

## **Wizard 279**

Chapter 279: Red Lotus Flame Body, Black Snake Limit Breaking! (4)

This way, it would save a lot of time compared to when a knight had to start cultivating the breathing technique from scratch.

Breathing techniques required a long period of practice.

This kind of spell was quick and effective.

This was the wisdom of a wizard.

"This spell can be learned." Levi thought. "This way, my physical defense will become even more monstrous."

Stacked Armor Style would never go wrong!

The last spell was called Mountain Giant's Wrath.

"What a pleasant surprise! It's actually this spell, the most powerful First-Ring Spell of the Earth School of Thought, Mountain Giant's Wrath."

"I don't need to learn this spell. After all, the Lion King's Pride has solidified this spell. I only need to use its incantation to trigger the Mountain Giant's

Wrath inside."

Apart from the spell book, the rest were some casting materials.

This included a large number of Eyes of the Gray Snake.

"Now that the materials for Withering Ray have been found, I can start to cultivate again."

Levi was excited.

There were indeed many good things in this official wizard's storage bag. Most of them were useful for practicing the School of Death's spells.

Levi became rich just from the Aether Stones alone.

Right now, Levi had more than 800 Aether Stones on him.

This was definitely a huge sum of money for an apprentice wizard.

Even for official wizards, many young official wizards who have no savings might not have so many Aether Stones.

Now, everything was ready. The only thing missing was experience.

In the following days, Levi tamed the Dragon King Whale as he worked on cultivating his experience.

During the Month of Wheatfield.

Levi's Night Crow Meditation Art had broken through to level 2. The speed of his Night Crow Meditation Art was even faster than the Earth Meditation Art.

It was all thanks to the special effect of Earth Pulse that Levi obtained.

With the help of the proficiency panel, Levi practiced the Earth School of Thought's Meditation Art as if there was a God to support him.

In just three months, Levi had completed the Earth Meditation Art from the beginner stage to level 2. His speed was many times faster than when he cultivated Deep Sea Meditation Art.

This made Levi even more interested in the seals of the Duncan family and the Van Helsing family.

The four great families were not as simple as they seemed.

Their bloodlines and seals corresponded to the four elements of Earth, Fire, Wind, and Water.

If he could gather all the seals, then his talent as the Children of Chaos would make him a true genius of the four elements!

"So this is what it feels like to be a genius. F\*ck, this is too f\*cking awesome." Levi sighed.

Now, the Earth Meditation Art had caught up with the Night Crow Breathing Technique and the Deep Sea Breathing Technique.

Levi even felt that even without the Meditation Art's supplementary potion, he could cultivate the Earth Meditation Art to level 3 within three years.

In the Month of Northern Wind.

The Old Mountain Snake Breathing Technique that Levi had obtained was also at level 8. Dragon King Whale Leviathan had already been tamed by Levi, and he had obtained a portion of the Dragon King Whale's ambergris.

After asking for the Tower Master's permission, he took a little bit of Jorman's blood and concocted it into a high-grade Old Mountain Snake's secret medicine. The effect was excellent and his cultivation efficiency increased greatly.

It was estimated that at the beginning of next year, Levi would be able to cultivate the Old Mountain Snake Breathing Technique to its maximum limit. At that time, he would be able to break the limit of the Black Snake.

During this period of time, the Gray Tower was exceptionally quiet.

After the Undead Ship was taught a lesson by the Tower Master and the Star Tower's enforcers, it was much more obedient now. It was unknown where it was hiding to recover its vitality and wait for the opportunity to make a comeback.

Levi remained at home and did not go anywhere.

Levi spent the entire second half of the year 1018 in a busy state.

Ms. Marlene had advanced to the second circle, but she still did not put on airs. With a Second-Circle Wizard senior who valued him, Levi led a comfortable life in the tower.

Although he was no longer short of points, he still often watered Ms. Marlene's little garden and took care of her flowers and plants.

However, Ms. Marlene did not want Levi to waste his time on this, so she found a successor for Levi so that he could do his own business.

Levi only needed to help Ms. Marlene to refine her medicine and do the duties of a pharmaceutical apprentice.

This allowed Levi's Pharmacy skills to steadily charge toward level 6.

Life in the Gray Tower was like this. It was dull, fulfilling, and slightly boring.

There were elders with different personalities here. Some were strict, some were kind, and some were strange.

However, these elders were not as evil as the elders of sects or organizations in online novels. They did not bully the weak or exploit the apprentices for small profits. Such an organization would not last long.

It was friendly here, and there was warmth between masters and disciples. As long as one was willing to contribute to the tower, one would be rewarded with an equivalent exchange.

Levi liked this atmosphere.

This was his ideal cultivation place.

Year 1019 of the Holy Brilliance Calendar, Month of Beginning.

The human world welcomed the new year again.

Under the leadership of the legendary female knight, Snow Queen, the

Evernight Kingdom and the Church of Snow managed to contain the terrifying Snow Demon calamity. Although it was only temporary, it was still a huge victory.

People called this rare female legendary knight, the Goddess Knight Elsa. This was her legendary name, which implied the Snow Queen's identity as the daughter of God. Believing in the Goddess Knight was believing in the Snow Queen. They were the same.

This legendary name would be passed down from generation to generation with the passage of time and would be revered by future generations..
