

Wizard 289

Chapter 289: Advanced To Legendary, His Strength Has Soared! (1)

In front of the mirror, Levi opened his mouth, and a hair-raising scene appeared.

In Levi's mouth, the seemingly ordinary tongue suddenly split into two and stretched out a full foot from his mouth. It coiled in the air like a tentacle.

His tongue turned into something like a snake's tongue.

Then, with a thought, his tongue began to shorten and contract, turning into a tongue similar to that of a normal person and returning to Levi's mouth.

That's right, this was the supernatural organ that was developed after Levi advanced to the legendary level.

It was not the Black Scale that he had expected, but something unexpected.

His tongue had actually turned into a forked structure similar to a snake's tongue.

Of course, under normal circumstances, Levi's tongue looked no different from an ordinary person's.

Otherwise, Levi felt that this was too strange. If he was discovered by some wizard from the School of Monsters, they would definitely treat him as a notorious lizardman and capture him for research.

As the supernatural organ did not appear on the proficiency panel, Levi did not know what it should be called.

He named it the 'Black Snake's Message'.

After some preliminary research, Levi roughly understood some of the functions of this supernatural organ.

This supernatural organ was a large-scale, high-precision smell perception.

He was currently on the ninth floor of the Gray Tower.

He could clearly smell the foul breath of Leviathan, who was sleeping on the coast more than ten kilometers away.

He could perceive the different auras of every apprentice in the entire Gray Tower. These auras were something that ordinary people could not sense or distinguish. On Levi's side, however, he could clearly see the unique aura coordinates.

These unique and different coordinates formed a huge circular map in Levi's mind, just like the 'mini map' in the upper right corner of some games.

Within the map, Levi could perceive prey and targets through the smell dimension.

These auras were stored in Levi's tongue, forming a huge aura vault.

As long as something that was stored in the aura vault appeared within Levi's perception range, he could immediately sense it.

This Black Snake's Message, coupled with the Man-Faced Spider's high-level vibration perception and the Night Owl's high-level hearing...

This caused Levi's Perception to reach an extremely exaggerated level. Extremely fine vibration perception, large-scale hearing perception, and large-scale smell perception.

Levi's ability to detect information about his surroundings was something that even a Second-Circle Wizard could not compare to.

At least, as far as Levi knew, whether it was the detection spells in the cantrip or the detection spells in the first and second circles, were there any that could sense and detect in so many dimensions, levels, and large areas?

None!

"I didn't expect that the supernatural organ that was developed after reaching the Black Snake Breathing Technique legendary level would actually be of the auxiliary type."

Although it wasn't a combat-type supernatural organ that Levi had expected, he wasn't disappointed at all.

After all, it could be seen from the rarity of breathing techniques like the Man-Faced Spider and the Night Owl.

The Perception attribute was the rarest.

Furthermore, after reaching the eleventh level of the Black Snake Breathing Technique, he already possessed the Solid State Black Scale. Its defensive power was not inferior to a first-ring defensive spell, and was even stronger than Golden Protection.

With such a defense, Levi was invincible against a normal First-Circle Wizard.

It should be known that the Solid Black Scale did not have any casting speed or spell power restrictions, just like Levi's innate ability.

As long as Levi's black gas continued, it could be produced continuously.

This was the strength of the breathing technique.

The disadvantage was that it took too long to cultivate it.

With the help of the proficiency panel and the secret medicine, Levi had taken seventeen years to get to where he is today.

If it was anyone else, it would basically be impossible.

Levi willed it, and the black gas wrapped around his body, eventually condensing into a solid Black Scale.

These Black Scales were layered, and as Levi willed them to open and close, the sound of metal clashing could be heard.

This was the Solid Black Scale. From the outside, it looked no different from a real snake scale.

Levi's body was covered in snake scales, and the snake tongue that stretched out of his mouth was twisting. Coupled with his tall and burly body, he was filled with a barbaric and unruly aura.

"I feel so safe and secure!"

Levi looked at this and stuck out his tongue.

Then, he retracted his tongue and removed the Black Scale.

Now that he had advanced to a legendary knight, there were still seven days before the opening of the Shadow Realm.

During this period, he needed to do some preparation work.

Poison, sacred medicines, mana potion, health potion, Sleeping Potion, the four great seals, some cantrip Casting materials, Lion King's Pride, Frostmourne, and so on.

There were a lot of things that needed to be prepared. Because Levi had obtained the Ring of Wind Spirit, the Bag of Gluttony that had accompanied him for a long time was left at home to eat dust. However, Levi still prepared a large amount of blood food for this guy.

After using it for so long, he had developed feelings for it. Although the version of the Bag of Gluttony was ancient and there was a risk of losing items inside it, Levi was reluctant to throw it away.

It had to be said that the Ring of the Wind Spirit was really a good item, not to mention the large storage space inside.

That First-Ring Spell could not only fly but also protect.

Levi had experimented with it before and found that its defense was very strong, enough to block two of Leviathan's Dragon King's Breath.

In terms of flying speed, it was twice as fast as the explosive Blood Wings..
