

Wizard 298

Chapter 298: Shifting Shadows, Killing! (5)

Even though he could still spend some time recovering from his spiritual force and make a comeback if he failed, Levi did not want to fail. He wanted to succeed once and for all.

Therefore, it was always good to collect this kind of medicine that could increase the success rate of breaking through in advance and prepare for the future.

Levi stuck out the snake's trust and sniffed the Fog Lamp Grass.

Then, he stored the aura of the Fog Lamp Grass in his aura library.

"With the Black Snake's Trust, it's much easier to find this herb. As long as there's a Fog Lamp Grass within my range of Perception, it won't be able to escape my demonic claws."

The Black Snake's Trust had countless uses. It could track and lock onto enemies, scout the surroundings, and search for treasures. It was a divine artifact.

This made Levi feel as if he had a god-like perspective in the Shadow Realm.

It was difficult to successfully refine Naga's Blessing in one go, so Levi had to prepare a lot of Fog Lamp Grass in advance.

As he followed the group of people from Whale Song Island, he continued to search for the Fog Lamp Grass in the inner area.

On the fourth day, Levi had collected about 20 sets of Fog Lamp Grass. If he was to sell them outside, countless people would fight to buy them.

"That should be enough. After I advance to a First-Circle Pharmacist, I should be able to start refining Naga's Blessing. If it really doesn't work, I'll just spend some points and ask Ms. Marlene to help me refine it. With her level as a Second-Circle Pharmacist, she should be able to refine it successfully."

The formula of this first-circle potion came from Ms. Marlene. Among all the potion formulas that Ms. Marlene had inherited, its value was second only to Eye Devil's Gaze. Ordinary pharmacists couldn't even buy it.

Levi was Ms. Marlene's most trusted apprentice pharmacist and had helped her a great deal. Thus, he only used 300 points to buy this potion formula.

As he went deeper and deeper into the fog, the frequency of monsters appearing increased, and their strength increased. There was no lack of first-circle extraordinary creatures.

Fortunately, Levi had superb Perception and could avoid them in advance. Otherwise, he would have wasted a lot of time just dealing with these monsters.

Suddenly, a black flame descended from the sky in the fog. Levi looked at this 'flame'.

"The feathers of the Black Flame Demonic Bird."

He had indeed sensed a type of bird flying over the sky just now.

He did not expect that it was the Black Flame Demonic Bird he was looking for.

He used the snake's trust to collect the Black Flame Demonic Bird's aura.

Then, he quickly rushed in the direction where the Black Flame Demonic Bird had flown.

Gradually, Levi ventured deeper into the inner region.

Along the way, he didn't meet any Rock Trolls.

Moreover, because he had to track down the Black Flame Demonic Bird, Levi lost track of the people from Whale Song Island.

At this moment, Levi could not care less about them.

The most important thing was to capture the Black Flame Demonic Bird alive.

He was very fast. Although the Black Flame Demonic Bird could fly, it could not avoid Levi's pursuit.

After all, it wasn't a first-circle transcendent creature.

Levi condensed his black gas condensing blades and waited for the Black Flame Demonic Bird to enter his attack range.

A black blade shot out.

Although they were separated by layers of fog, he relied on the Black Snake's Trust.

The Black Flame Demonic Bird could not escape Levi's lock-on at all.

Stab.

Black blood fell from the sky and turned into black flames as it descended.

"As expected of a creature with the bloodline of the Undying Bird. This blood is really magical. It seems that I have to use a special tool to extract blood."

The Black Flame Demonic Bird descended from the sky and was grabbed by its neck by Levi. With his current strength as a Legendary Knight, dealing with a Black Flame Demonic Bird was a piece of cake for him.

After casting a few more Seals of Dragon Might to disperse the Black Flame Demonic Bird's spirit, Levi immediately bound the Black Flame Demonic Bird with chains.

At this moment, he looked at the Black Flame Demonic Bird on the ground. It was only ten feet long and had a wingspan of about twenty feet. Its long black tail feathers were like a black flame, very beautiful.

At this moment, the Black Flame Demonic Bird was heavily injured by Levi and was on the verge of death.

Levi quickly gave it some healing medicine to save the Black Flame Demonic Bird's life before throwing it into the bug house.

Only the bug house could contain living creatures.

With Levi's current level of Insect Controlling Technique, it was not a problem for him to order these Saint Scorpions not to eat the Black Flame Demonic Birds.

"Now that the secret medicine for the Undying Bird Breathing Technique has been found, I will raise this Black Flame Demonic Bird when I return to the tower. At that time, won't the Undying Bird Breathing Technique take off like a rocket?"

The Black Flame Demonic Bird's Undying Bird Bloodline was thicker than the Seven-Rainbow Pheasant's Undying Bird Bloodline, so the effects of the secret medicine would definitely be better.

After doing all this, Levi looked at his current location. It seemed that he had already run into the depths of the inner region while chasing after the Black Flame Demonic Bird.

Next, other than dealing with the people from Whale Song Island, Levi's only mission was to find the Stone Heart.

Although he had only been here for four days, Levi had already gained a lot.

As long as he could get the Stone Heart and kill the group of people from Whale Song Island, who wanted to harm him, Levi could leave early.

There might be second-circle extraordinary creatures in the core area, so Levi naturally would not enter. He looked at the black fog in front of him, which was as thick as ink and flowed like asphalt before turning around to leave.

There was an existence that caused his Spider Sensing to feel an intense sense of danger. It was not something that he could touch at the moment.

Rock Trolls were first-circle extraordinary creatures. Theoretically, they could be found in the inner area. There was no need to take the risk to go to the core area.

Hence, Levi began to search the inner region on a large scale. Rock trolls were extraordinary creatures that were more than five meters tall when they matured. They were extremely strong and their bodies were covered in hard rocks. When they slept, these trolls were like boulders, making them very

Difficult to find..
