

Wizard 295

Chapter 295: Shifting Shadows, Killing! (2)

Levi had already learned the Deep Sea Meditation Art, and there was a section of the Deep Sea Meditation Art in the Gray Tower. Naturally, he would not waste his time learning the Stingray Mediation Art.

The spells were all spells that he had seen in the Gray Tower, and Levi was not interested in them.

Finally, Levi took the exquisite scroll.

The scroll contained powerful energy.

Mysterious and complicated spell runes flickered on it.

"Shifting Scroll, a second-circle spell tool, a one-time consumable. It has multiple combinations of second-circle spells on it, and the final effect is to shift one's body and shadow and swap positions. Because one of the spells was a lost spell from ancient times, the production process of this scroll was temporarily lost. The value of this scroll is more precious than all of my Wizard Tool and even the Ring of the Wind Spirit combined."

In order to harm him, Whale Song Island did not hesitate to use such a precious tool. Levi did not know what he did to make them go to such great lengths.

Deli was just a low-level apprentice and didn't know about the plans of the upper echelons of Whale Song Island.

Levi felt that if he wanted to know what Whale Song Island was up to, he had to start with the official wizard leading the team.

"As long as you tear open the scroll and recite the incantation, I can swap positions with the wizard leading the team. If I use this function well, I might be able to easily kill the other party."

Levi had a sinister expression on his face. He seemed to be plotting something despicable. He stuck out his snake tongue and looked like a villain.

"However, this Strange Realm can only exist for seven days. I have to complete at least two things in seven days. The first is the Stone Heart, and the second is to capture the Black Flame Demonic Bird."

In this Black Fog Realm, there were many monsters that were native to this world.

The source of the Stone Heart was the first-circle transcendent creature [Rock Troll]. Such transcendent creatures could only be found in specific Shadow

Realms.

The heart of the Rock Troll was called the 'Stone Heart'. It was a treasure rich in Earth elemental energy.

The Stone Heart has a wide range of uses, but its production was extremely low.

As a result, the price of one of them had risen to 10,000 Aether Stones. It should be known that a top-grade second-circle Wizard Tool might cost this much.

As for the Black Flame Demonic Bird, it was not a first-circle transcendent creature. It was almost at the level of a high-level apprentice wizard.

However, the Black Flame Demonic Bird could fly and was hidden in this Shadow Realm. It was quite troublesome to find it.

These two missions were not easy to complete.

Levi had to hurry up.

According to the information provided by the Gray Tower, the Black Fog Realm was divided into three areas.

The outer region was where Levi was currently located. In this region, there were very few ordinary monsters, and their strength was also relatively weak. If a high-level apprentice wizard was a little careful, they could survive for seven days.

As for the inner region, there was a possibility of a first-circle transcendent creature appearing. So far, there were as many as ten types of first-circle transcendent creatures that had been discovered in the Black Fog Realm.

The Rock Troll was one of them, and it was also the most powerful first-circle transcendent creature. It had mastered four spell abilities, and with its innate [Rock Body], its strength should not be inferior to a senior first-circle wizard.

The core area was further inside the inner area.

That should be the source of the black fog in the Shadow Realm.

There might be a second-circle transcendent creature living inside. This was an existence that Levi had to avoid if he met one.

There was a huge difference between a first-circle and a second-circle. The most important reason why a senior First-Circle Wizard was far stronger than an ordinary First-Circle Wizard was that a wizard at this stage had already constructed a second-circle spell model and was ready to break through to the second-circle.

Ms. Marlene, Green Ghost Carter, and Bane were all at this stage.

A true Second-Circle Wizard would have mastered so many powerful second-ring spells that ordinary First-Circle Wizard were no match for them.

Therefore, in this operation, apart from being careful of Whale Song Island, Levi was especially worried about encountering those second-circle transcendent creatures.

Fortunately, he had the Black Snake's Message, Advanced Hearing, and Advanced Vibrosensing. It was almost like he had a radar with him. Any movement in Levi's surroundings could not escape his detection.

From the outer area, he slowly explored the inner area.

Along the way, he didn't meet the Black Flame Demonic Bird he wanted.

He could only continue to venture deeper. The chances of encountering the Black Flame Demonic Bird in the inner area should be higher. After all, the inner area was smaller and the density of monsters was higher.

For the entire day, Levi was traveling at a leisurely pace.

Occasionally, he would encounter some monsters that appeared in the fog, but they were easily killed by him. He did not waste the corpses of these monsters and stored them in his storage bag. These monsters were often unique to the Shadow Realm. Their corpses might be rare potion materials or casting materials outside, and they could be sold at a good price.

The next day, Levi was finally about to leave the outer region.

Levi estimated that the people from Whale Song Island and Sighing Sea Breeze should have already reached the inner region.

Because Levi had a large range of perception, he would kill any monsters he encountered along the way as long as they were not too far away and store them in his ring.

No matter how small a mosquito's meat was, it was still meat.

Along the way, the corpses of the monsters that Levi killed could be sold for more than 200 Aether Stones at the Blacksail Wizard Market.

Apart from that, there were also some corpses of explorers from a long time ago. Their bones had already decayed, and their storage bags had long been taken away by others..
