

Wizard 308

Chapter 308: Blood Beast Breakthrough, Third Special Effect, Thousand Faces! (4)

"Congratulations." Levi congratulated her.

"Let me tell you about my experience," Senior Sister Winnie said.

Levi was stunned. He did seem to have said before that after Senior Sister Winnie successfully constructed the model, she would impart her experience to him.

He just said it casually. He didn't expect Senior Sister Winnie to remember it in her heart.

Sigh, this senior sister was still a very good person.

He sighed and hoped that she could become an official wizard safely in the future.

After listening to his senior sister's experience, Levi sent her away. He had to admit that the experiences that Winnie taught him were still useful. They were very helpful for Levi to build his first-circle spell model in the future.

"Now, let's start counting the gains from this trip to the Shadow Realm." Levi was excited.

He first took the Black Flame Demonic Bird out of the Bug House. The Black Flame Demonic Bird was still lying weakly on the floor with its eyes drooping.

Levi only had the Dragon Affinity and not the Undying Bird.

He did not know if he could use Wild Heart to tame the Black Flame Demonic Bird.

Logically speaking, the Black Flame Demonic Bird was not a first-circle transcendent creature, so there should be hope.

If it really didn't work, Levi would specially learn a Beast Taming spell from the School of Spiritualism. In order to cultivate the Undying Bird Breathing Technique in the long term and quickly, it was worth it.

Levi applied new sacred medicines to the Black Flame Demonic Bird, locked it in a room, and threw some food at it.

Although the Black Flame Demonic Bird was hungry, it was still in a state of stress. It was filled with fear towards Levi, so it ignored Levi's food.

"I think you'd better eat some. Otherwise if you starve to death, I'll use you to make soup," Levi said calmly, not caring if the Black Flame Demonic Bird could understand him.

After leaving the Black Flame Demonic Bird aside, Levi continued to organize his other gains.

He temporarily put aside the storage bags of the two official wizards, Green Ghost Carter and Bane, and piled the things in the storage bags of all the other apprentice wizards in the living room.

This time, Levi had snatched a lot of things. He had spent a lot of effort just to organize them.

In the end, the inventory was completed.

There were 14 magic wands, and one of them was an intact top-grade magic wand called the Dark Blue Wand. Two Zero-Ring Cantrips were solidified on it, as well as a First-Ring Spell.

The cantrips were the common Water Arrow and Wave Layering spells, while the First-Ring Spell was a very good defensive spell, Water Shield. It could form a huge water ball that could envelop the Spell Caster.

Naturally, Levi set his usual wand to this Dark Blue Wand. This wand was enough for him to use until he became an official wizard.

The other wands were very ordinary. Levi planned to pack them up and let Manla deal with them at the Blacksail Wizard Market. He should be able to exchange them for a lot of Aether Stones.

However, there were about 2,000 of these apprentice wizards in total.

Other than that, there were also books and Casting materials from the Ocean Faction that Levi was not interested in.

After all, this was the Realm of Azure Cloud. Other than a few heretics like Undead Ship, most organizations were mainly from the Ocean Faction.

The final harvest was the resources obtained by these apprentice wizards from the Shadow Realm, mainly some rare herbs, ores, or monster materials, and so on.

There was no lack of first-circle medicinal ingredients among the herbs. Many of them were difficult to find outside, such as Fog Lamp Grass, Water Lotus Grass, and so on.

Levi did not intend to sell the resources obtained from the Shadow Realm. He might be able to use them in the future. After all, he was a pharmacist and could never have too many materials.

After cleaning up the apprentice wizard materials, Levi rubbed his hands and flicked his snake tongue. He looked at the storage items of Wizard Bane and Green Ghost Carter happily.

Both of them were official wizards, and Levi was looking forward to their items.

The storage item of the wizard Bane was in the shape of a small sachet. There were no spells or restrictions on it, so Levi opened it easily.

He took a look and saw that the space inside was not small. It was only second to Levi's Wind Spirit Ring.

He shook all these things out.

A large pile of Aether Stones fell.

Levi counted them. There were a total of 3,400 of them.

"Good lord, Bane's wealth is more than the combined wealth of so many apprentice wizards. This damn Whale Song Island is really rich."

"This is only what he brought with him. There might be more hidden in his house."

In addition to the Aether Stone, there were also a few spell books.

He took a look and saw that they were all First-Ring Spells of the Ocean School of Thought. They were Whale Song, Water Shield, Water Prison, and Sailfish Arrow.

The Whale Song Spell was a detection spell. The principle was similar to the radar of dolphins and other creatures. It could emit a kind of Whale Song to detect the surroundings. When cultivated to the highest level, it could detect a radius of five kilometers.

Levi shook his head. "It's not even as good as my Black Snake's Message. There's no need to cultivate this."

His Black Snake's Message could cover a radius of 20 miles. Moreover, with the advancement of the Black Snake Breathing Technique, his supernatural organs could continuously evolve.

Levi looked at the remaining three spell books and was more interested in the Water Prison Spell. This was the advanced spell of Tidal Grasp that he had learned. It could form a water prison to control the enemy for a moment..
