

Wizard 291

Chapter 291: Advanced To Legendary, His Strength Has Soared! (3)

Not long after joining Sighing Sea Breeze, Fist of the Empire had successfully stepped into the legendary knight realm. His strength was no weaker than an ordinary First-Circle Wizard.

Sighing Sea Breeze had not announced it so that they could use the hidden trump card, the Fist of the Empire, to surprise some important events in the future.

"Docket, I owe Herman a favor. For this operation, help the people of the Gray Tower to the best of your ability. They do not seem to be led by an official wizard, so it would be difficult for them to gain anything in the Shadow Realm. Your first task is to obtain more resources. It's only necessary to attack once when the apprentice wizards of the Gray Tower are in a life-or-death crisis."

"As for Emperor Mu, you should try your best to avoid fighting in the early stages. I will let Docket and the others protect you. I hope that you will return from this operation with plenty of rewards," said Sage Mason.

"Alright, Mr. Mason."

After saying goodbye to Sage Mason, Docket and Fist of the Empire also left Sighing Sea Island.

During the past few days, the Dark Sea Cave, the Lost Ancient City, and other Second -Circle Wizards, even some first-circle wizard organizations, or those who lived alone on the island with only a few apprentice wizards under their command, all went to the entrance of the Shadow Realm.

Every exploration of the Shadow Realm was a feast where all the forces gathered. The strange and colorful Shadow Realm seemed to have endless temptation, attracting the wizards.

After Levi made his preparations, he set off on his own. He rode the Dragon King Whale and rushed towards the entrance.

The Dragon King Whale was much faster than the Azure Ship.

Therefore, when Levi arrived at the entrance of the sea, he realized that he was actually the first few to arrive.

In the center of the sea ahead, a thick black mist was swirling and twisting.

"Is this the intersection of the Black Fog Realm and the Realm of Azure Cloud?" Levi stood on the back of the Dragon King Whale with a calm expression.

This scene made Levi think of the place where the blue frost plane and the human world met in the Multidimensional Plane. It was also filled with strange blue light.

Levi was resting on Leviathan. He represented the Gray Tower and came here alone, which surprised the other organizations.

While Levi was waiting, the people of Whale Song Island arrived.

They rode on a high-level apprentice wizard's sea beast, Blue-Patterned Whale, and arrived at this place.

However, the Blue-Patterned Whale whale felt uneasy.

This was a sea beast tamed by a wizard from the School of Spiritualism on Whale Song Island.

Bane's expression turned cold. Such a situation meant that there was a high-level transcendent creature nearby that the Blue-Patterned Whale feared.

As expected, he quickly noticed that it was in an inconspicuous corner. A ferocious-looking Dragon King Whale was leisurely floating on the surface of the sea.

On its back, there was a tall and burly gray-robed wizard with two swords on his back. His robe was embroidered with moon patterns.

Levi had followed Marlene to Whalesong Island, so Bane knew Levi.

He looked around and found that other than Levi, there were no apprentice wizards from the Gray Tower.

"What's going on? Has the Gray Tower given up on this exploration? Throw away the pot?" Bane was confused.

He didn't understand why only one person from the Gray Tower had come.

Although Levi was a legendary knight according to their intelligence, it was too naive for a knight to think that he could fight against an official wizard and five apprentice wizards from other organizations!

There must be something wrong with this abnormal situation!

Bane said cautiously, "After we enter, we'll find a place to deal with the legendary knight of the Gray Tower."

He transmitted his voice to the five apprentice wizards.

Levi was not a simple person. To be able to tame the Dragon King Whale meant that he was quite capable. Therefore, Bane would not underestimate Levi and would have to go all out.

Hearing the voice transmission, the other four high-level apprentice wizards nodded slightly.

Jagri hesitated, but he did not say anything.

As the apprentice of Whale Song Island, he was powerless to make any changes and could only obey the orders of the organization unconditionally.

On the Dragon King Whale, Levi's expression remained the same, but he was sneering in his heart.

"Fortunately, I have the spider's senses. As expected, these people from Whale

Song Island actually want to harm me!"

"From the looks of it, the news of Ms. Marlene successfully refining the second-circle potion, Eye Devil's Gaze, was definitely released by Whale Song

Island. It's just that the killing intent of those people last time wasn't so obvious, so I didn't sense it."

"Very good. Since you want to harm me, I can't sit still and wait for death. I might as well finish you off in this Shadow Realm. It just so happens that my Saint Scorpions hasn't eaten humans for a long time and is already extremely thirsty."

Levi's heart was filled with killing intent.

He was already thinking about how to deal with this group of people in the Shadow Realm.

Among the six people on Whale Song Island, only Jagri didn't have any hostility towards him.

However, since both sides stood on different sides, Levi would not be merciful.

A day later, the Sighing Sea Breeze people also arrived.

The three-meter-tall Fist of the Empire stood out among these people and was especially eye-catching. Levi noticed him at a glance.

The Fist of the Empire also saw Levi on the back of the whale.

As a legendary knight, he naturally knew that Levi was the recently famous legendary knight of the Gray Tower.

Now that they met again, as expected, this aura should be that of a legendary knight.

His fighting spirit rose, and he really wanted to have a physical fight with Levi.

Levi was the only legendary knight he had ever met. Although Emperor Mu and Levi did not have much interaction, he felt a sense of mutual appreciation in his heart..
