

Wizard 278

Chapter 278: Red Lotus Flame Body, Black Snake Limit Breaking! (3)

Levi left White Sail Alley with the breathing technique inheritance diagrams.

He relied on his friends when he was away.

Even in the world of wizards, having connections could solve many problems.

When he was in the human world, he used the connections of the Golden Warhammer Master Tyra to solve many problems.

Holding the breathing technique inheritance diagram, Levi pondered over his next plan.

His path as a wizard was already on the right track.

The ways to improve a wizard's strength were to advance to a high-level apprentice wizard, increase the upper limit of spiritual power, and learn more cantrips.

However, advancing to a higher level required 11 spiritual force points. Levi only had 7 points now, which was still far from enough.

According to Levi's understanding, the potions used to aid Meditation Art were very precious. Even the official wizards in the tower only used them occasionally. No one could use them as daily supplementary potions.

Therefore, as an apprentice, he had no chance.

The resources in the tower were definitely given priority to official wizards, followed by apprentices.

If Levi wanted this kind of potion, he would have to rely on himself.

The most important thing now was to break the limit of the Black Snake Breathing Technique.

He wanted to strengthen the breathing technique that was relatively easy to break through at the current stage and then obtain more resources to support his wizard's cultivation. After he becomes a wizard, he would slowly study the path that comes after a legendary knight and use his wizard's abilities to support his knight's cultivation.

Strengthening his path as a wizard first and then using it to support his knight's path.

This was Levi's next plan.

On the way home, Levi met Senior Sister Winnie.

The current Winnie always had a melancholic expression on her face.

She found it hard to accept that Noz was a traitor and she was kidnapped by him.

She had yet to walk out of the trauma.

She truly treated Noz as a friend.

But Noz only wanted to sleep with her...

"Junior Brother Levi, long time no see." Winnie squeezed out a smile and said sweetly.

"It's been a while. I heard that you're already preparing to construct the First-Ring Spell model structure. Senior Sister, once you construct it successfully, you must tell me about your successful experience."
Levi smiled.

"Alright, Junior Brother, I'll go home first."

When Levi returned home, he activated all the breathing techniques.

There were a total of three breathing techniques.

One of them was for strength, one for speed, and one for defense.

Other than the defense technique being excellent, the others were low-level.

Levi did not lack speed and strength for the time being.

He kept these two for now and would use them later.

As for the defensive breathing technique, it was the Old Mountain Snake Breathing Technique.

"What a coincidence. It's another defensive breathing technique related to snakes."

The Old Mountain Snake Breathing Technique had a total of 66 miniature diagrams.

It should be an excellent defensive breathing technique, similar to the Black Snake Breathing Technique.

The old mountain snake was a legendary giant snake.

The size of the snake was immeasurable.

It was said that the old mountain snake liked to sleep. Every time it slept, it would sleep for thousands of years.

When it woke up, the world had changed. The snake's body was covered with rocks, trees, birds, and animals. It was like a mountain range that stretched across the earth, which was why it was called the "Old Mountain Snake".

Myths and legends were definitely exaggerated.

However, it was enough to know how extraordinary the old mountain snake was. It should be a mythical creature that was not inferior to the Black Snake with a Candle.

The secret medicine of the Old Mountain Snake Breathing Technique was also highly compatible with the Black Snake Secret Medicine.

Ambergris, snake blood, and so on.

The difference was that the Old Mountain Snake Breathing Technique needed another material called the Rock Tortoise Shell.

"There are tons of rock tortoises in the Endless Sea."

"Once I tamed the Dragon King Whale, ambergris can be collected continuously. As for snake blood, I'll ask the Tower Master, and also ask White Snake Jorman to donate some blood to me. At most, I'll hunt some high-quality sea beast meat for it to replenish its body."

In fact, White Snake Jorman could produce ambergris, but the gland that produced ambergris was also its poison sac. Therefore, the ambergris produced was poisonous and could not be used.

Moreover, the white snake was the first Tower Master's pet, after all. It was a little rude to take away the precious ambergris. After all, the production of ambergris was scarce, unlike blood.

After Levi finished reading the three breathing techniques, he was not in a

Hurry to cultivate.

Instead, he opened the official wizard bag that he had been thinking about for a long time and opened it to see what was inside.

435 Aether Stones.

There was one Earth Meditation Art.

This was the basic Meditation Art of the Earth School of Thought, but it could be cultivated to the level of a First-Circle Wizard. It was even more complete than the Deep Sea Meditation Art that Levi had previously obtained.

The other was the first part of the Night Crow Meditation Art.

This was the same as the Night Crow Meditation Art that Levi had obtained during his current apprentice wizard's stage.

This way, the School of Death's and Earth School of Thought's Meditation Arts would be enough for Levi to cultivate to the level of an official wizard. He would not have to worry about Meditation Arts for a long time.

Apart from that, there were also four spellbooks.

Two of them were the undead summoning and the apprentice spells that Levi had obtained before. They seemed to be the main spells of the Undead Ship. The other two were spellbooks belonging to the Earth School of Thought.

One of them was the First-Ring Spell, Rock Body.

This was a physical strengthening spell, a type of passive spell.

After constructing the spell model, one needed to solidify the spell with their body, and let the spell runes cover them entirely to strengthen themselves.

This was the method that wizards used to strengthen their physical defense..
