

Wizard 2851

Chapter 2851: The Four Treasures of the Universe! Massive Gains!

So even someone as arrogant as the Amethyst Saint was exceedingly respectful in front of this person, remaining silent until he spoke.

In front of the Underworld, the Pan-Plane ranks fifth, insignificant.

"You may go back."

The Rotating Ancient Emperor said indifferently.

The expression of the Amethyst Saint changed.

A light blue pair of high heels appeared in its palm, engraved with mysterious runes, faintly sketching a scene of hundreds of rivers returning to the sea. Amidst the waves, a blue figure, like the Water God, ruled the world, dominating all waters.

This is the 23rd-ranked treasure of the Pan-Plane — the Water Summoning Boots, forged by the late stage level-10 strongman from the Ancient Age, the Emperor Wan Chuan. It possesses the ability to control the water veins of a realm and contains several types of Exotic Species Water, with unpredictable power.

Moreover, wearing these boots allows entry into the "Water Net Path" and the "Star Realm Ruins Sea" in the void, traveling at several times the normal flying speed. Not to mention, it can also transform into the "Wanze Saint Body," true immortal god.

This is definitely something countless level-10 strongmen dream of.

And the only request of the Amethyst Saint was:

One opportunity for reincarnation retraining!

The Underworld has already released many slots for reincarnation retraining, and the Kings of the Underworld are generally able to grant this, myself included.

In any case, the Underworld gains a blood profit!

"Take it back, it's really not possible."

"Is this Lord Nether Ancestor's intention?"

"Yes."

Hearing this, the Amethyst Saint felt dejected, even reluctant to use the Water Summoning Boots itself, but giving them as a gift was rejected.

Though they are female high-heeled combat boots, men can wear them too.

It said nothing, secretly returning to the Purple Crystal World.

In the temple, the Amethyst Saint awakened, its expression gloomy.

The Purple Crystal Seven Kings asked with concern:

"Saint, how did it go?"

It sighed and said, "The Underworld doesn't work."

"Saint, should we not align with the astral world? With your strength, countless powerful deities from the Thousand Hills Countries would want to recruit you."

"Yes, it's certainly better than aligning with the Abyss and the Nightmare."

The Seven Kings offered ideas and suggestions.

The Amethyst Saint sent them away, pondering alone on the throne.

Aligning with the astral world isn't impossible. Although it has killed many Gods, surely there are those who still want me... The problem is, once I reshape the Divine Body, the powerful physical advantage as part of the Amethyst Race will be lost.

"Forget it, let's wait a while and see how the situation with Nora, the Nightmare, and the Abyss unfolds. If Nora collapses without being attacked, I still have hope."

...

Land of Nora.

The Supreme Council issued another important announcement:

[Recently, the Dusk Palace Master has slain the seventh Divine General's incarnation of the Holy War Army Master within the Pan-Plane, using a level 9 body to counter-slay an existence nearing divinity! Up to now, under the God Race, among the Blood Fire Eighteen Generals, the Dusk Palace Master has slain half!

By unanimous agreement of the Supreme Council.

The Dusk Palace Master is specially rewarded with 3 trillion Aether Stone, opening access to 100,000 types of spells, medicines, weapon refinement, and array knowledge from the Ancient Dragon Continent. Additionally, the Dusk Holy Temple is rewarded with 50,000 units of transcendent creature life forms and 500 bloodline crystals above level 6.

The collapse of the Council of Ten Thousand Clans is now a matter of time. The Nora Council once again states to the civilizations and alien races under the Council of Ten Thousand Clans:

Those who actively withdraw from the council or report relevant clues will receive corresponding criminal reductions in the future.

Those with great merits may join the Nora Council after taking the oath and receive amnesty. Those who persist in ignorance will welcome their destruction!]

The news caused an uproar in Nora!

"What? Didn't he just counter-slay a level 9? How did he counter-slay a level-10 incarnation now? It's only been a few hundred years."

"The Holy War Army Master is also an old level-10, isn't its incarnation comparable to some weak Gods of the astral world? Doesn't this mean the Dusk Palace Master already possesses god-slaying power?"

"Indeed, unbelievable!"

"Terrifying indeed!"

"At this rate, even the Holy War Army Master's life won't be safe."

"Yes, the Plane Sovereign can't escape."

"Awesome! They were so arrogant when messing with us before, now they're starting to panic?"

"My partner was assassinated by the Council of Ten Thousand Clans. Looks like the Nora Council is finally settling scores, revenge will be had!"

The news spread to the Ancient Dragon Continent.

Members were ecstatic, celebrating for three days.

"The Hall Master is indeed awesome!"

"What does it mean to be the Supernova King?!"

"Next, the enrollment in the Dusk Holy Temple will surely be lively again."

"Moreover, the rewards this time are too generous, 50,000 transcendent life forms, the Giant Beast Paradise won't be able to hold them, expansion is inevitable."

"500 bloodline crystals above level 6, my goodness, there'll be a surge of level 6 knights next."

This reward shook everyone. Any item alone could further enrich the foundation of the Ancient Dragon Continent.

A month later. .

Public award ceremony.

Elena, Triss, the Blood Knight, and other high-ranking members of the Ancient Dragon Continent, representing various organizations, collected the prizes with joy. These items together are worth over ten trillion! Is this the gold content of slaying a quasi-level-10?

Supreme Council.

Many Legendary Wizards gathered, joyful smiles all around.

Edmund said:

"Soon after the announcement was made, many who were once affiliated with the Council of Ten Thousand Clans sought assistance... However, many are bound by the Covenant Sword; truly resolving this issue will require killing the Amethyst Saint."

The Thousand Mountains Immortal said:

"Difficult... This is also a historical issue left behind. If it could be killed, many sages throughout history would have done it. The closest was Roger Great Councilman, but unfortunately, he fell short."

Chapter 2852: The Four Treasures of the Universe! Massive Gains!

Edmund might have the power.

But he is watched by countless eyes, leaving Nora is too risky.

As for the Underworld, it certainly won't get involved with the Council of Ten Thousand Clans.

"There's no rush in this matter, just give Levi some more time."

...

Two years later.

Year 1652 of the Nora Calendar, Year 1540 of the Blood Battle.

Silver spaceship head.

Levi and Rowling looked at the diminishing Nora light point ahead.

"If it weren't for Nora's great expansion, at our current distance, we wouldn't be able to see it at all... the universe is vast, yet civilization is so small." Rowling reflected.

"Indeed, but it's been peaceful during this time."

In the past years, under the mobilization of the Holy War Army Master, the God Race has retreated to the headquarters, guarded personally by him. Levi did not take action, so he didn't waste time in maneuvering, waiting for his return journey to make another attempt.

There's another reason, Levi feels there's a God tracking him, though unafraid, he doesn't wish to engage in battle, avoiding falling into the Blood Fire Dominator's trap.

Aid the Vast Sea sails at full power, barring other accidents, is expected to reach Nelarayan Civilization in twenty years.

Feeling a movement from the Twilight Round Table, Levi smiled:

"Lady, I'll return to the cabin now."

"Go ahead, I'll sit a bit longer."

After Levi left, Rowling lay at the bow, gazing alone at the starry sky.

"Once the war ends, I can travel around as well, the world is so big, I must see it, hoping all goes well."

Back in the cabin, Levi opened the Twilight Round Table.

"Where have you reached?"

Elena asked with a smile.

"Halfway there."

"Is Lady Rowling easy to get along with?"

"Very good, all Legendary Wizards are quite easygoing."

"Oh, my Lord Hall Master, did you kill another level 10?"

Elena stared at Levi.

Levi thought, it seems the news reached Nora, then explained:

"Not quite level 10."

"I suppose I worried for nothing, glad you're okay. The rewards from the council this time are incredibly generous, especially benefitting the Twilight Holy Temple." .

After hearing Elena's description of the reward, Levi was excited.

Another three trillion?

Can't spend it all, absolutely can't spend it all!

Of course, these Aether Stones are actually the small part, the real treasure is the knowledge, the bloodline crystals, and the transcendent creatures.

With these things, it's enough to uplift the Ancient Dragon Continent as a whole.

The council is also using the opportunity to reward me, supporting the development of the Ancient Dragon Continent, especially knights, in an official capacity.

Calming his emotions, Elena said:

"I refined the Sun Refining Artifact you gave me, saved me a lot of cultivation time, should achieve Eight Ring Perfection within a hundred years."

"How's the effect?"

"Very good, increased spiritual force by 1000 points, my 'Viewing the Sea' talent has also improved further, it's nearing a certain critical point, surpassing this point, it won't just be Sun-Grade talent, but closer to Legendary-grade talent."

"That's normal, after all, you've refined three Sun Refining Artifacts, plus three Water Series, the quantity changes leading to a qualitative change, after the ninth-circle, the cultivation speed won't be slow. Easier to forge your own Legendary Artifact in the future."

"Indeed, but it's a shame there's no special spiritual creature."

"That can't be forced, you currently have 2 Morning Stars, 1 Bright Moon, and 2 Sun-Grade special spiritual creatures in your lineup, many Ninth-Circle Wizards I know don't have as much as you."

"Yes, I tested my moves against the dragon corpse demon, at my current level, I'm capable of contending with level 9 momentarily... After actually experiencing it, I found the gap between level 8 and 9 is so vast, I can only barely sustain, utterly powerless to fight back."

"Of course, did you think reverse slaying level 9 would be easy? Anything happening on the Ancient Dragon Continent lately? How are those talents I'm tracking?"

"All doing well. It's just that Wind and Fire Dragon Witch, Leilon Knight is still at peak level 5, wanting to surpass Mythical, it's as tough as reaching heaven." Elena lamented.

"Take it slowly, he's still young."

Leilon is Levi's key focus, he once attempted to view his past life, but unable to do so, this one is obviously a reincarnated Legendary Wizard, fundamentally different from Heim, as for who, most likely the Dragon Flame God Wizard.

Because he once received the 'Dragon' character from Sauron, even if reincarnated, he should still carry this element of 'Dragon.'

Of course, this sort of thing, best left unspoken.

Levi did not elucidate.

Dragon Flame God Wizard was devoted in protecting them and Nora, now reincarnated, Levi will surely protect well too.

This way, the Twilight Holy Temple has two knights reincarnated from legends. Both carrying supreme potential, with a bright future ahead!

"How are the Eighteen Riders?"

"Green Bird Knight reached level 7, and his path of the wizard also achieved sixth-circle perfection; the Blood Knights, these old generals are all at level 7 peak, ready for level 8."

...

Understanding the organizational status from Elena's side, Levi felt more confident about the upcoming war. Before the Nightmare invasion, the organization should birth a large number of level 8 powerhouses, with methods from the Mechanical School, self-preservation is doable.

The two talked for a long time before concluding.

Levi then began tallying this period's harvest.

Six generals contributed a total of 1380 Truth Oddities, it was Levi's first four-digit-sized collection of oddities, he couldn't help but smile widely.

Adding to his previous gains, the treasure trove's Truth Oddities can sustain and absorb for many years, ensuring geniuses on the Ancient Dragon Continent don't lack oddities.

Even those relatively ordinary, as long as they work hard, the merits suffices for a chance to exchange for oddities. The upward channels aren't completely blocked.

Chapter 2853: The Four Treasures of the Universe! Massive Gains!

This is something other top wizard organizations can't even imagine.

Levi picked and chose some items he could use.

Now, for him, all sequence oddities from the Light, Darkness, and Lightning sects have reached perfection.

The Shadow Faction has gradually been assembled quite a lot too.

As for the traditional Elementalist School and Death Sect sequences, he doesn't plan to collect them for now. The elemental affinity in this aspect can be compensated by various breathing techniques. Moreover, his Elemental Proof itself already includes the Seven Elements.

For traits like Fire affinity, Levi feels they've already reached the ceiling. Further improvement would be challenging without legendary artifacts.

To him, refining isn't cost-effective.

The Metal and Frost factions have already been collected by Lord Victor and the Holy Infant, so there's no need for him to walk the same path again. For him, even minor improvements can cultivate a good number of primordial soul-level and even Grand Wizard-level key figures in the organization.

It's worth mentioning four oddities, all Glorious Sun-Grade: [Tear of the Water God], [Earth God's Shield], [Wind God's Flute], [Snow Country's Proof].

The first three are sequence components of the Elementalist School. His closest kin doesn't really need them, so they continue to serve as treasures in the troves.

When doled out among the organization's supernovas and geniuses, they should further improve and reach the eighth-circle realm sooner.

[Snow Country's Proof] belongs to the Frost Faction, Levi previously handed the Holy Infant a Glorious Sun-Grade [Radiant Fire Armor], making it a fitting balance.

Other ores, herbs, and resources required for the Three Arts are countless, Levi didn't want to waste time, so he assigned someone to organize them.

After the final inventory, there were over a dozen types of level 9 ores, each worth a fortune. Additionally, there were 5 sacred medicines, encompassing Earth, Fire, Wind, and Water, along with Lightning.

Still, none of these values compare to a piece of crimson ore in Levi's palm.

Its emitted heat was enough to melt Levi's scales, distorting his protective force field as golden flames spurted around, radiating Divine Light everywhere.

"It's actually a ten-level divine item Sun God Gold!"

Beyond level ten, herbs, ores, or any material are termed [Divine Artifacts]. They are treasures coveted by the Heavenly Father.

Sun God Gold reigns supreme among fire element ores, containing traits like [Solid], [Indestructible], [Extreme Temperature], [Everlasting], and other characteristics across level 9 and even level 10, making it the best material for crafting fire element supreme treasures!

Typically, only remnants from the dead Sun Plane might birth a small piece of Sun God Gold, highlighting its worth.

The [Dead Sun Nine Prisons] of the Fire Sovereign is formidable, and this treasure is partially why. Of course, the Fire Sovereign utilized nine suns to forge his treasure. Levi's small piece naturally can't compare; he merely needs it to recast [Crimson Dragon Slash].

Levi obtained this from the Seventh Divine General, who was surely intending to use it for forging a supreme treasure.

"Now, the Military Lord will be heartbroken."

He smirked proudly.

Moreover, there were three pieces of [Star Spirit's Heart]. Alongside Levi's previous reserves, he now possesses 6 pieces.

For Three Avatars and those dear to him like Elena, they won't have any concern about future advancement to the ninth-circle. Triss, already at eighth-circle perfection, doesn't need to worry about this item.

Levi plans to reserve the last piece for his second brother, Purgatory Demon Sword. The other core members of the organization still have some time before advancing to the ninth-circle, so they don't need it for now. With the development of the White Dragon Commerce, there will be a steady supply of Star Spirit's Heart.

[Starfall Remains] were likewise piled high.

These are accumulations from the God Race over aeons. Although a good amount has been consumed, the remainder still assures Levi a cose full of profits.

Among the rest are various knowledge pieces, spells, combat techniques, including a combat technique created by the Holy War Army Master, [Nine Stars Battle Manual], which is incredibly powerful. At level nine proficiency, it can condense spear-related [Intercepting Star Species].

Levi's [Extreme Dao Strategy] hasn't broken through its limit yet, with no clear path in sight.

He plans to practice some level 9 combat techniques next, seeking inspiration. Maybe volume can lead to miracles, breaking through the combat technique's level nine bottleneck. Given his current combat technique realm, achieving [Nine Stars Battle Manual] mastery won't take long.

The main event left is the level 9 rare treasures.

There are six in total, namely:

[Black Prison Chain], [Golden King Sky Light Armor], [Red Sun's Whirl], [Golden Moon Halberd], [Star Dust Sword], [Bloody Secret Book].

All are quite good.

But with Levi's discerning eye, only one is top-quality.

Golden King Sky Light Armor.

Most suited for Lord Victor, it enhances his defense, allowing him to focus entirely on attack and offense without worrying about survival. .

Black Prison Chain, in whip form, surpasses Demon Dragon Whip greatly. Madam Triss is sure to love it, and he plans to sell it to her cheaply upon returning.

Giving it directly won't be accepted by Triss.

Golden Sun Vortex is akin to the Holy Infant's early work Extreme Fire Wheel. It could serve as an auxiliary means outside the wizard tower.

Star Dust Sword was a famous treasure early forged by Plane Sovereign [Star Dust Army Master], oddly found on the Holy War Army Master's side. The Star Dust Army Master was taken by a demon early in the Blood Battle, leading to his demise.

Last is Bloody Secret Book, a crooked path rare treasure resembling a book that summons potent [Blood God Projection] against foes.

Levi intends to keep this treasure himself since it relates to Nora's enemy, [Blood River Will]. Maybe there are traps within.

Chapter 2854: The Four Treasures of the Universe! Massive Gains!

Speaking of which, the Blood River Will, as a progeny of the Mother River, ranked among the top twenty Nether Emperors, controls part of the Reincarnation and Undying Power, and even created the Blood Clan with its own hands. It once had its moment of glory, but alas, it made too many enemies and has been cast aside by the Underworld.

Now, who knows where it hides, causing trouble.

Additionally, there are 364 rare treasures above level 6, of various kinds, with many uses and styles. Several Space Treasures were also seized, inside which some God Race soldiers were hidden, all of whom Levi eliminated.

These rare treasures will become the foundation of the Ancient Dragon Continent, ensuring that the geniuses and supernovas at least have a few each.

The more unusual spoils include over a hundred transcendent creatures, with quantities in the tens of thousands, varying in strength. There are Heavenly Horse subspecies used as mounts and Shadow Leopards responsible for assassinations... Just the Dragon Clan creatures enslaved for war number over five hundred. However, most are from the mixed-blood dragon clan, with only a few dozen sub-dragons.

Moreover, inside an eighth-level Space Treasure, the "Ten Thousand Beasts Pearl," there are tens of thousands of transcendent creatures' younglings or eggs, seemingly a breeding base for the God Race's mounts. The God Race's civilization is quite advanced, with war as its primary driving force.

Seeing this, Levi laughed so hard his jaw almost dislocated.

"How can there be such a considerate civilization as the God Race? Whatever I need, it provides. The Giant Beast Paradise has just saved a hundred years of development time."

These biological resources are also a vast fortune.

Suddenly, Levi's eyes shifted as he discovered a Red Scale Giant Egg covered with dragon scales, exuding pure Dragon's Might, and surrounded by a wave of heat.

"This is an egg of the Ancient Red Dragon, one of the Five-colored Ancient Dragons! Excellent, I've unlocked a new entry in the Legendary Dragon Clan Atlas."

Levi suddenly thought of the other four types of ancient dragons in this category.

It doesn't feel complete unless they are all collected.

"Forget it, let's take it slow."

Beside the Ancient Red Dragon, he found another egg with pale blue feathers, probably some sort of transcendent bird, about a circle smaller than the Ancient Red Dragon's egg. Levi checked the data and eventually identified it as the egg of a "Star Falcon."

The Star Falcon is not large in size.

Its speed is extremely fast, rivaled only by a few Legendary creatures like the Aurora Bird within level 9; its speed burst in the short term surpasses the Aurora Bird by a notch. There was once a level 9 expert who got caught off guard and had his head blown off by a Star Falcon.

Thus, it is absolutely an assassin-type creature.

Levi remembered that the Green Bird Knight's Mythical Bloodline includes this Legendary creature. Once this little bird hatches, the Green Bird Knight will be blessed.

There are also many rare eggs, dazzling to behold. Levi transferred them all to the Ancient Banyan Fairyland for professional breeding organizations to take over.

The other spoils are so numerous that there's no need to elaborate.

Excluding the above-listed priceless treasures, the remaining loot's total value should exceed three trillion... Needless to say, not just for Levi, but also for the Nora Council, this is a considerable financial revenue.

The God Race indeed lives in opulence!

...

The silver spaceship sailed silently.

Time flickered, and three more years passed.

In the Nora Calendar 1655, the Blood Battle 1643.

In the cabin, Levi placed his hand on the Klein Crystal Ball.

[Spiritual Force: 62001/74000]

"Only two thousand points away from the Nine Rings Perfect. With regular cultivation, I can reach it in a little over a hundred years. And since I ascended to the ninth circle, it's only been four hundred years... Even reincarnations of legendary wizards can't keep up with me."

Of course, he wasn't being arrogant, just making a regular comparison.

"Taibai No.1, how much longer until we reach the destination?"

[About fifteen years more.]

"Good, proceed at full speed."

Levi's Deep Red Eyes glinted.

On the central screen, there was a host of level 10 experts with hostility toward him, emerging from the Abyss, Nightmare, Astral World... a total of dozens of figures.

"There are far more compared to the time before the Holy War Army Master's incarnation, but like they say, the famous and the strong face more foes. It's all right, let them come."

...

Abyss.

Land of Darkness.

Pazuzu looked at the intelligence from the front lines, visibly excited.

"Quick, contact the other demon lords in the Pan-plane Battlefield. If Levi dares to show up again, ensure to take him down, don't attempt to capture alive, directly kill him!"

If Levi were in Nora, he would be temporarily beyond reach.

But if this kid wanders outside again, doesn't that present an opportunity?

The Shadow Demon Queen said, "I've sent out the orders. General Commander, let me go too... I don't quite trust the lords on the other fronts."

As the lord of the Abyssal Layer 434, the Shadow Demon Queen is at the Level 10 Middle Stage in cultivation, not standing out, but it is a shadow demon, able to traverse the Shadow Dimension freely, and it commands a group of experienced spies skilled in assassination!

A master in a specialized field.

If it takes action personally, the effects might even surpass some Level 10 Late Stage individuals.

Pazuzu asked:

"If you set off now, will you make it in time?"

"I will."

"All right... go, and if you succeed in killing the Dusk Palace Master, I will ask the Chaotic Servant Lord to grant you a wisp of Supreme Demon Energy, helping you step into the Level 10 Late Stage and become a lord in the back layers, which will also benefit your Shadow Demon lineage. After dealing with Nora, we'll conquer the Shadow World as your future domain."

Pazuzu's promise was alluring.

The Shadow Demon Queen was internally thrilled.

Supreme Demon Energy!

Only the power of supreme-level demon energy, born from Level 11 strongmen, a mere wisp could bring level 10 demons endless benefit, saving countless years of arduous cultivation.

Chapter 2855: The Four Treasures of the Universe! Massive Gains!

Dusk Palace Master, you must die!

Shadow World, which it has coveted for a long time.

But there are quite a few strong ones over there as well, similar to Edmund, hard to deal with, so the Abyss cannot conquer it for now.

Moreover, the Shadow World involves multiple giant factions in a contest, and if the Abyss wants to monopolize it, it will inevitably lead to attacks from the other three sides, plunging into a chaotic battle.

However, this realm has already been scattered, its potential exhausted, making it difficult to form destiny in the future. In comparison, Nora presents a greater threat.

Shadow Dimension.

The Shadow Demon Queen's palm reveals a whip-like object full of barbs.

This is the [Shadow Whip], a supreme treasure-level magic tool for the shadow demon race, forged through countless years of slaughter and devouring, ranking in the top thirty of the Pan-Plane.

Its raw material is the divine artifact [Shadow Divine Gold] from the Shadow Faction, born from the core of the Shadow World's plane, obtained when the old powers scattered the Shadow World.

"I'm going to whip you hard! Dusk Palace Master!"

The Shadow Demon Queen licks the whip with her crimson tongue, then wraps it around her slender waist, not much inferior to a succubus, before transforming into a ghostly light and rushing away.

...

Nightmare World.

"Dusk Palace Master has appeared in the Pan-Plane; this is a perfect opportunity to kill him. Lords, who is willing to take a trip?"

The Lost Monarch looks at the strong ones below.

The Ghost Alley Monarch acts like it has nothing to do with him.

The Devouring Sky Demon Lord wants to go, but it is one of the main forces attacking Nora, and the current period is crucial before the war, rendering it unable to leave.

A monarch whose form is unstable, gathering and dispersing like mist says:

"Let me go, but let's make it clear first, all the spoils of hunting him are mine. Everyone has no objections, right?"

The Lost Monarch laughs and says:

"Then Grey Mist Monarch, with your level 10 middle stage cultivation, you should be sure to succeed... As for his spoils, they are naturally yours."

Suddenly.

The Lost Monarch opens its mouth and spits out a black bead.

It devours light, incredibly strange.

"This is the [Night Barrier Bead], an illusion artifact capable of obscuring astrology and concealing heavenly secrets. Dusk Palace Master has exceptional perception. Take this with you, and he should not be able to sense your presence," the Lost Monarch explained. .

The mist-like face of the Grey Mist Monarch reveals a smile.

"Alright, thank you then. I will surely complete the mission."

Illusion artifacts are a weapon refinement method unique to Nightmare World strongmen. This Night Barrier Bead was obtained by the Lost Monarch after killing a monarch-level enemy, matching a supreme treasure.

To deal with the Dusk Palace Master, one cannot proceed without investing heavily.

Afterward, Grey Mist Monarch tears open the red-black sky dome, enters the crack, and disappears.

Nightmare World holds most of the cosmic dark side fragments, making travel quite convenient. Catching up to Dusk Palace Master is not a big problem.

...

Two years later.

Holy War World.

The Holy War Army Master and the remaining nine Divine Generals gather here. They have already set up the Heavenly Net, just waiting for the Dusk Palace Master to arrive.

But, the Dusk Palace Master did not come.

"I thought he had become arrogant enough to challenge my true form."

The Holy War Army Master unwittingly breathes a sigh of relief.

"I also don't know the situation on the Wild Dog God's side. No news has been conveyed yet. Could it be he couldn't catch up?"

In these years, it often suffers from heart pain, not curable by any means.

The hard-won [Sun God Gold], hasn't been warmed up before it flew away, let alone so many level 9 rare treasures, materials.

"Once my master is rid of troubles, it must first solve this person!"

...

Darkness Void.

A slender figure rides the [Void Demon Dog] mount, rushing on the road, it is the Wild Dog God, carrying a simple great bow on its back, exuding the scent of age.

To smoothly complete the mission of intercepting the Dusk Palace Master, the Blood Fire Dominator approved it to use an [Ancient Divine ArtifactSun-breaking Divine Bow] from the Divine Kingdom.

Judging the power of a divine weapon depends on three factors: the level and power of its forge master, the material, and the sediment of time; the older, the stronger.

Currently, the most powerful divine weapon is the Ancient Divine Artifact, such as the [Spear of Blood and Fire]. Its predecessor was [Fiery Fire Divine Spear], bred in ancient times, constantly reforged and enhanced by the Blood Fire Dominator, making it a top-tier weapon in the astral world.

"Magic Dog, have you smelt traces of the Dusk Palace Master?"

The Wild Dog God asks.

The black hound beneath shakes its head.

"Oh well, it seems this person fears confrontation with me and has fled in terror. I can return to report."
The Wild Dog God breathes a long sigh of relief internally.

Great! No need to face that freak directly.

Though this time, quite a few Divine Race soldiers and Divine Generals were lost, the losses in the Belief Land were minimal, so it can be considered as completing the Main God's task.

Levi can at most hunt down Divine Race soldiers yet cannot possibly slaughter all the life in the three thousand Belief Lands just to trouble the Blood Fire Dominator.

Those lives themselves aren't guilty, they comprise important parts of Great Nora civilization's future vision. To solve the Blood Fire Dominator thoroughly, one must go to astral world, hammer the divine body, crush the Divine Kingdom, extinguish the divine fire!

...

Three years fly by.

Nora Calendar 1660.

Advancing at full speed, Aid the Vast Sea has already reached the Pan-plane edge.

Looking at the boundless deep space, Levi suddenly thinks of Ayak.

Who knows where that bird-child has gone?

This is their fortieth year of travel. Along the way, besides creating troubles for the Council of Ten Thousand Clans, Levi has saved a not few endangered alien race civilizations.

They are all settled within the Space Treasure he carries. As for the [Land of Oblivion], due to limited time, he plans to go there on the return trip.

"Master, ahead lies a Blood Battle Battlefield, it appears to be a large civilization. I investigated a bit; there's a level 10 strongman there."

A golden light descends upon the cabin, the scout Maya.

After reading the information, Levi goes to Rowling's room.

The lady just finished meditation.

"What's happening?"

"Lady, our route ahead includes a Mermaid Civilization, the strongest is [Emperor WhaleSain], the Merfolk Emperor."

"Merpeople... and Sea Clan are close relatives."

"Yes, I feel that it's beneficial for the development of body-refining wizard, I plan to go over and check, if the enemy is too strong, we'll abandon it; if it's ordinary, I plan to try to see if I can kill it, then I may need the lady to lend a slight hand."

"Alright, be careful."

Leaving the spaceship.

Levi conceals his dense qi, heading toward deep space.

The merfolk tribe also has branches in the ancient tower, their bodies strong with considerable bloodline ability, Levi estimates, the ancient tower borrowed people from here.

He has a premonition, the chance to unblock the Blood Battle Armor is here!

Chapter 2856: Defying Level-10! Complete Blood Armor!

Sain World, Mermaid Sanctuary, where ninety-nine percent of the territory is covered by endless ocean, with only scattered islands dotting within.

Since antiquity, the merfolk clan has thrived here, reaching the peak of civilization three hundred years ago... Whale Emperor Sain was born.

Since then, the merfolk clan had their own Level 10 Strongman.

But at the same time, the merfolk clan welcomed the worst era.

Abyssal invasion, blood battle began, lives devastated.

The lord of the 186th layer of the Abyss, [Old Sea DominatorRul] is the commander-in-chief of this battlefield, whose true form is a Fish Demon, with a legion of Level 9 Generals under its command.

Initially, the Abyss thought that a newly emerging level-10 civilization could be swiftly annihilated, but unexpectedly, under the command of the Whale Emperor, the merfolk clan resisted until now!

On this day.

Whale Emperor's Palace.

A vast and towering figure of ten thousand feet sits there precisely Sain.

Below, six level 9 merfolk clan strongmen stand on either side, reporting the battle situation. .

After listening, Sain expressed anger and immediately stood up.

"An outrageous insult!"

This Rul dispatched someone to capture the mermaid princess, his daughter. Fish Demons are well-known for their lust; he will not allow his daughter to be defiled by them!

In the past years, many female merfolk were defiled by Fish Demons, resulting in the birth of many deformed demonic creatures, wreaking havoc across the seas, threatening the merfolk lineage.

"Someone, prepare the chariot; I will personally go once to the demon camp!"

"Emperor, you must not, it might be a trap set by the demons."

"Then what do you suggest we do with my daughter?"

"This..."

A group of level 9 merfolk ministers were rendered speechless, looking at each other.

Were it their own kin, it would also be difficult.

On one side is one's flesh and blood, and on the other, civilization.

Whale Emperor calmed down and said:

"I've faced that Old Sea Dominator once, its power isn't much stronger than mine, just having ascended to level 10 longer, has more profound foundations... damned it, give me ten thousand more years for growth, I will surely be able to cut it down under my blade!"

A minister cautiously said:

"Emperor, should we seek assistance from the Nora Council?"

The Whale Emperor coldly replied:

"Nora? Have you forgotten how those wizards treated the Sea Clan?"

The ministers fell silent.

In the eyes of most alien races, the wizards' deceitfulness and wickedness are undisputed facts. In truth, wizards don't consider themselves righteous either.

One nervously looming under level-10 majesty said:

"Emperor, times have changed, I think at present, safeguarding our merfolk civilization is most urgent, You are the greatest talent of the merfolk clan across history, but our foundation is lacking. Now with the blood battle crisis at hand, please reconsider."

"Indeed, Emperor, I've learned that the Sea Clan there are doing fine, merfolk also survive in Nora. With your status, you could directly enter the Supreme Council, gain a place for our clan; it ought to be no issue."

Seeing someone dare to speak candidly, other ministers also voiced their thoughts. The three hundred years of blood battles made them see no hope.

Currently, just an abyssal 186-layer demon lord is making them greatly troubled. If demons dispatch more hands, can they still fight?

Regret would be too late by then.

Turning to Nora, they have consecutively won three waves of comprehensive wars, slaying 5 level-10 demons, among which one was the leader of the Four Great Demon Lords, Earth Demon Lord!

Even the powerful barbarian tribes' civilization has been merged into Nora, Heavenly Will, this nearly Level 11 top-level existence, has joined.

What is there for merfolk civilization to hesitate?

Survival is the eternal theme in the Land of Darkness!

Other bottom lines can be flexibly moved!

"By the way, Emperor, I recently heard, Nora's strongest prodigy, the Dusk Palace Master, single-handedly slew the Holy War Army Master's incarnation.

He is currently traveling across the Pan-Plane. If we ask Nora for assistance, perhaps this person can help us temporarily overcome the difficulty."

Upon hearing the Dusk Palace Master, the Whale Emperor's eyes shifted.

Judging from information, this person has a good attitude toward the Sea Clan, and Nora's merfolk clan are under his protection... If truly intending to join Nora, indeed, he is the key.

"Go, try to contact the Nora Council."

The Whale Emperor calmly said, he must make a decision.

Just remembering his daughter caught in the demon camp, Whale Emperor felt grief, a dignified tenth level body, unable to protect even the close kin.

If there weren't concerns for the clan, long ago would he have charged into the demon camp.

It boils down to being not strong enough.

Would that Old Sea Dominator dare to abduct Edmund's daughter?

This isn't asking to eat the sun?

Buzz!

A wave of absolute strong aura invaded the Sain World, Whale Emperor's face changed, his mountainous majestic whale body stood up, a four-thousand-foot-long blade surfaced in his palm.

This is the Peak Level 9 rare treasure [Sea Suppressing Blade], a clan treasure passed down through generations by the merfolk clan, refined to the strongest power in history.

It's just a pity it's not a supreme treasure.

A rainbow light crossed the endless space, appearing in the center of the great hall.

He wore black armor, his expression stern, wielding a sword in his right hand, with a black chain in his left dragging a Level 9 demon's corpse, striding forward.

The ministers looked at this person, their expressions changed with shock.

Whale Emperor did not take action, because he saw a level 8 peak female merfolk landing in the hall, measuring a thousand feet tall, it was the merfolk princess herself.

"Father! I'm back!"

The situation goes like this.

Not long ago.

Levi concealed his form and approached nearby the demon headquarters situated in the Land of Darkness outside the Sain World, aiming to capture some demons, enslave them to gather intelligence.

Then, on the way, he encountered a Level 9 demon.

Chapter 2857: Slaying a Level-10 in Defiance! Blood Armor Complete Body!

With his strength, naturally he resolved it in moments, after enslaving it, he discovered that the demon had actually abducted the Merfolk Empire's princess!

Heaven helps me!

He immediately became the hero who saved the beauty, and with the princess rushed to Sain World at the fastest speed. Without checking in, he directly used the Invisible Secret Word to penetrate all protective measures, openly appearing in the merfolk's core hall!

This Whale Emperor was only promoted a thousand years ago, merely at Level 10 Early Stage. He couldn't even defeat that Level 10 Fish Demon, who was considered the weakest among the four great demons of the Abyss's 186th layer.

Levi naturally had no fear.

A father-daughter reunion.

The burly merfolk princess threw herself into the Whale Emperor's arms, crying like a pear blossom in the rain.

This scene was something Levi really couldn't admire. His aesthetic could only accept humans, at most elves, he couldn't stand succubus.

"Daughter, that damned Fish Demon didn't touch you, right?" The Whale Emperor checked her, finding the princess was only slightly injured and let out a sigh of relief.

"Father, no, I was saved by this human strongman... By the way, may I ask your name, I haven't had the chance to ask you yet?" The princess turned and asked.

The Whale Emperor looked at the black-armored swordsman, eyes filled with surprise.

"You... You are the Dusk Palace Master?"

Levi nodded.

"It is indeed I."

The Whale Emperor then looked at the ministers.

"Have you already contacted Nora?"

The ministers shook their heads.

They were bewildered too.

Once Levi was mentioned, Levi appeared.

Levi said:

"I didn't contact the nobles beforehand. I passed by here, saw traces of demons, and came to check. I happened to meet your princess, it was really a coincidence."

The Whale Emperor cautiously asked:

"What is your purpose in coming, sir?"

Levi candidly replied:

"Two things. First, I want to invite the merfolk to join Nora to fight the demons and to overcome this unprecedented Great Tribulation. Second, I wish to kill the Old Sea Dominator, but considering this is your territory, I came to give notice."

The Whale Emperor and ministers felt relieved hearing the first matter.

Since they had just been intensely discussing this issue, and ultimately the Whale Emperor decided to ask for aid from Nora, applying for voluntary integration.

But the second matter left them stunned.

"Eliminate the Old Sea Dominator?"

The ministers showed a look of shock.

The princess also covered her mouth in surprise and exclaimed, "Benevolent one, that Old Sea Dominator is hard even for my father to kill, are you planning to hunt it alone?"

The Whale Emperor asked:

"Do you have great confidence in yourself, sir?"

Levi replied:

"I can't say there's a 100% success, but it's worth a try. In any case, for the merfolk, my upcoming actions have no drawbacks. Even if I can't kill the Old Sea Dominator, it and its demon soldiers won't be able to escape!"

Abyss first 200 layers, Fish Demon lord, Level 10 Early Stage.

This was tailored for his Blood Battle Armor to be unsealed. Should he miss this chance, finding another suitable demon would be difficult.

Levi needed to dominate to kill the Level 10 Demon.

However, he also prepared a backup plan. If he failed, then Lady Rowling would step in and they would join forces to eliminate it.

Though this wouldn't unlock the armor, it would be a severe blow to the demons. Not to mention, Level 10 demons themselves are treasures.

The Whale Emperor thought for a moment:

"Alright, do you need my cooperation, sir?"

Levi confidently stated:

"You just need to guard Kane World, leave everything else to me!"

He had investigated the configuration of the demon camp here, 1 Level 10, 10 Level 9... Such a formation, his Black Shadow Army could handle.

The Whale Emperor earnestly said, "In any case, thank you very much, sir."

Levi turned and left, disappearing inside the main hall.

It was only then that the Whale Emperor suddenly realized.

"How... did he get in?"

The ministers were stupefied too.

This was a place of great civilization.

This person comes as he wishes and leaves as he wishes.

This kind of strength truly was terrifying.

Perhaps there really was hope to eliminate the Old Sea Dominator!

...

Silver spaceship.

Levi's figure appeared.

Rowling asked, "How was it?"

"The merfolk civilization agreed to integrate into Nora. Next, I need to hunt that Fish Demon alone, I also ask that the lady secretly set up a Raid Formation for me while also preparing a second plan. No matter what, we can't let that Fish Demon escape." Levi said.

"Alright, I'll prepare several Legendary spells and arrays. Are you sure you don't need my help?" Rowling asked.

Levi nodded, his face resolute.

With his fight against the Holy War Monarch's incarnation, he was confident now.

He himself, Blood Battle Spirit, added with the Eight Formation Map!

These three major cards, fully prepared, were enough to encircle and kill a Level 10 demon!

...

Land of Darkness, demon camp.

"Ruel, quickly resolve the merfolk civilization, then rush to the Nora Battlefield," the voice of Water Demon Lord came from a pitch-black statue. .

The Old Sea Dominator had a head full of tendrils resembling a mix of fish and octopus, a broad back with fleshy wings, and its surface covered by spikes akin to lionfish scales.

The Fish Demon was a large class, including many aquatic demons with similar ecological niches. But the surface tendrils were a common feature. They were proficient in controlling water, most carried toxic power, suitable for invading oceanic civilizations like the merfolk.

"Lord, I encountered obstacles here. The merfolk civilization happened to have a Level 10 strongman born, named Whale Emperor. I can't take it down temporarily, requesting support."

"I know, I'll see if I can arrange a Level 10 helper for you. Besides, we're currently hunting the Dusk Palace Master. If you find this person's whereabouts, report to me immediately." The Water Demon Lord's statue shattered, its voice fading.

Chapter 2858: Reverse Strike at Level-10! Blood Armor Complete Body!

The Old Sea Dominator muttered:

"One Level 9 demon, and so many Level 10 demons still haven't resolved it. Is this Dusk Palace Master truly as terrifying as the legends say?"

"Report! My Lord, the Nine-Whisker Demon King has fallen!"

A Level 9 demon hurriedly rushed over.

The Old Sea Dominator frowned and asked:

"Who killed him? Was it the Whale Emperor?"

"Hehehe... it was me!"

As he spoke, the body of the Level 9 demon began to twist, swell, and a billowing black smoke spread out. Accompanied by the deafening roar of a dragon, a pitch-black, ferocious giant dragon soared up, flapping its wings that blotted out the sky, and its thick dragon breath shot directly at the Old Sea Dominator!

Boom!

Caught off guard, the mighty Demon Body flew backward, collapsing several Demon Mountains, and crashing into a group of innocent demons before finally stopping.

"Who are you?"

The Old Sea Dominator looked at its transformed subordinate with vibrating eyes, noticing that the tough demon scales on its chest had been cracked.

Was it parasitic possession?!

What exactly is happening?

It roared in anger, and a boundless demonic aura erupted, sweeping across a thousand miles, with its wings raising a vast, endless black ocean.

As a Level 10 Early Stage demon, although it was considered relatively weak in the Abyss, it had mastered the full Power of the Twelve Layers of Demon Realm.

Including the Water Domain and Poison Domain!

These powers intertwined, finally giving birth to its Level 10 Domain, named [Lightless Black Sea], possessing the ability to corrode all things!

Once the domain is activated, ordinary Level 9 demons can't even get close, which is one of the essential differences between Level 9 and Level 10 demons.

The commotion alerted other strong beings in the barracks, as one after another Level 9 figure flew over and asked: "My Lord, what's the situation?"

"We are under attack, quickly surround the barracks! Someone has infiltrated."

"As you command!"

The mighty Demon Army surged in layers, inside and out!

Hundreds of mountains levitated, forming a grand array!

The black dragon turned into a beam of light, once again attacking the Old Sea Dominator. Upon entering the [Lightless Black Sea] domain, it was like a clay ox entering the sea, beginning to disintegrate. Before it could get close, its flesh and blood merged into the seawater and vanished into smoke.

"Hmph!"

The Old Sea Dominator looked around with raised head and said loudly:

"Dusk Palace Master, stop hiding."

After speaking, a water column stretching ten thousand miles long shot out from the Black Sea domain, aiming at a void shrouded in darkness. The space shattered like a mirror, and beams of golden light poured through the cracks, illuminating the darkness.

The Six Holy Heavens descended!

On the Golden Throne, Levi stood up.

The demon lord of this remote land also knew his name. Unknowingly, he had become famous throughout the world!

"So it really is you! Was it you who killed the Nine-Whisker Demon King?"

"It was me."

Levi held his sword, stepping onto the golden stair, advancing step by step.

With each step, it was as if he trampled on the hearts of countless demons. That terrifying killing intent, formed by slaughtering billions of demons, made them shudder with fear!

Just how many demons has this guy killed?

The demons didn't know, nor did Levi.

Who keeps track of how many slices of small bread they've eaten in their lifetime?

"So arrogant, daring to storm a Demon Camp alone?!"

A Level 9 demon rushed at Levi first, obviously refusing to believe in legends.

Levi raised his hand and unleashed a Sword Qi that tore the sky and earth asunder!

The Level 9 demon felt danger in an instant, but it was too late.

Just when it thought it was about to die on the spot, a Black Water Wall suddenly stretched out in front of it, blocking the deadly Sword Qi. Its heart was shocked, realizing that someone truly could instantly kill a Level 9 of the same realm!

Fortunately, the Lord stepped in to save it. Just as it was about to retreat, a bloody light tore through the void, and a hand clad in Blood Armor pierced through its chest, grasping a black crystal core as black demon blood flowed.

It looked behind in disbelief.

A terrifying blood-colored figure appeared, its aura giving the impression of having one foot already in Level 10, even stronger than the Dusk Palace Master!

The Blood Battle Spirit smirked, its expression mirroring Levi's at that moment.

Trying to save someone from his grasp? No way!

The countless demons were all terrified.

They stared blankly at the Blood Sea, with billions of blood-colored wraiths struggling within, each resembling a demon, with many of their Fish Demon kin among them.

The demons couldn't help but wonder again.

How many demons has this guy killed?

All the demons in this battlefield combined didn't even outnumber the wraiths surging in that Blood Sea...

Is this the demon meat grinder on the Nora Battlefield?

Though they had never been there, all the demons felt the despair and helplessness of those three full-scale wars!

The Old Sea Dominator looked at the blood-colored figure with a solemn gaze.

"Body Separation?"

Some Level 10 rulers liked to dabble in such unorthodox methods, generally able to exert part of Level 10's power.

"Is this your trump card?"

From within the Lightless Black Sea, black water columns shot out like a dragon sucking water, as if the Land of Darkness sprouted tentacles, each stretching ten thousand miles long.

"Die!"

These tentacles were things that ordinary Level 9 demons wouldn't dare to confront head-on, touching them meant instant death. Perhaps a Late Stage Ninth Level demon could handle one or two.

"Kill!"

Levi and the Blood Battle Spirit attacked simultaneously!

The golden light shone like a Golden Star, grand and majestic.

The blood light was like a demonic star, eerie and bloody!

Two vastly different Sword Qi cleaved through the water columns and huge waves, rushing overhead in the black sea domain, slicing through with heavenly avenues.

The Old Sea Dominator plunged into the Black Sea, with its head's tentacles diving into the void, aiming directly for Levi's back.

Chapter 2859: Reverse-Slashing Level-10! Blood Armor Complete Body!

Body Separation is not important; solving the main body is naturally enough.

The spell protective force field on Levi's body layer upon layer, endless, but at the moment it encountered the Tentacles, it began to collapse, eventually tearing apart the Fourfold Vajra Sacred Realm, but what awaited it was the Fivefold Destruction Holy Domain.

The ultimate in power, Flame Dragon of World Annihilation!

The Tentacles now exhausted its power and was annihilated by the Power of Destruction Sanctuary, as the flames surged upward like ignited fuse.

Old Sea Dominator quickly severed the Tentacles and grew new ones.

"A bit difficult, no wonder the Demon Lord values it so much."

It dismissed all carelessness and fully engaged with this person.

The rumors weren't false; the actual person was even more exaggerated than hearsay!

At the same time, in the Demon Camp, squads of fully armed Demon Army surrounded to kill Levi, encasing him like a dumpling.

Suddenly.

In the shadows of darkness, ghostly lights fell on the camp, finally transforming into the figures of Shadows, primarily Demons, mixed with some alien races, angels and the like.

Rumble! Eight Shadows emanating level 9 momentum hoisted the Eternal Star Abyss Wizard Tower down from the sky, forming the Eight Formation Map!

In an instant, the Demon Camp fell into chaos.

Proficient in assassination, the Shadow Creatures pierced into the Demon Camp like a sharp blade, disrupting their formations, and upon emergence, many demons perished.

Snake coils with crane soaring, tiger leaps with dragon flying!

Cloud Drop and wind rise, ground overturns and sky tilts!

Achievements surpassing three divided states, fame forged in the Eight Formation Map!

The moment the giant octagram combat array centered around the Wizard Tower formed, the Shadow Dragon Group commenced their one-sided massacre of the Demon Army.

Four Wonders of Beasts' phantoms shook the heavens and earth!

Four Symbols of Heavenly Calamity carried the might of the universe!

Old Sea Dominator suddenly felt uneasy.

Its subordinates were completely no match for Levi's group of summoned creatures. Under such circumstances, even if it won, it would be a lonely commander without troops!

It unleashed the Power of Twelve Layers of Demon Realm fully, the entire Black Sea inverting, from which emerged a gigantic demon face spanning miles, intent on devouring Levi.

Blood Battle Spirit showed no fear, wrapping the Blood Sea, rising from the ground.

Black and blood collided between the heavens and the earth, shattering miles of space.

In the turbulence, Levi seized the opportunity to activate the Invisible Secret Word.

He donned the Supreme Blood Armor, not dodging, enduring the attack from Old Sea Dominator head-on, rushing to its front and activating the [Bath Blood] state!

The basic six dimensions soared by 50%.

His spiritual force also climbed from over 62,000 to over 93,000!

A near level-10 powerful spiritual force swept through, causing Old Sea Dominator's face to change drastically for the first time, muttering a silent alarm!

Boom!

Chaos Dragon and Primordial Spirit Emperor combined, forming Nine Suns Suspended in the Sky, All Creation Thunder, Long Whale Suppressing the Sea... and many such anomalies.

Talent, primordial soul spell emerged together! All spells resonating!

Levi's vast Chaotic Power frantically consumed!

"Extreme Dao Strategy" also pushed to the extreme by him, a dazzling Sword Qi brighter than daylight emerged, slashing onto Old Sea Dominator before all spells! .

Simultaneously, the Eight Formation Map split open the Demon Army's defenses, carrying the power of heaven and earth, transforming into a vast black star spanning miles, plummeting to the horizon!

Blood Battle Spirit exploded and self-destructed under the demon face's devouring, allowing escape.

It swiftly emerged within the Blood Battle Armor, sweeping away with a whole Blood Sea, locking Old Sea Dominator's retreat with blood-colored sword light!

Eight Formation Map + Blood Battle Spirit + Bath Blood explosion!

This was Levi's strongest strike exerted with full force!

He had to deal a heavy blow or even kill this demon, otherwise, if it escaped, Lady Rowling would have to act, and then the Blood Battle Armor couldn't be unsealed!

First, Sword Qi sliced the troll in half, followed by colorful magic radiance engulfing the Old Sea Dominator, finally, the black starry sky enshrouded everything.

This set of combos bewildered the Old Sea Dominator.

Its protective domain was torn apart, its indestructible demon scales flew off in large chunks, flesh evaporated under Holy Light and flames, demon bones shattered within Sword Qi, its Demon Soul decisively left the body, bursting to the horizon!

Welcoming it was an immense flowing Mother River!

A small golden armor figure riding a Hell Warhorse slashed, golden light shattered the void, slicing the Demon Soul into two, starting to disintegrate.

"Nether... Nether Emperor?"

Old Sea Dominator's heart and mind trembled.

Boom! Boundless Blood Sea Sword Qi engulfed it, countless evil spirits gnawed, like ants annihilating groups, with another batch waiting, weakening the Demon Soul further.

It's time!

"Blood Sacrifice Blood Armor! Unseal!"

Levi chanted the incantation.

Blood-colored armor emitted thousands of tentacles, piercing into the Demon Soul and Demon Body.

Gurgle! Gurgle!

Accompanied by sucking sounds, the blood-colored armor began to change.

The metal armor seemed to transform into a mass of living flesh, writhing, swelling, the boundless Blood Sea spreading until covering miles.

Blood Battle Spirit turned into light, vanishing within the Blood Sea.

Soon, the demon flesh throughout the sky was completely devoured.

The blood-colored armor glowed brightly with the rich golden light of legends around it. Step by step it walked to Levi, transformed into blood light, merging with the limbs and bones.

Simultaneously, lines of characters started to emerge before Levi's eyes.

[Equipment Name: Blood Battle Armor (Golden Legend)]

[Equipment Level: Supreme Treasure]

[Equipment Effect: Blood Battle]

...

Levi noticed, after [Bath Blood], [Berserker], [Devour], [Growth], a few new effects appeared.

[True Immortal God: The main ingredient for refining the Blood Battle Armor includes "Blood of Multiplication", a relic of the primordial existence "Eternal Heart", containing supreme traits. Once you completely merge with Blood of Multiplication, you cannot be killed by any non-supreme existence.

Chapter 2860: Reverse Slaughter at Level-10! Blood Armor Complete Body!

Wizard: Starting With the Knights Breathing Method

You can leave your Blood Mark anywhere in the Multidimensional Plane. There's no time or distance limit to the Blood Mark. When you're killed, your soul will be reborn at the Blood Mark.

Note: Resurrection takes one hundred years.]

...

[Unyielding: The Blood Battle Armor can remember all the combat techniques, physical techniques, and spells you have mastered. During your rest or resurrection period, the Blood Battle Spirit can still automatically track, find, and hunt demons! It never stops, sustaining battle with battle!

Note: If there is no demonic aura within a million miles, the Blood Battle Armor will automatically stop working and return to your side.]

...

[Unbreakable: When you are in the Abyss World, this Special Effect will automatically activate. You will be exempt from interference from all levels of demonic aura; exempt from the rules suppression brought by the Abyss World; exempt from part of the mental interference from the Supreme Will. The larger the number of Abyss Layers you are in, the stronger the Blood Battle Spirit can exert itself. Each deeper layer increases the six-dimensional Defense Attributes of the Blood Battle Spirit by 1%.

Note: After Abyss layer 666, this special effect will be suppressed. You need to upgrade the equipment to truly resist the supreme might.]

...

[Steel Body: In the event of an unexpected disaster, should your Divine Soul be exterminated and unable to be reborn, the Blood Battle Armor will use all accumulated Demon Power as energy. The armor itself will act as the body, and the Blood Battle Spirit will serve as the primordial soul, crafting a clone embodying your full knowledge, skills, and life experiences, yet devoid of human emotions and spirituality. The clone will continue the blood battle mission until the task is completed without rest.

The clone has no lifespan limit, akin to intelligent machinery, and will not naturally die unless the parts become damaged.

Please note:

Although the clone retains all your memories, the armor's creators think this might not be the original you, involving very complex ethical issues.

The clone cannot replicate the Supreme Level strengths, whether it's spells or bloodline. Life only happens once, cherish it!]

...

After reading the four new Special Effects, Levi's heart was shaken.

Each one is extraordinarily strong, born for the blood battle. Especially the first [True Immortal God], which formed a perfect complement with his Power of the Green Emperor Dragon. As long as he spreads his Blood Marks throughout the Universe, he would not die.

Of course, the premise is not to provoke the Supreme Existence. With their means, Sauron could be killed, not to mention a mere blood battle armor's ability.

"No wonder this armor has the potential to become a Cosmic Level Treasure. Inside it actually has primordial relics, [Eternal Heart] sounds like a bug-level life form... Just that this rebirth requires a century-long cooldown, best not to use it."

As for [Unyielding], it's still an idle skill.

[Unbreakable] is prepared for counter-attacking the Abyss. With armor on, before layer 666, you're invincible. Afterwards, with Level 11, this armor won't suffice.

Regarding [Steel Body], it's Sauron's last hope for civilization.

Even if this backup plan of Levi was erased by the Supreme Existence, he can still resurrect in disguise with the armor as body and Blood Battle Spirit as soul.

It's just that the "Levi" would truly be a "robot". No human emotions or spirituality, solely for completing the demon-slaying mission. As long as the Abyss exists, it would keep hunting, unless erased by the Supreme Will.

Essentially akin to [Nora Ark], strong as Sauron, he doesn't have absolute confidence in his plan.

Only a few battles are successful battles with no retreat.

Rationally speaking, Sauron must leave many sets of plans and backups.

It's no child's play to confront giants!

Moreover, Levi also discovered.

Both [Bath Blood] and [Berserker] Special Effects were enhanced.

The former's All Attributes increase turned into 70%, while the latter's range of attraction for demons expanded from ten-thousand miles to [million miles].

In other words, [Berserker] and [Unyielding], this idle special effect, formed a perfect combination. The former lures monsters, the latter lets the Blood Battle Spirit fight monsters 24/7.

No need for Levi to intervene, he only needs to cultivate at home.

"Awesome... Next, I'll idle my way all the way to Nelarayan World!"

Levi swiftly returned to the Golden Throne to rest and recover his strength. That attack he just issued was an extreme ascension, and now his spiritual force was utterly exhausted.

After a 70% increase, his Maximum spiritual force had already exceeded 100,000 points.

This means he's practically a semi-legendary wizard when he goes all out, lacking only legendary spells, profession, knowledge, and higher quality spell power.

The Blood Battle Spirit charged into the battlefield, continuing to sweep away the remaining demonic troops. Levi closed his eyes, waiting for the war to end.

The demons within the barracks all changed their expressions, feeling as if the sky had collapsed.

"Boss... Boss is dead."

"How is it possible? It was level 10!"

"What realm is this person in?"

Despair and helplessness spread among the Demon Army.

Originally these demons were chaotic, now leaderless, they're scattering like birds and beasts, with no staunch resistance. .

This allowed Levi's legion to advance more smoothly.

Buzz!

Buzz!

Two more terrifying calamity clouds swept through the sky and earth, three Level 8 Peak Shadows, including angels, demons, and alien races, once again advanced to Level 9!

The Twelve Demon Kings formed, for the sake of unifying naming conventions, all Level 9 are named as demon kings, not necessarily implying they are demon shadows.

The number of monsters also continues to rise rapidly.
