

Wizard 288

Chapter 288: Eleventh Level! (4)

"Moreover, my teacher spent a lot of effort to obtain these two spots for our Gray Tower. This is an extremely precious opportunity."

"Take advantage of the time when Demon Harland is severely injured and has no time to cause trouble. You should hurry up and study. When the time comes, you will bring more advanced knowledge from the Star Tower. It will benefit our Gray Tower endlessly."

"Right, Marlene, I have a Wizard Tool here, give it to Levi."

The left chest of the Tower Master suddenly opened. Among all kinds of metal alchemy prosthetics, a beating heart was connected to all kinds of alchemy prosthetics.

Beside the heart was a black ring.

It was engraved with complex and profound spell runes.

"This is the Ring of the Wind Spirit? Isn't this your lover's..."

Marlene's expression changed slightly, and she was a little puzzled.

The Tower Master took out the ring and assembled the lid.

Then, he said, "Yes, this is her ring. If I fail to do what I'm going to do next, the ring can't be covered in dust."

"Although Levi hadn't joined the Gray Tower for long, he had already helped us a lot many times. He has unanimously passed everyone's test. As a legendary Knight, he is quite strong, but he still lacks methods. I've decided to give this ring to Levi. With this ring, Levi could make up for some of his shortcomings as a knight."

The Tower Master's expression was somewhat melancholic. Only he knew how difficult it would be to succeed in what he was about to do next.

He had even made a series of arrangements, including letting Marlene be the Tower Master if he died.

"Alright, I'll hold onto it. If Levi doesn't go to the Shadow Realm, I'll return it to you," sighed Marlene.

"It's fine. Whether he goes or not, I'll let Levi take it. It's just a first-circle Wizard Tool, I can part with it. I have nothing else for you all to do here, so everyone can leave," said Tower Master.

The wizards left, leaving the Tower Master sitting there alone with a heavy heart.

After obtaining the information about the Shadow Realm's Black Fog Realm, Levi quickly finished reading it.

According to the classification of the Pan-Plane Wizard Council, the Shadow Realms were divided into small, medium, large, and extremely rare giant Shadow Realms.

As a small-scale Shadow Realm, the highest danger level in the Black Fog Realm was only at the second-circle. Most of the areas were not at the first-circle type of danger.

From the previous cases, even if it was an apprentice wizard, as long as they were careful, the survival rate was quite high.

Of course, there were also cases of First-Circle Wizards dying inside, but the probability was not high.

However, the problem was that a precious material like Stone Heart, even if it was not in the core danger zone, might not be too far away from it.

Moreover, the Stone Heart was not only an alchemy material, but also a material for refining potions and Wizard Tool. It was a true treasure.

Levi believed that other than the Tower Master, there should be other people who were also interested in this material.

This meant that Levi was very likely to have conflicts with people from other organizations. If that was the case, there would be a certain degree of danger.

"However, according to the information, there is a transcendent creature called the Black Flame Demonic Bird living in the Black Fog Realm. This transcendent creature is one of the few transcendent creatures with the Undying Bird Bloodline that I found some time ago."

After all, not all mythical creatures were like the Dragon Clan with a bunch of hybrids and sub-dragons.

So far, there were very few transcendent creatures that had been confirmed to have the Undying Bird Bloodline.

The Black Flame Demonic Bird was one of them.

This kind of bird used to be distributed in small groups in some of the Realm of the Unbelievers, but because of the wizards' hunting, it was almost extinct in the Realm of the Unbelievers.

Only some of the Shadow Realms still had a population of the Black Flame Demonic Bird.

The Black Fog Realm was one of them.

Levi's idea was that if he could capture a Black Flame Demonic Bird alive, he could learn the beast-taming spell of the School of Spiritualism and tame the Black Flame Demonic Bird. Then, he could completely solve the problem of the secret medicine for the Undying Bird Breathing Technique.

Other than that, the materials needed to refine the Meditation Art's supplementary potion could also be found in the Black Fog Realm. All in all, this place had risks, but there were also many opportunities.

Therefore, Levi was a little tempted.

"There's still a month before the entrance of the Shadow Realm is opened. As long as I become a legendary knight this month, with my combat strength at that time, it shouldn't be a problem if I'm a little careful."

"Moreover, they didn't force me to obtain the Stone Heart. If it is beyond my ability, I will just give up. With Tower Master's and Ms. Marlene's personalities, they wouldn't blame me. At most, I wouldn't get any points."

Levi analyzed the pros and cons repeatedly and decided whether he should go or not.

Ms. Marlene also brought over the ring that the Tower Master had given Levi.

"This is the Ring of the Wind Spirit. It used to be the Wizard Tool of the Tower Master's lover. This ring itself is a storage tool, and its space should be larger than all the storage bags you have now combined."

"The First-Ring Spell of the Storm School of Thoughts: Wind Spirit Shelter." "After casting this spell, the wind elements will gather around you, forming a wind mist armor that is enough to block most First-Circle Spells. Moreover, the wind spirit will wrap you up, giving you the ability to fly for a short period of time. Your speed is about the same as when I cast a flying spell. If you use it at a critical moment, it should be enough for you to survive in the Black Fog Realm.'

"Of course, if you don't want to go in, don't force yourself. The Tower Master won't force you."

Ms. Marlene looked at Levi, who had a grave expression on his face and comforted him.

"Teacher, I will go, but I have a request." Levi took a deep breath and said.

"What request?" asked Ms. Marlene.

"I want to go alone without apprentice wizards," replied Levi.

"Ah... Although you are strong, it would be better to have five high-level apprentice wizards to assist you than to fend for yourself alone inside," said Ms. Marlene as she smiled bitterly.

Levi shook his head, his expression firm.

"Alright then. I'll go and talk to the Tower Master." Ms. Marlene was helpless.

She handed the Ring of the Wind Spirit to Levi and told him the incantation before leaving in a hurry.

Levi watched as his teacher left. He fumbled around with the Ring of Wind Spirit and put it on his finger.

He felt that bringing along five apprentice wizards was more of a burden than providing help, and he had to divert his attention to protect them.

Otherwise, he would not be able to explain himself if all five apprentice wizards died inside.

It was better to go in alone and have no worries.

In the end, the Tower Master agreed to Levi's request.

Levi would be going alone for the exploration of the Shadow Realm in a month's time.

Levi, on the other hand, was completely focused on cultivating the Black Snake Breathing Technique.

He wanted to cultivate the Black Snake Breathing Technique to its maximum level within a month.

According to Levi's cultivation speed, the Black Snake Breathing Technique should reach its limit this month.

Now, Levi had even put aside some other cultivation and focused on training the Black Snake Breathing Technique. As a result, the rate at which the Black Snake Breathing Technique was leveling up increased rapidly.

At the end of the Month of Beginning, the week before the opening of the Shadow Realm entrance.

On a calm afternoon, Levi had successfully upgraded the Black Snake Breathing Technique to Level 11.

Levi—

[Black Snake Breathing Technique: Level 11 (Maximum), Special Effect: Black Scale (Solid State)]

Levi had finally become a legendary knight.

He had developed his first supernatural organ.

However, the position of the supernatural organ was somewhat out of Levi's expectations..
