

Wizard 285

Chapter 285: Eleventh Level! (1)

Levi—

[Seal of Flame: Level 5 (Maximum), Special Effect: Dance of the Fire God]

[Dance of the Fire God: Your cultivation speed of fire element-related Meditation Art and spell has increased significantly.]

Levi looked at the new Special Effect.

It was exactly as he had expected.

After the Seal of Flame reached the maximum at level five, the Special Effect it gave was related to fire element affinity.

This meant that his cultivation speed in the Meditation Art and spell of the Burning Faction far surpassed that of Children of Chaos.

If he were to refer to the effect of the Earth Pulse and add on his own proficiency panel, his current fire talent should not be inferior to those who had double affinity.

However, Levi did not have any Meditation Art related to the Burning Faction at the moment. This thing was not available in the Gray Tower either. He could only ask Manla to go to the Blacksail Wizard Market to help him take a look.

There were all sorts of people there, and all kinds of rogue wizards from all sorts of factions gathered there.

"Now, let's try out the might of the level five flame flow."

Levi left the ninth floor of the Gray Tower and came to a remote shore on the island alone.

This coast was a restricted area of the Gray Tower.

This was because there lived a supernatural creature that was comparable to a First-Circle Wizard, the Dragon King Whale.

With this huge creature here, the apprentices did not dare to come over.

The official wizards also knew that it was Levi's pet, so they did not disturb him.

Marko had previously asserted that Levi could not tame the Dragon King Whale, but he had never expected to be slapped in the face by Levi. In the end, he still could not figure out how Levi had managed to use such an ordinary beast-taming technique to make the irascible Dragon King Whale, which even official wizards had a headache over, submit.

Currently, Leviathan was leisurely wandering on the surface of the sea. Levi had specially customized some armor pieces to protect its weak spots, which made Leviathan look a little like a cyberpunk behemoth.

"Leviathan, let's go. Find me a Scorpion-tailed Turtle. I'll make you a fragrant roasted Scorpion-tailed Turtle."

After Levi finished speaking, he sat in the middle of Leviathan's spine and held the spine with one hand.

Leviathan spewed out mist, wagged its tail, and quickly left the shore.

They didn't need to go far to find Scorpion-tailed Turtles. They could be found in the sea near the island.

The size of this turtle was about the same as a private car, and its tail had a scorpion tail poison needle. This was its main attack method, and it was almost as strong as a high-level apprentice wizard.

Although the Scorpion-tailed Turtle's attack wasn't that great, its shell was very hard and its defense was definitely top-notch. Moreover, they gathered in a small group and had a bad temper. It was quite dangerous.

Therefore, most apprentice wizards would not provoke Scorpion-tailed Turtles for no reason.

Levi was different. He would look for Scorpion-tailed Turtles every once in a while and use them to test the power of his breathing technique.

This caused the number of Scorpion-tailed Turtles near the Gray Tower to dwindle.

With Leviathan's help, Levi searched for half a day before finding a Scorpion-tailed Turtle.

Levi had tested it many times before.

If Levi did not use his knight abilities, the only cantrip he had that could severely injure the Scorpion-tailed Turtle was the level 3 Withering Ray.

Because the Withering Ray had a strong penetrating effect, it could ignore part of the Scorpion-tailed Turtle's shell defense.

The Water Arrow technique, which was also at level three, could only cause some cracks to appear on the Scorpion-tailed Turtle's shell, but it could not completely break through its defense.

Now, Levi had mastered level five of the Seal of Flame. In theory, the power of this Seal of Flame should not be much weaker than the First-Ring Spell, Burning Palm.

He began to prepare to cast the spell about ten meters away from the Scorpion-tailed Turtle.

There were some small cracks on the shell of this Scorpion-tailed Turtle, which were caused by Levi's Water Arrow technique when he used it as a practice.

Now that the small cracks were about to heal, Levi was here again, riding his Dragon King Whale.

The Scorpion-Tailed Turtle was speechless when it saw the man and whale duo.

It swam desperately in front while Leviathan chased after it at a moderate pace. It basically maintained a distance of about ten meters from the Scorpion-tailed Turtle.

Levi slapped out with his palm, and a colorless flame flow scorched the path ahead. The air distorted under the high temperature, and a distorted burning tunnel crossed a distance of ten meters and blasted onto the Scorpion-tailed Turtle.

Boom!

The Scorpion-tailed Turtle seemed to be burning without fire. Its hard shell began to rapidly burn black and carbonize. It shrank into its shell.

After the flame flow ended, the Scorpion-tailed Turtle was already motionless.

It was roasted at a high temperature, and the turtle shell was used as a pot, turning into a pot of turtle soup.

"Go eat," said Levi.

After receiving Levi's permission, Leviathan began to enjoy the feast happily.

"Not bad. With the current power of flame flow, I finally have a decent trump card for my spell attacks."

Levi returned to the tower with satisfaction.

Now that the four great seals were all at their maximum levels, he did not need to waste time cultivating seals in the future. It could be considered as saving a lot of time.

Now, for Levi's path of wizardry...

The only Meditation Arts that required cultivation were Deep Sea, Night Crow, and Earth, as well as Tidal Grip and Withering Ray.

As for the breathing techniques, the Black Snake, Red Lotus, and the newly obtained Undying Bird Breathing Technique still required cultivation. Other than that, there were the Black Devil Blade and the Golden Cross Slash.

"I can't waste the Dance of the Fire God Special Effect. I'll get Manla to help me get a basic Meditation Art for the Burning Faction. In terms of attack power, the Burning Faction and the Thunder Faction are both top-notch.."
