

Wizard 317

Chapter 317: Level 10 Red Lotus, Fireplay Master! (7)

Levi wandered around the other shops in the Blacksail Wizard Market.

Unfortunately, he did not find the Gray Naga's Tears until the next day.

The Gray Naga was not strong to begin with. It was only at the level of a first-circle transcendent creature.

However, these creatures usually appeared in some dangerous sea areas on the Endless Sea. There were many powerful transcendent creatures entrenched there, including some second-circle transcendent creatures. As a result, it was difficult for ordinary official wizards to capture the Gray Naga. The wizards who had the strength to capture the Gray Naga did not like this thing, which resulted in the Gray Naga's Tears being often difficult to buy.

"After a while, I'll go to the wizard markets in other places. If it really doesn't work, when I, Red Lotus, and the Blood Beast have all reached level 11 legendary and become high-level apprentice wizards, I'll look for the Gray Nagas. I have the Black Snake's Message. As long as I avoid the second-circle transcendent creatures, I should be able to capture the Gray Nagas safely." When he left the Blacksail Wizard Market with his harvest, Levi found a deserted place and changed his appearance to Knight Anderson's to prevent himself from being targeted by some people.

However, even though he was careful, he could still sense through the Black Snake's Message that someone was following him.

From the moment Levi left the shop until now, three people had been keeping a certain distance from him. They looked around and seemed to be passersby, but Levi's intuition was very accurate. Coupled with his Spider Sensing, he knew that these three people were definitely following him.

"Could it be that the people from Whale Song Island have already discovered me? That's impossible. If Whale Song Island wants to deal with me, why would they let an apprentice wizard come? At least an official wizard... I guess they just met some criminals in the wizard bazaar. Forget it, since they want to harm me, prepare to die!"

Levi's heart began to turn cold. He had long heard that there were all kinds of people in the wizard bazaar, and there was no lack of lawless fanatics. He did not expect to meet them today.

He quietly changed direction and headed towards the depths of Blacksail Island.

The three of them followed closely behind.

In the end, Levi stopped at an uninhabited forest in the center of Blacksail Island.

His expression was calm as he sat on a huge rock and waited with his eyes closed. He had the demeanor of an expert.

The three apprentice wizards also followed him. They were all wearing black magic robes. It was impossible to tell which organization they belonged to. They could also be nomadic wizards.

"Your Perception is not bad. It seems that you have also discovered us," the apprentice wizard in the lead said with a smile.

Levi asked calmly, “Are you following me?”

The three apprentice wizards looked at each other and immediately launched all kinds of cantrip attacks, including Water Arrow, Tidal Grasp, and even a Fireball spell. This was a cantrip version of Fireball, which should be the most powerful one among the cantrips.

Levi waved his Dark Blue Wand and cast the First-Ring Spell, Water Shield. The blue water barrier protected Levi.

All the cantrips were blocked by Water Shield, not to mention Levi’s body was still covered in Black Scale.

At the same time, his body shot out like an arrow leaving the bow.

Accompanied by a cloud of dust, Levi arrived in front of the strongest high-level apprentice wizard among the three apprentice wizards.

He held the Poseidon Trident in his hand and stabbed at the apprentice wizard.

When the high -level wizard saw Levi’s trident, his expression changed. He couldn’t help but exclaim, “This belongs to Wizard Bane! You’re the person who killed Wizard Bane? How is that possible?”

The defense of Wave Layering lit up on his body.

However, in front of the Poseidon Trident, this defense was useless.

Puchi.

The Poseidon Trident pierced through the abdomen of this high-level apprentice wizard, along with all kinds of internal organs.

Levi raised the apprentice wizard high and threw him directly to the ground. The Poseidon Trident pulled him apart and split him into two.

For the current him, killing a high-level apprentice wizard was as easy as flipping his hand.

He wondered who gave these people the confidence to rob him.

Moreover, this high-level apprentice wizard actually knew Bane's Poseidon Trident, which meant that he was most likely from Whale Song Island. This was even more intriguing.

Whale Song Island was one of the law enforcers of the Blacksail Wizard

Market, but the disciples below were secretly guarding and stealing. They were doing some unlawful things. One could imagine how chaotic it was behind the seemingly calm market.

Fortunately, when he was short of points back then, out of caution, he did not choose to come to the Blacksail Wizard Market to be a law enforcer. Otherwise, he would most likely have been tricked by these people.

Levi's Poseidon Trident tore the high-level apprentice wizard in half, and the Saint Scorpions immediately swarmed forward.

Levi flicked his snake tongue and looked at the remaining two people with a ferocious smile.

These two people were also high-level apprentice wizards.

At this moment, they were completely dumbfounded.

The three of them came from different forces.

Usually, with the law enforcer of Whale Song Island as the leader, he would use the convenience of his position as a law enforcer to secretly do some illegal things.

The person killed by Levi was the captain of the police team sent by Whale Song Island to the Blacksail Wizard Market. He had some authority.

Through this method, they tasted the sweetness of it. Today, they chose Levi, the “dumb” who had just come out of the Celestial Circle Shop..
