

Wizard 274

Chapter 274: Capture Dragon King Whale, Second-Ring Battle, Level Nine Red Lotus! (7)

"Damn, these alchemical creatures are f*cking strong. I have to create them after I become a First-Circle Wizard!"

Levi was envious as he took the opportunity to step on the bow of White Tower No. 9. His feet appeared and bent like a bow with black gas bursting out.

Boom!

Levi jumped to a height of nearly 100 meters. Even White Tower No. 9 was kicked into the bottom of the sea by this impact.

Behind him, the Nine Swords Asura quietly appeared with a terrifying might. It was like a god that intimidated everything!

Falling from the sky!

Boom!

Using gravity and his Blood Wings, he shot out.

As the thousand-pound black flame giant smashed onto the wooden boat, Levi transmitted the Ripple Force to his Ostrich Feet.

The force of the kick directly shattered the deck engraved with spell runes.

In the end, Levi stomped through the bottom of the boat and fell into the sea.

Then, he looked at the wooden boat and took out the Lion King's Pride.

The heavy hammer struck with Ripple Force!

The bottom of the ship was soon shattered, and seawater poured into the cabin.

The wooden boat began to sink.

Immediately after, Levi's blood vessels turned red like lava, and hot steam came out of his mouth and nose.

At this moment, Levi had Black Scale, Ostrich Feet, Blood Wings, and red blood. He was like a little dragon that was breathing fire.

He held the giant hammer in his hand, and the Nine Swords Asura's ferocious figure appeared on the ship.

A terrifying green fireball descended from the sky.

Levi was blasted into the cabin, and the ship burned.

Green Ghost Carter sneered. "He's only at the legendary level. I've already said that if I was well-prepared, a legendary knight will not be worth mentioning.

This shot of mine..."

Before Green Ghost Carter could finish his sentence, a faint golden light flashed within the green flames. Then, it shattered, and liquid black scales flowed out.

Levi stomped on the deck and rushed over like a bloody shadow.

He discovered that his Seal of Protection could actually defend against a First-Ring Spell attack for a moment!

The blood shadow formed by Levi's rapid running reached Noz.

Noz, who was holding Winnie, had his protective shield shattered by Levi's palm.

Levi snatched Winnie over and smashed Noz's head with his palm.

He picked up Noz's loot and quickly retreated.

All of this was done in one go.

Although his seals were very powerful, his goal was to save Winnie, not to fight against a powerful wizard like Green Ghost Carter.

Green Ghost Carter was not an ordinary First-Circle wizard. He had too many trump cards on him, and Levi did not want to waste the opportunity to retreat.

Carrying Winnie, Levi immediately jumped into the sea and left.

At this moment, a flame knight burning with scarlet hellfire appeared beside Green Ghost Carter. He stared at Levi and emitted a monstrous aura.

"Go, kill that person." Green Ghost Carter sneered.

Riding on the skeletal warhorse, the flame knight chased after Levi, and it was getting closer and closer.

"Since I dared to surround you alone, I naturally have my own backing. This is a genuine Nightmare Knight. I'll let a so-called legendary knight like you experience what is a true knight."

Green Ghost Carter laughed.

The Nightmare Knight rode on the Hell Nightmare Warhorse and waved a heavy chain hammer in his hand. He stepped on the water and ran on the waves. The seawater around him turned into white gas.

Levi's expression was grave. This Nightmare Knight seemed to be even stronger than the Hell Strongman.

He didn't want to continue fighting. The Blood Beast exploded, and his speed increased by another level. He shot out directly from the water and jumped on top of White Tower No. 9. Another Crimson Flame's Breath was shot from White Tower No. 9 at the Nightmare Knight that was getting closer and closer.

The Nightmare Knight didn't dodge. Bathed in flames, he waved his chain hammer and continued to attack.

"This must be a f*cking second-circle summoned creature, right?" Feeling shocked, Levi shot out countless black gas, but they were all blocked by the Nightmare Knight.

With the help of White Tower No. 9, Levi successfully brought Winnie to Mr. Marko's side.

Under the joint efforts of the apprentice wizards, the Hell Strongman had already been crushed, and Marko had also taken care of one.

When he saw that Winnie had been successfully saved by Levi, he could not help but heave a sigh of relief.

Then, he looked at the Nightmare Knight on the flame horse with a solemn expression.

He felt a deep fear.

This hell creature seemed to have power close to the second circle.

Levi quietly retreated behind Mr. Marco.

He had completed his mission, so he couldn't work too hard anymore.

The Red Lotus Blood had burned out, and the Nine Swords Asura was also utilized.

If he charged forward now, he would be courting death.

The Tower Master should be quietly watching the situation somewhere.

It was even possible that the owner of the ship was also hiding in the dark.

These two second -circle experts would not easily make a move.

Once they made a move, it would be a complete war.

At that time, they might not stop until they die.

"Levi, take the other apprentices and leave quickly on White Tower No. 9. I'll hold back Green Ghost Carter and his summoned creature. This summoned creature is very powerful. He must have forcefully used a second -ring spell to summon it."

"Yes, Mr. Marko."

Levi did not dawdle. He took advantage of the moment when Mr. Marko was showing off his might and fighting the Nightmare Knight.

He led the apprentice wizards and quickly retreated while boarding White Tower No. 9.

He did a quick count. Other than Noz, the traitor, whom he had crushed to death, the other apprentices were still alive. However, a few of them were seriously injured..
