

Wizard 342

Chapter 342: Legendary Blood Beast, Wings of Black Gas!(2)

In the end, more than 40 portions of the Sandman Potion were produced. After consuming one portion, the effect could last for a week.

It was almost enough for Levi to cultivate for half a year.

After taking the pills, Levi's experience in the four Meditation Arts increased significantly.

The Deep Sea Meditation Art had finally broken through to level 3.

Levi, an apprentice of the Ocean School of Thought, had finally gotten his job.

It had not been easy for him to come all this way.

A few months after the third level of the Ocean Meditation Art.

The Sun Meditation Art and the Night Crow Meditation Art had also stepped into Class 3.

It had to be said that taking drugs was awesome.

Levi looked at the proficiency panel with satisfaction. It was neat and tidy with all the Level 3 Meditation Arts.

This way, it looked much more comfortable.

After level 3 of the Sun Meditation Art, Levi chose his seventh spell.

That was the classic “Small Fireball Technique”.

Although this name sounded a little trashy, like a skill that only cannon fodder characters in online novels would use.

But Levi knew that among the cantrips of the Burning Faction...

The Small Fireball Technique was the best.

This was called the simplicity of the Great Dao, returning to simplicity.

Levi did not intend to learn Burning School of Thought cantrips.

But now that he had Kane’s complete Burning Faction legacy, he felt that he could learn the Small Fireball Technique, which had a complete path to advance.

Small Fireball Technique, Fireball Technique, Big Fireball Technique, Five Fireballs Technique... This set of spells would be Levi's main Burning Faction attack spell. It was said that there was a path of advancement after the Five

Fireballs Technique, until the famous legendary sorcery, Eternal Blazing Sun!

It was said that the creator of this spell, Wizard Edmund, had once used this legendary spell to kill a powerful ruler of the Multidimensional Plane. Hence, he was called "Blazing Sun God Wizard Edmund".

With the Casting materials stored by Kane, Levi did not have to worry about his cultivation experience for the time being.

The path of cultivating the Small Fireball Technique was very smooth.

Coupled with Levi's Dance of the Fire God's Special Effect, half a year later, Levi cultivated this cantrip to the Maximum Level 4.

The power was not bad. With a Small Fireball Technique, the core area of the explosion could actually blow up a few of his Solid State Black Scales... This was too terrifying. It almost broke the defense of Levi's Solid State Black Scale!

Other apprentice cantrips would not be able to break Levi's defense.

The defense of the Solid State Black Scale was comparable to a top-notch first-circle defensive spell.

This way, Levi's offensive spells included the Water Arrow, Withering Ray, and Small Fireball Technique. They were basically enough. The Water Arrow was mainly used to deal with the assessment in the Gray Tower.

In the future, the offensive spells of the Death Faction and the Burning Faction would be Levi's main focus. At that time, with Withering Ray in one hand and Small Fireball Technique in the other, wouldn't that be wonderful?

In terms of spell defense, he had Stone Skin Technique and Tidal Grasp.

Coupled with his miscellaneous Wizard Tool, this cantrip alone was the best among official wizards aside from being a knight.

If Levi had his Wizard Tool, he would be able to protect himself even if an official wizard came. He could escape with the help of the Wizard Tool.

After all, other than the Pot of Equal Value and the broken Flaming Carpet, Levi only had five first-circle Wizard Tools. Many official wizards only had one, and some who had just advanced might not even have one.

With the Ring of the Wind Spirit, the Giant Squid Ring, the Flying Fish Robe, the Green Gloves, and the Fire Snake Bracelet as the system, the Wizard Tool's solidification spells combined defense, control, attack, and escape techniques. They were very comprehensive. In terms of spells, they were also developing in the direction of polygonal wizards.

During this period of time, Levi had also figured out the function of the Fire Snake Bracelet. It was to increase the power of his Burning Faction's spells. Of course, it was only limited to spells below the first circle, but it was still quite good.

With the Fire Snake Bracelet, the power of the Small Fireball Technique truly reached the power it should have. Otherwise, in this sea where the fire element was thin, the power of the Small Fireball Technique was actually only so-so.

Levi stood out among the apprentice wizards, but he was not satisfied with the current situation. Without becoming an official wizard, he was still an ant.

As long as Levi became an official wizard, he would at least be... a bigger ant. Looking at the border of the Gray Tower, becoming an official wizard was already a high-end combat power. With his knight skills, Levi could do whatever he wanted under the second circle.

With the help of the Sandman Potion, this day would not be far away.

Time passed peacefully and Levi cultivated in peace.

In a distant foggy sea.

The Undead Ship floated quietly in the fog.

The ghost fire on the ship flickered with a demonic light. It was sinister, terrifying, and dark. It would always be the main theme here.

The Three-Headed Hell Lizard lay lazily on the deck. Beside it, Demon Harland opened his eyes, and black demonic flames burned fiercely.

In front of the Undead Ship, a sea beast that was more than ten meters long and looked like a giant toad slowly emerged from the surface of the sea like a small island.

This made the Three-Headed Hell Lizard involuntarily open its eyes. As a second-circle transcendent creature, it felt a trace of threat from this huge toad.

This was a transcendent creature as powerful as it..
