

Wizard 269

Chapter 269: Capture Dragon King Whale, Second-Ring Battle, Level Nine Red Lotus! (2)

Although he didn't say much, he could still make people feel warm.

Some apprentices who had mastered diving spells had already jumped into the sea to find their targets.

For most apprentice wizards, it was difficult to swim in the sea for a long time without spells and potions. Therefore, for this hunt, many of them had prepared some spells and potions that were convenient for diving in the sea.

Winnie drank a bottle of Swimming Fish Potion. She waved at Levi and entered the sea like a mermaid. Her posture was elegant as she began to look for prey.

Noz had also entered the water.

Levi looked in the direction that Noz had left.

He didn't use any spells or props and jumped into the sea.

With his current physical fitness, it would be fine for him to soak in the sea for a day.

He followed Noz quietly.

Noz has been acting strange recently.

He seemed to have hostility toward him.

This caused the Spider Sensing to produce a hint of danger.

Levi naturally had to figure out what Noz was up to.

If it was just because of jealousy, that would be fine.

However, if he had any other dangerous schemes, Levi had to stop him and kill him right in the cradle!

He dived a hundred meters into the sea.

Holding his breath, he followed Noz from afar.

Noz seemed to be searching aimlessly.

Not long after, Levi actually followed Noz to a small island.

Noz went to the island and took out something.

It was a conch-like object with complicated patterns flickering on it.

"It's actually a voice transmission conch. How could this guy have such a precious thing?"

Levi was slightly surprised.

The voice transmission conch was very expensive.

The seemingly ordinary sea conch was actually a type of transcendent creature. Although this transcendent creature did not have much combat power, it was very rare.

This transcendent creature could communicate with its companions within a thousand miles through the antennae on its forehead and its shell.

Later, wizards invented the First-Ring Spell called the Voice Transmission Technique.

This was a spell that could transmit sound over a short distance.

The wizards imitated this conch and combined the Voice Transmission Technique with the shell of the conch to refine this kind of wizard tool.

Through the shell of the conch, the Voice Transmission Technique could amplify the distance.

The two wielders could communicate remotely through a fixed incantation. Within a thousand miles, they could transmit their voices. It was very convenient.

Because of the rarity of this kind of conch, this kind of wizard tool was also very expensive.

Not to mention apprentice wizards, even most official wizards did not have such a voice transmission wizard tool.

That was why Levi was surprised.

"Could it be that Noz is a spy from another faction?"

Levi immediately became alert.

After Noz took out the voice transmission conch, he muttered something.

Not long after, a voice came from the other end of the voice transmission conch.

Levi was too far away to hear what it was.

However, when he saw Noz's ferocious face, he knew he definitely had bad intentions.

"He's definitely a spy. Damn it, I knew that this trip wouldn't be so smooth." Levi cursed in his heart.

If it weren't for the assessment and also the Tower Master's guarantee, he definitely wouldn't go out.

The Tower Master also suspected that there was a spy in the tower.

Now, it seemed that the spy was Noz!

However, this was only his guess.

He didn't hear what Noz was saying.

Without any evidence, Levi could not make a move.

Otherwise, he would have directly captured this fellow and let the Tower Master deal with him.

"The Gray Tower is the most ideal place for me to cultivate. Ms. Marlene, the Tower Master, and the others are all good to me. If anyone has any designs on the Gray Tower, I'll be angry!"

Levi's expression was cold. This was a deceptive world of wizards. It was not easy for him to have such a place where he could cultivate peacefully.

Levi was not in a hurry to make a move.

He quietly watched as Noz looked around before leaving as if nothing had happened.

On the first night, many apprentice wizards had already hunted some sea beasts. These sea beasts were at the level of low-level apprentice wizards.

In order to obtain a higher rank and better rewards, many people were still searching in the sea.

Levi had also killed a few sea beasts that were about the strength of a mid-level apprentice wizard to complete the mission.

To him, completing the test was a piece of cake.

But this time, he came out not only to complete the mission.

He still needed to find a powerful sea beast to become his mount.

Most of the sea beasts in Silent Bay were around the level of low-level apprentice wizards, and Levi was too lazy to hunt them down.

He knew that powerful sea beasts were all in the deep sea.

Therefore, he drank a bottle of deep water potion to assist in diving and dived into the deep sea.

In the blink of an eye, Levi had reached a depth of several hundred meters.

It was already very difficult for sunlight to penetrate this place. It was extremely dark.

In the water, Levi's Advanced Vibrosensing's range was even wider. He activated his Perception and carefully searched for the sea beasts in this area.

"Since Whale Song Island can tame sea beasts as mounts, why can't I? Isn't it much more convenient to have a sea beast as a mount?"

There were too many limitations when it came to taking a ship. There was only one ferry every seven days.

Moreover, the Azure Ship was too obvious, and it was easy for the Undead Ship to ambush them.

Sea beasts were different. They were agile.

Therefore, Levi wanted to capture a sea beast alive and use Wild Heart to tame it slowly.

In the deep sea, there was no sunlight..
