

## Wizard 297

Chapter 297: Shifting Shadows, Killing! (4)

Suddenly, a familiar aura began to appear within the range of his Black Snake's Message.

"It's the people from Whale Song Island, but there's also an unfamiliar and dangerous aura nearby."

The person, who had snuck in, was Green Ghost Carter. He had only arrived after Levi entered the Shadow Realm.

Therefore, after becoming a legendary knight, Levi did not record Green Ghost Carter's aura in his aura database. Now that an unfamiliar aura had suddenly appeared, Levi became alert.

Levi did not act rashly. Although he had advanced to become a legendary Knight and his strength had increased greatly, just the First-Circle Wizard of Whale Song Island was enough to make him suffer.

Not to mention, there was also a strange and dangerous aura nearby.

Now, the people on Whale Song Island were in the light, while he was in the dark.

He was looking for the people of Whale Song Island, and they were also looking for him. He had the Black Snake's Message, which had a larger detection range. As long as he wanted to hide, the other party would not be able to find him at all. Just based on this point, he already had an absolute advantage in this Shadow Realm.

His original intention was to solve the problem with Whale Song Island today, but he suddenly felt that it would be better to let the other party live for a few days.

It was still too slow to rely on his own strength to gather resources.

He might as well let these guys collect them for him for a while.

When he found a suitable opportunity, for example, when he encountered some powerful enemies that were difficult to deal with, Levi would directly shift his shadow, transferring the strongest combat force of Whale Song Island, Shark Tiger Witch Bane, over and sending him to his death.

He would then enter the Whale Song Island's team and kill them.

After figuring this out, Levi followed behind Whale Song Island from afar.

Basically, the other party would always be within Maximum range of his Black Snake's Trust.

By midnight, Levi's strength had reached the peak of the day. He resisted the urge to make a move now and continued to wait for the right opportunity.

On the third day, among the wizards who entered the Shadow Realm, there were already many who died from other competitors and monsters in the Shadow Realm.

Especially as more and more people entered the depths of the inner region, Levi could sense some intense battles from time to time through his Perception.

The light of the spell, which flickered in the fog, was quickly devoured.

At this point, Levi would put on Delin's robe, change his appearance significantly, and disguise himself in a different form.

He took his time and killed all the humans and monsters.

In addition, the people of Whalesong Island had been hunting other wizards in this Shadow Realm.

Gradually, many people began to realize a terrifying fact: Whale Song Island seemed to want to keep everyone who ventured into the Shadow Realm inside the Shadow Realm.

For a moment, everyone felt threatened.

Some of them had even begun to retreat, not planning to continue exploring. They planned to go outside and complain to the Star Tower's law-enforcement officers.

Levi looked at his harvest in satisfaction.

There were more than 500 Aether Stones alone.

Moreover, the wands and casting materials he had obtained were also worth a lot of money.

Levi's targets were all wizards who fought monsters or other people, as well as apprentice wizards who overestimated themselves and ambushed him. There were no official wizards.

Therefore, he did not obtain any high-quality items and depended on the accumulation of quantity. Levi estimated that his final harvest from this trip to the Shadow Realm should exceed 2,000 Aether Stones.

A horse will not be fat without grass at night, and a man will not be rich without windfall. Hard work and unexpected opportunities are important in achieving prosperity.

Although the Pan-Plane Wizard Council encouraged the wizards who explored the Shadow Realm to cooperate, Levi realized that in the Shadow Realm, in the face of those benefits, no one was willing to cooperate with any one. Without the constraints of the rules, human greed could be seen at a glance, and it was the same for him.

After being robbed several times, Levi no longer pretended to be a simple person. He was a professional madman in the human world!

Apart from the normal items, Levi also obtained some herbs from a wizard who robbed him. There was actually a very precious material for the first-circle potion: Fog Lamp Grass.

The Fog Lamp Grass was also one of Levi's targets for this exploration.

This was because this kind of herb only had a very small chance of being born in a Shadow Realm like the Black Fog Realm.

Fog Lamp Grass was one of the three main ingredients for refining the first-circle potion, Naga's Blessing.

The other two main herbs were the Tears of Gray Naga and the Beak of the Bird of Joy.

Although those two were very precious, they could at least be bought with money. However, this Fog Lamp Grass was very difficult to buy in the outside world.

"Naga's Blessing" was a potion that increased the upper limit of one's spiritual power and increased the success rate of breaking through to the first-circle wizard by about one-third. It was equivalent to the low-level second-circle potion, "Eye Devil's Gaze".

The ingredients for this potion were extremely rare. For example, the Eye Devil's Gaze required all of Ms. Marlene's efforts to collect.

Although Levi was only a mid-level apprentice wizard now, with the rapid progress of the Earth Meditation Art, he was not far from a high-level apprentice wizard. He had to start preparing to advance to the official wizard level.

A double affinity high-level apprentice wizard only had a two-thirds chance of breaking through to become an official wizard.

For a Child of Chaos like Levi, even with the support of the Earth Pulse and the Dance of the Fire God, the success rate was less than 50%..
