

Wizard 271

Chapter 271: Capture Dragon King Whale, Second-Ring Battle, Level Nine Red Lotus! (4)

Levi pondered.

The Dragon King Whale was very powerful, and Levi was a little afraid of it.

However, such an opportunity could not be missed.

Because the Dragon King Whale was a hybrid, its strength was stronger than ordinary transcendent sea beasts. It should be similar to a First-Circle Wizard.

However, if they were to fight, it would still be difficult to deal with a First-Circle Wizard.

After all, humans were too cunning, and there were too many types of spells that First-Circle Wizards could master.

Levi felt that if he was careful, subduing a Dragon King Whale should not be a

Problem.

One had to know that he had just obtained a passive special effect called Dragon Affinity.

With this special effect, coupled with Wild Heart, Levi felt that he could give it a try.

For the sake of a dragon-hybrid transcendent creature, it was worth taking a

Little risk.

"Besides, the Dragon King Whale is not just a mount. It can also be my fighter. With its protection, I'll be safer in this sea area. After all, in this place, First-Circle Wizards are high-end combat forces.

"Apart from that, the glands of the Dragon King Whale could also produce ambergris. According to the wizards' General Education, all creatures related to the Dragon Clan can produce ambergris. The purer the bloodline, the better the quality of ambergris. If the quality of ambergris increases, the faster I can cultivate the Black Snake Breathing Technique, the black gas that I cultivate will also become stronger.

"The Dragon King Whale's blood was actually a substitute for the Earthly Dragon Beast's blood."

After learning more about mysticism in the wizard world.

According to Levi, the breathing technique master's comprehension, those secret breathing techniques required the blood of Earthly Dragon Beasts or ambergris.

In essence, it required the trace of the Dragon Clan's bloodline and aura in these materials.

And behind this breathing technique, there were huge beasts, such as the Black Snake with a Candle, the Giant Iron Crocodile, the red lotus, and other legendary existences.

It was very likely that they were alternative dragons or even pure-blooded dragons.

Therefore, he has a feeling now.

This type of breathing technique might be in the direction of the Dragon Clan, continuously purifying and evolving, and finally allowing Levi to have a body and ability that was as powerful as the Dragon Clan.

For so many reasons, Levi had no reason to let the Dragon King Whale go.

The Dragon King Whale was wolfing down the food.

It had no idea that Levi had drugged it.

Levi, on the other hand, quietly waited for the medicine to take effect.

How could the Dragon King Whale have imagined that at this thousand-meter-deep seabed, there was actually a cunning human who had set a trap for it?

After all, it was a transcendent creature, even after drinking a sleeping potion that was enough to knock out thousands of people, it continued to wander around as if nothing had happened for a short period of time.

Feeling helpless, Levi followed from afar.

Such large sea beasts usually wandered leisurely at the bottom of the sea.

If it swam at full speed, it would be fine for a short period of time, but if it swam for a long time, Levi would not be able to keep up.

He did not know how long he had been swimming with that sea beast. During this period, it even hunted some weak sea beasts. Levi had also witnessed the powerful strength of the Dragon King's Breath.

A dark blue high-pressure water column was spat out, and the attack penetrated the defense of a sea beast at the rank of a high-level apprentice wizard.

However, Levi felt that he could handle it.

Other than these two spell abilities, the Dragon King Whale didn't have any outstanding abilities.

It was not much stronger than the Earthly Dragon Beast, which was a top-notch beast in the secular world.

In the end, Levi noticed that the sleeping potion seemed to have taken effect.

The Dragon King Whale swayed as its body kept floating upwards. It wanted to go to the surface of the sea to take a breath.

When the Dragon King Whale came to the surface of the sea, Levi took the opportunity to burst out.

He turned into a blood-red shadow and arrived at the belly of the Dragon King Whale.

He did not hesitate to use the First-Ring Spell and Frost Giant's Sigh.

The phantom of the Frost Giant appeared and snapped its fingers.

Cold wind passed through, freezing everything. The surface of the sea was temporarily frozen.

The Dragon King Whale was also frozen.

However, it was obvious that this only temporarily restricted the movements of the Dragon King Whale.

There was no way to cause too much damage to such a transcendent creature.

Although the Dragon King Whale was dizzy, it also sensed danger and began to struggle. The ice layer creaked.

Taking advantage of this opportunity, Levi's Seal of Dragon Might blasted out one after another.

He planned to use the Seal of Dragon Might to consume the Dragon King Whale's spiritual force and destroy its will.

The Seal of Dragon Might was very effective in taming wild beasts. Levi had already tried it on the Hen-Ha Two Generals.

However, Levi was still not confident about a transcendent creature like the Dragon King Whale.

He could only place his hopes on his Dragon Affinity.

After a few Seal of Dragon Might, the Dragon King Whale was dispirited.

Although this sea beast was powerful, it was mostly physical strength.

The cultivation of spiritual power was similar to that of a grand knight.

It could not withstand the spiritual attack of Levi's Seal of Dragon Might at all.

However, the ice that restricted its body was also broken.

Levi immediately used Tidal Grasp to temporarily restrict the Dragon King Whale's movements.

He shot out a Water Arrow and hit the body of the Dragon King Whale.

The Dragon King Whale was in pain, but it didn't break through its defense.

"F*ck, trash cantrip!"

Levi cursed in his heart and pulled out the Lion King's Pride.

He raised the sledgehammer and his body expanded.

Then, Black Scale, Ostrich Feet, Blood Wings, and other forms appeared.

Other than the Red Lotus Form and the Nine Sword Forms.

Levi had already used most of his trump cards.

He hammered the head of the Dragon King Whale.

However, he held back a portion of his strength and did not use the Golden Cross Slash.

He was afraid that he would really kill the Dragon King Whale..
