

Wizard 284

Chapter 284: Sacred Dragon Emissary, Favored By The Night (4)

Ever since that battle, all the apprentices in the Gray Tower had been suppressed by Levi. No matter what assessment he took, Levi always had excellent results.

In the end, as a mid-level wizard, Levi obtained the right to live on the 20th floor of the Gray Tower. He could live in Noz's house.

However, Levi did not move. He still preferred the ninth floor.

Now, because of his strength and his identity as a high-level pharmacy apprentice, Levi had become the fifth well-known person in the Gray Tower other than the Tower Master and the three official wizards.

The legendary knight Levi had gradually become famous among the younger generation of the wizard organizations in this area.

Over a long period of time, there were still many knights who entered the Wizard World, and there were also many grand knights.

However, there were very few legendary knights.

Levi was helpless. He was not a legendary knight yet!

Please stop talking nonsense!

It was fine if they spouted nonsense about Levi being a legendary knight in the tower, but they even went outside and made everyone in the sea know that a legendary knight had appeared in the Gray Tower.

If a real legendary knight heard it and came to find out that Levi was just a fake legendary knight, wouldn't that be awkward?

This feeling was just like when he was young, his parents wanted to let the neighbors know that he had done well in the exams.

Levi was so embarrassed that he could dig a hole big enough to fit three rooms and a living room.

Therefore, in order to avoid being recognized as a fake legendary knight, Levi's goal was very clear.

That was to quickly cultivate the Black Snake to level 11 and become a true legendary knight!

However, in general, Levi could only be said to be a little famous among some small groups. He was far from being a person who could stir up a storm in this sea area.

On the contrary, Jagri, the dual-element genius, had created the fastest record for an ordinary person to become a mid-level wizard apprentice in the past hundred years on Whale Song Island.

In this sea area, dual-element geniuses were already at the top.

It had been a long time since a Child of the Elements had appeared.

Therefore, Jagri was even more famous among the younger generation than Levi, a legendary knight.

After all, this was the Wizard World. Everyone recognized the talent of wizards more than the talent of knights.

Wizards believed that legendary knights were already the limit of the knights, and there was no other potential to be discovered. However, a genius like Jagri could still become an Intermediate Wizard in the future.

At that time, Whale Song Island's dominance would be even more unshakable.

Naturally, Levi did not care about the comments of the outside world.

He only needed to quietly do his own thing.

At the end of the Year 1019 of the Holy Brilliance Calendar.

Levi's Undying Bird Breathing Technique had already been forcefully cultivated to level five by him without using any secret medicine.

If he had the secret medicine, he felt that he could at least reach level seven.

This was the difference between having the secret medicine and not.

After reaching level five, without the use of any secret medicine, even with Levi's proficiency panel, the speed at which the Undying Bird Breathing Technique could be used was much slower.

Levi was not in a hurry and continued to work on his plan.

At the same time, he kept looking up information and monster guides, wanting to see which transcendent creatures had the legendary 'Undying Bird Bloodline'.

Other than the breathing technique, he had also made rapid progress in all the cantrips he had learned.

During the Month of Northern Wind, his Water Arrow Technique was cultivated to the maximum level, level three.

Level three Water Arrow was quite powerful.

It could pierce through thick slates. Even if the Dragon King Whale Leviathan was hit by this arrow, it would not feel good.

Even the simplest Water Arrow technique could not be underestimated after reaching its maximum level.

In fact, many of the high-level apprentice wizards of the Gray Tower did not even reach level three of the Water Arrow cantrip.

Withering Ray and Tidal Grasp were also at level three, but these two cantrips were more complicated. Level three was not the limit, so Levi could continue cultivating and working on them.

That was especially the case for the Withering Ray. After level three, its power would increase greatly.

Levi had once tried it out with a sea beast, and the power of one attack had severely injured the sea beast known for its strong physique and defense, the 'Scorpion-tailed Turtle'. It should be known that it was not so easy for ordinary high-level apprentice wizards of the Ocean School of Thought to break the shell of the Scorpion-tailed Turtle.

Level three of the Withering Ray had already become Levi's most powerful spell attack.

This situation only changed after the Month of Winter, when the Seal of Flame reached the maximum level, level five..
