

Wizard 277

Chapter 277: Red Lotus Flame Body, Black Snake Limit Breaking! (2)

Levi could understand the Tower Master, but he would not do that.

When he learns alchemy, he would at most study some alchemical creatures or modify his living dead. He would not modify his own body.

He had the knight's breathing technique, which was the best way to transform his body.

This was an era where all kinds of extraordinary powers coexisted. In this era, flesh and blood were not weak, and there was no need to pursue the path of mechanical ascension.

On the other side, Ms. Marlene fiddled with the storage bag of the official wizard of Undead Ship for a while.

Then, she seemed to understand something and went to read some books.

In the end, under Levi's witness, the storage bag was opened by Ms. Marlene.

A pile of things fell to the ground.

Levi put these things away.

Ms. Marlene told Levi the spell to open the storage bag.

Levi thanked his teacher and left the White Tower. White Snake Jorman rubbed his head against Levi's hand.

"Goodbye, Jorman."

Levi waved goodbye.

Jorman wagged his tail as he said goodbye.

Levi did not know if it was because of his Dragon Affinity, but his relationship with Jorman was improving.

He seemed to be surpassing Winnie, which made her very discouraged, and she said that Jorman had a change of heart.

After he was done with his work, Levi came to the shore.

He brought a storage bag full of sea beast meat.

On a quiet coast, the Dragon King Whale was tied up. Its horn was covered with a mithril tool, and its mouth was covered with a halter.

It was tied to a huge rock pillar and had lost its motivation in the water. It floated quietly.

Levi came to the front of the Dragon King Whale.

"How about it, Leviathan? Have you thought it through? I only need you to be my mount for 30 years, and I'll return you your freedom in the future. With your lifespan as a mixed-blood Dragon Clan, 30 years is nothing, right?"

Leviathan was the name that Levi had given to this Dragon King Whale. It was very similar to his own name.

Levi took off the halter from the mouth of the Dragon King Whale and fed it.

The Dragon King Whale's eyes were filled with disdain. No matter how disdainful it felt, it enjoyed the meat of sea beasts very much.

The abyss-like mouth opened, and a hundred catties of meat were eaten in one bite.

Seeing that the Dragon King Whale did not have any reaction, Levi could not be bothered with it.

Anyway, he had plenty of time to use Wild Heart to tame it.

It could only be said that it was indeed a true first-circle transcendent creature.

Even if he had Wild Heart and the Dragon Affinity, there was no way to tame the Dragon King Whale in a few months.

After all, Levi wasn't from the School of Spiritualism. It was true that mortal beast-taming techniques couldn't tame transcendent creatures, but with the special effect of Dragon Affinity, Levi felt that there was still a chance.

A few months ago, the Dragon King Whale was agitated when it saw Levi and wanted to attack him. However, the Dragon King's Breath had directly blown Levi a hundred meters away.

If Levi had not prepared the Seal of Protection and the liquid Black Scale, he would have been crushed to pieces by now.

That was why Levi had custom-made an iron cage head mixed with mithril to prevent it from opening its mouth.

But now, although the Dragon King Whale was still unhappy when it saw Levi, it did not attack Levi like before.

This was a victory at this stage.

Dragon King Whales were very vengeful. Their intelligence was considered pretty good among sea beasts, and their memory was even stronger. It was still brooding over the fact that Levi had hit its head with a hammer.

"Even though my head is very tough, you can't be so rough."

Levi also had no other choice. Time was the best catalyst.

If he slowly endured it, one day, this big guy would become his mount.

After feeding the Dragon King Whale, Levi went to the small garden to take care of the herbs.

Then, he arrived at the materials store in White Sail Alley.

In the materials store, Wizard Manla was meditating in his small room.

Levi did not disturb him and waited quietly for a while until Manla finished his meditation.

When Manla saw Levi, he poured him a cup of coffee and said, "It's been a long time since I last saw you. You must be busy."

"Yeah, I was a little busy. Did you get the breathing technique?" Levi smiled. Manla proudly took out a few pieces of parchment from the warehouse.

Levi was delighted.

"These breathing technique inheritance diagrams were all collected by me at the Blacksail Wizard Market. You can just give me some gold coins as a token of appreciation," Manla said.

Levi directly gave Manla 1,000 gold coins and 5 Aether Stones.

This was because he saw that among these breathing techniques, there was an outstanding quality defensive breathing technique. Just this alone was worth 1,000 gold coins.

Boss Manla was not short of gold coins, so Levi gave him another five Aether Stones as the commission fee. After all, he wants to work with Manla for a long time, so he could not be too stingy.

Searching for the breathing technique inheritance diagram in the world of wizards would also waste a lot of Manla resources.

"Three Aether Stones is enough. Five is too much. It's just a mortal breathing technique." Manla said embarrassedly and returned two pieces to Levi.

"Take it. I heard that your daughter also has the talent of a wizard. In the future, she will definitely consume a lot of resources to cultivate in the tower. These two extra pieces can be considered as a little token of my gratitude as an uncle." Levi smiled.

"Alright! Brother Levi, I'll accept it. If you need any help in the future, just let me know!" Manla took the Aether Stones happily. He really needed the Aether Stones. He was working in the shop to earn money for his daughter. "You're welcome. Just help me keep an eye on these things in the future.."
