

Wizard 318

Chapter 318: Level 10 Red Lotus, Fireplay Master! (8)

After all, Levi's strength didn't seem like much. He was just a mid-level apprentice wizard, yet he already had evil intentions.

Unexpectedly, although Levi was a mid-level apprentice wizard on the surface, he was actually a legendary knight.

Under Levi's destructive attack, a high-level apprentice wizard died instantly. Such terrifying strength reminded them of the fear of being dominated by an official wizard.

"Don't kill me. I admit defeat this time. I'll give you all the money I have. My father is Fireplay Master Kane. If you kill me, when my father comes out of seclusion, you'll be chased by an official wizard. Don't do anything stupid on impulse."

The apprentice wizard who used the Small Fireball Technique said shakily. He found that the corpse of the law enforcer of Whale Song Island was about to be devoured by the poisonous scorpion. This was too tragic. He did not want to die!

"I didn't expect a law-abiding wizard like me to encounter thieves like you. In order to protect myself, don't blame me for being too defensive!"

Levi's expression was fierce. He used his actions to show his attitude. The Poseidon Trident opened and closed as he charged towards the two apprentice wizards.

When the apprentice wizard who called himself the son of Kane saw that the man didn't know what was good for him, his expression turned ruthless. He decisively took out a scarlet scroll, tore it open, and chanted an incantation.

Seeing this, the other apprentice wizard tacitly protected him and blocked Levi's attack.

In just a moment, a terrifyingly high temperature filled the air. A fireball with a diameter of three meters formed and shot towards Levi like a cannonball!

BOOM!

Flames soared into the sky and emerged from the black forest. A radius of ten meters around Levi was filled with high temperatures. All the trees in this area were instantly charred and turned into ashes!

"Die, this is the Big Fireball Technique known as the strongest first-circle attack!"

The son of Kane's expression was ferocious as he watched the fireball devour the mid-level apprentice wizard's figure at lightning speed.

This was the trump card that his father had given him. It was a one-time-use item, a first-circle Fireball Technique scroll.

Ordinary first-circle defensive spells could not withstand it at all.

Although the Big Fireball Technique was also a First-Ring Spell, it was an advanced and improved version of the Fireball Technique. Its power should be the strongest below the second circle. According to the Celestial Circle Shop's rating, this was the true A-grade attack power.

The flames devoured Levi.

"Good job." Another high-level apprentice wizard looked in the direction of the flames with lingering fear.

The son of Kane sneered. "This is courting death! I really planned to settle things peacefully after paying. Sigh, I don't want to kill anyone..."

In any case, he had the protection of his father, a senior wizard. He was just bullying an apprentice wizard. The higher-ups probably wouldn't blame him.

As soon as he finished speaking, the flames exploded.

A monster covered in crimson flames flew out from the explosion.

He was wearing a Flying Fish Robe, and his expression was savage and terrifying. Black Scales appeared on his face, and his smile was horrifying. His snake tongue flicked wildly, and snake saliva dripped down. The Flying Fish Robe was bulged by his exaggerated muscles, and his trident was burned red. His hands, which were covered in frost, held the trident tightly.

"Tsk tsk tsk, what a pleasant surprise. As expected of the Burning Faction, this attack power is really comfortable..."

The moment Levi was swallowed by the Fireball Technique, the Water Shield Spell on his Flying Fish Robe was evaporated by the Fireball Technique. Fortunately, he had the defense of the Solid State Black Scale and the fire resistance brought by the Flame Body.

Levi managed to block the attack unscathed.

Levi now believed that this person was indeed the son of the so-called "Fireplay Master" Kane. It was basically impossible for ordinary apprentice wizards to have such a precious magic scroll.

The son of Kane looked horrified.

"That's impossible!"

"Even official wizards can't withstand this Big Fireball Technique. What kind of monster are you?!"

He was completely flustered.

The trident tore through the air and pierced through his head and neck, nailing him to the tree and killing him instantly.

Levi jumped to the other side and crushed the head of another apprentice wizard.

The corpses and souls of these apprentice wizards would not be wasted. They were devoured bit by bit by Levi's adorable Saint Scorpions.

In the end, there was not even a skeleton left.

During this period of time, especially in the Shadow Realm, Levi's Saint Scorpion had devoured many apprentice wizards.

With such a high-quality supply of "scorpion feed", the number of Saint Scorpions in the Bug House was almost 1,000, which was the limit that Levi could control.

Many new Saint Scorpions were stronger than their parents after they grew up. They devoured the souls of wizards, allowing them to evolve faster.

Levi cleaned up the battlefield and picked up the loot.

These three apprentice wizards were not very strong, but they were quite rich.

The three of them contributed more than 1,000 Aether Stones to Levi. The apprentice who claimed to be the son of Kane also had more than 500 Aether

Other than that, there were only some things that Levi did not like. He kept them all and would count them in the future.

After Levi was done, he suddenly felt a warmth in his chest.

He lifted his clothes and could not help but look gloomy.

A red flame mark appeared on Levi's chest and shone with a demonic light.

"Tracking mark?"

Levi did not panic. Instead, he stood on the spot and pondered for a moment. In the end, he thought of a solution.

In order to avoid being hunted down by Kane, Levi was determined to strike first... to deal with Kane!

He changed into the appearance of the Earl of Silver Mountain and investigated at the Blacksail Wizard Gathering. Then, he was surprised to find that Kane was the master of Black Fire Island, the mentor of Manla's daughter.

Heh! Fate was indescribably wonderful!
