

Wizard 331

Chapter 331: High-Level Apprentice Wizard! (1)

On the ninth floor of the Gray Tower, Levi looked at the proficiency panel and pondered.

Previously, when he fused the breathing technique, he had used low-level to fuse it with high-level ones. He had never fused it with anyone of the same level.

The Man-Faced Spider Breathing Technique and the Night Owl Breathing Technique were both at the Maximum level 6. Their levels should be about the same.

When Levi fused the Night Owl Seed with the Human-Faced Spider Seed, he felt the Night Owl's struggle. It seemed that it was more challenging to fuse at the same level as the high-level fusion.

The two evenly matched breathing technique seeds were unconvinced and fused with each other.

In the end, a strange seed appeared in Levi's heart.

"Seed of the Human-Faced Owl."

In the legends, there was no such thing as a human-faced owl, so this should be considered a mutation...

The human-faced owl had a human face and was covered in the black feathers of the Night Owl. At the same time, eight spider legs extended from its back. The spider legs were covered in fine bristles.

It looked like a stitched monster.

Regardless, Levi's fusion was considered a success.

The Human-Faced Owl breathing technique had a total of three Special Effects.

[Spider Sensing] came from the Man-Faced Spider, which was equivalent to inheriting it. It was not much different from before.

[Favored By The Night] came from Night Owl, and it was the same as before. The newest [Advanced Perception] was a combination of the Man-Faced Spider's [Advanced Vibrosensing] and Night Owl's [Advanced Hearing].

[Advanced Perception: A special ability born from fusing the similar characteristics of the Man-Faced Spider and Night Owl. Combined with Advanced Vibrosensing's minute subtlety and Advanced Hearing's large range, the current Perception range is an area with a radius of 1,000 meters with you as the center!]

"Previously, the range of Advanced Vibrosensing was only dozens of meters. Now, it has suddenly expanded to a thousand meters. This improvement is too great." Levi was pleasantly surprised.

The effect of this mutation fusion was surprisingly good.

When Advanced Perception advanced to Top Perception, the range might be even larger.

In Levi's opinion, the current Advanced Perception was equivalent to a low-level cultivator's "sense".

With him as the center, Levi could sense every movement of the Gray Tower's apprentices within a thousand-meter radius, except for some isolation spells. Levi could sense the movements of the birds and beasts in the forest.

He closed his eyes, but he could feel the entire world.

Levi could sense that he was omniscient and omnipotent. He even thought that he was God.

Coupled with the Black Snake's Message and Advanced Perception, Levi could not only track and lock onto the enemy, but also predict many attacks from afar, such as the casting movements of wizards, and so on. From there, he could directly dodge them, making his actual combat ability even more abnormal.

"However, the secret medicines that were originally used for the Man-Faced Spider Breathing Technique or the Night Owl Breathing Technique can't be used alone now. I might have to combine these two breathing techniques with secret medicines and develop a new secret medicine alone."

A new question occurred to Levi.

For Levi, who was both a high-level pharmacy apprentice and a grandmaster of breathing techniques, these should not be difficult.

Moreover, even without the secret medicine, it was not difficult to cultivate the breathing technique to level 7.

Apart from the birth of the breathing technique, Levi had also cultivated the humpback dragon breathing technique to level 8 in the past half a year.

Levi—

Hunchback Dragon Breathing Technique: Level 8 (1/100,000). Special Effect: Transcendent Endurance.

With a thought, the Flying Fish Robe on his back bulged up. Levi took off the robe and could feel that there was a slightly bulging back like a camel on his back.

His back was covered in scales.

This was the Hunchback Dragon's hump. It could be used to store a huge amount of food energy, which was much higher than the upper limit of the Blood Whale's sac.

Apart from that, it could also absorb the force that the enemy transmitted to it and store it temporarily before bouncing it back to the enemy.

This effect was highly suitable for battle.

Levi's strength was greatly enhanced.

He went straight to the coast.

He found the Dragon King Whale Leviathan resting on the surface of the sea.

In order to facilitate his harvest, Levi was now supplying the Dragon King Whale with sea beast meat that was as nutritious as high-level apprentice wizards.

Just buying sea beast meat for this guy would cost a lot of gold coins.

After all, Levi was too busy and did not have the time to catch sea beasts for this fellow personally. Therefore, he directly asked Manla to purchase large amounts of sea beasts for him from the Blacksail Wizard Market.

Levi's breathing techniques required Leviathan's blood or ambergris as secret medicines, such as the Black Snake, Red Lotus, and the Hunchback Dragon.

Naturally, Leviathan was treated like a king.

In addition to providing the secret medicine, Leviathan was also Levi's training partner. After all, Leviathan was a first-circle transcendent creature and was very resistant to beatings.

Levi made a perverted request.

Leviathan had no idea what its master was up to.

In its understanding, it could not contradict the man in front of it.

Otherwise, he might have taken that sledgehammer and hit himself in the head... It really hurt.

Therefore, Leviathan refused at first.

Levi said again, "Don't be afraid. I won't blame you. Just come at me."

Leviathan finally made up its mind. It snorted and spewed out a column of water, as if to say, "This is the first time I've heard such a request in my life.."
