

Wizard 337

Chapter 337: Group Advancement! Dragon Spine, Lifting Beams, Burning Blood Ember! (2)

It would be fine if he was a Child of the Elements or other highly talented people. His cultivation speed would not be too slow. For example, Levi's Earth Meditation Art and Sun Meditation Art cultivation speed were not bad.

However, if he was a Child of Chaos, he basically had no chance of becoming an official wizard. His talent was not good to begin with, and he did not take drugs. How could he become an official wizard?

It was just like playing games. He was unlucky to begin with. If he didn't spend money, what was the point of playing?

Levi's Deep Sea Meditation Art was an example. This Meditation Art was clearly the first to be learned, but it was overtaken by the Earth Meditation Art later on. Until now, it had yet to reach level 3.

This made Levi realize how painful it was to not be able to take pills without talent.

If he could refine the Sandman Potion, his wizard cultivation speed would rise to another level in the future.

According to the description of the prescription, the Sandman Potion could increase the meditation efficiency of an apprentice by 50%, and the meditation efficiency of a First-Circle Wizard by 10%. For a Second-Circle Wizard, it could only increase their meditation efficiency by 1%. For middle-level and high-level wizards, it was completely ineffective.

“50%. That’s equivalent to reducing my cultivate experience time by half.” Levi was excited.

He had just broken through to level 3 of the Earth Meditation Art. Without the help of the Meditation Potion, even with Levi’s talent in Earth Pulse, it would take him at least five years to cultivate to the Maximum of level 3 and prepare

If Levi could continue to consume the Meditation Art potion, he would be able to cultivate the Earth Meditation Art to the Maximum of Level 3 in two and a half years and then try to break through to become an official wizard.

This gap was still very obvious.

He wanted to become an official wizard before he turned 40. That way, he would have 160 years to become a Second -Circle Wizard and break through the shackles of a legendary knight to explore a new realm.

Of course, the medicinal materials needed for such a heaven-defying potion were naturally not easy to find.

However, Levi had obtained a lot of rare potion materials in the Shadow Realm some time ago, so he had extracted and collected a portion of them.

The remaining potion materials might be difficult to gather in the Blacksail Wizard Market, so he would expand the range and go to other markets in the other sea areas to search.

In any case, Levi was rich now. The most important thing now was to convert the money into actual combat power.

Levi immediately went to the ingredient shop and gave Manla a list and some hard work fees. He would have to trouble Manla to use his connections to help him collect as many potion ingredients as possible.

As for himself, he also began to cultivate his pharmaceutical skills to level 7.

Holy Brilliance Calendar Year 1023, Month of Vitality.

Miss Messenger sent an email from the human world.

After he opened it, Andrew sent it to him.

In the storage bag were some breathing technique inheritance diagrams.

Unfortunately, the breathing technique inheritance diagram this time did not contain the kind that Levi wanted. For example, the Giant Iron Crocodile Clan's breathing technique.

The last time he wrote a letter, he asked Andrew to help him keep an eye out.

However, Andrew replied that after the rebellion in Montenegro Mountain, the Iron Crocodile Family, which had also followed Montenegro Mountain to rise up, was directly exterminated by the royal family after the rebellion subsided. Their family's breathing technique inheritance diagram was also missing. It might have flowed into the royal family's treasury.

Therefore, Andrew asked Levi if he wanted to infiltrate the royal family's treasure vault. With his identity as a member of the Blood Clan, he should be able to do it. When the time came, all the treasures of the royal family would belong to Levi.

Andrew was really brave. He was even more reckless than he was back then. He actually wanted to rob the King's Treasure Vault!

He thought about it and decided to let Andrew rest for the time being. He did not want to implicate Andrew, a useful agent of the human world, for the Giant Iron Crocodile's breathing technique. It would not be worth it.

Other than that, Andrew also brought some clues about the Van Helsing family, according to Knight Anderson's speculation.

It was very likely that the Van Helsing family's inheritance had fallen into the hands of the Church of Holy Light and was sealed in the Heavenly Mountain.

Heavenly Mountain was an important place for the Church. Many important things were sealed on Heavenly Mountain.

No one knew what level of powerhouse was guarding the Heavenly Mountain, because since ancient times, no one who trespassed the Heavenly Mountain, even a legendary knight, came back alive.

"Once everything involves the Church, it will be a little troublesome. It's not fun to cause trouble at Heavenly Mountain."

Recently, all the major Churches announced that their saints had arrived. Levi thought that he probably did not have the ability to cause trouble at such a special time.

Even if Levi had the strength to flatten the Church, it did not mean anything.

That would instead anger the Heavenly Father of the astral world. Even

Legendary Wizards chose to avoid contact with the seven orthodox gods.

This meant that even with the current strength of the Pan-Plane Wizard Council, they could not guarantee that they could withstand the anger of the orthodox gods.

Levi was not even a First-Circle Wizard. He was just a small fry who had been practicing for two and a half years. It was better not to court death.

"Forget it, let's wait for the right time. Now that the Dark Wave has revived, the human world is experiencing a huge change that hasn't happened in thousands of years. Even the Church might not be

able to sit still and transcend the world like in history. Because of the changes of dynasties in history, the rise and fall of families are basically matters of the mortal world. It's very difficult to have an impact on a giant like the Church. However, the revival of the Dark Wave this time is different. The power of other powerful existences from the Multidimensional Plane is infiltrating the human world and fighting against the gods. Therefore, the various Churches have no choice but to quickly declare that their saints are about to descend to appease the people and deal with the upcoming disaster of the Dark Wave..”
