

Wizard 316

Chapter 316: Level 10 Red Lotus, Fireplay Master! (6)

From the looks of it, this white-haired middle-aged man was not very strong. Why was he so rich? Could he be the descendant of an official wizard?

Another reason why Levi took a fancy to the Giant Squid Ring was because of the first-circle defensive spell he was wearing.

[Encirclement of Giant Demons: Ocean Faction spell. After casting it, it transforms into eight tentacles of the Water Element Giant Demon that tightly surrounds and protects the Spell Caster. Defense Strength Rating: B. Casting Cooldown: 1 day.]

This was the Celestial Circle Shop's introduction to the Encirclement of Giant

Demons. This kind of defense strength rating was a grading system that the Celestial Circle Shop had come up with after a long period of testing and evaluation of spells of different rings.

The defensive strength of each ring was divided into three levels:

Grade A, Grade B, Grade C.

This classification system was relatively authoritative and was generally recognized by most wizards.

Levi did some calculations. If he were to evaluate his defense according to this grading standard, among Levi's current defensive spells, Golden Protection,

Water Shield, and Wind Spirit Shelter from the Ring of the Wind Spirit were all C-grade defensive spells. This was also the defensive strength of most simple first-circle defensive spells.

Encirclement of Giant Squid was a more complicated first-circle defensive spell. Its defense was slightly stronger.

As for his Solid State Black Scale's defense, it should be an A-grade.

The defense of the Solid State Black Scale was equivalent to the top first-circle defensive spell.

That was why Levi was able to withstand the Nightmare Knight's second-circle attack.

After buying the Giant Squid Ring, Levi felt that his current defense should be enough. Next, he needed another one to escape and attack.

He looked at the remaining Wizard Tools. There was no room for selection. There was only one Wizard Tool in this shop that had been solidified with escape spells.

[Flying Fish Robe—first-circle Wizard Tool]

[Main Function: Defense, Movement]

[Solidification spell: First-Ring Spell—Water Shield / First-Ring Spell—Flying

Fish Ocean Leap]

[Price: 900 Aether Stones]

This robe was almost the most expensive Wizard Tool in the shop.

It was made of the skin of a first-circle sea beast, which was strong enough to withstand most cantrips.

In addition, there were also two practical spells solidified on it: Water Shield and Flying Fish Ocean Leap.

Needless to say, the Water Shield Spell was the most common first-circle defensive spell of the Ocean Faction.

Flying Fish Ocean Leap had a C-grade speed rating, which was similar to Ms. Marlene's flying spell.

Its speed was not as fast as Green Ghost Carter's Green Smoke Escape and Wind Spirit Ring's Wind Spirit Shelter, but the spell of Flying Fish Leaping into the Sea lasted longer. It could glide for a long time.

Levi didn't reject anyone. After all, he had money now.

To deal with the people from Whale Song Island or Undead Ship who might appear, he had to be fully armed.

With the Giant Squid Ring and the Flying Fish Robe, Levi's life-saving ability had improved greatly. He also bought a control-type Wizard Tool worth 600 Aether Stones called Green Gloves.

This was a Life School of Thought's Wizard Tool. He didn't know how it ended up in the Realm of Azure Cloud. Wearing this glove could increase the casting speed and increase the power of the Spell Caster.

In addition, there was a First-Ring Spell solidified on it, Green Vine Love.

The effect was to cast spells that could grow vines under the enemy's feet to entangle them.

The effects of this control spell were not inferior to the Ocean School of Thought's Water Prison spell. They were both classic and powerful control spells.

This way, Levi had defense, escape, and control.

As for attacks, he had the means of a knight and the Seal of Flame, so he didn't lack them for the time being. Moreover, with Levi's current upper limit of spell power, he couldn't use so many Wizard Tools at once.

Three Wizard Tools cost Levi 2,300 Aether Stones.

In all the years he had stepped into the Wizard World, he had never been so generous.

In the blink of an eye, thousands of Aether Stones were gone. This was money that most apprentice wizards could not save in their entire lives. It could even be said that most ordinary official wizards could not take out so much money.

Levi bought another Beak of the Bird of Joy. This thing was especially expensive. It cost 900 Aether Stones. After all, it was the main ingredient of the Naga's Blessing. He was already very lucky to be able to buy it.

However, a Beak of the Bird of Joy, ground into powder, was enough to split into dozens of portions of Naga's Blessing ingredients. At that time, as long as Levi successfully refined a few more potions and sold a random potion, he would be able to earn back the money.

As for the Burning Faction Meditation Art that Levi wanted, there was only the apprentice-level Sun Meditation Art in the shop. Fortunately, the Sun Meditation Art was the most basic Meditation Art of the Burning Faction and had the widest range of dissemination. It should be easy for Levi to find the content of the subsequent advancement chapters in the future.

Levi had no intention of learning the Burning Faction's cantrips for the time being. With the Seal of Flame in hand, he was not interested in them. He was preparing the Burning Faction's Meditation Art to become an official wizard in the future. By then, he could learn some powerful Burning Faction classic spells, such as the omnipotent... Fireball Technique, Big Fireball Technique, and even Five Fireballs Technique.

In the end, he bought some miscellaneous items. Levi spent a total of 4,000 Aether Stones in the shop and lost half of his wealth before leaving.

After this purchase, he immediately became a platinum member of the Celestial Circle Shop and obtained 40 points. These 40 points could be equivalent to 40 Aether Stones the next time he bought it. It was better than nothing....
