

Wizard 300

Chapter 300: Fight The Nightmare, Destroy The Green Ghost, And Obtain The Heart Stone!

From Levi's sudden arrival to the death of the three wizards, it was only a moment.

Although the three high-level apprentice wizards each had cantrips to protect themselves, in front of the legendary knight Levi's current Nine Swords Form, these cantrips were too fragile and could not withstand a single blow from him.

Of course, the most important reason was that Levi had used the Shifting Shadow technique to suddenly appear here, giving the three high-level apprentice wizards no chance to react at all.

They thought that it was Deli who had descended from the light.

They did not expect that it was a terrifying monster with three heads and six arms, covered in ferocious Black Scales.

After dealing with the three apprentice wizards, Levi looked at Green Ghost Carter who had suddenly appeared. His heart remained calm.

He would not avoid this battle.

If it was just a veteran first-circle wizard, Levi believed that with his own strength, he would be able to deal with it.

"Die, little bastard!"

When the two enemies met, their eyes turned red.

Now, killing Levi had almost become Green Ghost Carter's obsession.

If this guy died and turned into an evil spirit...

Then this evil spirit might still haunt Levi.

Therefore, Levi had to completely get rid of this damned old dog and turn him into a living dead to work for him for the rest of his life to vent the anger in his heart.

Seeing that things were not looking good, Jagri had already run off to somewhere unknown. His aura had disappeared from Levi's Perception range. Levi guessed that the Island Master of Whale Song Island had given him some life-saving Wizard Tools.

Levi had no time to care about him. Since he already had Jagli's aura, as long as he was in the Shadow Realm, Levi would be able to find him sooner or later.

He took a deep breath and remained focused.

The enemy he was going to face next would be the strongest enemy Levi had ever faced.

First-circle Senior wizard, Green Ghost Carter.

The first two times of meeting, Levi avoided the other party.

This time, Levi, who had truly become a legendary knight, would not run away anymore.

While his Nine Swords Aura was still around.

Levi took the initiative to attack.

He activated his Blood Beast Wings and turned into a black shadow, diving into the fog.

Green Ghost Carter's eyes shone with a faint golden light.

This was a cantrip he learned as an apprentice. He could see clearly in the fog, but the range was very small, only a few dozen meters ahead.

At the same time, he waved his staff and summoned two more Hell Strongmen. These two Hell Strongmen didn't rush into the fog blindly but protected Green Ghost Carter on both sides.

With the two Hell Strongmen protecting him, Green Ghost Carter felt very safe.

Suddenly, beams of cold light tore through the air from the fog.

The black blades whooshed toward Green Ghost Carter.

"You dare to show off your skills in front of an expert?"

Green Ghost Carter said coldly.

The two Hell Strongmen used their tough bodies to block Levi's black gas attack.

Although the Hell Strongman's defense was not as good as the Rock Troll's, it was still able to block Levi's black gas.

Furthermore, the speed of the Hell Strongman was even more agile.

Seeing that the black gas was ineffective, Levi hid in the fog again and stuck out the snake's trust, preparing for the next attack.

Green Ghost Carter took the initiative to attack. He began to chant a spell.

First-Ring Spell, Hellfire Rain.

However, just as he was chanting, in the thick fog in the core area ahead, there seemed to be indescribable ravings.

This made Green Ghost Carter a little frustrated, but he was a senior wizard with strong mental strength and willpower. He forcefully blocked these ravings and completed the spell under the protection of the Hell Strongmen.

As the rain of green flames descended from the sky, Levi quickly shuttled through the rain of flames. The green ghost flames that landed on his body sizzled and roasted Levi's solid-state Black Scales. The Black Scales melted into liquid and then vaporized into black gas.

However, new black gas had already appeared and turned into hard Black Scales.

This kind of small-range AOE spell did not have much attack power.

For Levi, it was completely bearable.

Green Ghost Carter obviously hoped that this spell could kill Levi. The moment Levi appeared, he had already sent a huge green fireball flying towards him.

First-Ring Spell, Soul Flame.

This was the advanced version of the Zero-Ring Cantrip, Soul Fire. It was extremely powerful.

Boom!

This Green Ghost Carter was indeed a veteran wizard. Even under the interference of the fog, whether it was the speed of casting or the type of spells, he was far superior to ordinary First-Circle Wizards.

The Golden Protection radiated with a brilliant golden light, expanding to shield against the fireball. Levi, the Black Scale Demon with three heads and six arms, each wielding a sword, vanquished the ghostly flames, and then swiftly counterattacked.

"Die!"

Levi held the Lion King's Pride in his hands!

Golden Cross Slash!

Boom!

One of the Hell Strongmen fearlessly stood in front of Green Ghost Carter, but he was instantly crushed by Levi's hammer.

The other Hell Strongman threw a punch at Levi, accompanied by a terrifying wind.

Even with his Advanced Perception, Levi could not dodge the attack of the other Hell Strongman at such a close distance.

Fortunately, the solid-state Black Scales were strong enough, and with the help of the Frost Giant Armor, Levi took another punch from the legendary knight of Hell, the Hell Strongman.

He was blasted into the fog, and his figure retreated at the same time.

Up until now, Levi did not have any injuries on his body and was still full of vigor.

The formidable defense of a Level 11 Black Snake could be seen at a glance!

On the other hand, Green Ghost Carter still had many spells that he had yet to use. However, he did not know if he was hearing things, but every time he chanted a spell, he would feel ravings coming from his ears..
