

Wizard 309

Chapter 309: Blood Beast Breakthrough, Third Special Effect, Thousand Faces! (5)

The duration of control was related to the Spell Caster's mastery and the strength of the accused enemy.

"These spell books saved me a lot of points. I don't need to buy them in the tower anymore." Levi put away the spell books.

Then, he rummaged under the large pile of bottles and bags that had fallen out. These vessels were basically experimental materials and Casting materials.

In the end, Levi found a trident with a strange shape.

Levi looked at the trident. It had an ancient design and was about ten feet long. Its entire body was actually made of Luminant gold.

It emitted a dazzling luster.

Until now, he had never seen so much Luminant gold.

Just this Luminant gold was worth a lot of money.

In the Wizard World, Luminant gold was also a valuable alchemy material.

Even the Tower Master could only use cheap brass to refine those huge creatures. He could only refine his own arm with mithril.

This trident was all made of pure Luminant gold. Its value was obvious.

"There aren't any spell runes on it. It looks like an ordinary weapon. No wonder

Bane didn't use it.'

Levi picked up the trident and held it in his hand. This trident weighed at least two thousand pounds.

Even an official wizard would not be able to use such a heavy trident as a weapon without using spells.

"Good stuff. Coincidentally, my Frostmourne is broken. I'll use this trident as a weapon in the future. Anyway, it doesn't matter to me whether there are solidification spells or not. What's important is that it's sturdy and resistant."

If Levi had this trident during the battle with the Nightmare Knight, he would not have been so badly trampled.

Levi was very satisfied with Bane's harvest.

It felt so good. As expected of an official wizard.

There were many good things in this storage bag.

As for the storage bag of Green Ghost Carter, his mortal enemy, Levi placed it at the end.

He was very interested in the spells of the School of Death.

Especially the spells that turned into green smoke and ghost fire.

This was simply a life-saving technique. This damn Green Ghost Carter had used these two spells which caused Levi to spend a lot of effort to deal with it.

After using Golden Protection, Water Shield, and Wave Layering to protect himself, Levi, who was covered in Solid State Black Scales, carefully opened Green Ghost Carter's storage bag.

Suddenly, a huge green fireball engulfed Levi.

A moment later, the flames disappeared and Levi appeared unscathed with a calm expression.

"Fortunately, I know that this old ghost is very sinister. Otherwise, I would definitely have been injured by that Soul Flame."

Levi poured out the contents of his storage bag.

There were only 1,000 Aether Stones. It was completely unworthy of his status as a senior first-circle wizard.

Other than that, there were also some spell books and Casting materials.

Then, there was the huge staff that Green Ghost Carter often used. Although its shape was exaggerated, it was just a top-grade wand. There was a First-Ring Spell and a few cantrips solidified on it. However, this staff was made of a very sturdy material. It could be used to swing people in the future.

There were several spell books that Levi was most concerned about. Among them, the three books that he was interested in were "Green Smoke Escape", "Body of Ghost Fire", and "Nightmare Summoning".

The Green Smoke Escape was a first-circle flying spell. It could turn into a cloud of green smoke and fly. Levi felt that this flying spell was more useful than Ms. Marlene's wing because it was immune to a portion of physical damage in the state of green smoke. The disadvantage was that it could only be cast once a day.

The body of the ghost fire, on the other hand, could elementalize the body and turn it into a ball of erratic ghost fire. Basically, it was completely immune to physical attacks and could also reduce the attacks of many spells.

This was Green Ghost Carter's strongest life-saving spell combination.

If not for the fact that it could only cast one spell a day, with these two spells, Green Ghost Carter could completely do whatever it wanted under the second circle.

These two spells were also spells that Levi had to learn in the future.

After counting the spoils of war, Levi tidied up the spoils of war that he planned to let Manla deal with. He went to the White Sail Alley and handed them to Manla.

Manla opened the storage bag and looked at it with a shocked expression. "Did you obtain all these in the Shadow Realm?"

Levi nodded. "Please keep this matter a secret. I don't want too many people to know. When you deal with it, deal with it separately to avoid being targeted. If there's any trouble, contact me at any time. After dealing with it, a tenth of the

Aether Stones will be yours."

When Manla heard this, his breathing quickened.

"One-tenth? That's too much... I roughly scanned it and roughly estimated that the things inside are at least a thousand Aether Stones."

Levi said, "Just one-tenth. Manla, you're someone I trust. For our long-term cooperation in the future, this bit of money is worth it."

Manla was so touched that he was about to cry. He was in dire need of money. Levi's action was undoubtedly a timely help.

"Don't worry, I'll take care of it," Manla promised.

Levi nodded, patted Manla's shoulder, and turned to leave, leaving Manla alone in a daze.

"Heavens, how many people did he rob... Junior Brother's strength is unfathomable. "

Whale Song Island.

Jagri had long since returned to the island alone.

Now, he was being lectured by Morpheus, who had just come out of seclusion.

Morpheus's face was dark as he asked, "Are the others all dead?"
