

## **Wizard 349**

Chapter 349: Legendary Six-Dimensional State! Blood Awakening Realm! The Beginning of Transcendence! (3)

Since those first-circle wizard organizations were able to pass through smoothly, it meant that most of the sea beasts were below the first circle. They would not pose any danger to him. Even if a second-circle sea beast appeared, the Tower Master and the others would be there to take care of it.

If that didn't work, Levi would escape with Leviathan when the organization was in danger of being destroyed. If Ms. Marlene and the Tower Master were willing to go with him, he would sneak back to the human world with them. By then, he might even be able to reimburse the ticket to the sub-dimensional portal.

When they arrived in the human world, they would hide for a period of time before returning after the sea beast tide passed.

In short, they fled back to the human world.

From the description of the announcement, this sea beast tide was no small matter.

It was actually the strongest level 3 beast tide in 2,000 years.

"Junior Brother, the sea beast tide is coming soon. Have you stocked up on cultivation resources? In the future, the sea route will be closed, and we won't be able to leave the island at will. For a long time to come, we'll have to guard the Gray Tower and protect the inheritance of the wizard tower." Winnie suddenly appeared beside Levi and asked with a gloomy expression.

He hadn't seen Senior Sister Winnie for a long time. Senior sister seemed to have become prettier and more feminine.

"No... Have you all stocked it up? I'm not ready yet." Levi was speechless. Why did even wizards like to stock up on things when they encountered trouble in the alternate world? He almost thought that he had not transmigrated.

"No, sigh... Who would have thought that this wave of sea beasts would be level 3? I wonder if our Gray Tower can survive it. After all, this is the first time we encountered a sea beast tide since our organization was established." Senior Sister Winnie was very pessimistic.

"With the Tower Master and Ms. Marlene here, I don't think it's a problem. If we can't defend the two second-circle powerhouses in this area, the other wizard organizations won't be able to either," Levi comforted. He was not confident, but he felt that he could protect himself with his own means.

"Junior Brother, there's probably less than a month until the first beast tide. Accompany me to the Blacksail Wizard Market to stock up on something," Winnie said.

"Is there nothing in the White Sail Alley?" Levi asked.

Winnie rolled her eyes at Levi and then said helplessly, "It's all gone."

"Senior sister, why don't you go by yourself... I've been a little busy recently."

Levi thought for a while, touched the back of his head, and said embarrassedly.

"Alright, then I'll go with the other apprentices. Junior brother, remember to store something." Winnie looked at Levi and said in a low voice. Then, she left unhappily.

After the other apprentice wizards had left, Levi used a complete piece of high-level sea beast meat to extract a large bucket of snake blood with the consent of the White Snake Jorman.

The snake blood of a second-circle transcendent creature was a good material to refine the Black Snake Secret Medicine. It could only be chanced upon by luck. Moreover, this snake blood itself contained the Dragon Clan's bloodline. It could also be used as a superior substitute for the Earth Dragon Blood.

Although Levi's Black Snake Breathing Technique had reached its Maximum, he would still draw a little blood every two months to stock up.

In the years he had been in the Gray Tower, he had stored nearly 20 barrels of snake blood, which was the same as wine.

"Thanks, Jorman. I'll get you something nice to eat next," Levi said.

Jorman nodded and watched Levi walk away.

With the physique and huge size of the second-circle white snake, Levi could draw a bucket of blood every two months without affecting it at all.

Most importantly, the white snake had sensed the majesty of many superior beings from Levi, so it had always been obedient.

Levi returned home, opened all the storage bags he had stored, and began to count the things inside.

Ordinary sea beast tides could last at least a few months or a year. Since it's a Level 3 tide, it might last for three to five years.

The logistics transportation in the Endless Sea would definitely be affected in the future. He really had to hoard more things.

"I need to hoard more things than other apprentice wizards, because not only do I need to hoard the things of apprentice wizards, but I also need to hoard the things of knights. I need to prepare both sides."

Levi immediately began to sort out what he needed to stock up on this time.

As for knights, the breathing technique inheritance diagram and the secret medicine ingredients were the most important. There was no need to prepare anything else.

As for wizards, they needed to prepare many things: Casting materials for the spells they had mastered, Casting materials for the seals, materials for the Sandman Potion, materials for the red, blue, and green potions, and even more spell books.

As for the Wizard Tools, Levi had more than enough.

Levi still had about 10,000 Aether Stones.

Among the ingredients listed above, other than the ingredients for the Sandman Potion, the other ingredients were not very expensive. With Levi's financial resources, it was not a problem for him to hoard them for three to five years.

Levi was well-prepared. He rode on Leviathan and set off.

To Levi, even if a sea beast tide came, with Leviathan's help, he should not be completely trapped on the island. However, he was used to being steady. After thinking about it, it was better to stock up.

As for Manla, Levi had already asked him about it. He no longer had any supply channels at hand.

Therefore, Manla had no choice and Levi had to do it himself..
