

Wizard 276

Chapter 276: Red Lotus Flame Body, Black Snake Limit Breaking! (1)

Levi—

Red Lotus Breathing Technique: Level 9 (1/150000), Special Effect: Flame Body (Gas), Red Lotus Blood.

"Red Lotus has reached level 9."

The Red Lotus Giant Beast was burning with flames, enveloping Levi's heart.

Levi felt a warmth in his heart.

His upper body seemed to have been poured into lava, emitting an extremely hot aura.

The black gas that resembled red flames circulated. His chest became a furnace, and his heart became the core of the furnace.

An incomparably powerful force surged into his body from his heart.

Then, it formed a shocking explosive force that surpassed everything.

"Flame Body: Red Lotus black gas gathers in your body, forming a gaseous flame body. Your body's strength and explosiveness are greatly enhanced. The Red Lotus Flame Body can burn everything. At the same time, your resistance to fire-related spells has increased significantly."

Levi stood in front of the mirror.

He looked at his own body.

Now, it had already turned red.

It was like red-hot glass and lava, emitting a different kind of luster.

"Is this the Red Lotus Breathing Technique? This is too powerful!"

Levi could feel an increase in strength that far surpassed Ostrich Feet and Frost Arm.

It had to be said that the Red Lotus Breathing Technique was worthy of being a perfect breathing technique.

At this moment, Levi's red lotus's black gas had already turned into the color of red flames. It could no longer be called black gas, but fire gas.

These flames danced around Levi, making him look like a flaming man.

He was bathed in flames, and the high temperature filled the practice room.

Although this kind of high temperature was far inferior to the Seal of Flame, it was superior in terms of endurance and could be heated continuously.

The current Levi only needed to burn the red lotus black gas, and his entire body would turn into a furnace that was constantly heating up.

"However, the burning effect of the gaseous body is average. It's still fine against ordinary grand knights, but it's definitely useless against wizards."

Levi removed the special effect, Flame Body.

The color of his body, which was burning red, began to fade.

The lava flowed back into Levi's heart.

Levi returned to normal. He opened his mouth and blew out a scorching breath. He looked like a dragon that had just finished breathing.

"You look more and more not like a human." Levi mocked himself.

It had been a few months since the last war.

Levi's Red Lotus weakness had long passed.

After safely returning to the Gray Tower, Levi was busy cultivating.

In these few months, the Red Lotus Breathing Technique had reached level 9.

Next, in terms of breathing techniques, other than the Red Lotus Breathing Technique and the Blood Beast Breathing Technique, Levi had nothing else to cultivate.

Therefore, he had to hurry up and break the limit of the Black Snake Breathing Technique

Once the Black Snake Breathing Technique advanced to level 11, he would become a legendary knight.

Becoming a legendary knight meant that he was a true First-Circle Wizard.

With so many trump cards, and after reaching the legendary level, an ordinary First-Circle Wizard shouldn't be a match for him as long as they weren't Green Ghost Carter or an experienced old wizard like Ms. Marlene.

Although it was a little arrogant to say this, after experiencing two soul-stirring battles, Levi realized that a First-Circle Wizard was not that scary.

Of course, being cautious was still needed.

A stable and fine tradition could not be abandoned.

Other than the breathing technique, there was no improvement in spell.

Water Arrow, Tidal Grasp's level 2 progress bar was halfway done, and it was steadily advancing towards level 3.

As of now, Levi's five cantrip spell slots had been used up. With his current spiritual force, he could not learn any new spells.

It was the same for his Meditation Art. Cultivating without supplementary potions would be slow.

Levi left the Gray Tower and went to the third floor of the White Tower, where Ms. Marlene's room was.

He wanted Ms. Marlene to help him open that official wizard's storage bag.

He tried for a long time, but he couldn't open it.

As for Noz's storage bag, there was nothing valuable inside other than the voice transmission conch. The conch itself required a specific incantation, or otherwise, it could not be used.

Therefore, Levi handed it over to the Tower Master, who rewarded him with 300 points.

Levi's contribution to protecting the apprentice wizards was included in the reward.

This allowed Levi's points to break through the 800 mark.

Therefore, Levi did not lack points at the moment.

On the third floor of the White Tower, Ms. Marlene was in a good mood after class and was researching a new potion.

"Teacher, are you busy?" Levi asked.

"Little Levi, what's the matter?" Ms. Marlene asked with a smile.

"Teacher, I obtained a storage pouch from the previous official wizard that I killed. I can't open it, so I'd like to trouble you." Levi smiled bitterly.

Now that he could trust Ms. Marlene, he didn't have any worries.

"Alright, bring me your storage bag. I'll study it. If I can't open it, you can go and find the Tower Master. Don't worry, as long as it's spoils of war, the Tower Master won't snatch it," Marlene said.

Levi chuckled. Although the Tower Master was a nice person, he still trusted Ms. Marlene the most.

"Oh right, Ms. Marlene, how is the Tower Master's recovery? Is he alright?" Levi asked.

"Don't worry. Other than his brain and heart, there's basically no other part of his body that's human. So, he doesn't need to recover from his injuries. This guy is too extreme. In order to pursue strength, he transformed himself into an alchemical creature. I persuaded him many times, but he didn't listen. Let him be. Levi, don't learn from him," Ms. Marlene said helplessly..
