Chapter 348: Legendary Six-Dimensional State! Blood Awakening Realm! The Beginning of Transcendence! (2)

From Levi's point of view, the legendary realm was a realm where mortals could not accurately understand the realm of legendary knights, so they used the vague and inaccurate word "legendary" to describe the realm of knights. As long as a knight's strength reached the peak of the Maximum of mortal knowledge, they would be labeled as "legendary", similar to the "grandmaster" in Wuxia novels.

In fact, it was the same for wizards. For the strongest wizards who had surpassed the ninth circle, they were collectively called "Legendary Wizards".

However, there were definitely different differences between Legendary Wizards. It was just that there were too few Legendary wizards now, so it was impossible to form an effective regional ratio.

Therefore, Levi believed that the three realms of Quasi-Knight, Knight, and Grand Knight could be summarized as one realm, which was "mortal knight". It was similar to the "Houtian realm" in some online novels in his previous life. Only peak-level grand knights could barely touch the threshold of transcendence, but that was all.

The beginning of the legendary knight was the beginning of the true extraordinary path of knighthood. The attributes of a certain dimension exceeded the limits of the mortal world, and it had shocking power, unparalleled speed, the physique of limb regeneration, and so on. It also gave birth to inhuman supernatural organs. Therefore, it was more appropriate to call a legendary knight a "Blood Awakening Knight".

It meant that the blood of an ancient existence was awakening.

Without a doubt, the knights began to become inhumane. They relied on the thin bloodline power in their bodies, using breathing techniques and secret medicines to constantly awaken the supernatural organs in their bodies and sublimate their bodies in order to infinitely approach the end of this path. They constantly evolved towards the existence represented by the inheritance diagram of the breathing technique. Those existences were the Black Snake with a Candle, the Fire Beast Red Lotus, the Frost Giant, and the Blood Beast...

They might be demigods or powerful existences in the Multidimensional Plane. They all had one thing in common. They were not humans.

The path of a knight was a path from “human” to “inhuman”. It was a path to awaken one’s power and bloodline!

The breathing technique was essentially the Evolutionary Technique.

This was the sorrow of the path of knights. Putting aside the spirit, the body of flesh and blood was ultimately weak, and there was a Maximum of Manpower. As a human, Levi had to admit that if he wanted to become an “ultimate creature”, he was destined to not be human.

Therefore, wizards chose to use the Meditation Art to open the door to spiritual force cultivation and open up the path of spiritual awakening. They relied on knowledge and wisdom to obtain extraordinary spells. Moreover, wizards succeeded and walked out of a prosperous path. Grand Wizards were comparable to demigods, and Legendary Wizards had already made the rulers of the Multidimensional Plane and even the gods wary. This was the right path.

However, for some reason, the path of a knight might be due to the bloodline of a knight, or it might be due to other external reasons.

In the end, legendary knights were only comparable to First-Circle Wizards who had just left the novice village.

He sorted out the future path of knighthood and found that there were still many things he could do.

Lu Man was far away in her cultivation, so she could slowly search for it.

He rode the Dragon King Whale and went further into the sea to hunt some sea beasts. Firstly, he wanted to stock up on more food for Leviathan and the Sacred Insects. Secondly, he could also eat.

During the process of hunting sea beasts, Levi realized that there were more sea beasts in the territorial waters around the Gray Tower than usual. Levi had found many high-level sea beasts that were rarely seen. In the Deep Sea, Levi even sensed a first-circle extraordinary sea beast passing by through his

Advanced Perception. He wanted to go to the Deep Sea to catch it, but Leviathan kept urging him to leave. It seemed that Leviathan sensed some kind of danger, and Levi's Spider Sensing seemed to have a faint sense of danger.

"What's going on? Logically speaking, there shouldn't be a first-circle transcendent sea beast in the territorial waters of this Gray Tower."

Sea beasts were usually afraid of wizards and were unwilling to have conflicts with them, especially these first-circle and above supernatural sea beasts. Many of them had extraordinary intelligence, so most supernatural sea beasts at the first circle and above lived in dangerous sea areas that wizards did not step foot in. They rarely came to the territory of wizards.

This made Levi feel that something was amiss. He felt uneasy as if a storm was brewing, and the faint sense of danger from Spider Sensing kept reminding him.

"Forget it, let's go back first."

Levi, who had just broken through to legendary and had not been happy for long, returned to the Gray Tower in a hurry. Just as Levi was about to cultivate to the official wizard realm in one go and come out of seclusion...

He found apprentice wizards gathered on the bulletin board of the White Tower's hall. Some looked solemn, some were nervous, and some were excited, as if something big was about to happen.

Levi also went over to take a look. After reading it, his expression remained the same, but his heart tightened.

"A sea beast tide?"

Levi had some understanding of this in the wizard General Education course. He knew that it would only be born once every 500 years. The last time the sea beast tide appeared, the Gray Tower did not even exist.

Moreover, according to the information he had received before, under normal circumstances, as long as wizard organizations and wizards were prepared, they could tide through the sea beast tide. Therefore, Levi did not pay much attention to it at that time..
