

Wizard 286

Chapter 286: Eleventh Level! (2)

The Flame Robe and the Thunder Spear, when Levi thought about it, he found them cool.

"Now, other than cultivating experience, there are two more important things to do. One is to find transcendent creatures that might contain the Undying Bird Bloodline, and the other is to find the seals' inheritance of the Duncan family and the Van Helsing family."

The Undying Bird Breathing Technique was very important. Levi had to cultivate it to the maximum level as soon as possible. This way, he would have a higher tolerance rate in battle. His powerful physique would allow him to have a low-level version of the Blood Clan's immortal body. Seals were equally important. It might be the only way to change his Children of Chaos talent and fate to become a genius of the four elements.

It was not difficult to find clues about the four great families in the Wizard World, because the four great families in the human world were established in the mortal world by the descendants of the four powerful Grand Wizards in the Wizard World. These descendants were the 'ancestors' of the four great families mentioned in the letter.

These four powerful Grand Wizards were all wizards from ancient times. They no longer existed, and they might have fallen.

After all, although wizards had a long lifespan, it was only relative to the short-lived species. Compared to the long-lived species, the lifespan of wizards was completely proportional to their strength.

A Third-Circle Wizard was extremely powerful. Under normal circumstances, they could only live for more than 500 years. They could not even live as long as Knight Anderson, a first-generation Secondary Blood Clan.

The higher-level wizards might have a lifespan of more than a thousand years, but compared to their powerful strength, this lifespan was not very long.

It was as if there was an unseen will balancing all of this.

Wizards possessed great wisdom and strength, but they had never been able to completely understand the mysteries of immortality.

Otherwise, with the speed of progress of the wizard, they would probably be able to take down the high and mighty gods of the astral world.

During this period, Levi also found some information about the four great families through various channels. However, he realized that this information was not very complete, and there was very little useful information.

Moreover, a lot of information ultimately pointed to the human world.

He felt that if he wanted to obtain seals inheritance of the two other families, he might have to start from the human world.

With Andrew acting as his agent in the human world, Levi naturally did not have to go back personally. He sealed the clues he had collected about the four great families and packed some things that he wanted to send back to the human world.

He contacted the messenger from the Owlery and planned to ask Andrew to increase his search according to the clues he had found.

The Year 1020 of the Holy Brilliance Calendar, the Month of Beginning.

The owl flew to the Gray Tower and transformed into Miss Messenger, whom Levi had met before.

"What a coincidence, beautiful lady. How should I address you?"

Levi smiled slightly.

Miss Messenger was expressionless, and her slender legs were faintly visible under her black veil. She did not answer Levi's question, but said, "The shipping fee is 100 Aether Stones, please pay."

"Can it be cheaper?"

"Alright then."

Levi tried to get close to them to reduce the cost of the shipping.

It was obvious that his charm was not good enough and he had completely failed.

Miss Messenger was like an iceberg, always with that cold and aloof expression.

After receiving the letter, Miss Messenger suddenly said, "Now to answer your first question. My name is Eve, and I'm the messenger of the Owlery number 1024. I'm in charge of the mail service in your area."

With that, she waved her wand, transformed into an owl, and flew away.

"So expensive, 100 Aether Stones. This is daylight robbery."

Levi felt a little ache in his heart.

Even with his current wealth, he could not afford such a high price.

If it wasn't for the fact that the matter of the seals was rather urgent, Levi definitely wouldn't have wasted his money.

However, considering how troublesome it was to travel between the human world and the Realm of Azure Cloud, 100 Aether Stones was actually not very expensive.

Among the things Levi mailed this time, there were clues and information about the four great families as well as a reply to Andrew.

There were also some Aether Stones that he returned to Anderson. After all, Levi was too embarrassed to ask the old man for so many Aether Stones for free.

Before Levi planned to continue his closed-door cultivation, he suddenly received news that the Tower Master seemed to have something to discuss with him.

Levi hurried to the White Tower.

He used Jorman to travel there and arrived at the seventh floor of the White Tower.

In a special meeting room, the Tower Master and three other official wizards were waiting for Levi.

"Hello Tower Master, hello teachers." Levi's heart skipped a beat.

So many official wizards gathered together, it seemed like there was something going on.

The current Tower Master did not seem any different from the first time Levi had seen him.

However, Levi knew that these were just appearances. Under the fake flesh and blood body was the alchemy body of the Tower Master.

"Have a seat, Levi," said Ms. Marlene.

Levi obediently sat at the side, waiting for the official wizards to speak. After a moment of silence, the Tower Master said, "Marko, you say it."

Mr. Marko nodded and said seriously, "Levi, you should have heard of the

Shadow Realm."

Levi nodded, "Yes, Teacher. I learned a little about it in General Education class, but not much."

The Shadow Realm was also a type of Realm of the Unbelievers.

It was also in the sub-dimensional portal.

However, due to all sorts of strange and bizarre reasons, the Shadow Realm did not have a large number of wizards gathering like the Realm of Azure Cloud, so it was also known as the Uninhabited Realm.

If the Realm of the Unbelievers in the Realm of Azure Cloud was a huge sub-dimensional portal bubble, then there were other bubbles of different sizes floating around the Realm of Azure Cloud..
