

## **Wizard 2691**

Chapter 2691: Heading North, Level-10 Pursuit!

Levi patted Leon's head.

"Is this the King of the Underworld?"

The Star Splitter had seen much of the world.

"Sort of."

Levi said.

More accurately, it's the Nether Emperor.

"Sigh, indeed, my days are numbered."

The Star Splitter lamented.

"Let's go, find another place to talk, it's not safe here."

He led the Star Splitter away.

Then punched towards the entire God Race stronghold.

Accompanied by a massive explosion, a Sea of Fire spread in all directions.

The Shadows mercilessly harvested lives.

Soon, there was no longer any sign of life here.

A few days later.

The figure of the Seventh Divine General appeared, face grim.

"Dusk Palace Master, you dare to come again?!"

He thought that after being hunted by the Red Crow.

Levi would be calm for a few hundred years.

Who would have thought he would immediately launch a counterattack on the God Race.

Just too arrogant!

"All strongholds, be on alert, the Dusk Palace Master could invade at any time!"

In no time, incarnations of divine generals went to guard each location.

The Red Crow and even The End Dragon Bird took this opportunity to move.

If Levi dared to show himself, they would capture him on the spot.

Then, this waiting lasted for two years.

Levi never appeared again.

...

Levi isn't foolish.

The reason he ambushed General Canon.

Was because he heard it had captured the Lone Wolf Star Splitter.

He intended to rescue it, which is why he acted.

But there was only one chance.

Attacking the God Race stronghold again.

Would likely lead to an ambush by the Holy War Army Master or other level-10s.

He's only in the early stages of level 9 and isn't playing with his life.

Just needs to wait a few hundred years.

Then he can properly play with them.

In a secluded small world.

The Star Splitter sighed:

"I didn't expect Green Ghost and the White Dragon Mountain Master to have gone to Nora."

Levi said, "If, sir, you don't have a place to stay, and want to experience something different, you can try Nora. There are many opportunities there, especially longevity items." *r'ANÓBĒŞ*

"I understand, thank you for the advice."

After bowing in gratitude, the Star Splitter left.

Before leaving, it gave Levi a large piece of level 9 metal as a token of thanks.

It was very tempted by what Levi had said.

Over in Nora, with its status and wealth.

Extending its life by another thousand or two thousand years is not a problem.

Enough to allow it to advance to the late stage of level 9.

If lucky enough, gaining great creation.

Ascending to level-10 isn't out of the question.

Levi finished appraising General Canon's spoils of war.

It was quite luxurious.

Just the Truth Oddity count was 82.

Not mentioning the low-grade ones.

There are 4 Bright Moon Artifacts.

Sun Refining Artifact, named [Radiant Fire Armor].

This is a non-sequence artifact.

The effect is also good.

Levi plans for the Holy Infant to refine it, to strengthen the Ice and Fire Divine Body.

And earlier let him ascend to the ninth-circle.

There are also three types of level 9 ores.

Heiger's Gold, Gael's Stone, Melted Bright Divine Iron.

The first two Levi had obtained many times, no need to elaborate.

The last one is a fire element ore, containing the [Evil-breaking] trait.

Evil-breaking, simply put, targets dark creatures.

He immediately fused it into the Crimson Dragon Slashes.

In this way, his divine weapon, already contains:

Solid, tenacity, regeneration, breakthrough its limit, indestructible, sharpness, six level 9 traits.

One slash, demons wail and ghosts weep!

General Canon's most valuable item was his level 9 rare treasure.

It's an ice-blue longsword, exuding a chilling cold air.

Wraiths are coiled within, making it impossible to look directly at it.

There's a whispering sound in the ears.

This is the [Star Ghost Sword].

An oddity dropped after Levi shattered the Frost World behind it.

Countless souls of the Star Ghost Clan were sealed within.

This sword's power is decent.

But Levi has no use for it.

Also, this sword feels a bit ominous.

He plans to find a chance to sell it, for something he can use.

This divine general had many more good items.

All in all, their worth is in the trillions.

But not much use for Levi.

Once he returns to Nora, he will fill the treasury with them.

After fixing up a period of time, waiting for the storm of the God Race to pass.

Levi travels through the Void, heading north.

...

Time flies like an arrow, years flick by.

In the blink of an eye, another five years had passed.

Levi, like the protagonist in a road movie.

Traveling while encountering all sorts of strange tales.

He inquires along the way about the traces of various Dragon Clans, Legendary Creatures.

Where there's oppression, there's liberation.

One by one, sub-dragons and mixed-blood dragon clans were brought into the Dragon Palace by him.

The lineup of the Eight Dragon Guards became increasingly full.

Unknowingly, he gained the title of "Dragon Clan Liberator."

Of course, occasionally there were those who dared to cause trouble.

They were instantly dispatched by him with a single sword strike.

Whenever he hears of alien race marketplaces.

He would join the fun.

Auction houses he must participate in.

And indeed, he had some gains.

Not long ago.

He traded a Sea God Divine Attribute Crystal and a Blood Angel Divine Attribute Crystal with a level 9 alien race powerhouse, in exchange for a [Blood Essence Dragon] bloodline crystal.

This is a type of Blood Sect dragon.

However, what it's skilled at is the dimension of physique.

It can be used as his evolution material.

His Inferno Dragon Breathing Technique is already at level 8 limit.

Just one evolution potion away from advancement.

Now his strength is sufficient.

So he plans to wait a while longer.

Strive to achieve super mythic advancement.

Moreover, the Nightmare Traveler is also at its limit, likewise waiting for materials.

The six dimensions, three at level 9, three at level 8 limit.

On this day.

Levi randomly found a place to set up a shelter.

Then opened the Twilight Round Table.

"Happy 1800th Birthday!"

Elena jumped out, exclaiming with delight.

Chapter 2692: All the Way North, Level-10 Pursuit!

"You forgot your birthday, didn't you?"

"No, I remember it."

"Looks like you're not very busy lately."

"Yeah, lately I've just been traveling, taking a break."

"That's good too, you were living too tiredly before."

Upon hearing Elena's words, Levi was somewhat emotional.

Indeed, nearly two thousand years have passed.

He's been working hard all that time.

Now that the goal is near, there are no enemies that can suppress him anymore.

He finally breathed a slight sigh of relief.

Elena asked:

"Did you cause a big commotion in the God Race recently?"

"Yes, how did you know?"

"The intelligence department of the congress obtained the information."

"Oh, any new level 9 alien races heading to Nora?"

"Not yet."

Levi estimated that the Star Splitter was still on its way.

He then explained the situation to Elena.

"I've heard of this one, a very strong lone wolf, the congress will surely welcome him... By the way, Ayak is back, seems eager to find you."

"Ah? That silly bird."

Levi was somewhat speechless.

When he's at home, it doesn't come.

Now that he's gone, it comes back.

"Let it stay put, wait till I return."

Levi wasn't sure if Ayak could find him deep in space.

He didn't plan to let it take the risk.

"Oh, the Steel Dragon Knight has become a seven-circle wizard, he recently secluded himself to cultivate the Evolution Breathing Technique, should be fine." ʔANÓBEŠ

"Yeah, with his talent, there shouldn't be any issues."

Levi later used the Rebirth Stone to check the Steel Dragon Knight's previous life.

Turns out he was the Secondary Blood Clan member, Andrew.

The servant Levi had arranged in Flower City.

His intuition was right back then.

Two lifetimes, both named Andrew. .

And both stayed by his side.

Sometimes, fate is just that cunning.

He chatted with Elena for a long time.

The other knights were also eager to come online.

"Happy birthday, commander."

"Happy birthday!"

The words of blessing warmed Levi's heart as a lone traveler away from home.

Emperor Mu said, "Commander, I had another kid, named Mutta. He inherited my Zhu Yan bloodline; my bloodline has a successor, haha."

Eddy didn't inherit the monkey bloodline, which was Emperor Mu's obsession.

This time it could be considered wish granting.

"Congratulations, does he have wizarding talent?"

"Yes, but it's average, just fire element affinity."

"? That's called average, and you're just a Child of Chaos yet have the cheek to say so."

"Nowadays, there are so many Children of the Elements..."

"Where are there many? Considering the massive base, they are still rare as phoenix feathers and unicorn horns. With fire element talent, if properly cultivated, he can become accomplished."

"Hehe, indeed, I'll have his older brother guide his cultivation."

Emperor Mu could be considered to have completed his mission.

Two mythical descendants in the family, one Qing Niao, one Zhu Yan.

"By the way, how is your wife?"

"She's also at level 6 late stage, advancing to level 7 should pose no major problems... However, to go further is indeed difficult; it depends on whether wizards can achieve eighth-circle, as they have Truth Oddities which can reverse fate, slightly better than knights."

"Yes, that's true."

Compared to the wizard system.

The knight system indeed isn't perfect yet.

The levels have expanded vertically to level 9.

But on aspects like talent improvement, there's still a long way to go horizontally.

Take it slow.

Levi chatted with the knights one by one for a long time.

The Silver Dragon Knight chose stability and successfully advanced to level 7.

Mythical might be hard to reach.

But legendary is still hopeful.

At the very least, there's hope for level 9 in the future.

He also found his better half.

A Cat Witch several hundred years older than him.

Most likely matched by Elena, the Federation Director, in the Mandarin Duck List.

Levi frankly stated her taste was good.

A Cat Witch with a mature and somewhat wild cat temperament is quite good...

He suggested the Silver Dragon Knight learn from the Goddess Knight.

If he has a kid like the Green Bird Knight, the Silver Dragon Family's bloodline may still have a chance at the mythical level.

If one isn't enough, have two, three...

Many children, many grandchildren, one will win eventually.

Otherwise, how do those top wizard families produce geniuses?

Among the Eighteen Riders now.

The one leading the way is the Fire Dragon Knight.

Not long ago, he also reached level 7 late stage realm.

Then rose to third in the Level 8 Demon Slaughter List.

He has already slain two level 8 early-stage demons.

But the other knights of the new generation.

Are still at level 6 late stage, peak realm.

Lagging behind by a major realm,

Admittedly, some are born as freaks.

The others are all doing well too.

Gandaph's disciple Abel has astonishingly become a six-circle refining body wizard.

Also works as a level 6 Sun Chasing Dragon Knight.

With his full strength, he slaughters level 6 demons of the same realm.

Gradually living up to the title "Giant Spirit God Witch."

And Heim remains the same old way.

Spending his days quietly cultivating.

Only six hundred years old, already a six-circle perfect wizard.

When he initially advanced to the primordial soul, he used a superior cultivation method.

But it wasn't Roger's creation, the "Infinite Primordial Soul Method."

Rather, it's Edmund's creation, the "Supreme Primordial Soul Method."

Clearly, regardless of being a legendary reincarnation or not.

He's determined to attain legendary status.

Over these years, Heim has gained a new reputation in blood battles.

Equally achieving the name of a supernova.

The Ancient Dragon Continent has become a true cradle for supernovas.

The Wizard World's "Huang-Pu Military Academy."

After finishing his birthday, Levi continued north.

...

Ten years passed in a flash.

Nora Calendar, 1387.

Blood Battle, year 1175.

In Levi's vision, Nora was getting smaller and smaller.

On this day.

He came upon another large alien race market.

After a makeover, he transformed into a white-robed elder.

Planning to see if he could find something valuable.

Suddenly, a brilliant golden light burst forth from the plane ahead.

"Robbery, there's a robbery!"

A figure chased out, quickly outrun by the golden light.

Levi's gaze shifted slightly.

After hesitating momentarily, he pursued the golden light.

No need to browse through the market anymore.

If there were good things, they've been snatched by that fellow.

With Levi's speed, chasing a level 9 was naturally easy.

Soon, the golden light realized it couldn't shake off Levi and stopped.

It was cloaked in a black robe, its face obscured.

Emitting a level 9 middle stage aura, it spoke coldly:

"We have no grievances nor enmity, why meddle in my matters?"

It sensed Levi was tough to deal with, thus avoided starting a fight casually.

But it didn't mean fearing Levi, after all, he was just an old-level 9 early-stage.

Levi stared at the person, feeling somewhat familiar.

He pondered, "You're the one who attended Giant Head Star auction that day?"

Upon hearing this, the black-robed mysterious figure's aura shifted, suddenly becoming fierce.

A terrifying golden wave exploded the black robe, revealing a perfect sixteen-foot golden statue-like form.

Its bones cracked loudly, as it readied itself and sneered:

"Since you've discovered me, don't blame me for being ruthless."

Levi hadn't seen this person before.

But witnessing this familiar style.

His expression first surprised, then delighted.

Golden Absolutes Race!

Chapter 2693: Super Gift Pack

As a powerful and confident member of the Golden Absolutes Race.

Earth Awakening thought that after displaying his aura,

the white-robed elder would regret provoking him.

Why then does he have the expression of witnessing the birth of a treasure?

Moreover, he laughed cynically and said:

"Since I've discovered you, don't blame me for being ruthless!"

In the next moment, the white-robed elder's clothes burst apart, red flames soaring to the sky.

A towering figure clad in black armor drew his sword and struck.

"How dare you attack the Holy Clan!"

Inside Earth Awakening, the law of the elephant roared.

Divine Image Law!

As a power law second only to the Heavenly Dragon Law.

Vast golden power flowed into Earth Awakening's sixteen-zhang golden body.

Next, an enormous golden shadow with an elephant head and a human body appeared across the sky.

"LawElephant Charge!"

Boom! A punch infused with immense power forcefully blasted forward.

Earth Awakening was confident that this punch could knock away most adult giant dragons.

However.

That figure did not dodge at all.

He held the sword with one hand and slashed downward.

Sword Qi infused with the power of two Destruction Sanctuaries exploded.

The charging Elephant God's shadow was hit hard and flew backward.

"How is this possible?"

Earth Awakening groaned in disbelief.

This move, which he had always relied on, was easily broken?

Without any tricks.

Just a straightforward collision that repelled his offensive.

"A formidable enemy... Somehow feels familiar."

Earth Awakening reassessed the person before him.

Seemed to be one of the Wizard World's existence in the intelligence.

He remembered... He was the Dusk Palace Master.

Claimed to crush the strongest race of the Pan-Plane, the Amethyst Race's level 9 newbie.

No wonder he could take his strike.

Earth Awakening had fought the Amethyst Race once before.

It left a strong impression on him.

There was no time to think further.

The second Sword Qi had already ruined everything in its path.

Earth Awakening took a deep breath.

"LawElephant Armor!"

He clasped his hands together.

Golden power turned into a golden elephant armor.

Then, two curved ivory blades appeared in his hands.

These were the nine-level treasuresElephant's Dual Moons.

Crafted from the tusks of a slain legendary giant elephant.

Could easily tear a giant dragon's scale armor.

Clashing metal!

Crimson Dragon slashes collided with the ivory blades, sparking endless flames.

Levi's immense power erupted, Destruction Sanctuary surged like waves.

Bang!

Silent explosion.

Elephant's Dual Moons cracked, shattered, and flew away.

Earth Awakening panicked, crossing his arms in front.

Crimson Dragon slashes carried on, striking his vambrace, tearing it apart.

Boom! Earth Awakening was blasted away by the Sword Qi, rolling in deep space.

He stored away the damaged treasure, heart bleeding.

What kind of monster is this?

Regular methods don't work.

Even using treasures, still crushed.

This person is unbeatable.

"The thirty-six stratagems, fleeing is the best option."

Earth Awakening turned into a golden light and fled.

Buzz! The void cracked open.

A majestic nine-tiered pagoda descended.

At its top, coiled a pure white dragon, deep and domineering gaze.

Four level 9 Spiritual Weapons circled like four great Guardian Heavenly Kings.

Nine thousand Sealing Stars shone, weaving a massive net covering tens of thousands of miles.

The eighteen layers of Hell World pressed down, overwhelming beyond resistance.

Nine Suns Suspended in the Sky, scorching the starry sky.

The All Creation Thunder rolled endlessly.

A blue Giant Whale's shadow surfaced within.

Nine-Ring Magic Long Whale Sea Suppression!

Faced with the rarely interacted strongman of the Golden Absolutes Race.

Levi naturally gave a warm reception.

Without any suspense.

Earth Awakening was suppressed, golden armor shattered inch by inch.

Lying in deep space, his perfect golden body already scarred.

Levi descended from the sky, not killing Earth Awakening.

Malicious Black Emperor Dragon Power surged into his body, wantonly destroying.

"Dream on enslaving me! Golden Will shelters me, you won't succeed... Master."

Levi silently mused.

"The sheltering power of the Golden Will is weak. Or rather, the enslaving power of Black Emperor Dragon is stronger now, previously enslaving ordinary Golden Absolutes Race was difficult, now can enslave level 9. Indeed, the previous enslavement was only legendary level, now super mythical, incomparable, as long as I'm strong enough, Golden Will can be enslaved."

Levi cleaned up the battlefield, taking the Golden Absolutes Race, left the place.

Found a safe location, set up a shelter.

He summoned the Golden Absolutes Race out.

"Name?"

"Earth Awakening."

"Race?"

"Golden Absolutes Race."

"Profession?"

...

Like a police interrogation.

He asked, Earth Awakening answered.

This time, there was a level 9 Golden Absolutes Race.

Levi finally completed his understanding of the race.

The Golden Sacred Realm, outside the Pan-Plane.

Of course, the Pan-Plane itself is a concept devised by wizards.

To the Golden Absolutes Race.

The center of the universe is the Golden Sacred Realm.

The Land of Darkness is an endless, eternally spinning Black Sea.

The Golden Sacred Realm, located at the vortex at the center of the Black Sea.

Other worlds, including the Pan-Plane, are peripheral islands.

They are scattered across the sea regions of four spiral arms thrown out when the Black Sea spins.

Namely Beiluo Arm, Southern Immortal Arm, East Hunting Arm, West Spirit Arm.

Also known as the east, south, west, north seas.

The Pan-Plane is located in the Beiluo Arm.

Levi is currently here.

The Rainbow Sea he is heading to should also be here.

The Golden Sacred Realm, as far as the south.

Of course, this is just the cosmic view of the Golden Absolutes Race.

Doesn't represent anything.

Levi believes.

Still, the cosmic view of the Multidimensional Plane is more reliable.

The Golden Sacred Realm can never be the center of the universe.

If there is a center, it should be the Four Great Giant Worlds.

Chapter 2694: Super Gift Pack

No matter what.

The worldview of the Golden Absolutes Race is also a new way of looking at the world.

A thousand years ago, Earth Awakening began its journey northward.

Along the way, it colonized worlds and harvested resources.

After coming to the Pan-Plane, it heard that the overlord here was the Wizard World.

So it went incognito and developed secretly.

It frequently appeared in various auctions and markets.

Not only that.

It also carried a space treasure with it.

Inside it nurtured rare creatures it had tamed along the way.

Levi scavenged all the good things from Earth Awakening.

He moved aside to sort them alone.

Earth Awakening kept watch.

Though Levi knew where the Golden Sacred Realm was,

he couldn't go for now.

It was still too far.

He planned to go once he had power to counter a level-10 force.

After all, it was a civilization with seven level-10s, not to be underestimated.

And the Golden Will seemed to be a special existence similar to Heavenly Will.

Level 11 wasn't far off either.

With his current strength, there wasn't much he could do even if he went.

In his hand appeared a rare treasure shaped like a golden leaf.

This was an eight-level space treasure called "One Leaf, One World."

Levi's consciousness entered it, discovering an inner heaven and earth that stretched thousands of miles.

"Not bad."

After a little while, Levi's face lit up with joy.

The Legendary Creatures that appeared in the past auction,

aside from the Sword King Dragon, were all here with Earth Awakening.

Suddenly, Levi noticed a round-faced girl in white-feathered clothes.

She was imprisoned here, idly drawing something in the snow.

It was a blue crow... it was Ayak.

"Who are you?"

Levi's sudden voice startled the girl.

"Ah? Who are you? Aren't you that bald weirdo?"

The round-faced girl's expression was surprised, and her form disappeared from the spot.

She appeared outside, seeing a figure in black-armored swordsman attire.

"Are you Ayak's master?"

The girl covered her mouth, incredulous.

Levi frowned slightly.

"How do you know me?"

"Ayak told me."

Levi was momentarily speechless.

He didn't expect Ayak could even communicate with transcendent creatures.

"Did Ayak ask you to rescue me?"

The girl asked familiarly.

"Yes."

"Didn't expect that Ayak really has a powerful master."

"I ask you, what's your relationship with that bald man?"

"Nothing, he insisted I'm destined for Bo Ruo Saint King and wanted to give me to the Saint King, said I was born of a tree... nonsense, I was born from an egg!"

The round-faced girl protested indignantly.

"Come with me, I can take you to find Ayak."

Levi began to lure the underage Legendary Creature.

"Sure, just don't take me to that Bo Ruo Saint King, sounds like an old creep who lures kids! I'm not going!"

"..."

Levi took the round-faced girl to the Ancient Banyan Fairyland.

"Wow, it's so big here, so beautiful, so many dragons."

She exclaimed.

Growing up, she'd never seen so many Dragon Clan members.

On the earth, thousands of Dragon Clan creatures ran.

There were also some similarly juvenile Legendary Creatures, giant dragons.

If Levi hadn't left the adult dragons to guard the Ancient Dragon Continent,

this round-faced girl would have been scared out of her wits.

"What a cute little girl."

Mana appeared out of nowhere, scrutinizing the round-faced girl.

"You can call me Vera."

"Then you can call me Mana, I'm that tree."

"A tree can talk?"

"Of course, live long enough, and you become a spirit."

Levi had Mana show the round-faced girl around to get acquainted with the environment.

He then took out the enslaved Holy Giant Ape.

Abused from a young age, it lacked trust in anyone.

Levi asked, "Do you have a name?"

The Holy Giant Ape remained silent.

Levi called forth Lopez and Red King.

To have them work on the ape's mindset.

Earth, Fire, Wind, and Water, now the four great apes were complete.

Levi found Emperor Mu's "ancestor."

As for the Heavenly Pegasus Egg,

Levi sent it to the incubation room.

As a knight's mount, it would be incredibly impressive.

But with his strength, he wouldn't need it.

By the time the Heavenly Horse grew up, he'd be invincible in the universe.

In the future, young Levi could have it as a companion.

Raise the child as a knight from an early age.

After a while,

Lopez led the Holy Giant Ape to Levi.

"Master, her name's Maya, still just a young girl."

Lopez said with a somewhat smug smile.

Hearing it was a female ape, Levi nodded secretly.

The previous apes were all male, unable to reproduce.

With a female ape, Lopez and the others wouldn't be lonely in the future.

The other rare creatures weren't of Legendary level.

Levi settled them all into his Ancient Banyan Fairyland.

"Earth Awakening mentioned Bo Ruo Saint King also has a knack for collecting rare flora and fauna. I'll have a good talk with it sometime."

Levi felt a tinge of anticipation.

Eventually, before him appeared a pure white giant beast of lithe form.

Surrounded by hurricanes and flowing flame clouds.

It was sealed inside a giant piece of amber, its aura long gone.

"Wind-chasing Beast, Level 9 Legendary Creature."

This thing wasn't slain by Earth Awakening.

It was something it found on the road, not long dead.

Earth Awakening was no good.

But it generally didn't kill the Legendary Creatures.

In this aspect, it was somewhat like Levi.

"Wind-chasing Beast, living by chasing the wind, stopping by searching the wind, never resting. Possesses immense endurance, perfect for making bloodline crystals to evolve the Heavenly King Dragon Breathing Skill."

Levi stored it away.

In not long since he set out, he'd found two types of bloodline crystals.

This journey was indeed worthwhile.

Additionally,

the most valuable on Earth Awakening,

was still the Truth Oddity.

Chapter 2695: Super Gift Pack

The Golden Absolutes Race loves collecting Truth Oddities.

Levi had analyzed this before.

The Golden Will was made using Truth Oddities to create the Golden Absolutes.

So, when he saw the Earth Awakening's oddity collection, he was stunned.

pieces!

That's right, almost five hundred oddities.

This was the result of a thousand-year journey by Earth Awakening.

Earth and Sky.

Morning Star and Bright Moon oddities.

Sun Refining Artifacts.

Too exaggerated.

The majority of oddities Levi already knew.

And several sequence oddities from various sects were also present.

Levi organized them one by one.

Not to mention Earth and Sky oddities.

Among the Morning Star oddities, a few belonged to the Light and Dark Faction.

These were what Levi needed.

He refined them, perfecting the Dark Body and Light God Body.

Throughout, he hadn't purposely collected the Light and Dark sequence.

Yet he found out.

He was already close to completing the Light and Dark collection.

Others knowing this would probably be furious.

In the Bright Moon oddities.

Levi found one suspected to be a Five Poison Series oddity from the Ocean Faction.

Its appearance looked like a spider, entirely snow jade white, with blood spots encircling its body.

He named it [Snow Jade White Spider].

It could let Triss refine it.

Levi also wanted to see the effects of completing this sequence.

Additionally, there was a Bright Moon-level body refining oddity.

[Red Armored Sky Dragon], suitable for Gandaph to refine.

And a few low-level oddities possibly birthing small top-grade companion spiritual objects.

Levi selected some to refine himself.

He also picked out some Bright Moon-level non-sequence oddities.

To let his Three Avatars enhance their talents.

Finally, he focused on the two Sun Refining Artifacts.

One among them was clearly a body refining oddity.

Its shape was like a blue ghost claw, veins bulging, muscles knotted like a dragon.

Surrounded by wisps of blue airflow.

Levi called it [Ghost God's Claw].

Belonging to wind-element body refining oddities.

It was very useful for Gandaph.

He had currently refined [Dragon God's Blood] and [Wild God's Body].

Belonging to water element and fire element respectively.

And the Body Refining Academy Treasure Vault had one earth element [Giant God's Shoulder].

Once all these four oddities were refined.

His [Ancient Divine Body] would reach Perfection.

Ascending to the ninth-circle would indeed be easy.

The other Sun Refining Artifact.

Was the [Steel Throne].

A non-sequence metal faction oddity.

The effect was quite good, allowing Lord Victor to refine it.

Among the Three Avatars, Lord Victor had too few Sun Refining Artifacts.

Apart from the oddities.

The most valuable Earth Awakening possessed was the rare treasure [Elephant's Dual Moons].

But Levi broke it.

So he did not take it, leaving it for Earth Awakening to save his own life.

There were also several level 9 ores.

Which Levi refined into his wizard tower and divine weapon.

The remaining resources totaled over three trillion Aether Stones in value.

The Golden Absolutes Race was too wealthy, even richer than a Divine General.

From head to toe, entirely made of treasures.

When Levi had the ability, he must seize them.

After a period, Levi embarked on a journey towards the north again.

...

On this day.

During the daily rest period.

Levi's Twilight Round Table received a communication.

It was the Steel Dragon Knight, looking delighted as he said:

"Commander, I have successfully evolved."

He displayed his mythical form to Levi.

It was like a dragon yet like a serpent, with wings on its back, a fish tail at the end, and a body covered with diamond-like armor.

The giant beast spewed magma, soared through the clouds, exuding an ethereal aura, and had no limbs.

"How about it, Commander?" the Steel Dragon Knight asked.

"Not bad, but it's closer to a serpent, not much like a dragon... Did you use a bloodline crystal? Does it have [Drilling Star Snake]?" Levi asked.

"Commander, your eyes are too sharp, indeed you are right, I did use the Drilling Star Snake's, it's highly defensive, top-level among the Legendary Creatures."

"No wonder, then your breathing technique will be called Soaring Serpent."

"Soaring Serpent Breathing Technique. A good name."

Levi and the Steel Dragon Knight chatted for a while.

This sort of Soaring Serpent Bloodline was also a hodgepodge.

Unexpectedly containing the four elemental attributes of Earth, Fire, Wind, and Water at the same time.

Actually, it's better to promote wizard cultivation.

It's best to focus intensely on a certain attribute, thus more specialized.

But clearly, with fewer bloodline crystals to choose from that way.

Prioritize knight evolution.

That way is also good.

With the Steel Dragon Knight's talent and status.

Exchanging Truth Oddities to improve wizard talent is not difficult.

From now on, the Steel Dragon Knight's cultivation would become smoother.

If not dying young, nine current levels are guaranteed.

Mythical bloodline is indeed difficult.

But once achieved, future accomplishments would inevitably not be low.

In conclusion, Levi asked:

"By the way, what's the deal with you and Tifana?"

"Pretty good." The Steel Dragon Knight hadn't understood Levi's urging for marriage.

"Hmm, inherit the bloodline early, after all during wartime, no one can guarantee to see the Sun tomorrow."

"Haha, I get it."

The Steel Dragon Knight suddenly understood, laughed, and went offline.

Levi shook his head and continued the journey.

The Middle Generation Knights' mission also completed.

The Dusk Holy Temple now already had 11 kinds of mythical bloodlines.

The upcoming responsibility was to observe the new generation's performance.

...

Thirteen years, a flick of the fingers.

Nora Calendar 1400.

Blood Battle 1188.

Levi headed north along the way.

On this day, he reached a vast, deep space area.

All around was empty, surrounded by desolate planes.

"Plane Graveyard... should be nearing the edge of the Pan-Plane now."

Levi murmured.

According to a few wizards who had reached beyond the Pan-Plane and returned.

The boundary between the Pan-Plane and the outside world was a ring of desolate plane graves.

Here, it was extremely dangerous, black beasts ran rampant, pirates rampant.

Most civilization fleets or travelers wouldn't approach here.

Chapter 2696: Super Gift Pack

The headquarters of the Council of Ten Thousand Clans is located in the Dimensional Cemetery.

Of course, not in this area.

Danger Perception slowly and rhythmically warns.

Levi is fully focused, activating the Hermit Rune as he carefully advances.

In unknown territories, one can never be too cautious.

In contrast to Levi, who is tense and worried outside,

inside the Ancient Banyan Immortal Realm, the atmosphere is harmonious and joyful.

The Cold-calling Bird and the Holy Giant Ape are gradually integrating into the Dragon Palace family.

A group of large creatures gather around an egg.

Crack.

The eggshell splits open, and a sound like the neigh of a horse comes through.

"The little one is coming out."

"Let me see."

"Why is a horse hatched from an egg? Shouldn't it be born as a mammal?"

"You don't understand, do you? The Heavenly Horse looks like a horse, but it's actually closer to our Dragon Clan."

In the noisy atmosphere,

a magnificent horse, about ten feet tall with a slender body, a blue horn on its forehead, and covered in sleek starlight mane, breaks out of the shell, neighing.

As it appears, the surrounding tiny starry anomalies flicker constantly.

"What a lovely horse."

"Born at level 6... Wow, even more powerful than our pure-blooded Dragon Clan?"

"Quick, bring the master in to have a look."

Soon enough, Levi appears.

Seeing this Pegasus seemingly composed of starlight, his face beams with joy.

"It's actually an exotic breed, the Starstep Pegasus."

Mana asks:

"Is it very powerful?"

"On par with the Purgatory Heavenly Horse, naturally able to travel the astral world and cover billions of miles in a day. Its strength surpasses that of ordinary Heavenly Horses, able to shatter stars with a single step. In adulthood, it can reach level 9 late stage or even peak power, and is the favorite mount of True Gods." 𐄂ANÓBÈ

"We've found a treasure; no wonder it's born at level 6."

The Pegasus joyfully runs around the Ancient Banyan Immortal Realm.

Followed by a group of Dragons, it's very lively.

Levi instructs the fairies to take good care of it.

He, the laborer, continues his journey.

...

Half a year later.

Levi finally exits the relatively dangerous Star Cemetery.

He finds a shelter to cultivate for a while.

On this day,

Levi's figure appears in Destruction Heaven.

He looks upward to the Nine Heavens and strikes a punch. .

Crackling! Accompanied by the sound of the world shattering.

Levi arrives at the third heaven of Destruction Heaven!

The power of the Three Layers of the Destruction Sanctuary flows around him.

At a thought, the Triple Sacred Realm overlaps, exploding with even greater power.

At this point, Levi has reached the peak realm of a lower-level Destruction Sanctuary Knight.

A step further, and he'd become a mid-level Sanctuary Knight.

With each ascent to another heaven, his gap to level 10 diminishes.

Before long,

Levi's Golden Emperor Dragon Breathing Technique also mastered the Double Vajra Sacred Realm Power.

His defense strengthened further.

This adds some more sense of security to his solitary wanderings.

Long journeys are indeed dull.

Luckily, he brought along the amusing group from the Ancient Banyan Immortal Realm.

During breaks, he can play mahjong with Mana and the others.

The round-faced girl, once she learned mahjong, couldn't stop playing.

A month later,

Levi arrives at a dead world to rest.

Recently, he discovered information about a world not far ahead.

It is the dojo of his old acquaintance, the Sea Beast God.

On this one's territory, transcendent creatures and sea beasts abound.

With an aim to enrich his species resources, he approaches the world.

Before even getting close, intense Danger Perception strikes him.

With doubt in his heart, he hides and observes from the shadows.

In the world ahead, two twelve-winged fishman angels appear.

They are fighting a level 9 black beast.

Before long, the black beast flees defeated.

The angels give chase.

The next instant, a sudden change occurs.

The void within a hundred thousand miles starts to collapse.

A massive web descends, capturing the fishman angels.

Then, a giant spider, almost the size of a world, reveals itself.

It swiftly ties up the two angels, packing them.

Its beady eyes suddenly glance towards a spot in the void.

Only to see a light beam leaving without looking back, a million miles away in an instant.

The spider doesn't react, its figure vanishing into the Darkness.

...

In some world,

Levi clutches his pounding heart.

"Nowadays, even spiders fish... I actually saw a living Star Spider, it's truly the ancestor of the Spider King, adept at controlling puppets. But the Spider King itself isn't very strong in combat, while the Lord of the Stars' true form is horrifyingly powerful. In this Land of Darkness, it's surely the absolute ruler, even a True God would submit."

The Sea Beast God has it tough.

Such a weak deity can't have many angels under him.

Already lost two to Levi, and now two more eaten by spiders.

He must be crying back in his Divine Kingdom.

Levi doesn't dare delay, continuing his journey.

Only when that sense of danger fades does he slow down a bit.

...

Ten years later.

Nora Calendar Year 1410.

Blood Battle Year 1298.

Before Levi, appears a stunning sight akin to the aurora.

As far as the eye can see, within a range of millions of miles, there's nothing but a spectrum of seven-colored rainbow light.

"Rainbow Sea..."

Levi murmurs, feeling indescribably excited.

Even at his speed of Traveling the Void, it's taken nearly a hundred years to get here.

This place is truly far away.

If it weren't for Roger's guidance,

who would have thought that in this desolate Deep Space,

there'd be such a spectacle?

Danger Perception continually warns him,

indicating that the Rainbow Sea is not as benign as it seems.

Levi doesn't rush to enter.

He spends several months circling the Rainbow Sea,

familiarizing himself with the surrounding environment.

Only after ensuring there's no great danger does he venture in alone.

The radiance here is actually composed of metal elemental particles,

their various types and certain reactions forming this scene.

Chapter 2697: Super Gift Pack

On the way, Levi also picked up several oddities from the Golden God Series.

And also relics from other adventurers.

There were alien races, as well as wizards.

One day, he discovered a relatively fresh wizard's corpse.

He had an eighth-circle cultivation, seemed to be from the Storm Faction.

The spoils on him didn't hold much value for Levi.

There was just a notebook documenting his travel experiences along the way.

At the end of the notebook, he wrote:

[My lifespan is at its limit, with little time left. To have discovered such a wondrous place, I have no regrets in death! The Rainbow Sea truly exists. If a fellow wizard finds my relics, please take them back to the Storm Realm...]

Levi silently put it away, intending to take it back and deal with it.

During this wizard's travels, the great confluence of the planes might not have even started.

He didn't know that the Storm Realm was already a thing of the past.

"This is the joy of exploration, I suppose."

Levi mused, continuing on his journey.

Days later, Levi gradually reached the center of the Rainbow Sea.

Along the way, he even saw Legendary Creatures appearing.

But to avoid disturbing a Legendary Artifact, he didn't make a move.

If fate allows, once he acquired the artifact, he might encounter them again.

Finally, Levi came upon a terrifying Golden Element Vortex.

Like a black hole, it tore at everything around it.

The space here was warped.

Everything was disintegrated into basic Gold Element Particles in the black hole.

Levi set up the Death Ember Divine Palace.

And then stepped inside.

Without much effort, Levi found his target.

It was a Starry Sky Giant Spear, thousands of miles long.

It had been nurtured here for countless years, exuding an ancient aura.

It could have been birthed directly from the heavens and earth.

Or perhaps it was formed here after a Level 10 Strongman fell.

But now, it was ownerless.

Legendary ArtifactDusk Spear!

The ultimate treasure that Roger was obsessed with!

No, it seemed like there was a swordswoman over there.

She sensed an unwelcome guest and opened her indifferent eyes.

"I am Rainbow Sword Master Bertolice. Foreigner, leave on your own. This is not a place you should set foot in."

Unmoved, Levi replied,

"I have no intention of disturbing. I only want the thing behind you. Once I get it, I'll leave. It's not easy for an elemental spirit to advance to level 9. You are no match for me."

The swordswoman shook her head.

"I discovered this first. It's mine. You can't take it."

Levi smiled: "If you put it like that, a senior of mine discovered this before you were born. It's mine."

The swordswoman stood up, concentrating a seven-colored greatsword in her palm.

She looked resolute: "Since you're being unreasonable, then let's fight... Foreigner, state your name. I do not kill the nameless."

"Supreme Knight Levi! By the way, what was your name again?"

"...Rainbow Sword Master Bertolice! Remember it!"

The swordswoman charged fiercely.

Levi smiled, drawing the Crimson Dragon Slash.

Two Destruction Sanctuaries entwined.

Two were enough to deal with the sword master.

He didn't want to kill her either.

Whizz! Whizz! .

Two streaks of light clashed instantly, a rainbow Sword Qi spanning thousands of miles and magnificent Red Gold Sword Energy collided!

The shockwave exploded, causing a tremor in a region of ten thousand miles.

The swordswoman's strength was commendable.

Her realm was at the Level 9 Middle Stage.

Her strength seemed comparable to a Five-layered Demon Realm demon.

Similar to Earth Awakening.

Of course, it was still far from Bang Gu.

After one clash,

The swordswoman's eyes glowed.

"So strong..."

She had roamed the Rainbow Sea for so many years.

Encountered many adventurers.

Exceptional Level 9s.

But few could stand shoulder to shoulder with her in sword skill.

Levi's form vanished and, at top speed, slashed again!

The swordswoman dared not face it head-on.

Dodging while employing more powerful sword moves.

Suddenly, she shouted,

"Secret Skill: Twenty-Four Bridges!"

At once, twenty-four rainbow Sword Qi bridges spanning the sky attacked in unison.

They enveloped Levi like a massive woven net.

No escape, nowhere to hide!

"Excellent swordsmanship!"

Instead of panic, Levi's joy increased.

The Extreme Dao Strategy operated at Maximum.

The seemingly plain sword moves dissected the rainbow bridges.

Soon,

This killing move, capable of grievously wounding a Level 9 Middle Stage strongman, was dissipated without a trace.

The Rainbow Sword Master's beautiful eyes quivered.

Grinding her teeth, she refused to admit defeat, once again using the [Twenty-Four Bridges] to attack.

Levi shouted aloud, his longsword spinning like a great windmill.

Boom! The rainbow greatsword shattered into Gold Element Particles.

The Rainbow Sword Master's body was slashed in two.

She collapsed and avoided a fatal hit.

Her form vanished into the expanse of Gold Element Particles.

Levi sheathed his longsword, ignoring her.

He approached the Dusk Spear.

"How should I take this away?"

Ancient Banyan Fairyland? That's not doable, a Legendary Artifact's power is too vast.

After pondering, he resorted to the Eternal Star Abyss.

The ninth-floor tower exerted a strong pull, causing the Dusk Spear to buzz and shake.

"Foreigner, do not touch it!"

The Rainbow Sword Master, panicked, transformed into a giant sword to cut at Levi.

Levi didn't even turn back.

With a thought, the emperor's phantom appeared behind him.

Its right arm was clenched, dragons coiling, and it struck fiercely!

Boom! The giant sword shattered.

The swordswoman stumbled out, looking dejected.

"You... you're dishonorable."

"How am I dishonorable? You were the one who ambushed."

"But you fought two against one!"

"No I didn't, look closely, doesn't it resemble me closely? That's my Primordial Spirit, a part of me."

Chapter 2698: Super Gift Pack

Levi was in a good mood and patiently explained to it.

"You, you are not allowed to take it."

The Rainbow Sword Master couldn't argue with Levi and attacked again.

"Stop messing around."

Another Pure White Dragon appeared, a thousand spells roared.

The Rainbow Sword Master's figure was instantly blasted apart.

Chaotic Power formed a giant net, suppressing it firmly.

"You... you called for help again! This time it looks different, it's not you, right? You really have no martial integrity!"

"This is also me, this is my wizard form, haven't you seen a wizard before?"

"I've seen one, his wizard form isn't like this, you're lying."

It took a bit of effort.

The Eternal Star Abyss absorbed the Dusk Spear.

Levi muttered to himself:

"Good thing I built a wizard tower, otherwise even a Legendary Artifact couldn't be contained."

Watching the treasure being taken away.

The Rainbow Sword Master looked dejected and asked somewhat despondently:

"Why did you take my father away!"

Now it was Levi's turn to be bewildered.

"Your father?"

"Yes, I was born from it, it is my father!"

"Elemental Spirits are born of heaven and earth, they have no parents."

"No, I was born from my father."

"As you wish, you can come with me too."

"No way, I live well here."

An impatient Levi showed a fierce expression.

He came in front of the Rainbow Sword Master, lifted her chin with his big hand.

"What do you want to do?"

"If you don't come with me, I'll kill you."

"Wait... I don't want my father anymore, go away and don't bother me!"

"Heh heh, you don't have a choice now, you belong to me too."

Black Emperor Dragon Power manifested in Levi's palm.

A dreaded, dark aura spread.

At this moment, he became like a living Demon King.

The Rainbow Sword Master had grown up in the Rainbow Sea.

She had never met such a villain.

She was already scared out of her wits.

"I'll go with you! Is that enough?"

"Then obediently sign the Elemental Spirit Contract."

"Okay!"

So, through a mix of hard and soft tactics.

Levi successfully contracted this Mid-Stage Level 9 Elemental Dominator.

How similar this scene was.

The Fire Phoenix and Thunder Crocodile expressed their approval!

Rumble!

Perhaps due to the absence of the Legendary Artifact as a core pillar.

This gold elemental black hole vortex began to collapse.

Levi grabbed the Rainbow Sword Master and sent her into the wizard tower.

Then his form exploded, his aura dissipated.

He reappeared on Rainbow Sea, watching the ever-collapsing black hole.

With a sigh, he flew outwards.

It seemed this wondrous place was destined to disappear.

Its mission was already fulfilled.

"My home..."

The Rainbow Sword Master looked at Rainbow Sea, feeling somewhat sad.

"There's nothing good here, I'll take you to a more exciting place. With your strong sword skills, it would be a shame not to kill enemies," Levi comforted. ~~ANŃÈŠ~~

"You just want me to work for you for free!"

"...You've suddenly become quite smart."

"Hmph! I've always been smart!"

Leaving Rainbow Sea.

Levi quietly watched all those gold elemental particles dissipate into the Land of Darkness.

Revealing a large amount of debris and remains.

He searched here for a month.

Harvested quite well.

Various Metal Faction oddities in a few numbers.

And some broken rare treasures, wizard tools, and the like.

Most importantly, there were as many as 6 pieces of Starfall Remains.

Enough to refine many space treasures.

Or to allow the Three Avatars to advance to ninth-circle in the future.

After completing all this, Levi took another lap around the area.

Unfortunately, he didn't find the Legendary Creature of that day.

"Now that this matter is settled, it's time to find the Death Soul Tree."

Before, when Levi met the Baron of the Castle.

It roughly mentioned the location of that tree.

Levi had come so far outside the Pan-Plane, he naturally couldn't miss it.

...

Time passed slowly, another two years.

Nora Calendar 1412.

Blood Battle Year 1300.

Underneath Sorren Continent.

A giant circular Star Castle was completed.

It was seamless, with many swirling patterns on its surface.

The silhouettes of Nine-Ring Artifact Makers stood around it.

Herman, Deep Space Wanderer, Eyre, and other Mechanical School wizards were also present.

Lady of Thunder and Blazing Star God Witch, two Legendary Wizards recited incantations.

Buzz! The Star Castle emitted a dazzling glow, as if making Nora tremble.

Led by the Artifact Maker Association, countless artifact makers and Mechanical School powerhouses jointly developed the Wizard World's only level-10 Star Castle.

It was named the [Deep Space Navigation]!

Next, it would head to distant lands.

Relying on the powerful [Power of the Whirling Star].

To further accelerate plane convergence!

...

Three years later.

Nora Calendar 1415.

Blood Battle Year 1303.

Prison World.

A large, Death Energy-filled world.

A figure hurried over, it was Levi.

From a distance.

He saw in the center of the world, a giant tree standing tall, tens of thousands of feet high.

Surrounded by billions of dead souls and wraiths.

Hungry ghosts roamed, the human realm was like a prison.

"The thirty-thousand-year-old Death Soul Tree..."

To find this place, Levi had gone through much effort.

A group of alien-looking devil soldiers patrolled under the tree as guards.

This was the Torture demon race.

"Sure enough, it's that crowd of the Emperor of Torture... these traitors of Hell, what are they doing hiding outside the Pan-Plane?" Levi wondered.

Levi was not concerned about the Emperor of Torture.

With his current strength, he could easily kill them.

Of course, it would be better to let his second brother handle it in the future.

What concerned Levi was the Radiant Prison Dragon King, a level-10.

Before long.

He captured an outbound devil, then subdued it with Black Emperor's Enslavement.

After some questioning, Levi's expression changed slightly.

He learned shocking news...

The Radiant Prison Dragon King achieved Divine Enthronement!

It had been plotting this for ten thousand years.

Establishing a domain of faith outside the Pan-Plane.

Recently, it succeeded.

It joined the ranks of the Lord of Chaos.

That powerful God kindled divine fire for it, creating a Dragon God Body.

Its divine titles were [Brilliant Prison Dragon God], [Dragon of Death], [Hell's Snake].

The main believers were devils who defected from Hell, alien races, members of the Dragon Clan, and the Snake Clan.

As Levi knew. .

In the entire astral world, with [Dragon] as Authority, there was only one.

That was the [King of Ten Thousand Dragons].

Once a product of the former Star Dragon King's disintegration.

Levi speculated.

The Lord of Chaos intended to foster a Dragon God.

To compete with the King of Ten Thousand Dragons for Dragon Authority.

This was likely also the bargaining chip used to make the Radiant Prison Dragon King defect.

Otherwise, it was serving well as the second pillar of Hell.

No need to change allegiance.

The competition among the gods of the astral world was exceptionally fierce.

The Lord of Chaos loved to dig out powerful beings from the Multidimensional Plane.

The four evil gods came this way.

When one person achieves enlightenment, all subordinate beings benefit.

After the Radiant Prison Dragon King became a god.

The pillar powerhouses who defected with it all became angels.

Such as the Emperor of Torture.

Now, it served as the "Murder Angel."

Acting as the Angel Leader, also the god of the Torture demon race.

Meanwhile, Levi learned another important piece of news.

The Radiant Prison Dragon King had established several Dragon Clan worlds outside the Pan-Plane.

Filled with Dragon Clan creatures it had gathered.

These poor creatures.

Would undergo faith transformations.

To serve this newly emerged "Dragon God."

A sense of mission welled up in Levi's heart!

As the master of the Dragon Palace, he absolutely would not allow such abominable acts to happen!

These Dragon Clans needed to be liberated!

Chapter 2699: East Sea Shepherd Sword! Sauron's Current Situation!

Liberate the Dragon Clan!

Levi feels he cannot shirk the responsibility!

However, this matter requires careful planning.

The Brilliant Prison Dragon God is not the main concern.

The problem is now it involves the Lord of Chaos.

This is also a powerful deity.

Its strength and influence do not fall short of the Heavenly Father.

Under its command are not just the four evil gods.

Levi plans to first gather more intelligence.

To strengthen himself further.

Then to formulate the next step of the plan.

In the meantime, the Death Soul Tree can be uprooted first.

To prevent any complications over time.

The Emperor of Torture is now in the astral world.

Levi needs not worry too much.

Moreover, he need not do it personally.

"Earth Awakening!"

"Master, I am here."

"Go uproot that tree."

"Alright."

Earth Awakening transformed into a golden light.

Appeared openly in the sky of the Prison World.

"Enemy attack!"

"Is this... a Level 9 expert?! Could it be the King of the Underworld has come?"

A group of demons from the Torturing Clan panicked.

Since their betrayal of the Underworld, they've lived in constant fear.

Afraid the Kings of the Underworld would seek revenge.

"It's not the King of the Underworld, it's a Level 9 from another race!"

"Quick, report to the Murder Angel!"

The Devil Army soared into the sky.

"This is the domain of the Brilliant Prison Dragon God, leave at once."

The Army Commander said coldly.

Earth Awakening said nothing, crushed it to death with a punch.

"Noisy!"

With its Level 9 strength, it was as if in an Uninhabited Realm here.

Soon, the Devil Army scattered in all directions.

Earth Awakening came before the towering giant tree, growing in size to match the tree's height.

"Rise!"

The Divine Image Law roared, and the tree was uprooted.

After completing all, Earth Awakening carried the tree and left.

Before long.

The astral world passage descended slowly.

A figure appeared, face twisted in anger.

It was formerly the Emperor of Torture.

"Dare to uproot my tree?!"

All along, it had only been it snatching from others.

Today, inexplicably targeted, it was truly a great humiliation.

Long ago, it followed the Brilliant Prison Dragon God to survey this place.

Discovered this Death Soul Tree that's already been growing for hundreds of thousands of years.

This type of giant tree can root in Hell.

Continuously extracting Death Energy into the material world.

Perfect as the Torturing Demon race's base.

Without this tree, this world would be uninhabitable for the Torturing Demon race.

They would have to find a new place to reside.

"You offend me, you won't escape."

Meanwhile.

Levi had long begun the return journey with Earth Awakening.

He had marked this region on his self-drawn map of the Multidimensional Plane.

He would return someday.

...

Two years later.

Nora Calendar 1417.

Blood Battle 1305.

The uninhabited Land of Darkness.

Levi recited spells, his hands conducting music in the Land of Darkness.

Buzz buzz buzz! Invisible Elementary Magnetic Field rushed over.

They both attracted and repelled, condensing into a peculiar form.

The invisible force took shape due to the dust and meteorites in the darkness.

Finally, a towering ten-thousand-foot-tall Primordial Magnetic Giant took form.

It punched, and the Primordial Magnetic Storm ripped apart space for thousands of miles.

"Such a powerful force, almost comparable to a Nine-Ring Senior Wizard... as expected of my own creation of a ninth-circle spell, truly top-grade among top-grades!" rANôBÊs

Levi praised himself.

He opened the proficiency panel.

Levi-----

Primordial Magnetic Giant Soldier: Level 20 (1/20,000,000).

...

"Primordial Magnetic Giant Soldier."

This is a ninth-circle spell of the Primordial Magnetic Series.

Also the first type of ninth-circle spell created by Levi.

The power is immense. Much stronger than Level Eight spells like "Thunder Ghost," "Storm Giant Spirit," enough for Levi to face off against ninth-circle level enemies.

Levi plans to contribute "Primordial Magnetic Giant Soldier" to the Congress library to earn continuous authorization fees.

The next spell sequence.

He's chosen the Bright Faction.

On the journey home, he slowly conducts research.

The most urgent task is to attend the Netherworld Market.

...

Hell's Eighth Layer.

Black King City.

The Purgatory Demon Sword successfully reached the Eight Environments on the Ancient Dragon Continent.

Most of the time, it roams in Nora.

After all, there are more opportunities there.

Only on such special days does it come to Hell to meet Levi.

The major affairs of Black King City are overseen by the Mistress and Ghost Elephant Master.

After learning a bit about the current situation, Levi left.

Midway, he halted, hiding his presence.

High in the sky, a new Abyss Well was forming.

A Level 9 Flame Demon descended with blazing flames.

Behind it was a dense Devil Army.

Seeing no Level 10 appeared.

Levi immediately revealed himself.

"Dusk Palace Master?!"

The Wind Demon that was laughing wickedly just a moment ago.

Flew towards the Abyss Well without looking back.

Escaping swiftly.

Boom! Crimson Dragon Slash descended!

The piercing Sword Qi shot straight to the skies, tearing that Level 9 demon to shreds.

The Abyss Well trembled with a roar, collapsing under the Sword Qi.

The demon army scattered, fleeing like birds and beasts.

Levi couldn't be bothered to chase.

He just aimed to unseal the Blood Battle Armor.

Current progress: 7/10.

Having done a good deed, Levi hid his achievements and reputation, and left.

Arriving at the Netherworld Market location.

Di Gao arrived as promised.

"This time I brought 10 pounds of Rest Soil."

"So much? I don't have enough money, I can only buy 3 pounds at most."

"No problem, the rest is a gift."

"A gift?"

"Yes, a Nether Emperor saw you deal with a Level 9 demon for Hell and sent me this Rest Soil as a reward for you."

"Then I appreciate the Nether Emperor."

Levi collected the hefty 10 pounds of Rest Soil.

Indeed, good deeds bring good rewards.

It was an unintentional act.

He never thought of asking the Underworld for a reward.

"By the way, how's the battle progressing?" Levi asked.

## Chapter 2700: East Sea Shepherd Sword! Sauron's Current Situation!

"The full-scale defeat of the Abyss is only a matter of time," Di Gao remarked.

This comprehensive war, Nora is just one of the largest battlegrounds.

Across the Multidimensional Plane, countless other battlefronts exist.

The Underworld and Abyss, these two giants, are engaging in high-level clashes unseen by ordinary people.

"That's good."

"However, although the Abyss is severely wounded, it won't take long to recover... After a long epoch, a new round of blood battle will commence; it is destined unless the Abyss Will can be resolved and this Giant World destroyed. Of course, for us microscopic individuals, we may not even live to see the next blood battle, so there's no need to overly worry."

"Indeed."

Levi also felt somewhat helpless.

Once this comprehensive war is over.

The Underworld remains, and so does the Abyss.

What disappears are those nameless civilizations and worlds.

Yet, the Abyss retreat is still premature.

Whether Nora can safely pass this ordeal remains unknown.

...

Gondor City.

Inside the Fire Dragon Sky Work Refining Room.

A wizard tower, resembling a sharp sword, hovered overhead.

Lord Victor and Holy Infant were fully absorbed in the final refinement work.

Soon, a golden pillar of light shot up into the sky.

"The Golden Star Sword Tower is complete."

Lord Victor expressed delight.

He entered the space within the tower.

The Golden Electric Sword Grass stood abruptly in the center.

The dense power of the golden element gathered around.

Billions of sword qi, like dust, swirled incessantly.

golden small swords were arrayed in suspension, like a formation of stars at the sky peak.

"Big guy, when can we go out?"

"Yes, we want to get some fresh air."

"It's so boring."

These golden small swords asked in unison.

Lord Victor replied with a smile:

"Alright, from now on, this will be your home. I'll let you out every morning to play, but you must not cause random destruction. However, you may kill demons... Return here before sunset each night to sleep, understood?"

"Okay, let us out quickly."

"We want to kill demons!"

"Kill them!"

The voices of a hundred doll-like beings echoed noisily in Lord Victor's mind.

He carried the Golden Star Sword Tower to the Outer Sea of the Ancient Dragon Continent.

Subsequently, the wizard tower grew with the wind, transforming into a tens-of-thousands-foot-high golden greatsword!

Viewed from afar, the greatsword that pierced the sky and the earth emitted sword light, extraordinarily awe-inspiring.

Lord Victor sat beneath the sword like a deity.

Then, with a single thought, he opened the door of the wizard tower.

"Freedom at last!"

"Charge!"

"Kill demons!"

A hundred golden streaks of light shot out from inside the tower.

Like doves released into the morning.

They circled the wizard tower once.

"I'm going east."

"I'll go south."

"I'll head north!"

The chatter gradually dispersed.

From this point onward.

The Ancient Dragon Continent, and indeed a vast region of the Eastern Sea.

Were perpetually patrolled by a vibrant group of golden small swords in the sky.

Demons of level 6, level 7, even level 8, targeted by these golden small swords.

Required no concern from Lord Victor.

These golden small swords would emit golden thunder sword qi to annihilate them.

No demon could match them.

Lord Victor, while at home, could continuously hunt demons on auto-pilot.

Dominating the Demon Slaying List, his ranking began to soar.

Even Holy Infant and Gandalf, also part of the Three Heroes, couldn't catch up.

Unlike ordinary secret swords.

These small swords with individual consciousness.

Were mature secret swords.

Capable of autonomous cruising, tracking prey, executing targets, and returning when tired.

They had no conventional sword control distance limitations.

Theoretically.

If allowed to wander freely.

All of Nora could be within Lord Victor's sword control range.

However, the uncertainties would be too great in such cases.

Firstly, Lord Victor would lose accurate perception and position of the small swords.

Secondly, these small entities themselves could get lost, unable to find their way home.

Thirdly, they could very likely be captured by level 9 demon experts on their journey.

Therefore, Lord Victor allowed them to operate within a radius of ten thousand miles around him, even so, his attack range was already extremely vast.

This was a distance unimaginable to a Grand Wizard.

In the days that followed.

Many people trailed the golden swords to find their source.

Upon discovering it was Lord Victor, they quietly left.

Gradually.

Everyone grew accustomed to the golden streaks of light passing overhead daily.

Everyday when the sun rose.

Everyone knew:

Lord Victor was about to release his swords.

And when the sun set.

All the small swords would return to the wizard tower like swallows returning home.

Using the golden element and thunder element power within to nurture themselves.

As time went on.

The Dawn Divine Sword acquired an additional title.

"East Sea Sword Shepherd!"

Everyone believed.

That one day.

This man would ascend to the top of the Demon Slaying List.

The Secret Sword Flow surged with a second wave of fervor.

Scholars continuously sought out Lord Victor.

Everyone wanted to know Lord Victor's sword control secret.

How to be so excellent.

To this, Lord Victor also expressed his uncertainty.

The reason he was so formidable.

Was not attributable to the Golden Star Sword Tower, nor to his talent, comprehension.

But because... the Golden Electric Sword Grass was truly badass!

He was merely an ordinary "Secret Sword Pooper Scooper."

...

Land of Darkness.

Returning from the Netherworld Market, Levi was also aware of the changes on Victor's end.

Honestly, he was astounded.

Truly, he found a treasure on the eighth level.

This Golden Electric Sword Grass could not merely be a Legendary level plant.

It must be some unknown Mythical level plant.

A presence to rival the Energy Sect's legendary [Mystic Sky Spirit Vine].

This Golden Electric Sword Grass still has significant growth potential.
