

Wizard 296

Chapter 296: Shifting Shadows, Killing! (3)

Levi only picked up a broken old wand.

The old wand was an antique. It should be a high-grade wand with three Zero-Ring Cantrip fixed on it. Unfortunately, it was already useless. The spell runes had been damaged and dimmed.

However, the material of the wand was not bad, so Levi kept it.

Till now, Levi had yet to find anything truly valuable items, such as precious herbs and the like.

As he walked, a corpse appeared in front of him in the fog.

Unlike the rotten bones he had encountered along the way, this corpse should have been born yesterday.

Levi could feel the fluctuations of spell coming from it.

"Someone is fighting here."

This corpse should belong to a high-ranking wizard.

Looking at its clothes, it should be the Dark Sea Cave.

The organization's base was located in an underwater cave. The cave master was also a Second-Circle Wizard.

There was also a storage bag around the corpse.

Levi's expression remained the same. He lowered his head and excitedly picked up the storage pouch.

At the same time, the light of the spell pierced through the fog.

Two Water Arrows suddenly shot towards Levi.

Levi sneered and shattered the two spells with his black gas.

Then, he rushed into the fog beside him.

Miserable screams came from the fog.

A moment later, the corpses of two apprentice wizards appeared in Levi's hands. The heads of these corpses were crawling with Saint Scorpions. These little guys were greedily devouring the souls of the apprentice wizards.

The soul of an apprentice wizard was more nutritious and delicious than the soul of a mortal.

The Saint Scorpions, which had been eating the souls and meat of the sea beasts in the Bug House, had long been craving this.

After devouring the souls, the Saint Scorpions still wanted to eat the flesh of the two apprentice wizards, but Levi chased it back to the bug house. He had his own use for the two corpses.

"Hehe, you still want to bait and ambush me? I'll turn you into living dead and make you work for me even after death."

With his extraordinary Perception, he naturally sensed that there were others lying in ambush beside the corpse.

That performance just now was just an act.

He did not know which force these two apprentice wizards belonged to. One was a high-level apprentice wizard, and the other was a mid-level apprentice wizard. Their strength was very ordinary.

"You overestimated yourself," Levi said softly.

Levi picked up the storage bag on the ground and found that it was empty. It must have been divided by the two people. Li Wei looked at the two people's storage bags and saw that there was nothing good in them. He put them away calmly.

He took out the antiseptic on the spot and began to make the living dead.

In this Shadow Realm, no one cared about him.

Levi felt that he could try to use the corpses of the apprentice wizards to create living dead.

When he left the Shadow Realm, he could just pack up these corpses or destroy them.

Levi had never used a wizard corpse to make a living dead before, so he did not know if he could succeed.

After he was done, he began to cast the Seal of Hell.

"O Lonely Soul of Hell, give thee a new life."

As Levi chanted an incantation.

The three Core of the Undead spun and turned into blue rays of light that shot into the foreheads of the three corpses.

Then, the three living dead with blue ghost flames burning in their eyes sat up in unison.

With a thought, Levi gave an attack command to one of the high-level apprentice wizards.

Then, the high-level apprentice wizard instantly waved the wand in his hand and chanted an incantation coldly and mechanically. Then, a water arrow shot out.

He wanted to continue casting spells, but Levi stopped him.

"Seems feasible. He can use his spell."

Levi had been worried that the apprentice wizard controlled by the Seal of Hell would not be able to cast spells.

If that were the case, it would be better to control a Grand Knight than to control a wizard.

Now, it seemed that Levi was overthinking things.

The Seal of Hell was far more powerful than he had imagined.

Among the three living dead, there were two high-level apprentice wizards and one mid-level apprentice wizard. Levi was too lazy to give them names. In any case, this kind of living dead at the apprentice level would soon be eliminated. They were all cannon fodder specially prepared for this trip to the Shadow Realm.

Levi discovered that the living dead made with the corpses of these wizards had consumed one-tenth of the energy of an ordinary Core of the Undead just by casting a cantrip of Water Arrow.

This was much higher than the energy consumption of a Grand Knight.

Basically, after a battle, one Core of the Undead would be wasted.

Levi brought the living dead deeper into the forest.

The next night, Levi entered the inner area of the Shadow Realm from the outer area.

As the fog became thicker and thicker, the gray fog had already turned into black fog, and the sunlight was completely blocked. It was impossible to see one's fingers here, and it was no different from the deep sea.

Levi could imagine how difficult it would be for a wizard who had not learned any tricks like the Illuminating Spell to move forward in the dark.

He was not affected at all. He walked in the fog and used his Perception to sense the aura of his prey.

Along the way, he also met some people from other wizard organizations. He chose to avoid them in advance. After all, they all had official wizards leading them.

As night fell, Levi could feel his body strengthening bit by bit. The magnitude was small, but it was lasting.

This was the effect of the Favored By The Night.

As Levi felt his body getting stronger and stronger, he quickly searched for the

Black Flame Demonic Bird and the Rock Troll..
