

Wizard 270

Chapter 270: Capture Dragon King Whale, Second-Ring Battle, Level Nine Red Lotus! (3)

Every half an hour, Levi had to go up to get some fresh air.

He kept diving, wanting to test the maximum depth to which his body could go.

Five hundred meters.

Six hundred meters.

One kilometer.

Levi dived to the depths of a thousand meters. The immense pressure squeezed his internal organs. If not for his strong body and the protection of the black gas, ordinary people would not have been able to withstand it.

Countless glowing sea fish were swimming around. The big fish ate the small fish, and the small fish ate the shrimps.

Suddenly, a huge shadow appeared in the water in front of him. Blue light flashed above its head as it charged towards Levi.

Levi used Tidal Grasp.

The spell of the Ocean School of Thought were the most powerful in the water.

Soon, streams of water formed a cage and surrounded the huge creature.

Levi could already sense the creature's appearance through his Advanced Vibrosensing.

It was a creature that looked like an anglerfish.

It had an exaggerated abyssal mouth and was more than five meters long. Its body was covered in hard fish scales.

The strength of this sea beast should be at the level of a high-level apprentice wizard.

Especially in the sea, these beasts were even stronger.

Boom!

After the sea beast was controlled by Tidal Grasp, the Blood Wings on Levi's back suddenly appeared.

Bang, accelerate!

A bloody trail appeared behind Levi, and bubbles surged up.

With Frostmourne in hand, Levi unsheathed his Golden Cross Slash.

One sword!

As the sword light shone in this Lightless Sea, that sea beast had already been cut in half.

It was torn apart by Levi from the middle.

"It's too ugly, not worthy of being my mount."

Levi was disgusted as he put the valuable materials from the sea beast into his storage bag.

Many of the casting materials of the Ocean School of Thought came from sea beasts.

Thus, the sea beasts were treasures. Their meat was a delicacy for Levi and the Saint Scorpions while other parts of the sea beasts could be used as casting materials.

Blood filled the seawater.

The smell of blood flowed along with the water.

Levi deliberately left the internal organs of the sea beast here.

He was preparing a bait. He wanted to catch a big fish.

He also placed a large bottle of the enhanced sleeping potion he had refined into its internal organs.

The sea beasts were larger in size, so they basically swallowed food in one gulp. He wasn't afraid that they would not fall for it.

The bottle cap was made of a material that was easily dissolved. Once it entered the stomach of the sea beast, it would melt. Then, the large bottle of strengthened sleeping potion would be drunk by the sea beast.

Even transcendent sea beasts would be confused.

After everything was ready, he hid in a reef in the sea.

After a while, all kinds of fish began to appear here, eating the carcass of the giant anglerfish. In order not to destroy his bait, Levi directly used the Seal of Dragon Might to scare away these small fishes.

Not long after, the place became quiet.

After waiting for a moment, the deep sea water suddenly shook violently.

Levi activated his Spider Sensing.

His hair stood on end.

"There's a big guy.'

Levi's expression changed.

From his Spider Sensing, this big guy might not be an ordinary sea beast.

It would be a true transcendent creature.

Its strength might be comparable to a legendary knight or a First-Circle Wizard.

Thus, Levi did not dare to neglect it.

Liquid black scales covered his entire body. The casting materials for the Seal of Protection and the Seal of Dragon Might were also prepared. Although the Seal of Flame could be used underwater, its power would be greatly reduced, so Levi did not prepare it.

In his Perception, a sea beast with a streamlined body that was more than ten meters long appeared next to the pile of internal organs and began to eat without restraint.

This sea beast had a horn, and there seemed to be light flowing on its horn.

Its four limbs had already degenerated into four flippers.

Its body was covered in fine scales, and there were inverted spines on its back.

"Is this a Dragon King Whale?"

Levi's heart skipped a beat.

He had learned about this sea beast in his General Education class.

It was a famous transcendent sea beast in the Endless Sea.

It was a true first-ring transcendent creature.

It possessed spell-like abilities comparable to First-Ring Spell.

There were two types.

One was the energy beam shot out by the horn on its head, which was called the Annihilation Beam.

This was the Dragon King Whale's most feared spell ability.

This was because there had been a precedent of a Second-Circle Wizard's second-ring defensive spell being destroyed by the Dragon King Whale's Annihilation Beam.

According to theory, if the Dragon King Whale's Annihilation Beam was charged for a long time, it could injure a Second-Circle Wizard.

Of course, this was only in theory. After all, the charging time of this skill was too long. It was easy to interrupt and dodge.

Apart from that, the Dragon King Whale also has a spell ability.

That was to spit out a powerful breath from its mouth.

It was called Dragon King's Breath!

This was the most commonly used spell ability of the Dragon King Whale.

Every time the Annihilation Beam was used, it would cause a certain amount of damage to the Dragon King Whale itself.

Therefore, unless it was a critical moment of life and death, this big guy would not use it.

The most important reason why the Dragon King Whale was famous was that it was the most common dragon hybrid in this sea area.

The term dragon clan resounded throughout the entire Multidimensional

Even powerful wizards were extremely respectful and fearful of the Dragon Clan.

This was a race with ancient wisdom and power. Like the gods, they were synonymous with power in the eyes of mortals.

Among the seven kingdoms, there was one kingdom whose national religion was to worship the God of the King of Ten Thousand Dragons.

"If I could have a hybrid dragon clan transcendent creature as my mount, I'd be so awe-inspiring. The sea beasts on the Whale Song Island are much weaker than the Dragon King Whale.."
