

Wizard 347

Chapter 347: Legendary Six-Dimensional State! Blood Awakening Realm! The Beginning of Transcendence! (1)

On the surface of the sea, strong winds blew and huge waves piled up.

A high-level apprentice wizard-level Rock-Scaled Fish was swimming well. Suddenly, a blood-red lightning bolt plunged into the sea. The next moment, a scarlet tentacle wrapped around the Rock-Scaled Fish and arrived in front of Levi.

"This Vampire Touch is really convenient to use. You can prick it wherever you want. You can even use it as your Wizard's Hand."

He had killed many sea beasts with the Vampire Touch. He gave some to Leviathan, some to the Saint Scorpions, and the rest to the Vampire Touch.

His stamina quickly recovered.

"Interesting. With this supernatural organ, I can save a lot of potions."

After Levi's test, the strength and penetrative power of the Vampire Touch should be at the level of a first-circle attack spell. In any case, a high-level apprentice wizard's defensive cantrip would definitely not be able to defend against it. Even an official wizard would definitely be pierced through the heart by the Vampire Touch if they were caught off guard by Levi's approach.

"Sigh, I'm walking further and further down the path of not being a human. It's so difficult to be a human." Levi sighed.

"Right now, I'm already a legendary dual-path Blood Beast and Black Snake. My strength should be above ordinary legendary knights. After all, I only need one supernatural organ to be called a legendary knight, and I have two supernatural organs. I also have the Solid State Black Scale Defense, which is comparable to a Grade A first-circle defensive spell, and has greater mobility than a First-Circle Wizard. I've achieved the ability to fly with my body. I'm stronger than ever.

"However, I still don't have the feeling of breaking through the shackles of legendary, the feeling of real qualitative change in strength, or the confidence to be on par with a Second-Circle Wizard!

Although this dual-path legendary and double supernatural organ had made me stronger, it still couldn't be called breaking through to legendary.

As for how to break through to legendary, it would depend on how the breathing technique developed after breaking through level 11.

"The Black Snake represents the extraordinary Legendary Defense, and the

Blood Beast represents the Legendary Speed that is comparable to the Blood Clan. What I lack now is Red Lotus's Legendary Power, the Hunchback Dragon's Legendary Endurance, the Human-faced Owl's Legendary Perception, and the Undying Bird's [legendary physique].

In addition, the giant, the black whale, and the Ostrich Mountain were all paths of power. When I have time, I'll deduce them all to be legendary.

Under legendary power were differentiations. Red Lotus, giants, Ostrich

Mountain, and the black whale could be stacked. The torso, arms, legs, and the unknown strengthening parts of the black whale were combined into a defense system of legendary power.

Then, he had to collect defensive breathing techniques to break the limit for the Black Snake as soon as possible. As long as he kept breaking the limit, he would definitely be able to break through to legendary. It was just a matter of time.

"Although I'm still in the legendary realm, I'm no longer a legend in the ordinary sense of the word. I should change my name and call it the Legendary Two-Dimensional State."

Levi called his current Two-Dimensional State because he had reached legendary in the two dimensions of strength and speed.

If the Red Lotus Breathing Technique reached the legendary level in the future, it would be the Legendary Three-Dimensional State. In the end, all six attribute dimensions would reach the legendary level and become legendary six-dimensional warriors, which would be the Legendary Six-Dimensional State!

Based on Levi's current understanding of breathing techniques, none of the breathing techniques in the world could escape these six dimensions. However, they might be refined in the same dimension. For example, there might be different focuses under the power dimension. They were essentially the same.

Therefore, theoretically, the Legendary Six-Dimensional State should be the strongest legendary form in the world before breaking through the shackles of legendary. It could be called Complete Legendary, and the previous ones could be considered “incomplete”.

In Levi’s opinion, if he could reach the Legendary Six-Dimensional State, he might be able to fight a Second-Circle Wizard even if he hadn’t broken through the shackles of the legendary realm.

If one counted the spiritual force dimension and divided cultivation into seven dimensions, then apart from the legendary knight’s six dimensions, the most crucial, most important, and most promising aspect was naturally the spiritual force that wizards relied on.

By relying on spiritual force, wizards could construct spells and cast spells, doing all kinds of strange things that knights could not imagine. Therefore, according to the Seven Knights of the Sky of the Church of Holy Light, the most important God’s wisdom was obtained by Sauron, the ancestor of wizards, who created the wizard system.

Levi had learned about the history of wizards and knew that the Church was trying to flatter him. However, from this, it could be seen that spiritual force was undoubtedly the most powerful attribute. It was the cornerstone of human beings that could go against other powerful races.

Although his spiritual force was strong, it did not mean that the other six dimensions were weak.

As long as he stacked the other six dimensions, he could rely on quantity to cause a qualitative change.

He didn’t believe that a Complete Legendary Knight in the Six-Dimensional State couldn’t fight against an ordinary Second -Circle Wizard.

Since there was a proficiency panel, Levi had to reach the top in all seven dimensions. This way, Levi would always be invincible among his peers!

Of course, the Complete Legendary Body was still legendary and had yet to break through the shackles..
