies.

The thing he envied the most was those speedsters.

The world's martial arts, only speed is unbreakable.

He opened the proficiency panel.

Levi —————

Black Emperor Dragon Breathing Technique: Twenty-first Rank (1/50,000,000), Special Effect: Black Emperor Dragon Body Supreme Level (Level 9 Early Stage). Exclusive Weapon: Invisible Shadow (Level 9); Bloodline Divine Patterns: 44/81. Heavenly Sovereign Authority: Invisible Sanctuary (First Layer).

...

Black Emperor.

That's the name Levi gave to the new breathing technique.

It follows the same naming style as Crimson Emperor and Golden Emperor.

Furthermore, considering that his current cloak is no longer blood-red.

The power of blood is merely a small part of the Invisible Sanctuary.

He simply renamed his divine weapon to "Invisible Shadow."

The Invisible Sanctuary encompasses a wide range of elemental attributes.

Unlike the Crimson Emperor Dragon, which is extreme fire.

It includes various attributes such as Shadows, Darkness, Poison, Light, and Blood. These come from creatures like the Ender Dragon, Dark Dragon, Jade Dragon, and Blood Beast. Light, on the other hand, comes from the Rainbow Dragon, with its rainbow light being a more powerful exotic force, similar to how the Power of the Whirling Star is a variant of Elementary Magnetic Field.

Thus, the Black Emperor Dragon bloodline granted Levi a diverse range of elemental affinity talent boosts, although it's not as specialized as the Crimson Emperor.

For his wizard cultivation, it is quite useful.

Other spell-like abilities can also be performed through the Invisible Sanctuary.

However, for Levi, they aren't very useful.

It's worth mentioning, the former "Extreme Darkness Enslavement" and "Extreme Darkness Parasite."

They have become "Black Emperor's Enslavement" and "Black Emperor Parasite," and they still exist.

The number of Black Emperor's Enslavement increased from 14 to 20.

It surged by six in an instant.

And Levi has only used 12 so far.

When one is strong enough.

There's no need for enslavement.

People will willingly come to you.

But facing the inevitable battle against the high ranks of the Abyss in the future.

The enslavement, if used well, will be of great use in blood battles.

The succubus and the Mind Flayer.

Now, they aren't very useful to Levi anymore.

But having accompanied him all this way.

He hasn't dealt with them for now.

The "Black Emperor Parasite" has also undergone changes.

Now Levi can parasite four individuals at most.

And each one can temporarily have level nine power.

Not only can they be used for assassinations.

But also for regular fights.

It's like having four more level nine summoned creatures.

"Now, let's test my ultimate speed after reaching level nine."

The power of the Invisible Sanctuary flowed within Levi.

Colorful lights began to flash.

Like the superhero Flash.

Ancient and modern gone, the invisible everywhere! Speed!

In an instant, he vanished.

...

Sauron Continent.

The Golden Walker was in a good mood.

He completed all the various tasks given by the congress.

Not long ago, he received his due reward.

His cultivation improved again.

Coupled with the life-prolonging potions made available by the congress.

He had hopes of becoming a Senior Nine Ring.

Legendary status is beyond his reach.

But before he dies of old age.

He could find ways to build a substantial foundation for the Golden Lightning family.

That's worthwhile.

Living in this world, one should leave some mark, shouldn't one?

The Golden Lightning family right now.

Is indeed in a dire state.

The Molten Gold Wizard King died in the first comprehensive invasion war.

The Shining Gold Witch King died in the second comprehensive invasion war.

Among the once four great wizard kings, only two remain.

This infuriates the Golden Walker to no end.

He curses the demons for their shamelessness.

Always targetting the Golden family for utter destruction.

Reflecting upon the past millennium.

The Golden family's situation has indeed worsened.

But fortunately, things have started looking up.

Recently, good news arrived.

The Electric Eel Wizard once had relations with someone outside the clan.

A bastard was born.

In his descendants, an initial dual-talent top genius unexpectedly emerged.

Known as the Golden Eel Wizard.

He has been performing excellently these years.

With the potential to become a supernova in the future.

As an ancestor, he finally saw hope for the family's rise.

Secretly, he cared for him.

Counting on him to take over in the future years.

At least ensuring the Golden Lightning family always has someone in the congress.

And not fall to the bottom tier.

Additionally.

There's another joyous event.

When he returned the Heart Cleansing Tea Tree to Louise.

He kept a small piece of the root.

He never expected it to survive.

But unexpectedly.

When he went to check today, it sprouted.

The thought of being able to drink Heart-Cleansing Tea again made him feel his life improving.

Today.

Just like always, he went to the backyard to water the plants.

Humming a little tune.

Suddenly he felt something flicker in front of him.

Looking closer, a figure stood there.

Who else could it be but Levi?

He smiled, "Good morning, I didn't intend to enter your residence."

The Golden Walker instinctively wanted to get angry, but then remembered that things are different now.

"It's okay, is this a breakthrough, testing new abilities?"

"Yes, I lost control. I'm leaving, hope you don't mind."

"No... no worries."

Levi glanced at the sprouted Heart Cleansing Tea root, then disappeared.

Inside, the Golden Walker was anxious.

He had thought of 81 explanations for the origin of this thing.

Fortunately, Levi did not probe further.

How many years has it been?

He went from being a big shot to a minor character in Levi's eyes.

It's enough to bring tears.

Suddenly he remembered something, his face changed.

His residence was equipped with an officially constructed Nine Ring Array.

How did Levi get in just now?

...

Ancient Dragon Continent.

Levi appeared in the Emperor's Palace.

"So fast!"

Chapter 2686: God Above Gods! Secrets of the Astral World!

The Sorren Continent seems very close to the Ancient Dragon Continent.

In fact, it is eighty hundred thousand miles away.

But Levi only needs a single thought to reach it.

He believes that Ninth-Circle Wizards definitely can't do that.

This is something only a Legendary Wizard can achieve.

Levi's fastest speed has already surpassed the speed of light from his previous life.

Of course, this is the maximum value achievable when using the Invisible Secret Word.

Under normal circumstances, it's not as exaggerated.

But it's safe to say.

Under level ten, there are almost none who can catch up with Levi.

Even if they are level ten, if they are not adept in speed.

it's likely they won't catch up with him either.

Keep in mind, he has only mastered one layer of the Invisible Sanctuary.

There's still plenty of room for improvement before reaching level ten.

Once he reaches late-stage level nine, even most level tens might not catch up with him.

In a world this vast, where can't he go?

As long as I run fast enough, I am invincible.

Moreover, average Nine Ring Arrays and restrictions.

To him, they are merely illusions.

In short, the benefits of the Black Emperor Dragon at level nine are numerous.

"Did you succeed in your breakthrough?"

Elena saw Levi smiling to himself and asked.

"Hahaha, yes, I succeeded."

Levi was in a great mood.

He picked up the innocent-looking Elena and returned to the room to celebrate.

...

Time flies by swiftly.

Twenty years passed in the blink of an eye.

Nora Calendar Year 1357.

Blood Battle Year 1145.

During this long period,

Levi focused on one thing.

Dispersing and rebuilding the Bloodline Divine Patterns of the Golden Emperor Dragon and Black Emperor Dragon.

Now that it was almost done, he had exited seclusion.

"Levi, I've reached the Eight-Ring Senior level."

Elena, dressed in formal attire, eagerly shared with Levi who had just exited seclusion.

Girls are like this, they like to share big and small things with their partners.

Unlike Levi, who only mentions breakthroughs in major realms.

"That's great," Levi praised skillfully.

"And there's more good news."

"Tell me."

"A few years ago, Wendy also went into seclusion and advanced to the Ninth-Circle. The Witch's Family is about to have a new Grand Wizard!"

Levi was not surprised by this.

The Wind Witch had already reached the Eight-Ring Perfect Realm.

Plus, she had refined the complete Wind God Series.

Her talent was certainly not a problem.

She should succeed this time.

By then, the Blood Knight would have a demigod-level wife.

And he himself had only recently reached late-stage level seven.

There's still quite some time for him to enjoy a comfortable life.

He asked, "Did Wendy prepare the Star Spirit's Heart?"

He wasn't worried about the sacred medicines, as they were relatively easy to obtain.

"Yes, she did, and it was obtained at the White Dragon Mountain auction," Elena said.

"Speaking of the White Dragon Mountain auction, I have a Turtle King Fruit. Please auction it off for me. If you can exchange it for the Star Spirit's Heart, even better. If not, a Level 9 Treasure or Sun Refining Artifact will suffice. Its value will deplete over time, and we don't lack lifespan, so we might as well trade for something useful." RANŌBĒs

...

Three years later.

Nora Calendar Year 1360.

In the outer sea region of the Ancient Dragon Continent, fierce winds gathered.

Levi sensed something unusual and rushed to the scene.

His family member was about to advance to the Ninth-Circle; he needed to keep an eye out.

So as to avoid demonic interference.

He sat cross-legged in the sky, with the Crimson Dragon Slash embedded into the nearby void.

Exuding a powerful aura of level nine.

Next, whoever came would die!

He was eager for an overconfident Level 9 Demon to appear.

To contribute the last four blooded food to his Blood Battle Armor.

As time slowly ticked by.

The calamities of the Ninth-Circle descended.

The primordial soul faces three calamities and four disasters.

The typical Ninth-Circle tribulation is the same.

Just an enhanced version.

Levi could sense it.

There were gazes from all around watching.

Legendary Wizards had likely also noticed the advancement to the Ninth-Circle.

For Nora, this was no small matter.

The Old Witch even personally came over to join the guarding force.

They had known each other for many years, so she naturally offered a helping hand.

Triss, Elena, the Blood Knight, and others also rushed over.

Other organizations, seeing such a grand display on the Ancient Dragon Continent,

were all envious internally.

Promoting here truly offers a sense of security.

Even the Dusk Palace Master personally came to guard.

Finally, after much effort,

the Wind Witch successfully upgraded to the Ninth-Circle without any danger.

Her excitement was unmistakable.

For her,

for advancing to Grand Wizard was her greatest ambition.

Legendary status was beyond her dreams.

Not for lack of ambition,

but because of the hardships she'd faced on the path to Grand Wizard.

She truly understood her own limits.

To become a Legend requires immense willpower, superior talent, and extraordinary fortune.

To go as far as possible in the Ninth-Circle is already enough.

Becoming legendary, we'll leave that to fate.

"Thank you all!"

Her eyes were slightly moist.

Witnessing so many seniors and juniors come to guard her.

"Mom!"

The Snow Lotus Witch, who had reached Seven Rings Perfection, rushed over.

And the Safa Witch, who at just over four hundred years old, had achieved the Primordial Soul Realm.

She was also a level six Jade Phoenix Knight, inheriting her father's Jade Qilin bloodline.

This year, she was just selected as the new supernova, ranking on the Star List.

"It's truly wonderful, the whole family is full of geniuses."

In the crowd, a sentiment suddenly arose.

"It really is. Not counting the Hall Master and Madam, this is the strongest family on the Ancient Dragon Continent... In three generations, not a single ordinary person."

Regarding this.

Everyone could only feel envious.

This is the harsh reality of the transcendent world.

The hierarchy forms slowly like this.

That night.

After everyone finished celebrating,

the official emissaries from the Nora Council arrived.

Ms. Lucy from the Blood Battle Command Center also arrived.

After becoming part of the Ninth-Circle, these two organizations are typically joined.

Levi counted.

Now, Nora should have 154 Grand Wizards.

Plus, 66 level 9 alien races.

Excluding himself and some hermits, a total of 220 at level nine!

No force in the Pan-Plane could match this.

Let alone.

The Heavenly World also had a group of allies.

This too was a hidden force.

Were it not for concerns about the unknown will of Heaven.

These barbarian tribes would definitely join the Nora Council.

For now, they could only maintain ally relations.

After Wendy's promotion to the Ninth-Circle, she took residence on the Sorren Continent.

Not including Levi, the absentee leader.

Triss became the second-in-command of the Witch's Family.

With years of development and supplementation,

the Witch's Family currently has 24 Primordial Soul Wizards, 80% are witches.

The young talents with the Children of the Elements gifted by Levi early on.

Had now all taken root and sprouted.

All those who hadn't perished had become Primordial Soul Wizards,

becoming the core backbone of the organization.

And the Cat Witch, Snow Lotus Witch, and others,

all held hopes of advancing to the Eight-Ring in the near future.

The Witch's Family today.

Among the top wizard organizations, is already in the upper-middle tier.

Similar to the declining Golden Lightning family.

It truly was a mutual journey.

...

A month later.

After spending affectionate moments with Hundred Flowers.

Levi packed his bags and got ready to leave.

"Stay safe."

"There are few in the world who can take my life, Levi."

"Look at you, you're so full of yourself now, not as steady as before."

Elena couldn't help but tease.

Levi kissed her forehead.

"Don't worry, I'll come back soon."

He bid farewell to his wife and entrusted some matters to other leaders.

Then transformed into a ray of light, appearing in the Star Realm Ruins Sea.

He was about to embark on a journey that was considered extremely distant for both himself and the wizard civilization, to explore the Multidimensional Plane outside of the Eye of Sauron's observations. He couldn't help but recall the famous saying originally by Sauron.

"Multidimensional Plane, infinite wonders!"

"Rainbow Sea, here I come!"

Chapter 2687: Heading North, Level-10 Pursuit!

The year 1362 of the Nora Calendar.

The 1150th year of the Blood Battle.

Flora Realm.

Levi listened to the Spider King's work report, closing his eyes to rest his mind.

There was no resistance from the God Race.

The Spider King regained control of the underground world.

Its power grew day by day.

It is expected to ascend to Level 8 Late Stage Realm within a few hundred years.

Under its command are nine Level 8 Avatars.

Dubbed the "Dark Nine Sons."

Other avatars are countless.

The Spider King constructed a secret Heavenly Net in the Flora Realm.

Intelligence, materials, and resources were continuously sent.

Not only that, it has already begun to infiltrate other realms.

In many alien race markets, or civilized nations, it has placed pieces.

After listening, Levi gained a great deal.

There are several pieces of information worth mentioning.

First, it seems a new Ancient has arrived at the Council of Ten Thousand Clans, with great power.

This Levi could also verify from Bang Gu's memory.

It's just that the new member's identity is still unclear for now.

As time goes on, these Ancients will eventually reveal themselves.

All will be exposed and discovered by Levi.

Second, soon after.

A large auction will be held on Giant Head Star in the Black Swamp Territory.

The event has spread in nearby realms.

Giant Head Star, similar to White Dragon Mountain, is an alien race market.

But its overall strength far surpasses the former.

The owner of the Giant Head Star is a Level 9 Late Stage powerhouse.

Their origins are mysterious, and no one knows their true identity.

They are the undisputed overlord of the Black Swamp Territory.

It's uncertain if they belong to the Council of Ten Thousand Clans.

In any case, there are many good items at the Giant Head Auction.

The current rumors include several that interest Levi.

For example, the Heart of the Star Spirit.

Or a sub-adult form of a Legendary Creature.

There might even be Level 9 Giant Dragon slaves for sale.

The Spider King told Levi, if interested, he could go take a look.

But he must be careful of the Council of Ten Thousand Clans' secret schemes.

There are many other similar pieces of information.

He was very satisfied with the Spider King's performance.

He immediately rewarded a hundred bottles of Almond Flower Immortal Brew to the Spider King.

"Master, is this some new good wine?"

"Yes."

"Better than Five Immortal Liquid?"

"Hmm, more fragrant, you'll know when you taste it."

A while ago, Levi refined an inconspicuous water-element Morning Star Artifact.

He named it Flower God's Word.

One Shot Soul, birthed a special spiritual creature.

It is similar to a Flower Fairy, called Little Flower God.

Little Flower God can gather the essence of various world treasures.

Producing the incredibly miraculous Flower God Water.

Levi immediately had the research team work overtime.

To create a drink for the third generation of the Ancient Banyan Fairyland.

Which is Almond Flower Immortal Brew.

The effects of Almond Flower Immortal Brew are unparalleled.

A mortal drinks a sip to prolong life, living up to one hundred and twenty years is not a problem.

Low and Intermediate Wizards can also extend their life by about ten years.

Of course, after drinking it again later, the effect becomes negligible.

Overall, as a drink.

Being able to prolong life is already a miracle.

Longevity is merely a side effect.

The most important functions are threefold:

Firstly, assisting meditation.

Even for Levi, a Ninth-Circle Wizard.

There is still some effect.

Just like Heart-Cleansing Tea, it can overlap effects with the meditation supplementary potion.

He now meditates with a glass of wine, a sip of tea, better than living godlike.

Secondly, promoting growth.

Transcendent plants and animals can all be fostered in their growth.

Thirdly, gaining a somewhat insignificant Almond Blossom Immortal Body.

Whoever possesses this physique is impervious to all poisons.

And there are many functions yet to be developed.

In short, this is truly a good thing.

No matter how much others would pay, Levi will not sell it.

Oh right, because the Panda Clan's winemaking technique was utilized.

This wine has a strong enhancing effect on Emperor Mu's Drunk Ape Martial Arts, and it's also effective for the Energy Sect, especially for the Spirits Sect's cultivation enlightenment. . RÀNŎB E§

After drinking it, Lord Victor immediately achieved enlightenment, advancing his Energy Sect cultivation to Level 7 Late Stage, almost catching up to the Holy Emperor, benefiting Elena, Emperor Mu, Link, and the Four Sons of Qi Sect significantly.

The Spider King knew this wine must be extraordinary, hearing his master praise it so highly.

"I will be traveling for a while, take your time with this, and I'll bring you more when I return, hoping you reach Level 8 Late Stage soon, I will find a way to help you advance further, or find you a strong backer."

Levi contemplated, once his strength was sufficient.

He would directly enslave the Star Spider.

Both the big and little spiders would work for him.

Wouldn't that be wonderful?

"Thank you, Master... Oh, right, Little Wo wants to meet Little Rou."

"No problem."

Levi arranged for them to meet.

Little Rou is now at Level 8 Peak, probably soon to reach Level 9.

Under its nurturing, Thunderclap Mountain Blessed Land has taken on the semblance of a Thunder Pool Secret Realm.

Elemental spirits continually emerge within it.

Thunder Cranes, Thunderbirds, Thunder Rocs, Thunder Snakes... endless varieties.

He didn't rush to leave,

Instead, he stayed with the Spider King for a while to rejuvenate.

Reviewed the Spider King's gains over the past years.

A total of 36 oddities.

A plethora of materials, rare creatures, Dragon Clan, etc., numerous in quantity.

Also, a sacred medicine plant, named Ice Carp Grass.

Shaped like a little blue goldfish.

Acquired by one of the Spider King's avatars from a Frost World.

Can be refined into a Holy Soul Potion for a Holy Infant.

A month later.

Levi bid farewell to the Spider King.

Treasure hunting while heading to the Black Swamp Territory.

...

Five years later.

The year 1367 of the Nora Calendar.

The 1155th year of the Blood Battle.

Giant Head Star.

It is said, this is the skull of a True God.

After long years, the divine power dissipated.

Along with countless meteorites and other materials attached to it.

Chapter 2688: Northbound, Level-10 Pursuit!

Over time, it turned into a gigantic entity like a planet.

Its diameter exceeded ninety thousand miles.

To compete for control of Giant Head Star and explore its internal secrets,

Level 9 experts have historically waged battles over it,

and ultimately, the current Giant Head Star Lord became its master.

On this day,

Outside Giant Head Star, it was bustling with activity,

Strong individuals from all directions, either traveling in their physical forms, or riding mounts, ships, etc., came one after another. Humans, elves, and various bizarre and alien races were all present.

Levi transformed into a human warrior wielding a huge axe, mingling among them.

The Black Swamp Territory is not far from the territory of the Council of Ten Thousand Clans.

If Levi came in his true form, it would surely cause a stir.

Wanting to quietly attend the auction would be difficult.

He came before Giant Head Star, sensing a faint divine aura.

It seems the legends are true, this head is indeed a True God relic.

But the time has been too long, it has become a spectacle, and it has no real value anymore.

If there was anything good, it had already been plundered by various strong persons.

Easily blending in, he secured a residence to settle down.

There was still some time before the auction started, and he couldn't delay his cultivation.

He could feel a strong aura inside Giant Head Star.

The momentum far surpassed Bang Gu, though it might not necessarily be stronger in actual combat. .

Presumably, it's the mysterious Giant Head Star Lord.

The next day.

As the ground shook with a rumbling noise.

Levi opened his eyes and went outside the residence.

He saw a towering brawny man covered in green scales, standing a hundred meters tall, opening the door to the opposite residence, also here to attend the auction.

Its presence was also at Level 9 Middle Stage, carrying a pitch-black huge axe on its back.

Levi recalled the intelligence provided by the Spider King.

"Star Splitter, a Level 9 strongman from the Green Scale Clan, a lone wolf... I didn't expect this one to come too, this auction is going to be lively."

The Qilin Clan is a general term, referring to a kind of humanoid scale-bearing alien race.

Levi's Ancient Dragon Continent adopted the White Scale, Purple Scale, and Green Scale Clans.

In addition, there were four others: Black Scale, Crimson-Scaled, Golden Scales, and Green Scales.

The Seven-Colored Scale Clan was all physically strong, each mastering an elemental power.

This was considered a relatively prosperous race among the Pan-Plane.

They once produced a renowned Level 10 strongman worldwide known as the Seven-colored Scale Master.

This one not only possessed an invincible body capable of slaying Mythical Creatures

but could also control the Seven Elements of power, quite fierce.

Unfortunately, eventually, they fell.

Since then, the Seven-Colored Scale Clan has never produced a Level 10 again.

But Level 9 experts have never ceased to appear.

The brawny Green Scale man turned around and asked:

"Is there something you need?"

Levi showed a friendly smile and shook his head.

"Nothing."

He closed the door and returned home to cultivate.

Afterward, three Level 9 individuals came one after another.

Levi also quietly inquired.

They were Lady Bai Shanhua from the Jade Eye Clan,

Sword of Dominance from the Dog Bear Clan,

and Star Singer from the Spirit Sound Clan.

All were famous figures in the nearby territory.

Levi estimated that they were also here for that Giant Dragon Slave.

His heart was calm as a well, as he pulled out a diary to record.

On his way to Giant Head Star, he had stopped by four treasure map locations.

There was nothing gained from the first two.

The third was a site of ancient ruins, inhabited by a Level 8 sub-dragon species.

A sub-dragon species of the Ancient Black Dragon, the Black Water Spirit Python.

He sent it to the Dragon Palace.

The fourth was a highly poisonous forbidden area.

Inside was a powerful Zerg, the Thousand Poison Insect.

Upon reaching adulthood, it could rival a Level 8 powerhouse, not inferior to the Golden Blade Guest.

Levi transplanted its species to the Black Swamp Secret Realm for breeding.

These years, the School of Insects had become increasingly prosperous.

The variety of self-cultivated Zerg species was continuously emerging.

It was similar to the School of Spiritualism, very hard to become a top school.

But one day, if the school produced a Grand Wizard, it shouldn't be a problem.

It could enrich the wizard civilization's soldier species.

A month later.

The auction began.

Everyone rushed to the interior of Giant Head Star.

Arriving at the location of the God's skull's brain.

There laid a wonderland.

In the sky, a giant floating island hovered.

All around it, smaller islands were scattered like stars.

Before long, two obscure figures appeared from the central giant island.

One was at Level 9 Late Stage, the other at Level 9 Early Stage, both wearing masks.

"I am the Giant Head Star Lord, welcome everyone to Giant Head Star. Without further ado, the auction begins. The auction operates on a barter system; everyone just needs to call out what you're willing to offer, and sellers will select their preferred trades."

As soon as these words fell.

The first item presented caught Levi's attention.

It was a beast egg adorned with star patterns, radiating light.

Exuding a slight holy aura.

"Heavenly Horse..."

Levi murmured.

A Heavenly Horse, though horse-like, is not a horse, its body adorned with dragon scales.

With extreme endurance and speed.

It is a Legendary Creature favored by the Heavenly Father and angels.

Many use it as a mount.

The Heavenly Horse also has several variants, such as Lady White Bone's Purgatory Heavenly Horse from the other day.

This variation is rare, with even greater potential.

It has the potential to grow to peak level 9.

Ordinary Heavenly Horses usually max out at Level 9 Early Stage.

Their value naturally doesn't match the variant's.

The magical aspect of a Heavenly Horse is this:

No one knows if it's a variant before it hatches.

Soon, the auction for the Heavenly Pegasus Egg began.

If raised from a young age, it would be very loyal to its master.

Therefore, it was very popular.

Ultimately, a mysterious Level 9 draped in a black cloak acquired it.

Levi glanced at them, realizing he didn't recognize them.

Chapter 2689: Heading North, Pursued by Level-10 Killers!

He also wanted it, but without anything of equal value that the seller desired, he had to give up.

Subsequently, a series of rare treasures that drove the outside world mad went up for auction.

When it came to the Star Spirit's Heart, Levi gave it his all.

But in the end, he secured it with a Divine Crystal that fell from a Poison Angel.

This surprised him a bit.

He had a lot of these and didn't know how to use them.

It seems that many powerful beings from alien races still covet God's power.

However, they neither dare nor have the ability to hunt angels.

Seeing Levi with a Divine Crystal, many eyes assessed him.

In the second half of the auction, the host brought out a cage.

Inside was a golden giant ape.

It looked spiritless, with a dull gaze, appearing to have Level 8 Late Stage strength.

A collar was around its neck, with spikes piercing into it.

Levi's gaze hardened.

"Holy Giant Ape?"

Outrageous! To enslave the ancestor of one of my team members!

This was something he had to acquire no matter what.

But despite bidding for half a day, it was eventually snatched away by that mysterious Level 9 figure.

That guy seemed very interested in Legendary Creatures.

He had already secured the Heavenly Horse, and now the Saint Ape.

Levi's mind was racing.

He intended to meet this person after the auction.

It would be best if he could exchange for it peacefully.

If not... then there would be other ways.

Afterward.

He exchanged another Dark Angel's Divine Crystal for a large piece of Level 9 Gael's Stone.

As the auction neared its end.

A heavy auction item was introduced.

The Giant Head Star Lord personally carried a sleeping giant creature, floating in mid-air.

It was a giant dragon, with a slender body.

Like a drawn sharp sword, its joints, dragon wings, and tail were all blades.

"Dragon Swordman Matthew? Wait... no, this is a mother dragon."

Levi murmured.

It gave him a scare; he thought Mr. Matthew had been caught by someone else.

"This is an adult giant dragon, already under enslavement restriction. If you acquire it, you'll have a Level 9 mount or fighter. Its value is needless to say."

Unlike the Heavenly Horse or Saint Ape.

This giant dragon doesn't require a lengthy growth process.

Once bought, it's ready for use.

This is more useful than obtaining a Nine-level Treasure.

Which is why so many experts gathered.

Experts from all around showcased their abilities.

Taking out their prized treasures to bid for this item.

The Star Singer even offered a Nine-level Treasure.

But the seller was slow to decide.

"Are you going to sell or not?"

"Exactly, what do you actually need?"

"Stop wasting our time!"

The experts began to complain.

Meanwhile.

Outside the Giant Head Star.

Four figures quietly descended.

One with red feathers, crow-headed and human-bodied, holding a Red Flame Giant Sword.

It was the newly risen Ancient, Red Crow.

The other three were generals in golden armor, riding heavily armored warhorses.

The Seventh Divine General, Endless.

The Ninth General, Ancient Teeth.

The Thirteenth General, Canon.

The first two had Level 9 Late Stage Cultivation.

Though General Canon was at Level 9 Middle Stage.

With the Power of the World behind him.

He could also exert a Level 9 Late Stage battle strength for a short period.

Such a grand lineup, approaching menacingly.

The Seventh Divine General said, "Enclose this area, block the Giant Head Star."

Red Crow asked, "Are you sure the Dusk Palace Master is among them?"

The Seventh Divine General said, "I wasn't sure at first... but after coming here, I believe he is here!"

The two generals lined up, placing this area under restriction. .

The long sword in Red Crow's hand traced a circle in the Void.

A ring of fire with a diameter of a hundred thousand miles appeared out of nowhere.

It enveloped the Giant Head Star and slowly began to contract.

"Let's begin, and I hope you don't disappoint my big brother."

Red Crow waved a broad sleeve, transforming into a beam of light, rushing inside.

With the rampant Level-10 aura sweeping across.

The entire Giant Head Star trembled.

Some Level 9 experts attending the auction.

Their expressions changed one after another.

The Giant Head Star Lord suddenly declared:

"Everyone, do not resist. Submit to my Council of Ten Thousand Clans, and you can avoid this catastrophe, otherwise... it might be hard to leave here alive today."

He and the person beside him tore off their masks.

"Fifth Divine General, Yago; Twelfth General, Meng Luo!"

Lady Bai Shanhua exclaimed.

Boom! A domineering and unparalleled aura filled the venue.

Red Crow's sharp gaze swept across the scene.

Everyone held their breath.

"Level-10..."

They now understood.

This auction was actually a trap.

The real Giant Head Star Lord was probably swapped out long ago.

Or perhaps, he had always been the Fifth Divine General.

"Dusk Palace Master, stop disguising. I can already smell that irresistible dragon blood scent, you can't escape."

Red Crow suddenly stared at a certain island.

And then cast a giant flaming net towards that direction.

The next moment.

That figure suddenly self-detonated, its aura invisible.

Outside the Giant Head Star.

A figure appeared, and then transformed into a beam of light shooting straight away.

Directly passing through all blockades, vanishing without a trace.

"Damn it!"

Red Crow was both shocked and furious.

Shocked that he hadn't expected the Dusk Palace Master to actually be inside.

Furious that even after making a personal move, he couldn't stop him?

If this fails, won't it be a laughingstock across the Pan-Plane?

He stomped his foot, turned into a streak of fire, and sped away.

Boom! The Giant Head Star was blasted, leaving a charred hole with a radius of ten thousand miles.

A river of flame spanned the Deep in space.

A moment later.

Red Crow stood in the starry sky with a sullen expression, fists clenched tight.

"He got away..."

In just the blink of an eye.

The Dusk Palace Master had already escaped at least a million miles away.

Chapter 2690: Heading North, Level-10 Pursuit!

Otherwise, it would be impossible to escape its tracking.

As for the various blockades set by the God Race.

They were completely futile.

They didn't serve as any obstruction at all.

It doesn't believe in evil, and its perception spreads outward.

Its figure heads in one direction, continuing the pursuit.

On the other side.

Five Divine Generals join forces to trap a strong alien race.

Yet there is still a golden figure breaking through the constraint and escaping.

The Divine Generals don't care about this.

It's just curious.

The light that the Red Crow just pursued...

Was it the Dusk Palace Master?

If it was.

It seems this operation is in jeopardy again.

How could a level 9 possess such speed?

Could it be that this person has already reached level 10?

Rumble.

No one knows how long it has been.

A streak of fire breaks through the sky.

The Red Crow stands with arms folded, saying calmly.

"That kid has some skills, underestimated him."

It feels a bit annoyed.

If I had known.

I should have let my big brother take action personally.

I just wanted to show off a bit, but screwed it up...

The Divine Generals look at each other.

"Ran away?"

"Ran away."

Buzz! The shadow of The End Dragon Bird appears.

"Second brother, did you fail?"

Its voice is deep, somewhat incredulous.

"Big brother, that kid's speed is somewhat extraordinary, completely unlike the means of a level 9... I sensed the aura of the Rainbow Dragon."

"Rainbow Dragon?"

"Yes."

"It seems the Master of Rainbows that recently fell was devoured by this kid, this path of knights is truly wicked."

The End Dragon Bird mutters to itself. .

If he acquired the power of the Rainbow Dragon.

Then it's understandable that this kid could escape.

Thus, other Ancient Dragons cannot say anything.

"Come back, Plan B failed, that kid is like a startled bird, already ran who knows where, implement Plan A."

The Red Crow glanced at the Divine Generals.

"What use were your blockades? So many people couldn't stop one."

The projection of the Holy War Army Master emerges, speaking sarcastically:

"They are only level 9, but I didn't expect you, dignified level 10, to fail in capturing."

"Hmph!"

The group disperses, discontented.

...

Dark Temple.

The Ancients have already heard the news of failure.

The Dark Sun Sovereign's gaze is calm, revealing no joy or sorrow.

The Worm Lord's expression is somewhat unpleasant.

The Amethyst Saint is extremely grim.

The End Dragon Bird remains thick-skinned.

"No matter, if there's an opportunity next time, I will personally take action."

...

Land of Darkness.

In a certain void, Levi steps out.

He finds a piece of meteorite, sets up a shelter.

Sitting cross-legged to rest, his pale face gradually turns rosy.

"Luckily, I refined the Rainbow Dragon Bloodline before setting off... the Council of Ten Thousand Clans is really painstaking in their efforts against me. What is that bird man's origin? It's actually a level 10 exist; not heard of in the Pan-Plane rankings, is it a new Ancient?" ㄝNÖBĚŞ

He escaped without danger.

First by suicide to avoid level 10 attack.

Then resurrecting from the set checkpoint.

At once, using the Invisible Sanctuary and reciting secret words to escape.

In the maximum state.

He teleported a million miles.

The Red Crow, this level 10 strongman, was stunned.

Having been calculated against, Levi pondered on how to retaliate.

"Forget it, wait until I advance further; now facing level 10, I'm still far off."

The casual strike by the Red Crow, Levi tried everything but couldn't resist.

At least it requires reaching level 9 late stage.

After ensuring safety, Levi continued with the original plan.

It's a pity, though.

None of the legendary creatures at the auction were obtained.

Especially the final adult Sword King Dragon.

...

Several months later.

At a certain God Race location.

A figure is bound tightly.

It is the Star Splitter.

The figure of General Canon appears.

"You are quite talented, as long as you join our God Race and worship the Blood Fire Dominator, you can gain a status equal to mine, what are you hesitating about?"

The Star Splitter replies coldly:

"I have wandered the Multidimensional Plane for tens of thousands of years, all for freedom, I don't want to work for others, kill me... I don't have many years left anyway."

What others don't know is, it is only a few hundred years away from its life limit.

This auction was originally intended to buy items to prolong life.

But failed to extend lifespan, and lives are lost.

General Canon, seeing its resolute intent to die, doesn't waste words.

Behind it, the Frost World emerges, and a frosty longsword appears in its palm.

"Then die!"

It raises its shark-tooth-shaped sword and slashes down.

Just at this moment.

A ray of light attacks at an unimaginable speed.

The Frost World behind Canon instantly cracks.

Accompanied by the cries of countless Star Ghost Clan members.

A golden world suppresses, dominating this world!

From the Golden Throne, Levi strikes with his sword!

The Destruction Sanctuary shreds everything before it.

The Frost World is utterly annihilated.

General Canon couldn't persist long.

Was shredded by unstoppable Sword Qi.

Levi descends from above, looking at the fallen corpse, his eyes cold.

He grabs Canon's escaping soul, handing it to Leon.

"Still trying to run? Get in my stomach and serve your sentence!"

The little guy rides his warhorse out from the Nether River, swallowing it whole.

A level 9 Middle Stage strongman falls.

The Star Splitter's face shows unspeakable shock.

It seems like somewhere it has seen this black-armored swordsman.

"Dusk Palace Master?"

"Indeed, it's me."

Levi cuts the bonds with his sword.

He suddenly frowns and says:

"You're not far from your life limit."

"How do you know?"

"I can see your remaining lifespan, oh yes, he can too."
