

Wizard 312

Chapter 312: Level 10 Red Lotus, Fireplay Master! (2)

Marko and Mr. Tim had returned from their studies in the Star Tower.

The apprentices welcomed the two teachers enthusiastically.

Mr. Marko had even become a senior first-circle wizard. When he was studying, he had successfully constructed his first second -circle spell model. As long as he continuously polished his spiritual force to the limit and prepared the corresponding potions, Mr. Marko could prepare to advance to the second circle.

With the help of the Second -Circle Pharmacist, Marlene, the future prospects of Gray Tower would definitely be good.

As long as Gray Tower was given some time, it could become a small and sophisticated wizard organization.

There were still two months before the sparring session between Levi and the Fist of the Empire.

To ensure that nothing went wrong, Levi kept improving his strength.

The sparring between him and the Fist of the Empire was only limited to the path of knights. Neither side could use the path of wizards.

Therefore, he had been practicing the knight's breathing technique.

The Black Snake had already reached its Maximum and could not break through the limit for the time being. The only ones that he could cultivate were the Blood Beast, Undying Bird, and Red Lotus.

The Blood Beast needed a large amount of Proficiency to advance to level 11. Levi estimated that if he wanted to reach the Maximum, he would have to wait until next year.

He had just obtained the Undying Bird not long ago and was still moving towards level 9 cultivation.

Levi placed his focus on the Red Lotus Breathing Technique.

A month later. Levi's Red Lotus Breathing Techniaue finally reached level 10.

Levi—

Red Lotus Breathing Technique: Level 10 (1/200,000). Special Effect: Flame Body (Liquid), Red Lotus Blood.

"Finally, level 10."

Levi breathed a sigh of relief.

Finally, before the battle with the Fist of the Empire, he had cultivated the Red Lotus Breathing Technique to level 10, which was second only to legendary.

The Liquid Flame Body was even more exaggerated than the Gas Flame Body. Levi felt that his body was filled with explosive power, as if countless lava was flowing in his body. He picked up a piece of paper and placed it on his chest. A moment later, the paper burned and turned into ashes.

"Young people are indeed hot-tempered," Levi said with a smile.

He casually picked up his Poseidon Trident and waved it at the place where he was practicing his martial arts. The 1,000 -kilogram Poseidon Trident was swung at his will. It was airtight, and the whistling wind of the trident cut through the void.

A terrifying might spread out, making the Black Flame Demonic Bird next door tremble.

What was this master doing next door all day?

Levi's mind moved as he played around.

Frost Armor appeared on his arms, and a frost aura spread. Liquid flames flowed through his Frost Arm like lava on his Flame Body, forming a strange scene of ice and fire.

The aura of ice and fire swirled and emitted white smoke before finally flowing into the Poseidon Trident in Levi's hand.

The Poseidon Trident was half ice and half fire. The ice and fire dragons spiraled into the sky!

"Although the Poseidon Trident doesn't have a solidification spell, I can use the

Frost Arm and Flame Body's Special Effects to enchant it."

Levi gently thrust out his trident, and the trident easily pierced a small hole in the wall. In the small hole, half was frozen, and the other half was blazing. It was very magical.

"Hahaha, this move is really not bad. At the very least, it looks very cool. Let's call it Double Dragon Fusion."

With Frost Arm's Frost Special Effect and Red Lotus' Scorching Special Effect, it was very difficult for them to cause any substantial damage to official wizards. The gorgeous effect of this move was greater than actual combat.

However, as these two Special Effects continued to evolve, their power should still be extraordinary in the future.

After all, the Frost Giants were a powerful frost race, while Red Lotus was a natural fire beast.

Levi's breathing technique could be said to be unparalleled in the world.

In the Wuxia novels of his previous life, he had to be an Earth Immortal.

Black Snake was level 11.

Red Lotus and Blood Beast were level 10.

The Giant and Ostrich Mountain were level 9.

Undying Bird, Blood Whale, and Giant Rhinoceros were level 8.

Vortex Beast was level 7.

Man-Faced Spider and Night Owl were level 6.

These were Levi's main breathing techniques.

In addition, there were also some shallow breathing techniques such as strength and speed. Levi would practice them when he had nothing to do. He would cultivate them to the limit and save them for later use.

For the current him, shallow breathing techniques could be mastered several Maximum breathing techniques in a month. It was not a waste of time.

Other than the breakthrough in the breathing technique.

The Black Devil Blade had also reached the Maximum of level 3.

Levi—

Black Devil Blade: Level 3 (Maximum, breakthrough available)

Levi did not expect that the Black Devil Blade, which he had obtained from the mortal world, could actually be cultivated in the future.

However, if he wanted to reach level 4, he needed to break through the limit.

According to his previous experience, his spiritual force had to reach 11 points before he could break through the limit, which was the spiritual force of a high-level apprentice wizard.

And now, his mental strength was only 9 points.

However, as he used the Earth Pulse Special Effect, his progress in the Earth Meditation Art had already surpassed the Deep Sea Meditation Art that he had first learned.

Therefore, he estimated that he would be able to break through 11 points of spiritual force and become a high-level apprentice wizard before the end of this year.

At that time, he would be able to break through the Black Devil Blade.

The power of the Nine Swords Form proved that the Black Devil Blade was an extremely outstanding black gas combat technique.

Although it was obtained by Levi in the mortal world, as a mystical technique that combined the spiritual power cultivation of a wizard and the physical body cultivation of a knight, its future potential was not limited to this!

Levi was looking forward to the performance of the level 4 Black Devil Blade.

Up until now, all the skills that could be broken through had been broken through by Levi..
